Electrochemistry

This textbook offers original and new approaches to the teaching of electrochemical concepts, principles and applications. Throughout the text the authors provide a balanced coverage of the thermodynamic and kinetic processes at the heart of electrochemical systems. The first half of the book outlines fundamental concepts appropriate to undergraduate students and the second half gives an in-depth account of electrochemical systems suitable for experienced scientists and course lecturers. Concepts are clearly explained and mathematical treatments are kept to a minimum or reported in appendices. This book features: - Questions and answers for self-assessment - Basic and advanced level numerical descriptions - Illustrated electrochemistry applications This book is accessible to both novice and experienced electrochemists and supports a deep understanding of the fundamental principles and laws of electrochemistry.

Chemical Engineering Design, Second Edition, deals with the application of chemical engineering principles to the design of chemical processes and equipment. Revised throughout, this edition has been specifically developed for the U.S. market. It provides the latest US codes and standards, including API, ASME and ISA design codes and ANSI standards. It contains new discussions of conceptual plant design, flowsheet development, and revamp design; extended coverage of capital cost estimation, process costing, and economics; and new chapters on equipment selection, reactor design, and solids handling processes. A rigorous pedagogy assists learning, with detailed worked examples, end of chapter exercises, plus supporting data, and Excel spreadsheet calculations, plus over 150 Patent References for downloading from the companion website. Extensive instructor resources, including 1170 lecture slides and a fully worked solutions manual are available to adopting instructors. This text is designed for chemical and biochemical engineering students (senior undergraduate year, plus appropriate for capstone design courses where taken, plus graduates) and lecturers/tutors, and professionals in industry (chemical process, biochemical, pharmaceutical, petrochemical sectors). New to this edition: Revised organization into Part I: Process Design, and Part II: Plant Design. The broad themes of Part I are flowsheet development, economic analysis, safety and environmental impact and optimization. Part II contains chapters on equipment design and selection that can be used as supplements to a lecture course or as essential references for students or practicing engineers working on design projects. New discussion of conceptual plant design, flowsheet development and revamp design Significantly increased coverage of capital cost estimation, process costing and economics New chapters on equipment selection, reactor design and solids handling processes New sections on fermentation, adsorption, membrane separations, ion exchange and chromatography Increased coverage of batch processing, food, pharmaceutical and biological processes All equipment chapters in Part II revised and updated with current information Updated throughout for latest US codes and standards, including API, ASME and ISA design codes and ANSI standards Additional worked examples and homework problems The most complete and up to date coverage of equipment selection 108 realistic commercial design projects from diverse industries A rigorous pedagogy assists learning, with detailed worked examples, end of chapter exercises, plus supporting data and Excel spreadsheet calculations plus over 150 Patent References, for downloading from the companion website Extensive instructor resources: 1170 lecture slides plus fully worked solutions manual available to adopting instructors

Teaching and Learning in the School Chemistry Laboratory

Mathematical Methods for Physical and Analytical Chemistry presents mathematical and statistical methods to students of chemistry at the intermediate, post-calculus level. The content includes a review of general calculus; a review of numerical techniques often omitted from calculus courses, such as cubic splines and Newton's method; a detailed treatment of statistical methods for experimental data analysis; complex numbers; extrapolation; linear algebra; and differential equations. With numerous example problems and helpful anecdotes, this text gives chemistry students the mathematical knowledge they need to understand the analytical and physical chemistry professional literature.

Basic Laboratory Methods for Biotechnology, Third Edition is a versatile textbook that provides students with a solid foundation to pursue employment in the biotech industry and can later serve as a practical reference to ensure success at each stage in their career. The authors focus on basic principles and methods while skillfully including recent innovations and industry trends throughout. Fundamental laboratory skills are emphasized, and boxed content provides step by step laboratory method instructions for ease of reference at any point in the students' progress. Worked through examples and practice problems and solutions assist student comprehension. Coverage includes safety practices and instructions on using common laboratory instruments. Key Features: Provides a valuable reference for laboratory professionals at all stages of their careers. Focuses on basic principles and methods to provide students with the knowledge needed to begin a career in the Biotechnology industry. Describes fundamental laboratory skills. Includes laboratory scenario-based questions that require students to write or discuss their answers to ensure they have mastered the chapter content. Updates reflect recent innovations and regulatory requirements to ensure students stay up to date. Tables, a detailed glossary, practice problems and solutions, case studies and anecdotes provide students with the tools needed to master the content.

Problems in Organic Chemistry

[This book] is a supplement to the texts, not a replacement. It is intended to maximize your success in this course, by showing you how to become involved in developing your own techniques for grasping the concepts of chemistry. Using a study outline, problem sets, problem examples, worked and unworked, and numerous self tests, with answers, this manual will provide you with opportunities to sharpen your skills and evaluate your comprehension of the material in [the texts]. The worked-out solutions at the end of this manual walk you, step-by-step, through the methods of arriving at the answer to those same problems which have an answer only in the answer key ... Used in conjunction with your textbook and classroom lecture notes, this [book] offers an essential learning opportunity to the chemistry student.-Back cover.

A valuable review for a wide range of laboratory professionals, this book prepares candidates for certification examinations by presenting them with the latest technology and terminology, as well as current test taking formats. Its large number of practice questions, variety of practice modes, and

explanations for clarification prepare learner for success on examinations. Comprehensive coverage of laboratory medicine includes clinical chemistry, hematology, hemostasis, immunology, immunohematology, microbiology, urinalysis and body fluids, molecular diagnostics, laboratory calculations, general laboratory principles and safety, laboratory management, education, and computers and laboratory informatics.

Mathematical Methods for Physical and Analytical Chemistry

This clearly written, easy-to-read book offers a practical introduction to the topics of water supply, waste management, and pollution control. Because of the wide scope of the subject matter, the author has included review sections so that readers with little knowledge of biology, chemistry, geology, or hydraulics can comprehend and use this book, and mathematical topics are introduced at a relatively basic level. An overview of environmental technology introduces the book, and includes a discussion of public health, ecology, geology, and soils. The book then focuses on water and wastewater topics, including hydraulics and hydrology, water quality and water pollution, drinking water treatment and distribution, sewage collection, sewage treatment and disposal, and stormwater water management. Municipal solid waste, hazardous waste, air pollution, and noise pollution are also discussed. For individuals working in the fields of environmental quality control and public health protection, as well as civil engineers, wastewater technicians, and water treatment professionals.

