Televisión

Como lo fueron todas las experiencias anteriores con la luz y las sombras—antorchas, espejos, cámaras oscuras, cámaras fotográficas o cinematográficas—, también la televisión, la más sorprendente invención tecnológica de todos los siglos, es una fuente espontánea de determinaciones originales de las Ideas de Apariencia y Verdad. Esta obra es un primer ensayo de análisis general de las Ideas de Apariencia y Verdad tal como ellas se «abren camino» en la pantalla de televisión. Todo aquel que tiene un trato «no infantil» con la televisión, ya sea como espectador, actor, productor o programador político, y cree poder distinguir críticamente apariencias y verdades en la pantalla, tendrá también su «filosofía de la televisión», implicada e inmersa en su propia experiencia, aunque a menudo poco organizada y mal representada. Gustavo Bueno toma muy en serio esta experiencia de la filosofía mundana, ya que las ideas filosóficas siempre proceden de las experiencias prácticas, políticas o técnicas. Esto no excluye observaciones irónicas en relación con la presencia de ciertos políticos en la televisión, que creen saber (actuando en consecuencia) que su existencia como tales depende de su presencia en la telepantalla, actitud que se puede relacionar con la doctrina de Berkeley del *esse est percipi* (ser es ser percibido)

Televisión : apariencia y verdad

This book provides an up-to-date revision of materialism's central tenets, its main varieties, and the place of materialistic philosophy vis a vis scientific knowledge. Materialism has been the subject of extensive and rich controversies since Robert Boyle introduced the term for the first time in the 17th century. But what is materialism and what can it offer today? The term is usually defined as the worldview according to which everything real is material. Nevertheless, there is no philosophical consensus about whether the meaning of matter can be enlarged beyond the physical. As a consequence, materialism is often defined in stark exclusive and reductionist terms: whatever exists is either physical or ontologically reducible to it. This conception, if consistent, mutilates reality, excluding

the ontological significance of political, economic, sociocultural, anthropological and psychological realities. Starting from a new history of materialism, the present book focuses on the central ontological and epistemological debates aroused by today's leading materialist approaches, including some little known to an anglophone readership. The key concepts of matter, system, emergence, space and time, life, mind, and software are checked over and updated. Controversial issues such as the nature of mathematics and the place of reductionism are also discussed from different materialist approaches. As a result, materialism emerges as a powerful, indispensable scientifically-supported worldview with a surprising wealth of nuances and possibilities.

Contemporary Materialism: Its Ontology and Epistemology

Los informativos en televisión amplían sus contenidos, enfoques y tratamientos y extienden las coberturas a los puntos más recónditos sorprendiéndonos con imágenes inusitadas y deslumbrantes. En la lucha por una audiencia más y más numerosa se olvidan a menudo los derechos que protegen la dignidad humana, la propia imagen y la intimidad. Se trata de una lucha entre dos frentes: por un lado, los intereses económicos, que ven al ciudadano como cliente y la información como una mercancía más, y, por el otro, el poder ideológico-político, que trata de influir en la audiencia para captar votos. Esta obra aborda las estrategias de representación de la actualidad en televisión examinando con gran precisión sus dimensiones ética, estética y temática en toda su complejidad. El autor se ocupa de la concepción de la información en programas como los magazines, los talk shows y en las diversas modalidades informativas, desde los noticiarios hasta los comentarios a fondo o los documentales. En los grandes cambios que se han producido en la información televisiva durante los últimos años destaca no sólo su despliegue global y local bajo los dictados mercantiles e ideológico-políticos, sino también el movimiento que fomenta la globalización de una información solidaria al servicio democrático de la sociedad.

Informativos para la televisión del espectáculo

En los tiempos del cambio de siglo, la digitalización está produciendo importantes cambios de carácter económico y empresarial en un medio al que siempre se ha supuesto una gran capacidad de influencia social y política. El modelo de la televisión digital presenta características completamente novedosas con respecto al anterior y en muchos sentidos los mitos asociados a la vieja televisión empiezan a perder vigencia. Algunos de ellos se refieren al papel de los entes públicos de radiodifusión, a las relaciones de la televisión con otras industrias de la comunicación y el entretenimiento y a la movilización comercial de las audiencias. Esta obra revisa los esquemas tradicionales de financiación de los medios, ofrece una prospección de los futuros mecanismos económicos de la televisión digital (integrada en medida creciente con otros medios) y propone algunas clasificaciones para comprender los nuevos significados de los contenidos tradicionales, los servicios de valor añadido y las relaciones tecnológicas con los usuarios. Finalmente, aporta algunas ideas sobre la medición de las audiencias digitales en un sistema complejo donde los conocimientos y herramientas privados comienzan a disputar el territorio a los viejos procedimientos sindicados.

La información en televisión

Los medios de comunicación siempre han suscitado debates en el ámbito académico y en la opinión pública. En este sentido, la televisión es el medio que mayores inquietudes despierta sobre el papel ejercido en la difusión de la cultura y de sus valores. Quienes conviven o trabajan con adolescentes suelen preguntarse cómo pueden competir con un medio tan seductor, que intenta desprestigiar los valores recibidos a través de la familia, la escuela, las iglesias y las asociaciones socioculturales. Este libro pretende verificar y refutar los alcances de estudios anteriores sobre la televisión y su impacto en los adolescentes. Combinando enfoques y métodos procedentes de la psicología social y de las teorías de la recepción televisiva, Yolanda Montero ha realizado un trabajo con adolescentes a partir del visionado de la conocida serie *Al salir de clase*, convencida de que «el espectador es quien dota de riqueza y profundidad a un material que, a primera vista, puede parecer poco profundo e infructuoso».

Negocios de televisión

La historia de los programas de la televisión en España es un objeto de estudio imponente por razones estrictamente cuantitativas. Tal es así que cualquier acercamiento es más digno de un episodio doble de *Misión Imposible* que de un estudio con ribetes universitarios. Por si fueran poco las decenas de miles de programas emitidos desde el comienzo de la televisión en España en 1956, la oferta es tan

variada y heterogénea que abarca todos los posibles géneros audiovisuales que se nos puedan ocurrir. Hay además otra dificultad añadida para el quehacer histórico sobre la televisión: lo que se ha llamado unas veces "octavo arte" y en otros "caja tonta" parece vivir en un presente continuo que invita a los espectadores a la nostalgia. La televisión crea muchas imágenes que circulan en el espacio público nacional (desde una Masiel en minifalda en Eurovisión hasta un Carlos Arias Navarro gimoteante, desde un ominoso teniente coronel de la Guardia Civil hasta una flecha que en su vuelo olímpico parece dispuesta a llevar a España a una desconocida modernidad), pero muy pocas representaciones capaces de arraigar en el imaginario colectivo de los ciudadanos como parte de un pasado histórico. Este libro examina la evolución histórica de los principales macrogéneros televisivos con el objetivo declarado de interpretar la propia historia de la televisión en España.

Televisión, valores y adolescencia

Este libro es una crítica a las ideas más manejadas por la teoría política contemporánea en su significado más extendido: ideas como sistema, democracia, izquierda, derecha, nación, Imperio, globalización y revolución. La crítica está hecha desde el Sistema filosófico contemporáneo conocido como Materialismo Filosófico.

Historia de la televisión en España

El lector tiene entre sus manos un libro que pretende servir a la vez como homenaje al profesor Gustavo Bueno y como análisis de su obra y del Materialismo Filosófico. Con la estructura de una encuesta, los sesenta participantes en el libro responden a las tres preguntas que se les formulan, aunando un carácter autobiográfico y doctrinal. Gustavo Bueno es uno de los mayores filósofos de nuestro presente, y, por supuesto, no solo en lengua española. Desde su llegada a Oviedo en 1960 ha venido ejerciendo su magisterio intelectual, creando un sistema filosófico propio, el Materialismo Filosófico, y dando lugar a lo que se conoce como Escuela de Filosofía de Oviedo, que ha rebasado los límites de esa ciudad, extendiéndose por el resto de España y la Hispanidad. En 2014 siguen proliferando tal cantidad de mitos oscurantistas e ideas simplistas como en cualquier otro momento histórico anterior (si bien transformadas democráticamente o secularizadas). Por eso es tan necesaria la labor de una racionalidad filosófica materialista. El futuro del Materialismo Filosófico dependerá de sus cultivadores, y a la vista de las visiones que contiene este libro, parece que la filosofía crítica en español está garantizada.

El alma de los brutos en el entorno del padre Feijoo

El Anuario OBITEL 2007 ofrece un estudio sistemático sobre los diferentes ámbitos de la producción y programación de ficción para televisión en el ámbito regional, nacional e internacional en Iberoamérica. El mercado iberoamericano de hoy tiene un peso económico y cultural que, más allá de la lengua, conforma un espacio imaginario común basado en formatos y contenidos nacionales de amplia circulación internacional. Los escenarios de la ficción, sus historias y personajes se relacionan preferentemente con la cultura urbana: en Colombia, la ciudad y el narcotráfico; en México, la presencia en los guiones de la política nacional en la manipulación electoral, o el ajuste de cuentas narrativo con la última dictadura militar en Argentina. En Brasil y Chile, los fragmentos narrativos de las historias y escenarios también están secretamente regulados por la realidad social. La ficción que se puede ver en Latinoamérica, Portugal, España y el mundo hispano de Estados Unidos ofrece un mínimo de mediación entre las historias locales y el ciclo histórico que se está viviendo en ambos lados del Atlántico. Este libro muestra que la ficción iberoamericana no se agota en la mercancía, siendo como es un producto estratégico para la cuenta de resultados de las televisiones, porque las historias y personajes de la ficción que se asoman en las diferentes televisiones nivelan todos los dispositivos narrativos en una misma identidad. Los coordinadores científicos de este volumen son María Immacolata Vasallo de Lopes y Lorenzo Vilches. Coordinadores nacionales: Isabel Ferin (Portugal), Valerio Fuenzalida (Chile), Tomás López-Pumarejo (EE.UU.), Nora Mazziotti (Argentina), Guillermo Orozco (México), Omar Rincón (Colombia), María Immacolata Vasallo de Lopez (Brasil) y Lorenzo Vilches (España).

Re-escritos de la disidencia disidente

En la década de 1990, las series de ficción televisiva de producción española fueron las preferidas del público espectador y experimentaron un auge sin precedentes. Para poder explicar este fenómeno, el presente estudio reconstruye la historia de las series españolas de televisión en su evolución

cronológica desde sus orígenes hasta su hegemonía. El autor analiza las leyes internas de este género televisivo a la luz de sus antecedentes e influencias y de las condiciones materiales de su producción. El examen muestra las características del medio que condicionan las formas expresivas, las textuales de los mensajes, las demográficas de la audiencia, de los procesos de recepción y del ambiente social. Además subraya la eficacia de las mediaciones sociales implícitas en todo discurso televisivo. Mario García de Castro sostiene que, además de la implantación de técnicas de producción norteamericanas, la eficaz conexión con el público de estas series se debe al hecho de que sean herederas del denso caudal de creación que procede de la tradición del realismo popular español.

Gustavo Bueno: 60 visiones sobre su obra

La identidad pública establece una jerarquía de roles sociales privilegiados o subordinados, con marcas identitarias que los medios generan y difunden. Esta interrelación tiende a reproducir las desigualdades estructurales de los individuos y los grupos sociales, que pugnan para hacerse con unas identidades públicas que hagan avanzar sus intereses.

Red digital nº 4. Revista de tecnologías de la información y comunicación educativas. Televisión educativa: reto y utopía

La lógica del entretenimiento es el gusto socialmente legitimado que otorga sentido a las estéticas mediáticas. Una estética que no sólo ofrece la información como espectáculo sino que también crea modos especiales de narrar para cada medio de comunicación. En Narrativas mediáticas, Omar Rincón analiza los modos y las estructuras del relato periodístico, de la publicidad, de la radio, el vídeo y la televisión. También afirma que vivimos en una realidad de signos sin sentido, de significantes vacíos, libremente dispuestos para ser llenados por nuevas significaciones, cuya mejor estrategia para reforzar el pensamiento único es la «narración mediática». ¿Cómo se traduce este cambio de paradigma? ¿Cuál es el mensaje de la publicidad, que ya no vende productos sino que pretende la fidelidad a una marca? ¿Y la radio, con su tradición oral? Sin un discurso apocalíptico sobre los medios de comunicación, Omar Rincón examina una instancia fundamental de la narrativa mediática: la función del relato y la necesidad de contar siempre la misma historia para que el significado, a fuerza de repetición, se imponga y llene los signos vacíos con una cultura que garantice la reproducción infinita del sistema. ÍNDICE Introducción 1. Culturas mediáticas 1. La interpelación mediática / 2. La estética: sentidos colectivos y experiencias subjetivas / 3. Estéticas de la actualidad / 4. Culturas y mercados de la ficción televisiva en Iberoamérica

Este trabajo nace ante, lo que consideramos, la necesaria ejemplificación práctica del programa Cuarto Milenio, como máximo representante en el panorama audiovisual nacional de temática paranormal y, en consecuencia, constructor de valores y de una nueva realidad social. Sus ejes centrales giran en torno a lo paranormal, lo esotérico y la angustia existencial. Entendemos que el éxito de este programa se debe al nicho emocional que el público cubre con su temática. Un vacío motivado por la falta de confianza en los antiguos pilares emocionales de la sociedad. El motivo que ha llevado a esta investigación se centra en la crisis de las instituciones tradicionales y la búsqueda del hombre de satisfacer motivaciones vitales en los mass media, que antaño quedaban garantizadas por Iglesia, Familia y Escuela. Es por esto, que el objetivo central de esta investigación ha sido intentar dar respuesta a las hipótesis planteadas, por medio de un esquema de lectura que extraiga las estrategias comunicativas del programa Cuarto Milenio, para la transmisión de valores afectivos caractereológicos, de la socialización, éticos y trascendentes.

La ficción televisiva popular

Este manual aborda los distintos géneros del periodismo televisivo: noticia, crónica, reportaje, entrevista... desde una perspectiva práctica y con numerosos ejemplos. También analiza la transformación de los informativos de televisión, aportando el contexto para conocer de primera mano cómo se produce un programa informativo y su evolución más reciente. Está dirigido a los estudiantes de periodismo y a quienes deseen conocer los entresijos de la actividad profesional en la información audiovisual. Sus autores cuentan con amplia experiencia periodística en diferentes televisiones.