Basic Laboratory Methods for Biotechnology

When *Biology: A Search for Order in Complexity* was originally released in the early 1970s, it was the first text of its kind to challenge the long-standing assumption that a study of biology must be predicated upon the atheistic philosophy of Darwinian evolution. Now, over three decades later, as the so-called theory of evolution faces a deepening crisis, Christian Liberty Press is pleased to present a newly updated and improved version of the textbook that first challenged the modern scientific community with the validity of biblical creationism. *Biology: A Search for Order in Complexity, Second Edition*, is the culmination of over two years of diligent study and labor by a team of educators and scientists who are committed to giving students a greater understanding of and appreciation for the handiwork of Almighty God. Every effort has been made to ensure that this biology text is scientifically accurate and relevant to the needs of students in the twenty-first century. With gratefulness to the Creator of the whole earth, we humbly present this new edition to the public in the hope that it will be a powerful influence in the lives of those who are seeking true science and an understanding of life.

NOTE: This edition features the same content as the traditional text in a convenient, three-hole-punched, loose-leaf version. Books a la Carte also offer a great value; this format costs significantly less than a new textbook. Before purchasing, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of MyLab[™] and Mastering[™] platforms exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a Course ID, provided by your instructor, to register for and use MyLab and Mastering products. For courses in two-semester general chemistry. Accurate, data-driven authorship with expanded interactivity leads to greater student engagement. Unrivaled problem sets, notable scientific accuracy and currency, and remarkable clarity have made *Chemistry: The Central Science* the leading general chemistry text for more than a decade. Trusted, innovative, and calibrated, the text increases conceptual understanding and leads to greater student success in general chemistry by building on the expertise of the dynamic author team of leading researchers and award-winning teachers. In this new edition, the author team draws on the wealth of student data in Mastering[™] Chemistry to identify where students struggle and strives to perfect the clarity and effectiveness of the text, the art, and the exercises while addressing student misconceptions and encouraging thinking about the practical, real-world use of chemistry. New levels of student interactivity and engagement are made possible through the enhanced eText 2.0 and Mastering Chemistry, providing seamlessly integrated videos and personalized learning throughout the course. Also available with Mastering Chemistry Mastering[™] Chemistry is the leading online homework, tutorial, and engagement system, designed to improve results by engaging students with vetted content. The enhanced eText 2.0 and Mastering Chemistry work with the book to provide seamless and tightly integrated videos and other rich media and assessment throughout the course. Instructors can assign interactive media before class to engage students and ensure they arrive ready to learn. Students

further master concepts through book-specific Mastering Chemistry assignments, which provide hints and answer-specific feedback that build problem-solving skills. With Learning Catalytics[™] instructors can expand on key concepts and encourage student engagement during lecture through questions answered individually or in pairs and groups. Mastering Chemistry now provides students with the new General Chemistry Primer for remediation of chemistry and math skills needed in the general chemistry course. Interviews conducted with Eric Scerri at the Chemical Heritage Foundation on the Periodic Table Part 1
Interviews conducted with Eric Scerri at the Chemical Heritage Foundation on the Periodic Table Part 2
This book contains key articles by Eric Scerri, the leading authority on the history and philosophy of the periodic table of the elements and the author of a best-selling book on the subject. The articles explore a range of topics such as the historical evolution of the periodic system as well as its philosophical status and its relationship to modern quantum physics. This volume contains some in-depth research papers from journals in history and philosophy of science, as well as quantum chemistry. Other articles are from more accessible magazines like American Scientist. The author has also provided an extensive new introduction in order to integrate this work covering a period of two decades. This must-have publication is completely unique as there is nothing of this form currently available on the market.
Contents: Chemistry, Spectroscopy, and the Question of Reduction
The Electronic Configuration Model, Quantum Mechanics and Reduction
The Periodic Table and the Electron
How Good is the Quantum Mechanical Explanation of the Periodic System?
Prediction and the Periodic Table
Löwdin's Remarks on the Aufbau Principle and a Philosopher's View of Ab Initio Quantum Chemistry
Mendeleev's Legacy
The Role of Triads in the Evolution of the Periodic Table: Past and Present
The Past and Future of the Periodic Table
The Dual Sense of the Term "Elements", Attempts to Derive the Madelung Rule, and the Optimal Form of the Periodic Table, If Any
Readership: Academic readers: philosophers and science historians, science educators, chemists and physicists.
Keywords: Periodic Table; Philosophy of Science; Philosophy of Chemistry; Chemistry; Atomic Physics; Reductionism; History of Science
Key Features: Written by leading researcher and best selling author of the periodic table of elements
Covers a range of topics related to the periodic table: evolutionary history, philosophy, education, and quantum mechanics
Includes articles published in highly accessible science magazines as well as specialized journals
Reviews: "Selected Papers demonstrates how an author's perceptions of a single topic have materialized historically ... The Selected Papers confirms that this is still an active research area and is a worthy addition to a library of materials on the periodic table. The publication adds significantly to the historical and philosophical dimensions of the topic." Kevin C de Berg Avondale College, Australia
"It bundles some of his most brilliant papers into one volume, and it provides the reader with a thorough overview of Scerri's cutting edge research on the periodic table. Scerri has tackled all of these periodic table related problems by approaching them both scientifically, historically and philosophically. Every chemist, philosopher and educator with an interest in the periodic table of chemical elements should definitely add a copy of this volume to his personal library!" Foundations of Chemistry
"The volumes will certainly serve as a source for future history of the philosophy of chemistry, and, in particular, the history and philosophy of quantum chemistry." Metascience

Modern Experimental Organic Chemistry

"Developed to address the need for a text that allows teaching fundamentals to be covered in a practical fashion, this general methods text provides complete and concise coverage of the teaching act with a focus on planning and implementing classroom instruction and assessing student achievement in an era of standards and accountability. With an emphasis on case studies and real-life classroom scenarios and features including self-check exercises, portfolio assignments, suggested field experiences, and selected tools for teaching, this text provides students with the resources they need to master the material presented in the text."--Publisher's website.