La pantalla de las identidades

Un análisis riguroso de los medios, sus contextos, mensajes y mediaciones, sus serias influencias en la Educación y en la Sociedad, por un colectivo de profesores que, desde 1988, ha realizado numerosos estudios y actividades sobre Medios y Educación.

Narrativas mediáticas

Con la llegada de las televisiones privadas en 1990 se pone fin al monopolio de Televisión Española y comienza la lucha encarnizada por la audiencia. Al multiplicarse la oferta televisiva también se multiplican el número de programas a emitir y de este modo comienza la búsqueda de formatos nuevos y diferentes, ya sean originales o procedentes de otros países. Las cadenas adquieren un perfil de espectador determinado y los programas se convierten en sellos de identidad. El desarrollo o la explosión del mundo del formato ha sido un fenómeno extraordinario de los últimos años a nivel mundial. Cada vez es mayor el número de canales, lo que provoca que en el momento en que un programa no funciona haya que buscar otro que le sustituya. La competencia feroz hace que los formatos sean "de usar y tirar" y todo el mundo se empeña en encontrar el "killer format" que le resuelva la temporada. Los formatos son la base del éxito, pero muchas veces es difícil distinguir lo esencial de lo secundario, lo que hace que un formato triunfe y sea diferente de otro. En esta obra se pretende hacer una aproximación hacia los principales formatos de entretenimiento desde la aparición de las privadas hasta el año 2001, lo que se podría llamar el "boom del formato".

El papel de los medios en la construcción de valores en la sociedad

El falso documental ha pasado de ser una producción anecdótica a convertirse en una categoría cinematográfica reconocida por el gran público. Aunque su popularidad actual es incuestionable, no se trata de una forma nueva, sino que podemos rastrearla desde el inicio del cinematógrafo. Este libro recopila algunos de los títulos más emblemáticos, buscando a través de su estudio las características y la estructura que lo definen como modelo documental. En sus páginas se mantiene que todo fake puede ser estudiado no solo por los códigos tradicionalmente adscritos a los relatos de realidad que parasita, sino también por el contexto de su producción, su recepción y por la actitud mantenida por el texto. Alguno de los aspectos que mejor definen el falso documental es su falta de vocación de engaño y su insistencia en retratar los medios de comunicación de una manera subversiva.

Manual de periodismo televisivo

Este libro nos sumerge en un mundo en el que niños y adolescentes son los que dirigen la acción. Comenzamos dando un vistazo al contexto que rodea la alfabetización audiovisual infantil para luego adentrarnos en los principios que rigen este particular tipo de enseñanza.

Máscaras y espejismos

El Libro blanco sobre la Televisión Educativa y Cultural es la primera publicación de conjunto sobre este tipo de televisiones que operan en Iberoamérica. Este libro es un balance provisional y parcial del camino recorrido en las últimas décadas por las televisiones de Argentina, Brasil, Chile, Colombia, México, España, Perú, Portugal, Uruguay, Venezuela. Describe el origen, contexto y estado actual de las Televisiones educativas y culturales – TEC- en 10 países Iberoamericanos. El enfoque del Libro es global y da cuenta del estado presente de unas televisiones con vocación de competir en calidad y excelencia para llegar al máximo posible de espectadores en plena transformación tecnológica. El estudio correspondiente a cada país presenta inicialmente una descripción del sistema general audiovisual dando cuenta de su organización, principales actores e impacto en públicos y audiencias, así como una visión general de las tendencias de programación y producción. Este libro es una referencia indispensable para operadores audiovisuales del área educativa y cultural, así como para estudiosos, docentes y destinatarios de estas televisiones en Iberoamérica. Los coordinadores de

este Libro Blanco son catedráticos de larga trayectoria investigadora, docente y profesional en el ámbito de la televisión y la comunicación internacional. Ambos son coordinadores del Observatorio iberoamericano de la televisión educativa y cultural en el seno de la ATEI. José Manuel Pérez Tornero es docente de la Universidad Autónoma de Barcelona y director del Gabinete de Comunicación y Educación. Lorenzo Vilches es docente de la Universidad Autónoma de Barcelona y director del Master de Escritura para cine y televisión.

¿Qué es eso del formato?

"La búsqueda intelectual de lo trascendente es un ensayo clave para entender nuestro tiempo. En un mundo en que prima lo inmanente, este libro tiene el interés de plantear el valor de lo trascendente. Son muchos los que sienten esta necesidad. Lo trascendente no se agota en lo religioso. Hay una dimensión también intelectual tendente hacia lo trascendente. Es una necesidad humana que se relaciona con lo filosófico y lo literario y que plantea la cuestión de hasta qué punto todo esto puede servir para la ordenación de la sociedad y hasta qué punto el mundo trascendente puede ser una realidad en sí misma. Pero por contrapartida también se presentan los riesgos de esta traslación de la realidad trascendente a la ordenación social y en este contexto se explica el origen de los totalitarismos. La dimensión social al final está muy presente en el libro cuando se pone en contraposición lo jurídico o social y lo intelectual. El libro tiene un carácter ameno con numerosas citas que permiten al lector, además, aprovechar el tiempo de la lectura para tomar cultura".

El falso documental

Esta obra recoge un conjunto de ensayos sobre el Mito del Héroe en el Western, elaborados desde las coordenadas teóricas del Materialismo filosófico, para el que los mitos no son saberes irracionales o previos a un pretendido Logos racional. La Mitología tiene su propia lógica, aunque ésta no sea exactamente la del rígido Estructuralismo de Lévi-Strauss y sus discípulos. Así pues el Cine es un Arte (no una ciencia) y el Western, en concreto, despliega un curso esencial mitológico que da cauce a la evolución ideológica del imperio estadounidense en su proyección social y política.

Pequeños directores

Esta obra analiza la radio actual y sus tendencias con un objetivo claramente crítico y amplía la polémica sobre el papel que debe desempeñar, al lado de los otros medios de comunicación, en la sociedad de hoy. La situación actual de la radio está en un profundo proceso de transformación y reconfiguración interna y su conexión con otros medios de comunicación y técnicas, también en plena expansión, permite ver nuevas perspectivas para la gestión de sus contenidos y servicios tanto culturales como comerciales. El planteamiento del análisis es global y sistémico, pero muestra en una serie de casos paradigmáticos toda la complejidad de su escenario y su potencial de nuevas modalidades de ofertas culturales, información, entretenimiento, música y servicios de enseñanza y otras propuestas en constante expansión. Aunque la radio parece algo más lenta en su adaptación a las nuevas tecnologías, esta obra muestra que los sofisticados recursos que ya está incorporando prometen un futuro de amplias posibilidades a este medio, que nunca debe extinguirse por su valor insustituible e insuperable de proporcionar no sólo la información y comunicación más inmediatas y versátiles, sino de ser, sobre todo, el más fiel compañero en cualquier situación.

Libro blanco sobre la educación educativa

Esta investigación de los procesos de recepción de TV pretende obtener un conocimiento útil de ésta, para formar televidentes críticos, autónomos y creativos. El libro está estructurado en dos partes: la primera aborda la recepción, y la segunda discute la educación y la generación de alternativas.

La búsqueda intelectual de lo trascendente

Este libro trata, desde diferentes perspectivas, sobre la dictadura de los medios de comunicación de masas y las alternativas a su poder. En el primer capítulo, El fetichismo de la libertad de expresión y comunicación, se debate la ideología que ampara a los medios: la libertad de expresión elevada a objeto de culto, a fetiche. En los siguientes dos capítulos, La dictadura incontestable: los juegos de manipulación, y La dictadura incontestada: Esquizofrenia y mente disociada, se muestra cómo los medios eluden cualquier posible crítica con estrategias de manipulación y cómo se sustraen al control de los poderes públicos y la ciudadanía, amparados por la atonía social, la indiferencia a sus

atropellos y la aceptación generalizada de su *modus operandi*. Así, su poder es incontestable a la vez que incontestado. En el capítulo 4, El poder de los medios y la sociedad sometida, se busca entender las causas sociales, económicas e ideológicas que expliquen el poder de los medios, y el análisis se extiende a la comprensión de los fundamentos de la sociedad de la información, incorporando al análisis las TIC (Tecnologías de la Información y Comunicación). En el siguiente capítulo, La rebelión contra los medios, se exponen argumentos para concienciar a la opinión pública sobre la necesidad de luchar contra la dictadura de los medios y se proponen directrices para exigir a los poderes públicos las actuaciones necesarias para limitar su poder. En el último capítulo, La transformación de la sociedad de la información, se constata la limitación de las alternativas a los medios, como el ciberperiodismo y las redes sociales, y se apuesta por un nuevo modelo social, alternativa al neoliberalismo, que recupere el papel regulador del Estado en la economía y en el control de los medios de comunicación.

El Western y la Poética

¿Por qué hoy en día se insiste en “educar en valores”? ¿por qué según el artículo 1.1 de la Constitución española nos guían “valores superiores”? ¿qué tiene que ver la valentía de un guerrero con la validez de la lógica o la valoración de un inmueble? ¿qué tienen que ver los valores de una ecuación con los valores espirituales? ¿puede entenderse qué son los valores y cómo se diferencian? ¿son independientes de los bienes y los sujetos? ¿desde qué criterios preguntamos si la valoración pone el valor o el valor determina la valoración? ¿qué fundamenta su orden en jerarquías? ¿es posible la neutralidad axiológica o a todo valor se le opone un contravalor? Más de un siglo de teorías y concepciones de los valores han pretendido responder a estas y otras cuestiones olvidando que ya en el S. XVI español se hablaba del “valor de los valores”, del “valor infinito de Dios”, de “valores intrínsecos” y de “intrínsecos valores”. La pluralidad de disciplinas axiológicas que nacen en la Alemania de finales del S. XIX, donde las tecnologías están cambiando vertiginosamente la vida humana, reaccionan frente a filosofías mecanicistas, economicistas y materialistas desde la teología protestante, la fenomenología, la psicología, el historicismo u otras disciplinas “humanas” que como la jurisprudencia o la pedagogía expanden el campo de la idea de valor y la terminología de los valores.

La radio en la convergencia multimedia

Se trata de un libro que pretende acercar las realidades del siglo XXI, contextualizando los movimientos sociales junto a los cambios tecnológicos y las necesidades de la didáctica. Se pretende dar una visión de cómo sacar partido de la aplicación de las nuevas tecnologías a la educación.

Televisión y audiencias

Este libro interesa a todos aquellos que tratan con sistemas. En primer lugar, a los científicos que estudian los sistemas científicos; en segundo lugar, la idea de sistema también incumbe a los técnicos, tecnólogos e ingenieros que construyen y manejan máquinas e instituciones. Los médicos, por su parte, tampoco se libran de tratar con sistemas: el digestivo, circulatorio, endocrino nervioso, simpático, etc. Afecta también a los políticos, que tienen que moverse dentro de una multitud de sistemas muy heterogéneos (sistemas políticos, electorales, tributarios, sanitarios o de propaganda), y a los profesionales del derecho (jueces, abogados, fiscales, legisladores), que tienen que realizar su labor dentro del sistema jurídico, por no hablar del propio Estado entendido como un sistema. Es un libro adecuado, igualmente, para los militares, ya que el mismo ejército en combate es un sistema en marcha, por no hablar de los diferentes sistemas de armas y de defensa. En el otro extremo, los lingüistas podrán comprobar la pertinencia de estudiar los lenguajes humanos de palabras como sistemas. E interesa también a los filósofos, y aunque pueda resultar paradójico, a los que se dedican a las artes sustantivas (músicos, novelistas, guionistas, cineastas, escultores, arquitectos, pintores) y a sus intérpretes, porque en él se defiende que las obras de arte sustantivo no son sistemas.

La dictadura de los medios de comunicación

José Manuel Rodríguez Pardo, Iván Vélez, Santiago Armesilla e Ismael Carvallo presentan aquí un libro que trata de analizar al partido político que ha cambiado el panorama político español. Este libro lo forman cuatro capítulos, escritos por otros tantos autores pertenecientes, por edad a la generación del recambio (la de 1976, nacidos entre 1969 y 1983), de la que también forman parte Carolina Bescansa, Luis Alegre, Pablo Iglesias, Pablo Echenique e Iñigo Errejón, adalides de Podemos (y Soraya Sáenz de Santamaría, Pedro Sánchez, Susana Díaz, Albert Rivera o Santiago Abascal, por ejemplo). Analiza distintos aspectos del partido político español Podemos, fundado en enero de 2014, que en mayo

de ese año logró 1,2 M de votos y 5 eurodiputados, quince escaños en las elecciones andaluzas de marzo de 2015, 1,8 M de votos en las autonómicas de mayo, y más de cinco millones de votos y 69 diputados nacionales, junto con sus afluentes, el 20 de diciembre de 2015, convirtiéndose en tercera fuerza política de España, tras los 123 diputados del PP y los 90 del PSOE.

REIS - Julio/Septiembre 2002

Se presenta como una panorámica ordenada de los principales aspectos que conforman la educación mediática. Se trata de un conjunto de aprendizajes, que comprende el conocimiento de la gramática audiovisual, la práctica de la producción escolar creativa y, especialmente, la construcción de la capacidad crítica del alumnado en sus relaciones con todos los medios de comunicación. La radio, el cine, la televisión, Internet, las redes sociales, la publicidad, las novísimas pantallas... representan los canales por donde discurre nuestra sociedad de la información. Se pasa revista a estos escenarios para apostar decididamente por que su implantación en nuestras aulas sea una realidad en el más breve plazo, que permita formar una ciudadanía competente, creativa y crítica ante los contenidos mediáticos.

El valor de la Axiología

Este libro es una herramienta práctica orientada a un objetivo: fortalecer la organización de las empresas, conseguir comunicaciones y estrategias más eficaces e imaginar una mejor relación entre sus individuos. Es decir, dar mayor sentido a nuestro trabajo. Reflexionar sobre el cambio organizacional nos enfrentará a muchas preguntas: ¿por qué todo lo vinculado a la organización comunica?, ¿somos conscientes que todos nuestros trabajadores comunican a su manera?, ¿sabemos la diferencia entre informar internamente y comunicar al exterior?, ¿lo aplicamos conscientemente?, ¿sabemos con certeza quiénes somos (identidad) y cómo nos ven (imagen) como marca y organización?, etc. Todo ello nos lleva a plantearnos en este libro qué es la comunicación en 360º y cómo podemos aplicarla en nuestro entorno laboral. Las organizaciones del siglo XXI requieren la valentía de hacerse las preguntas decisivas para fomentar el talento, el emprendimiento, los nuevos liderazgos y la circulación informativa, aumentando la eficacia y dotando de energía regenerativa a las direcciones. Queremos abordar estas preguntas, con esta obra práctica e ilustrada, pues la comunicación es nuestro nuevo campo de certezas para las organizaciones del nuevo siglo.