Electric Drives provides a practical understanding of the subtleties involved in the operation of modern electric drives. The Third Edition of this bestselling textbook has been fully updated and greatly expanded to incorporate the latest technologies used to save energy and increase productivity, stability, and reliability. Every phrase, equation, number, and reference in the text has been revisited, with the necessary changes made throughout. In addition, new references to key research and development activities have been included to accurately reflect the current state of the art. Nearly 120 new pages covering recent advances, such as those made in the sensorless control of A.C. motor drives, have been added; as have two new chapters on advanced scalar control and multiphase electric machine drives. All solved numerical examples have been retained, and the 10 MATLAB®–Simulink® programs remain online. Thus, Electric Drives, Third Edition offers an up-to-date synthesis of the basic and advanced control of electric drives, with ample material for a two-semester course at the university level.

Americans in Paris: A Literary Anthology

Including stories, letters, memoirs, and journalism, "Americans in Paris" distills three centuries of vigorous, glittering, and powerfully emotional writing about the place that Henry James called "the most brilliant city in the world."

The Best American Essays

Presents an anthology of the best literary essays published in 2014, selected from American periodicals.

Paris to the Moon

This is a look at what was to be an American family man in Paris at the end of the twentieth century.

Winter

Winter takes us on an intimate tour of the artists, poets, composers, writers, explorers, scientists and thinkers who helped shape a new and modern idea of winter. We learn how literature heralds the arrival of the middle class; how snow science leads to existential questions of God and our place in the world; how the race to the poles marks the human drive to imprint meaning on a blank space. Offering a kaleidoscopic take on the season, Winter is a homage to an idea of a season and a journey through the modern imagination.

The Greater Journey

The #1 bestseller that tells the remarkable story of the generations of American artists, writers, and doctors who traveled to Paris, fell in love with the city and its people, and changed America through what they learned, told by America's master historian, David McCullough. Not all pioneers went west. In *The Greater Journey*, David McCullough tells the enthralling, inspiring—and until now, untold—story of the adventurous American artists, writers, doctors, politicians, and others who set off for Paris in the years between 1830 and 1900, hungry to learn and to excel in their work. What they achieved would profoundly alter American history. Elizabeth Blackwell, the first female doctor in America, was one of this intrepid band. Another was Charles Sumner, whose encounters with black students at the Sorbonne inspired him to become the most powerful voice for abolition in the US Senate. Friends James Fenimore Cooper and Samuel F. B. Morse worked unrelentingly every day in Paris, Morse not only painting what would be his masterpiece, but also bringing home his momentous idea for the telegraph. Harriet Beecher Stowe traveled to Paris to escape the controversy generated by her book, *Uncle Tom's Cabin*. Three of the greatest American artists ever—sculptor Augustus Saint-Gaudens, painters Mary Cassatt and John Singer Sargent—flourished in Paris, inspired by French masters. Almost forgotten today, the heroic American ambassador Elihu Washburne bravely remained at his post through the Franco-Prussian War, the long Siege of Paris, and the nightmare of the Commune. His vivid diary account of the starvation and suffering endured by the people of Paris is published here for the first time. Telling their stories with power and intimacy, McCullough brings us into the lives of remarkable men and women who, in Saint-Gaudens' phrase, longed "to soar into the blue."

Resurrecting Empire

Begun as the United States moved its armed forces into Iraq, Rashid Khalidi's powerful and thoughtful new book examines the record of Western involvement in the region and analyzes the likely outcome of our most recent Middle East incursions. Drawing on his encyclopedic knowledge of the political and cultural history of the entire region as well as interviews and documents, Khalidi paints a chilling scenario of our present situation and yet offers a tangible alternative that can help us find the path to peace rather than Empire. We all know that those who refuse to learn from history are doomed to repeat it. Sadly, as Khalidi reveals with clarity and surety, America's leaders seem blindly committed to an ahistorical path of conflict, occupation, and colonial rule. Our current policies ignore rather than incorporate the lessons of experience. American troops in Iraq have seen first hand the consequences of U.S. led "democratization" in the region. The Israeli/Palestinian conflict seems intractable, and U.S. efforts in recent years have only inflamed the situation. The footprints America follows have led us into the same quagmire that swallowed our European forerunners. Peace and prosperity for the region are nowhere in sight. This cogent and highly accessible book provides the historical and cultural perspective so vital to understanding our present situation and to finding and pursuing a more effective and just foreign policy. From the Hardcover edition.

The Table Comes First

Our modern society is very particular about what constitutes good food: local, seasonal, organic produce that doesn't overly impact on the environment. But throughout history every generation has believed that it alone knows the true value of food, and looked with distaste on the culinary practices of its predecessors. Not so long ago eating food from around the world was the mark of the cultural sophisticate. In *The Table Comes First* Adam Gopnik envisions a new 'physiology of taste' which will enable us to dispense with this moralising attitude and concentrate on the pleasure principle: food is to be enjoyed, and to help us enjoy life in turn. Above all the dining table should be the heart of the family, the place where all real family begins. To show this we are taken through the courses, from starters to desserts, from the establishment of the first restaurants in Paris in the early 19th century to the green movement of the present day, in a witty and erudite narrative interspersed with delightful anecdotes, ranging from making soufflés for Derrida (hint: the perfect soufflé is determined by the ineffable 'zone' between peaks and troughs) to hunting the lost recipe for 'Steack Boston'.

A Traveler at Forty

A Traveler at Forty "rises completely out of the commonplace, and becomes something new, illuminating and heretical. It differs enormously from the customary travel books: it is not a mere description of places and people, but a revelation of their impingement upon an exceptional and almost eccentric personality." - H. L. Mencken "For everywhere [Dreiser] goes he watches people with a terrible curiosity about them that never rests until he has their secrets." - Sinclair Lewis The most productive period of Theodore Dreiser writing life began with the five months he spent in Europe between 1911 and 1912. *A Traveler at Forty* is the detailed account of his travels during that time, including the exploration of his ancestral roots in Germany. This is the text of the popular original edition as it was published in 1913. THEODORE DREISER (1871-1945) was a pre-eminent American novelist of the first half of the twentieth century. He believed that the experiences of working-class people striving for economic, emotional, and spiritual fulfillment were viable subjects for serious fiction, and for this reason he is regarded as an anatomist of the "American Dream."

Writing the Lost Generation

Members of the Lost Generation, American writers and artists who lived in Paris during the 1920s, continue to occupy an important place in our literary history. Rebelling against increased commercialism and the ebb of cosmopolitan society in early twentieth-century America, they rejected the culture of what Ernest Hemingway called a place of "broad lawns and narrow minds." Much of what we know about these iconic literary figures comes from their own published letters and essays, revealing how adroitly they developed their own reputations by controlling the reception of their work. Surprisingly the literary world has paid less attention to their autobiographies. In *Writing the Lost Generation*, Craig Monk unlocks a series of neglected texts while reinvigorating our reading of more familiar ones. Well-known autobiographies by Malcolm Cowley, Ernest Hemingway, and Gertrude Stein are joined here by works from a variety of lesser-known—but still important—expatriate American writers, including Sylvia Beach, Alfred Kreymborg, Samuel Putnam, and Harold Stearns. By bringing together the self-reflective works of the Lost Generation and probing the ways the writers portrayed themselves,

Monk provides an exciting and comprehensive overview of modernist expatriates from the United States.

The Spirit of Cities

A lively and personal book that returns the city to political thought. Cities shape the lives and outlooks of billions of people, yet they have been overshadowed in contemporary political thought by nation-states, identity groups, and concepts like justice and freedom. *The Spirit of Cities* revives the classical idea that a city expresses its own distinctive ethos or values. In the ancient world, Athens was synonymous with democracy and Sparta represented military discipline. In this original and engaging book, Daniel Bell and Avner de-Shalit explore how this classical idea can be applied to today's cities, and they explain why philosophy and the social sciences need to rediscover the spirit of cities. Bell and de-Shalit look at nine modern cities and the prevailing ethos that distinguishes each one. The cities are Jerusalem (religion), Montreal (language), Singapore (nation building), Hong Kong (materialism), Beijing (political power), Oxford (learning), Berlin (tolerance and intolerance), Paris (romance), and New York (ambition). Bell and de-Shalit draw upon the richly varied histories of each city, as well as novels, poems, biographies, tourist guides, architectural landmarks, and the authors' own personal reflections and insights. They show how the ethos of each city is expressed in political, cultural, and economic life, and also how pride in a city's ethos can oppose the homogenizing tendencies of globalization and curb the excesses of nationalism. *The Spirit of Cities* is unreservedly impressionistic. Combining strolling and storytelling with cutting-edge theory, the book encourages debate and opens up new avenues of inquiry in philosophy and the social sciences. It is a must-read for lovers of cities everywhere. In a new preface, Bell and de-Shalit further develop their idea of "civicism," the pride city dwellers feel for their city and its ethos over that of others.

Race in Translation

While the term "culture wars" often designates the heated arguments in the English-speaking world spiraling around race, the canon, and affirmative action, in fact these discussions have raged in diverse sites and languages. *Race in Translation* charts the transatlantic traffic of the debates within and between three zones—the U.S., France, and Brazil. Stam and Shohat trace the literal and figurative translation of these multidirectional intellectual debates, seen most recently in the emergence of postcolonial studies in France, and whiteness studies in Brazil. The authors also interrogate an ironic convergence whereby rightist politicians like Sarkozy and Cameron join hands with some leftist intellectuals like Benn Michaels, Žižek, and Bourdieu in condemning "multiculturalism" and "identity politics." At once a report from various "fronts" in the culture wars, a mapping of the germane literatures, and an argument about methods of reading the cross-border movement of ideas, the book constitutes a major contribution to our understanding of the Diasporic and the Transnational.

Paris In Mind

"Paris is a moveable feast," Ernest Hemingway famously wrote, and in this captivating anthology, American writers share their pleasures, obsessions, and quibbles with the great city and its denizens. Mark Twain celebrates the unbridled energy of the Can-Can. Sylvia Beach recalls the excitement of opening Shakespeare & Company on the Rue Dupuytren. David Sedaris praises Parisians for keeping quiet at the movies. These are just a few of the writers assembled here, and each selection is as surprising and rewarding as the next. Including essays, book excerpts, letters, articles, and journal entries, this seductive collection captures the long and passionate relationship Americans have had with Paris. Accompanied by an illuminating introduction, *Paris in Mind* is sure to be a fascinating voyage for literary travelers. Nadja

"*Nadja*," originally published in France in 1928, is the first and perhaps best Surrealist romance ever written, a book which defined that movement's attitude toward everyday life. The principal narrative is an account of the author's relationship with a girl in the city of Paris, the story of an obsessional presence haunting his life. The first-person narrative is supplemented by forty-four photographs which

form an integral part of the work -- pictures of various "surreal" people, places, and objects which the author visits or is haunted by in Nadja's presence and which inspire him to meditate on their reality or lack of it. "The Nadja of the book is a girl, but, like Bertrand Russell's definition of electricity as "not so much a thing as a way things happen," Nadja is not so much a person as the way she makes people behave. She has been described as a state of mind, a feeling about reality, or a kind of vision, and the reader sometimes wonders whether she exists at all. Yet it is Nadja who gives form and structure to the novel.

France in Mind: An Anthology

From Gertrude Stein's Paris to Ezra Pound's Pyrenees; from Tobias Smollett, who grumbled, to Peter Mayle, who settled in; and from Mark Twain's "Innocents Abroad" to David Sedaris's "Me Talk Pretty One Day"--here is France in all its splendor in the words of some of the best and most entertaining writers in the English language.