Nuevas tecnologías y medios de comunicación en la educación

Como Aquiles persiguiendo a la tortuga, el pensamiento siempre se queda atrasado o, en el mejor de los casos, se pasa de frenada. Lo que aquí se trata de apresar es la nueva realidad digital, pero nuestros ojos estudian el presente, como decía McLuhan, mirando por el espejo retrovisor. Este libro pretende corregir la miopía analítica desde el rigor filosófico. En él subyace la idea de que Internet es una tecnología de la comunicación diferente de las tres anteriores: la oralidad, la escritura y la electricidad. Abriendo cada una de ellas en canal se podrán descubrir sus entrañas, a saber: una narratividad particular, una memoria característica y, finalmente, una temporalidad segregada.

La idea de sistema

Breve Enciclopedia que contiene biografías de los principales escritores españoles desde el siglo I hasta el XXI, así como las definiciones y explicaciones de los movimientos y escuelas literarias que han influido en España desde esa lejana fecha. Reseñas de obras clásicas como "El Quijote\

PODEMOS

Este libro cuenta la historia de pensamiento filosófico y científico español e hispanoamericano desarrollado a lo largo del recién pasado siglo XX. Su propósito es ser un companion, una guía o compañero, que introduzca y oriente en esta materia de una manera eficaz, atractiva e interesante. La primera de sus cuatro partes se ocupa de la llamada Edad de Plata de la cultura española, que comienza en los últimos años del siglo XIX y termina con el estallido de la Guerra Civil. La segunda abarca el cuarto de siglo comprendido entre el principio de la Guerra Civil y la década de los sesenta, el periodo que corresponde a la dictadura franquista y en el que resulta obligado contemplar separadamente el pensamiento de la España residente en el territorio nacional y en el exilio. La tercera parte se ocupa del estudio de los últimos cuarenta años del siglo XX, cuyas dos primeras décadas, fueron revolucionarias y rupturitas. La cuarta y última parte contiene una historia sintética del pensamiento

hispanoamericano del siglo XX, escrita por filósofos hispanoamericanos interesados en comprender la historia intelectual de sus respectivos países. Hemos querido de esta forma renovar la memoria y profundizar en el recuerdo de que buena parte de los herederos culturales de la Edad de Plata española fueron exiliados en esos países para devenir ciudadanos suyos.

Mutaciones escénicas

El libro Relato audiovisual y humor revisa en primer lugar diversas teorías sobre los relatos fílmicos y televisivos. A continuación se abordan las estrategias metaficcionales en la pantalla y su función lúdica, la burla macabra al servicio de la comicidad cinematográfica, la génesis de un discurso cómico-fílmico en la España de la posguerra, la influencia del teatro en el humor de Rafael Azcona, el guion de comedia, la representación del humor en dos comedias actuales y las parodias, pastiches y farsas televisivas. En una época dominada por lo mediático, este libro constituye un valioso instrumento para todos los estudiosos del fenómeno audiovisual y de cualquier manifestación cultural y artística de nuestros días.

Solar Energy Conversion Systems

Solar energy conversion requires a different mind-set from traditional energy engineering in order to assess distribution, scales of use, systems design, predictive economic models for fluctuating solar resources, and planning to address transient cycles and social adoption. Solar Energy Conversion Systems examines solar energy conversion as an integrative design process, applying systems thinking methods to a solid knowledge base for creators of solar energy systems. This approach permits different levels of access for the emerging broad audience of scientists, engineers, architects, planners, and economists. Traditional texts in solar energy engineering have often emerged from mechanical or chemical engineering fields. Instead, Solar Energy Conversion Systems approaches solar energy conversion from the perspectives of integrative design, environmental technology, sustainability science, and materials science in the wake of amazing new thin films, polymers, and glasses developed by the optoelectronics and semiconductor industries. This is a new solar text for the new generation of green job designers and developers. It's highlighted with vignettes that break down solar conversion into useful stories and provides common points of reference, as well as techniques, for effective estimation of evolving technologies. Contextualizes solar conversion for systems design and implementation in practical applications Provides a complete understanding of solar power, from underlying science to essential economic outcomes Analytical approach emphasizes systems simulations from measured irradiance and weather data rather than estimations from "rules of thumb" Emphasizes integrative design and solar utility, where trans-disciplinary teams can develop sustainable solar solutions that increase client well-being and ecosystems services for a given locale

Profits and Sustainability

Are profits and sustainability compatible? This book brings unique perspectives to this key debate by exploring the history of green entrepreneurship since the nineteenth century, and its spread globally in industries including renewable energy, organic food, natural beauty, ecotourism, recycling, architecture, and finance. The book uses the lens of the extraordinary and often eccentric men and women who defied convention and imagined that business could help save the planet, rather than consume it. The social and religious beliefs that drove many of these individuals are explored as the book looks at how they overcame huge obstacles to execute their strategies. The green entrepreneurs seen here are shown to have created new markets and industries, and driven innovations in sustainable practices, even at times when most consumers and governments marginalized the entire subject. The struggles of early pioneers appear to have been rewarded by the growth of environmental awareness among consumers, business leaders, and others in recent years, but the Earth's environmental health continues to deteriorate. If profits and sustainability have proved challenging to reconcile, the book argues that one reason was how they were both defined.

Solar and Geothermal Energy

Describes the nature of solar and geothermal energy and the processes by which these sources of energy can be harnessed to supply electricity power markets.

The Shock of the Anthropocene

The Earth has entered a new epoch: the Anthropocene. What we are facing is not only an environmental crisis, but a geological revolution of human origin. In two centuries, our planet has tipped into a state unknown for millions of years. How did we get to this point? Refuting the convenient view of a "human species" that upset the Earth system, unaware of what it was doing, this book proposes the first critical history of the Anthropocene, shaking up many accepted ideas: about our supposedly recent "environmental awareness," about previous challenges to industrialism, about the manufacture of ignorance and consumerism, about so-called energy transitions, as well as about the role of the military in environmental destruction. In a dialogue between science and history, *The Shock of the Anthropocene* dissects a new theoretical buzzword and explores paths for living and acting politically in this rapidly developing geological epoch

Energy, the Modern State, and the American World System

Energy and the modern state -- The political economy of energy -- Urban sprawl in the U.S. and the creation of the Hitler regime -- Urban sprawl, the Great Depression, and the start of World War II -- U.S. economic elites, nuclear power, and solar energy -- Global oil politics -- Plutonium and U.S. foreign policy -- Conclusion: energy and the global order

Solar Energy

As our world's population grows, so to does our need for energy. Scientists seek the next breakthrough in new technology while constantly finding ways to make current solutions cheaper and more efficient. In this title, discover what solar energy is, its history, how we use it today, and how new technologies can contribute to our energy future. Learn about cutting-edge uses for solar cells, including tiny nano-sized cells and cells printed on paper, and exciting new ways to make and use power from the sun's heat. Sidebars, full-color photos, full-spread diagrams, well-placed graphs, charts, and maps, stories highlighting innovations in action, and a glossary enhance this engaging title. Aligned to Common Core Standards and correlated to state standards. Essential Library is an imprint of Abdo Publishing, a division of ABDO.