Becoming Americans in Paris

Americans often look back on Paris between the world wars as a charming escape from the enduring inequalities and reactionary politics of the United States. In this bold and original study, Brooke Blower shows that nothing could be further from the truth. She reveals the breadth of American activities in the capital, the lessons visitors drew from their stay, and the passionate responses they elicited from others. For many sojourners--not just for the most famous expatriate artists and writers--Paris served as an important crossroads, a place where Americans reimagined their position in the world and grappled with what it meant to be American in the new century, even as they came up against conflicting interpretations of American power by others. Interwar Paris may have been a capital of the arts, notorious for its pleasures, but it was also smoldering with radical and reactionary plots, suffused with noise, filth, and chaos, teeming with immigrants and refugees, communist rioters, fascism admirers, overzealous police, and obnoxious tourists. Sketching Americans' place in this evocative landscape, Blower shows how arrivals were drawn into the capital's battles, both wittingly and unwittingly. Americans in Paris found themselves on the front lines of an emerging culture of political engagements--a transatlantic matrix of causes and connections, which encompassed debates about "Americanization" and "anti-American" protests during the Sacco-Vanzetti affair as well as a host of other international incidents. Blower carefully depicts how these controversies and a backdrop of polarized European politics honed Americans' political stances and sense of national distinctiveness. A model of urban, transnational history, *Becoming Americans in Paris* offers a nuanced portrait of how Americans helped to shape the cultural politics of interwar Paris, and, at the same time, how Paris helped to shape modern American political culture.

S. J. Perelman: Writings (LOA #346)

Adam Gopnik presents the very best of S. J. Perelman, America's zaniest humorist. S. J. Perelman (1904-1979) wrote for the Marx Brothers films *Horse Feathers* and *Monkey Business* and won an Oscar for his screenwriting on *Around the World in Eighty Days*, but he remains best known for his many sketches and essays penned for *The New Yorker* during its golden age of humor. In these short comic pieces--Perelman called them *feuilletons*--his penchant for wordplay, witticism, spoofery, self-deprecation, and plain zaniness are on full display. *The New York Times* once noted his ability in these magazine pieces "to transform the common cliché or figure of speech into an exploding cigar." Author and *New Yorker* staff writer Adam Gopnik has selected the very best of them, including

Perelman's parodies of books and films, his biting social satire, autobiographical pieces, and a selection from the celebrated *Cloudland Revisited* series, in which Perelman reminisces nostalgically about books and movies encountered in youth before describing in his inimitable hyperkinetic style the rude shock of revisiting them as an adult. Also included in this volume are the acclaimed play *The Beauty Part* (1963) from Perelman's Broadway career; profiles of the Marx Brothers, Dorothy Parker, and his brother-in-law Nathanael West; and a selection of letters written to correspondents such as Groucho Marx and Paul Theroux.

Paris in American Literatures

This collection brings together new perspectives on the novels, memoirs, poetry, and journalism concerning Paris written by Americans. By examining the implications of foreignness as a creative device, this volume offer an innovative approach to understanding the role of the French capital in American Literatures, one that would be compelling for the literary scholar and the avid reader.

World Cities, City Worlds

When living and working in cities, we need to make sense of them in order to get by. We must delve below their surface to understand what makes them tick and how we can best engage with them. This book argues that three tropes can help us: namely, metaphors, icons and perspectives. Metaphorically, we can see the city as a community, a battleground, a marketplace, a machine or an organism. Some cities are iconic; they present us with characteristics that are more generally true of cities and city life, such as Venice, Mumbai, New York, Tokyo, Paris and Los Angeles. Cities can also be viewed from different perspectives: those of artists, analysts, rulers and citizens. This book explores these ways of understanding cities, drawing on rich accounts of cities across the world and through time.

Shadows of Revolution

Renowned historian, essayist, and journalist David A. Bell has long made France and its history the subject of his scholarly gaze and the object of his enduring affection. *Shadows of Revolution: Reflections on France, Past and Present* gathers together his writing, composed over a period of more than 25 years, into a single volume. As the title of this collection suggests, Bell views much of French history through the lens of the Revolutionary era. Within a space of a dozen years, from Bastille to Bonaparte, the country experimented with and experienced every form of governance, creating in the process, as Bell puts it, "the most intense political laboratory the world had ever known." The Revolution remains the country's defining era, delineating its sense of identity and overshadowing the events that followed it. Yet another, Bell argues, is the Vichy period and World War Two-France's dark night of the soul-with whose legacies the country continues to contend. These two moments of violent and transformative upheaval may dominate French history, but as this collection and Bell's observational powers reveal, the full range of topics involving France is endlessly rich and diverse. Divided into eight sections, it connects France's education to its national identity, the Enlightenment to the Revolution and human rights, Napoleon to Victor Hugo, and nineteenth-century anti-Semitism to such recent events such as the riots of 2006, the Arab Spring, and the Charlie Hebdo tragedy. *Shadows of Revolution* embodies and reflects the endlessly fascinating and entertaining complexity of French history, and shows the ways in which it has shaped world history.

Free as Gods

Among many art, music and literature lovers, particularly devotees of modernism, the expatriate community in France during the Jazz Age represents a remarkable convergence of genius in one place and period - one of the most glorious in history. Drawn by the presence of such avant-garde figures as Joyce and Picasso, artists and writers fled the Prohibition in the United States and revolution in Russia to head for the free-wheeling scene in Paris, where they made contact with rivals, collaborators, and a sophisticated audience of collectors and patrons. The outpouring of boundary-pushing novels, paintings, ballets, music, and design was so profuse that it belies the brevity of the era (1918-1929). Drawing on unpublished albums, drawings, paintings, and manuscripts, Charles A. Riley offers a fresh examination of both canonic and overlooked writers and artists and their works, by revealing them in conversation with one another. He illuminates social interconnections and artistic collaborations among the most famous - Fitzgerald, Hemingway, Gershwin, Diaghilev, and Picasso - and goes a step further, setting their work alongside that of African Americans such as Sidney Bechet, Archibald Motley Jr., and Langston Hughes, and women such as Gertrude Stein and Nancy Cunard. Riley's biographical

and interpretive celebration of the many masterpieces of this remarkable group shows how the creative community of postwar Paris supported astounding experiments in content and form that still resonate today.

The Cambridge Companion to American Travel Writing

Travel writing has always been intimately linked with the construction of American identity. Occupying the space between fact and fiction, it exposes cultural fault lines and reveals the changing desires and anxieties of both the traveller and the reading public. These specially-commissioned essays trace the journeys taken by writers from the pre-revolutionary period right up to the present. They examine a wide range of responses to the problems posed by landscapes found both at home and abroad, from the Mississippi and the Southwest to Europe and the Holy Land. Throughout, the contributors focus on the role played by travel writing in the definition and formulation of national identity, and consider the experiences of minority writers as well as canonical authors. This Companion forms an invaluable guide for students approaching this new, important and exciting subject for the first time.

Paris in the Americas: Yesterday and Today

Across centuries, France -and especially its capital city, Paris- established itself as a major source of influence across the Americas through colonization, diplomacy and political influence, but also through intellectualism and cultural productions of all sorts, either by imposition, exportation or as a trend of fashion via a bilateral transatlantic movement of people and ideas. In itself, the influence of Paris, the “capital of the world,” as Patrice Higonnet (2002) analyzes it, is similar to a phantasmagoria, which results in a transatlantic fascination for the city of lights and all the tangible or intangible elements that function as its embodiment. As Stuart Hall explains, understanding cultures and languages and their representations through various manifestations presupposes that we can identify, understand and interpret the signs that constitute their core identity. (Hall 2013). In an interdisciplinary approach, this multi-authored, edited volume examines the long-established relationships between Paris and cities across the American continent, in the past as well as in the present time. In order to explore all aspects of Paris’s influence(s) in the Americas, this volume is organized around two main axes of analysis: first, in a geographical progression from North to South, the reader is invited to reflect upon cultural productions that demonstrate the many influences of Paris in the Americas through theater, literature, philosophy, fashion and cinema (chapters 1 to 6). In the following chapters (7 to 11), the volume focuses particularly on a variety of urban connections that take the reader from South to North this time, analyzing tangible architectural and urban design influences of Paris in major cities such as Rio de Janeiro, Buenos Aires, Mexico City, New York, or Washington D.C. In today’s global world, this multifaceted study of Paris’ visible and invisible influences in the Americas clearly reveals the transnational intersections of spaces, languages, people and cultures.

Secret Ingredients

The New Yorker dishes up a feast of delicious writing—food and drink memoirs, short stories, tell-alls, and poems, seasoned with a generous dash of cartoons. “To read this sparely elegant, moving portrait is to remember that writing well about food is really no different from writing well about life.”—Saveur (Ten Best Books of the Year) Since its earliest days, The New Yorker has been a tastemaker—literally. In this indispensable collection, M.F.K. Fisher pays homage to “cookery witches,” those mysterious cooks who possess “an uncanny power over food,” and Adam Gopnik asks if French cuisine is done for. There is Roald Dahl’s famous story “Taste,” in which a wine snob’s palate comes in for some unwelcome scrutiny, and Julian Barnes’s ingenious tale of a lifelong gourmand who goes on a very peculiar diet. Selected from the magazine’s plentiful larder, Secret Ingredients celebrates all forms of gustatory delight. A sample of the menu: Roger Angell on the art of the martini • Don DeLillo on Jell-O • Malcolm Gladwell on building a better ketchup • Jane Kramer on the writer’s kitchen • Chang-rae Lee on eating sea urchin • Steve Martin on menu mores • Alice McDermott on sex and ice cream • Dorothy Parker on dinner conversation • S. J. Perelman on a hollandaise assassin • Calvin Trillin on New York’s best bagel Whether you’re in the mood for snacking on humor pieces and cartoons or for savoring classic profiles of great chefs and great eaters, these offerings from The New Yorker’s fabled history are sure to satisfy every taste.

Atlantic Citizens

By looking beyond the page and into the extraordinary lives of Walt Whitman, Henry Wadsworth Longfellow, Grace Greenwood, Ralph Waldo Emerson, Margaret Fuller and Frederick Douglass, this book uncovers their startling contributions to transatlantic culture and makes the argument that literature is dependent upon other modes of professional creativity in order to thrive. Leslie Elizabeth Eckel shows how these six figures shaped their careers in the fields of education, journalism, public lecturing and editing in productive relation to their development as imaginative writers. To see Walt Whitman co-producing foreign editions of his work with British poets while exuberantly breaking free from verse strictures on the page, or to witness Margaret Fuller reporting from the battle ground in revolutionary Rome as well as writing her country's first feminist treatise is to comprehend more deeply the ways in which these writers acted in the transatlantic sphere. By practicing Atlantic citizenship, they were able to achieve critical distance from the United States and, paradoxically, to catalyse its ongoing growth.

Postcolonial Paris

Expanding the narrow script of what it means to be Parisian, Laila Amine explores the novels, films, and street art made by Maghrebis, Franco-Arabs, and African Americans, including fiction by Charef, Chraïbi, Sebbar, Baldwin, Smith, and Wright, and such films as *La haine*, *Made in France*, *Chouchou*, and *A Son*.

Why France?

France has long attracted the attention of many of America's most accomplished historians. The field of French history has been vastly influential in American thought, both within the academy and beyond, regardless of France's standing among U.S. political and cultural elites. Even though other countries, from Britain to China, may have had a greater impact on American history, none has exerted quite the same hold on the American historical imagination, particularly in the post-1945 era. To gain a fresh perspective on this passionate relationship, Laura Lee Downs and Stéphane Gerson commissioned a diverse array of historians to write autobiographical essays in which they explore their intellectual, political, and personal engagements with France and its past. In addition to the essays, *Why France?* includes a lengthy introduction by the editors and an afterword by one of France's most distinguished historians, Roger Chartier. Taken together, these essays provide a rich and thought-provoking portrait of France, the Franco-American relationship, and a half-century of American intellectual life, viewed through the lens of the best scholarship on France.

The Greater Journey

McCullough mixes famous and obscure names and delivers capsule biographies of everyone to produce a colorful parade of educated, Victorian-era American travelers and their life-changing experiences in Paris.

Hating America

Reviled as an imperialist power, an exporter of destructive capitalism, an arrogant crusader against Islam, and a rapacious over-consumer casually destroying the planet, it seems that the United States of America has rarely been less esteemed in the eyes of the world. In such an environment, one can easily overlook the fact that people from other countries have, in fact, been hating America for centuries. Barry Rubin and Judith Colp Rubin here draw on sources from a wide range of countries to track the entire trajectory of anti-Americanism. With this powerful work, the Rubins trace the paradox that is America, a country that is both the most reviled and most envied land on earth. In the end, they demonstrate, anti-Americanism has often been a visceral response to the very idea--as well as both the ideals and policies--of America itself, its aggressive innovation, its self-confidence, and the challenge it poses to alternative ideologies.