Varieties of Green Business

This book provides rich new empirical evidence on green business as it examines its variation between industries and nations, and over time. It demonstrates the deep historical origins of endeavors to create for-profit businesses that were more responsible and sustainable, but also how these strategies have faced constraints, trade-offs and challenges of legitimacy. Based on extensive interviews and archives from around the world, the book asks why green business succeeds more in some contexts than others, and draws lessons from failure as well as success.

A House in the Sun

"'A House in the Sun' describes a number of solar house experiments in the 1940s and 1950s. The houses relied on the materials and ideas of modern architecture for both energy efficiency and claims to cultural relevance, and also developed out of a growing concern over global resource limits"--Provided by publisher.

Alternative Envelope Components for Energy-Efficient Buildings

This book examines ways of saving energy by using green roofs and facades, solar devices such as building-integrated photovoltaics (BIPV), and thermal solar panels, as components of energy-efficient building envelopes. The author takes an interdisciplinary / multidisciplinary approach to the subject that analyzes several different scientific fields connected to building research—sustainability, sustainable architecture, energy efficiency in buildings, and building envelopes—while approaching other collateral domains, including history, archaeology, botanics, physics, engineering, and landscape architecture. *Alternative Envelope Components for Energy-Efficient Buildings* will be a welcome resource for researchers, students, and postgraduates in the fields of energy, building materials, and renewable energy, as well as architects, engineers, and specialists in industries related to building products. Looks at the impact of building envelopes on energy usage; Offers readers an introduction to the principles of sustainability; Presents passive and active approaches to using solar devices.

Solar Energy Conversion in Communities

This book presents novel findings concerning the systems, materials and processes used in solar energy conversion in communities. It begins with the core resource – solar radiation – and discusses the restrictions on the wide-scale implementation of conversion systems imposed by the built environment, as well as potential solutions. The book also describes efficient solar energy conversion in detail, focusing on heat and electricity production in communities and water reuse. Lastly, it analyzes the concept of sustainable communities, presenting examples from around the globe, along with novel approaches to improving their feasibility and affordability. Though chiefly intended for professionals working in the field of sustainability at the community level, the book will also be of interest to researchers, academics and doctoral students.

Global Energy Shifts

A timely look at key transitions in energy use over the past 100 years.

MTD Solar heating

With the cost of heating oil and electricity fluctuating wildly, consumers are clamoring for information on alternative energy. This source book covers all the relevant technologies, including solar space and water heating as well as photovoltaic electricity.

Convert Your Home to Solar Energy

A biographical and bibliographical guide to current writers in all fields including poetry, fiction and nonfiction, journalism, drama, television and movies. Information is provided by the authors themselves or drawn from published interviews, feature stories, book reviews and other materials provided by the authors/publishers.

Contemporary Authors

Shortlisted for the 2022 ESSE Book Awards How has humanity sought to harness the power of the Sun, and what roles have literature, art and other cultural forms played in imagining, mythologizing and reflecting the possibilities of solar energy? What stories have been told about solar technologies, and how have these narratives shaped developments in science and culture? What can solar power's history tell us about its future, within a world adapting to climate crisis? Identifying the history of capturing solar radiance as a focal point between science and the imagination, *Imagining Solar Energy* argues that the literary, artistic and mythical resonances of solar power – from the Renaissance to the present day – have not only been inspired by, but have also cultivated and sustained its scientific and technological development. Ranging from Archimedes to Isaac Asimov, John Dee to Humphry Davy, Aphra Behn to J. G. Ballard, the book argues that solar energy translates into many different kinds of power (physical, political, intellectual and cultural), and establishes for the first time the importance of solar energy to many literary and scientific endeavours.

Imagining Solar Energy

Many people believe that the world's oil supply is finite and that alternative sources of fuel must be pursued. The contributors in this volume consider the issue of alternative energy in the following chapters: Are Alternative Energy Sources Necessary? Are Alternative Energy Sources Viable? Should Alternatives to Gasoline-Powered Vehicles Be Pursued?

Energy Alternatives

The topic of our natural resources has become an important issue over the last few years. The abundance of some (and scarcity of others) has sparked many a debate. The four volumes in this set discuss not only the aspects of the resources themselves, but their economic and social impact as well. Plus, complimentary online access is provided through Salem Science.

Encyclopedia of Global Resources

The book—companion to a PBS series—that proves humans are causing global warming and offers a path to the future. Since the discovery of fire, humans have been energy users and always will be. And this is a good thing—our mastery of energy is what separates us from the rest of the animal kingdom and has allowed us to be the dominant species on the planet. However, this mastery comes with a price: we are changing our environment in a profoundly negative way by heating it up. Using one engaging story after another, coupled with accessible scientific facts, world authority Richard B. Alley explores the fascinating history of energy use by humans over the centuries, gives a doubt-destroying proof that already-high levels of carbon dioxide are causing damaging global warming, and surveys the alternative energy options that are available to exploit right now. These new energy sources might well be the engines for economic growth in the twenty-first century.

Earth: The Operators' Manual

This multivolume resource is an excellent research tool for developing a working knowledge of basic energy concepts and topics. With energy issues so much in the news, it is important that students get a clear understanding of how energy is produced and how it affects virtually every aspect of our lives. The multivolume set *A Student Guide to Energy* does just that, with an accessible introduction to the basic concepts and key topics concerning nonrenewable energy sources, future renewable energy programs, and the importance of achieving a sustainable energy program for future generations. *A Student Guide to Energy* is divided into five separate volumes. Volume 1 highlights our present dependence on nonrenewable energy sources—oil, gas, coal, and nuclear power. Volumes 2, 3, and 4 look at the renewable energy sources that will play a vital role in our future, including solar energy, hydrogen fuel cells, wind and water power, and geothermal energy. The concluding volume focuses on efforts to develop a global sustainable energy system that encompasses energy efficiency, conservation, and a healthy, cleaner environment.

A Student Guide to Energy [5 volumes]

Our relentless drive to create makes us unique among living creatures. What is special about the human brain that enables us to innovate? Why don't cows choreograph dances? Why don't squirrels

build elevators to their treetops? Why don't alligators invent speedboats? Weaving together the arts and sciences, neuroscientist David Eagleman and composer Anthony Brandt explore the need for novelty, the simulation of possible futures, and the social components that drive the inventiveness of our species. Taking us on a tour of human creativity from Picasso to concept cars to umbrellas to lunar travel, Brandt and Eagleman explore the cognitive software that generates new ideas, and illuminate the key facets of a creative mentality. Through understanding our ability to innovate - our most profound, mysterious, and deeply human capacity - we can meet the challenge of remaking our constantly shifting world.

The Runaway Species

Two Groundbreaking Scientists and Their Conflicting Visions of the Future of Our Planet 'Does the earth's finite carrying capacity mean economic growth has to stop? That momentous question is the subject of Charles Mann's brilliant book.' Wall Street Journal In forty years, the population of the Earth will reach ten billion. Can our world support so many people? What kind of world will it be? In this unique, original and important book, Charles C. Mann illuminates the four great challenges we face – food, water, energy, climate change – through an exploration of the crucial work and wide-ranging influence of two little-known twentieth-century scientists, Norman Borlaug and William Vogt. Vogt (the Prophet) was the intellectual forefather of the environmental movement, and believed that in our using more than the planet has to give, our prosperity will bring us to ruin. Borlaug's research in the 1950s led to the development of modern high-yield crops that have saved millions from starvation. The Wizard of Mann's title, he believed that science will continue to rise to the challenges we face. Mann tells the stories of these scientists and their crucial influence on today's debates as his story ranges from Mexico to India, across continents and oceans and from the past and the present to the future. Brilliantly original in concept, wryly observant and deeply researched, The Wizard and the Prophet is essential reading for readers of Yuval Noah Harari's Sapiens or Jared Diamond's Guns, Germs and Steel, for anyone interested in how we got here and in the future of our species.

Public Library Catalog

Erneuerbare Energien wie Fotovoltaik und Windkraft sind den meisten Bürgern ein Begriff. Doch die Chancen, die diese und viele weitere, bisher kaum bekannte Techniken bieten, werden noch nicht gesehen: die Energieautarkie des privaten Haushalts, die eigene Unabhängigkeit von den Strom- und Gas-Versorgern. Nur eine eigene, unabhängige Energieversorgung schützt uns Bürger vor den kommenden Kosten-Tsunamis. Denn die fossilen Energien werden weltweit immer knapper, die Kernenergie bietet schon wegen der geringen Uranressourcen keinen Ausweg und die neuen Offshore-Windparks zementieren nur alte Abhängigkeiten. Deshalb brauchen wir frische, unkonventionelle Ideen und Lösungen. Künftig werden wir gemütlich und versorgungssicher in unseren eigenen Kraftwerken wohnen. Und wir werden zusätzlich die Energie für unsere Elektro-Autos vom eigenen Dach beziehen. Wie das geht, zeigt diese Buch anhand vieler Beispiele und innovativer Ideen.

The Writers Directory

Traducere de Carmen Strungaru Împietind artele i tiin ele, specialistul în neuro tiin e David Eagleman i compozitorul Anthony Brandt exploreaz nevoia de noutate, simularea viitorurilor posibile i componen-tele sociale care anim inventivitatea speciei noastre. Antrenându-ne într-un tur al creativității umane, de la Picasso la ma inile-concept i c l toriile pe Lun , Brandt i Eagleman examineaz software-ul cognitiv care genereaz noi idei i arunc o lumin asupra aspectelor esen iale ale mentalității creative. Atunci când în elegem capacitatea noastră de a inova, putem face fa provocării de a remodela lumea în care tr im, i care e în permanent schimbare. Cei doi autori explic puterea speciei umane de a prefigura i construi viitorul, c utând sursele creativității, tr s turile comune ale actelor creative i modalit ile prin care le-am putea folosi pentru a ne îmbun t i via a cotidian , sistemul colar i institu iile. „Într-un mod antrenant i uimitor de accesibil... cu nenum rate exemple i informa ii amuzante... aceast carte proasp t i incitant surprinde deopotriv miracolul tiin ei i frumuse ea spiritului uman.“ — Booklist „Suntem membrii unui vast arbore filogenetic de specii animale. Dar de ce nu fac vacile coregrafie? De ce nu proiecteaz veveri ele lifturi pentru vârful copacilor? De ce nu inventeaz aligatorii ambarca iuni rapide? O ajustare evolu ionist a algoritmilor care ruleaz în creierul uman ne-a permis s absorbim lumea i s cre m o versiune ce-ar fi dac a acesteia. Aceast carte este despre acel software creativ: cum func ioneaz , de ce îl avem, ce facem cu el i unde ne poart . Vom ar ta cum dorin a de a ne înc lca propriile a tept ri duce la inventivitatea n valnic a speciei noastre. Uitându-ne la tapiseria artelor, tiin ei i tehnologiei, putem vedea urzeala inova iilor care leag între ele disciplinele.“ — DAVID EAGLEMAN, ANTHONY BRANDT

Choice

Die direkte Sonnenenergienutzung hat seit den 1970er-Jahren einen beachtlichen technischen Fortschritt und große Zukunftshoffnungen hervorgebracht. Doch trotz des hohen Mobilisierungspotenzials in Wissenschaft, Politik und Wirtschaft und der daraus resultierenden großzügigen Förderung blieb die Photovoltaik bis Mitte des letzten Jahrzehnts eine Zukunftstechnologie ohne Marktchancen. Timur Ergen zeigt, dass diese Entwicklung auf Probleme sektoraler Ordnung zurückzuführen ist: In Industrie und Politik kam es wiederkehrend zu Umsetzungsproblemen und Konflikten, die verhinderten, dass die Solartechnik effektiv weiterentwickelt und kontinuierlich unterstützt wurde.

The Wizard and the Prophet

An original investigation into the social and technological history of solar power. From the days of Archimedes and Leonardo, the earliest efforts to harness the power of the sun have become the stuff of legend. But it was not until the industrial revolution, with its great demands for fuel, that inventors --like Prometheus carrying fire from Mt. Olympus--began to build machines capable of channeling the sun's rays into usable energy. In *The Power of Light*, solar energy expert Frank Kryza recounts the dramatic saga of solar invention, from its optimistic dawning in the mid-19th century to its impending triumph today. With a fervent passion for his subject, the author introduces solar pioneers such as Auguste Mouchot, whose solar-powered steam engine amazed Napoleon III, and Frank Shuman, whose solar pumping station, in 1911, became the largest and most cost-effective machine prior to the space age. While presenting a thorough and original investigation into this little-known chapter of science history, *The Power of Light* offers a sober meditation on the revolutionary impact technology often has on society.

Wege zur Energie-Autarkie

[illegible]

Specia rebela

Augustin Mouchot a inventé l'énergie solaire moderne. Sorti de la pénombre d'un lycée de la France périphérique, ce professeur du secondaire grimpe en une dizaine d'années, à partir de 1869, au sommet de la courbe en cloche de la célébrité. Expérimentateur de talent, démonstrateur adoubé par l'Académie des Sciences, il influence les premiers convaincus de l'importance énergétique du Soleil pour les sociétés modernes. Puis il bascule dans une interminable glissade de dénis et d'oubli, trente années jusqu'à la tombe, plus d'un siècle et demi jusqu'à nous. Indépendamment des adversaires qu'il va se découvrir, indépendamment des erreurs qu'il va commettre, le parcours que suit la renommée d'Augustin Mouchot est indissociable de la cause à laquelle il a voué son existence : l'énergie solaire. Et plus largement, pour nous, de celle des énergies renouvelables et de la sortie des énergies fossiles. Ce livre est sa première biographie. Il est aussi la première tentative, en France, de compréhension et de réhabilitation de cet innovateur mondial dans le domaine des applications pratiques de la force du soleil. Son travail a aujourd'hui 160 ans.

Große Hoffnungen und brüchige Koalitionen

An original investigation into the social and technological history of solar power From the days of Archimedes and Leonardo, the earliest efforts to harness the power of the sun have become the stuff of legend. But it was not until the industrial revolution, with its great demands for fuel, that inventors --like Prometheus carrying fire from Mt. Olympus--began to build machines capable of channeling the sun's rays into usable energy. In *The Power of Light*, solar energy expert Frank Kryza recounts the dramatic saga of solar invention, from its optimistic dawning in the mid-19th century to its impending triumph today. With a fervent passion for his subject, the author introduces solar pioneers such as Auguste Mouchot, whose solar-powered steam engine amazed Napoleon III, and Frank Shuman, whose solar pumping station, in 1911, became the largest and most cost-effective machine prior to the space age. While presenting a thorough and original investigation into this little-known chapter of science history, *The Power of Light* offers a sober meditation on the revolutionary impact technology often has on society.