The Measure of Paris

Paris remains one of the most fascinating cities in the world. It provides a measure of excellence in many areas of culture, and it is itself constantly being measured, both by its lovers and by its critics. This book presents a series of studies on the images of Paris presented by writers (mostly Canadian, from John Glassco to Mavis Gallant to Lola Lemire Tostevin), but also in such other areas as social history and personal memoir. The result is a wide-ranging discussion of the city's history in 20th century

literature and thought, which will appeal to all those who love Paris, or who have ever walked on its streets.

The Limits of Transnationalism

Transnationalism means many things to many people, from crossing physical borders to crossing intellectual ones. *The Limits of Transnationalism* reassesses the overly optimistic narratives often associated with this malleable term, revealing both the metaphorical and very real obstacles for transnational mobility. Nancy L. Green begins her wide-ranging examination with the story of Frank Gueydan, an early twentieth-century American convicted of manufacturing fake wine in France who complained bitterly that he was neither able to get a fair trial there nor to enlist the help of US officials. Gueydan's predicament opens the door for a series of inquiries into the past twenty-five years of transnational scholarship, raising questions about the weaknesses of global networks and the slippery nature of citizenship ties for those who try to live transnational lives. *The Limits of Transnationalism* serves as a cogent reminder of this topic's complexity, calling for greater attention to be paid to the many bumps in the road.

The Crime Without a Name

In this incisive blend of personal narrative and philosophical inquiry, journalist and activist Barrett Holmes Pitner seeks a new way to talk about racism in America. An NPR Best Book of the Year, *Can new language reshape our understanding of the past and expand the possibilities of the future?* *The Crime Without a Name* follows Pitner's journey to identify and remedy the linguistic void in how we discuss race and culture in the United States. Ethnocide, first coined in 1944 by Jewish exile Raphael Lemkin (who also coined the term "genocide"), describes the systemic erasure of a people's ancestral culture. For Black Americans, who have endured this atrocity for generations, this erasure dates back to the transatlantic slave trade and reached new resonance in a post-Trump world.

Comics and Narration

This book is the follow-up to Thierry Groensteen's groundbreaking *The System of Comics*, in which the leading French-language comics theorist set out to investigate how the medium functions, introducing the principle of iconic solidarity, and showing the systems that underlie the articulation between panels at three levels: page layout, linear sequence, and nonsequential links woven through the comic book as a whole. He now develops that analysis further, using examples from a very wide range of comics, including the work of American artists such as Chris Ware and Robert Crumb. He tests out his theoretical framework by bringing it up against cases that challenge it, such as abstract comics, digital comics and shojo manga, and offers insightful reflections on these innovations. In addition, he includes lengthy chapters on three areas not covered in the first book. First, he explores the role of the narrator, both verbal and visual, and the particular issues that arise out of narration in autobiographical comics. Second, Groensteen tackles the question of rhythm in comics, and the skill demonstrated by virtuoso artists in intertwining different rhythms over and above the basic beat provided by the discontinuity of the panels. And third he resets the relationship of comics to contemporary art, conditioned by cultural history and aesthetic traditions but evolving recently as comics artists move onto avant-garde terrain.

Shakespeare and Company

Sylvia Beach was intimately acquainted with the expatriate and visiting writers of the Lost Generation, a label that she never accepted. Like moths of great promise, they were drawn to her well-lighted bookstore and warm hearth on the Left Bank. *Shakespeare and Company* evokes the zeitgeist of an era through its revealing glimpses of James Joyce, Ernest Hemingway, Scott Fitzgerald, Sherwood Anderson, Andre Gide, Ezra Pound, Gertrude Stein, Alice B. Toklas, D. H. Lawrence, and others already famous or soon to be. In his introduction to this new edition, James Laughlin recalls his friendship with Sylvia Beach. Like her bookstore, his publishing house, New Directions, is considered a cultural touchstone.

Candide

Appearing in 1759, *Candide* is a foreboding, ironic, and fierce satire. The protagonist, Candide, is an innocent and good-natured man. Virtually all those whom he meets during his travels, however, are scoundrels or dupes. Candide's naivete is slowly worn away as a result of his contact with the story's

rogue elements. The wisdom Candide amasses in the course of his voyages has a practical quality. It entails the fundamentals for getting by in a world that is frequently cruel and unfair. Though well aware of the cruelty of nature, Voltaire is really concerned with the evil of mankind. He identifies many of the causes of that evil in his work: the aristocracy, the church, slavery, and greed. Axel Sowa has chaired the department for architecture theory at RWTH Aachen University since 2007. Susanne Schindler is an assistant professor in the department for architecture theory at RWTH Aachen University.

Virgil Thomson and Gertrude Stein *Four Saints in Three Acts* Edited by H. Wiley Hitchcock MU18 / A 64 ISBN (2008) iv + 447 pp. \$250.00 ISBN 978-0-89579-629-5 Rental parts available from Schirmer only. With music by Virgil Thomson and a libretto by Gertrude Stein, *Four Saints in Three Acts* was completed in 1928 but waited almost six years for its first performances. After a week's run in Hartford, Connecticut, in February 1934, it moved to New York where—with some sixty performances in six weeks—it became the longest-running opera that Broadway up to that time had experienced. This critical edition by H. Wiley Hitchcock and Charles Fussell features the scenario by Maurice Grosser and is based on the full score that Thomson commissioned from copyist Ben Weber for his 1947-48 revision; it includes the 32-measure orchestral prelude to the Act II "Dance of the Angels," and it makes comparisons primarily to the manuscript scores held at the Library of Congress and Yale University. The critical apparatus applies as much to the music as to the Stein text, the principal source for which is the 1929 first publication.

Four Saints in Three Acts

MLN pioneered the introduction of contemporary continental criticism into American scholarship. Critical studies in the modern languages—Italian, Hispanic, German, French—and recent work in comparative literature are the basis for articles and notes in MLN. Four single-language issues and one comparative literature issue are published each year.