The Power of Light

"The Uprooted: The Epic Story of the Great Migrations That Made the American People, which won the 1952 Pulitzer for history, was aimed at an audience of general readers in making his case that immigration — more than the frontier experience, or any other episode in its past — was the continuing, defining event of American history. Dispensing with footnotes and writing in a lyrical style, Dr. Handlin emphasized the common threads in the experiences of the 30 million immigrants who poured into American cities between 1820 and the turn of the century. Regardless of nationality, religion, race or ethnicity, he wrote, the common experience was wrenching hardship, alienation and a gradual Americanization that changed America as much as it changed the newcomers. The book used a form of historical scholarship considered unorthodox at the time, employing newspaper accounts, personal letters and diaries as well as archives." — Paul Vitello, *The New York Times* "[Oscar Handlin] has charged his pages with poetry and feeling... The Uprooted is history with a difference — the difference being its concern with men's hearts and souls no less than an event." — Milton Rugoff, *The New York Times* "Seldom in our historical literature have we been offered such detailed, realistic pictures of what it meant to come to the New World. The crossing itself, the struggle to make a living in the New World, the problems of housing, social fellowship, religion, adjustment to democracy — a chapter is devoted to each of these. The social and political pressures, the friction and misunderstanding between generations, the awful realization that the adjustment was too great — this reviewer knows of no book that captures these moods and situations with such sympathy and understanding... This is not, in either style or format, conventional or scholarly history... The style is not pedantic or heavy. The author is imaginative, sensitive, understanding. A tremendous amount of research and real depth of understanding lies behind the book." — Ralph Adams Brown, *The Annals of the American Academy of Political and Social Science* "[S]trong stuff, handled in a masterly and quite moving way." — *The New Yorker* "This is a book of fundamental importance. For the first time it attempts to get at the inner meaning of an experience crucial in the development of the United States. It makes the attempt with a back- ground of imaginative research, a perceptiveness, and a literary skill rare in the modern writing of history... no one should attempt serious work in modern American history without fully reckoning with *The Uprooted*." — Eric F. Goldman, *The Journal of Southern History* "Dr. Handlin's *The Uprooted* deserves every bit of the praise and honors that have been heaped upon it. Dealing with an important area of American history without deviating from scholarly standards, the author succeeded in penetrating the façade of historical data to reach the drama of the historical process. The book is not only beautifully written and alive with human interest, but also highly pertinent to current social and political events in the United States... [Dr. Handlin] has handled his material magnificently, and every immigrant and descendant of an immigrant — that is, every American — ought to read this book in order the better to understand himself and his ancestors." — Solomon Grayzel, *Publications of the American Jewish Historical Society* "[T]he best historical interpretation of the inner meaning of migration." — John Higham, *Pacific Historical Review* "Dr. Handlin has discharged his responsibility admirably. An able scholar of immigration history, Dr. Handlin, in the present work... reveals a mastery of historical data and rare insight and understanding of the manifold problems of the immigrant. The book is beautifully written, and many passages are truly moving... Americans would understand their country better if they would read this book and benefit from the humane spirit in which it is written." — Carl Wittke, *The New England Quarterly*

ë+ Hå

This book is about Christianity, Islam, Judaism, and how the Arabs and Europeans took these Afrikan Religious Belief Systems from ancient Egypt, North Afrika and used them during The Trans-Sahara Afrikan Slave Trade by the Arabs in the name of Allah, and followed by The Transatlantic Afrikan Slave Trade by the Europeans in the name of Jesus, to enslave the bodies, minds, and souls of the Afrikan Race. This book is about the "Jesus' Deception" that has been passed on down through history by European historians, that is still being taught around the world today. This book takes a provocative intellectual, scholastic, historical, cultural, and sociological look at the Bible. This book identifies the names of the translators of the King James Bible of 1611 A. D., and when the chapters and verses in the Bible were created and who created them. The purpose of this book is to expose the historical, cultural, sociological, religious and theological lies of the Europeans and the Arabs. This book reveals the truth of the origination of The Bible, as "There Is No Religion Higher Than The Truth". Join me in an intellectual odyssey through time. Here, I feel like a Lone Warrior standing before a mighty army. Come with me on this perilous pilgrimage as we travel through a parallel universe. I dedicate this book to my mother and father who gave me life. To the rest of my Native Afrikan family for supporting me and encouraging me on this publishing venture. To the Heavenly Father, without whom none of this

would be possible. There are others I would also like to thank for being a part of helping me through this journey called Life, such as my professors at the Alabama State University where many a great scholars paths I have crossed. To my American family and friends in Mobile, Alabama who nurtured and taught me from childhood to adulthood. The many friends and colleagues I met in my travels all across America in my intellectual journey, and last but certainly not least, to my publisher for granting me the opportunity to speak to many all around the world in this forum. I am eternally indebted to you all-Thank you.

L'Invention de l'énergie solaire

Everyone has heard of the Minotaur in the labyrinth on Crete and many know that the Greek gods would adopt the guise of a bull to seduce mortal women. But what lies behind these legends? The Power of the Bull discusses mankind's enduring obsession with bulls. The bull is an almost universal symbol throughout Indo-European cultures. Bull cults proliferated in the Middle East and in many parts of North Africa, and one cult, Mithraism, was the greatest rival to Christianity in the Roman Empire. The Cults are divergent yet have certain core elements in common. Michael Rice argues that the ancient bulls were the supreme sacrificial animal. An examination of evidence from earliest prehistory onwards reveals the bull to be a symbol of political authority, sexual potency, economic wealth and vast subterranean powers. In some areas representations of the bull have varied little from earliest times, in others it has changed vastly over centuries. This volume provides a well-illustrated and accessible analysis of the exceptionally rich artistic inheritance associated with the bull.

The Power of Light

Ironical commentary on miscellaneous topics from the author's perspective as an English immigrant to the U.S. These commentaries were originally broadcast on National Public Radio stations WSHU & WSUF in Long Island, New York, and Connecticut.

The Publishers Weekly

The Prize recounts the panoramic history of oil -- and the struggle for wealth power that has always surrounded oil. This struggle has shaken the world economy, dictated the outcome of wars, and transformed the destiny of men and nations. The Prize is as much a history of the twentieth century as of the oil industry itself. The canvas of this history is enormous -- from the drilling of the first well in Pennsylvania through two great world wars to the Iraqi invasion of Kuwait and Operation Desert Storm. The cast extends from wildcatters and rogues to oil tycoons, and from Winston Churchill and Ibn Saud to George Bush and Saddam Hussein. The definitive work on the subject of oil and a major contribution to understanding our century, The Prize is a book of extraordinary breadth, riveting excitement -- and great importance.

The Uprooted: The Epic Story of the Great Migrations That Made the American People

The Epic of Gilgamesh is an epic poem from ancient Mesopotamia. It tells the story Gilgamesh, king of Uruk, and Enkidu, a wild man created by the gods to stop him oppressing the people of Uruk.