A "thorough and perceptive" portrait of the not-so-famous expatriates of the City of Light (The Wall Street Journal). History may remember the American artists, writers, and musicians of the Left Bank best, but the reality is that there were many more American businessmen, socialites, manufacturers' representatives, and lawyers living on the other side of the River Seine. Be they newly minted American countesses married to foreigners with impressive titles or American soldiers who had settled in France after World War I with their French wives, they provide a new view of the notion of expatriates. Historian Nancy L. Green introduces us for the first time to a long-forgotten part of the American overseas population—predecessors to today's expats—while exploring the politics of citizenship and the business relationships, love lives, and wealth (or in some cases, poverty) of Americans who staked their claim to the City of Light. *The Other Americans in Paris* shows that elite migration is a part of migration, and that debates over Americanization have deep roots in the twentieth century.

The Other Americans in Paris

During the Cold War, freedom of expression was vaunted as liberal democracy's most cherished possession—but such freedom was put in service of a hidden agenda. In *The Cultural Cold War*, Frances Stonor Saunders reveals the extraordinary efforts of a secret campaign in which some of the most vocal exponents of intellectual freedom in the West were working for or subsidized by the CIA—whether they knew it or not. Called "the most comprehensive account yet of the [CIA's] activities between 1947 and 1967" by the New York Times, the book presents shocking evidence of the CIA's undercover program of cultural interventions in Western Europe and at home, drawing together declassified documents and exclusive interviews to expose the CIA's astonishing campaign to deploy the likes of Hannah Arendt, Isaiah Berlin, Leonard Bernstein, Robert Lowell, George Orwell, and Jackson Pollock as weapons in the Cold War. Translated into ten languages, this classic work—now with a new preface by the author—is "a real contribution to popular understanding of the postwar period" (The Wall Street Journal), and its story of covert cultural efforts to win hearts and minds continues to be relevant today.

Two best friends on the run... to IKEA. Frankie and Walter aren't really running away. Just like the kids in their favorite book, they are running to somewhere. Specifically, a massive furniture store. They've been obsessed with the Ikea catalog for years. So they make a plan, pack their backpacks, give their parents the sleepover switcheroo . . . and they're in. One night all on their own, with no grown-ups or little brothers. One night of couch jumping, pillow forts, and unlimited soda refills. One night of surprises and twinkle lights and secrets they have been keeping—and waiting to share. One unforgettable night in Ikea. A tribute to the beloved classic From the Mixed-Up Files of Mrs. Basil E. Frankweiler! Only, instead of running away to the Metropolitan Museum, these kids are running away to somewhere a little more modern...

The second edition of Disney Stories: Getting to Digital will be of interest to lovers of Disney history and also to lovers of Hollywood history in general. The first edition was planned as a short history of the companies evolution from analog storytelling to a digital online presence that closed the chapter on early Disney films with the release of the groundbreaking Snow White. The purpose of the new edition is to bring to readers a more complete view of the analog-digital story by including three new chapters on film that cover key developments from the live-animation hybrids of the 1940s to CAPS and CGI in the 1990s and VR in the 2010s. It also includes in the discussion of cross-media storytelling the acquisition of the exceptional story property, Star Wars, and discusses how Disney has brought the epic into the Disney Master Narrative by creating Galaxy's Edge in its US theme parks. Krystina Madej's engaging portrayal of the long history of Disney's love affair with storytelling and technology brings to life the larger focus of innovation in creating characters and stories that captivate an audience, and together with Newton Lee's detailed experience of Disney during the crucial 1995-2005 era when digital innovation in online and games was at its height in the company, makes for a fast-paced captivating read. Disney Stories first edition explored the history of Disney, both analog and digital. It described in detail how Walt Disney used inventive and often ground-breaking approaches in the use of sound, color, depth, and the psychology of characters to move the animation genre from short visual gags to feature-length films with meaningful stories that engaged audience's hearts as well as tickled their funny bones. It showed Walt's comprehensive approach to engaging the public across all media as he built the Disney Master Narrative by using products, books, comics, public engagements, fan groups such as the Mickey Mouse club, TV, and, of course, Disneyland, his theme park. Finally it showed how, after his passing, the company continued to embrace Walt's enthusiasm for using new technology to engage audiences through their commitment to innovation in digital worlds. It describes in detail the innovative storybook CD-ROMs, their extensive online presence, the software they used and created for MMORGs such as Toontown, and the use of production methods such as agile methodology. This new edition provides insight on major developments in Disney films that moved them into the digital world.

Disney Stories

Disney Stories: Getting to Digital explores how Disney, the man and the company, used technological innovation to create characters and stories that engage audiences in many different media, in particular in Video Games and on the Internet. Drawing on Disney films from the twenties and thirties, as well as the writings of historians, screenwriters and producers, Disney Stories: Getting to Digital explains how new film and animation techniques, many developed by Disney, worked together to evolve character and content development and produce entertaining stories that riveted audiences. Through an insider's perspective of Disney's legendary creation process, the book closely examines how the Disney Company moved its stories into the digital world in the 1990s and the virtual, online communities of the 2000s. By embracing the digital era, Disney led storytelling and technological innovation by granting their audience the unique opportunity to take part in their creation process through their online games, including The Lion King Animated Story Book, Disney Blast and Toontown. Disney Stories: Getting to Digital is intended for Disney fans and current practitioners looking to study the creation process of one of the most famous animation studios in existence. Professors teaching courses in new media, animation and interactive storytelling will also find this book a valuable asset.

It is a companion to Prue Goodwin's *The Literate Classroom* and *The Articulate Classroom* and aims to: augment our existing knowledge about the teaching and learning of writing stimulate thought and provoke discussion about writing offer a blend of theory and practice give 'food for thought' and ideas for teaching writing to primary age children. The topic of writing is one which is under the spotlight with increasing regularity as politicians and policy makers move on from reading as an 'issue'. This has already happened in England where the National Literacy Strategy is urging more emphasis on the teaching of writing to remedy weaknesses in this area.

Home and School Use of Mother Goose

Child Discourse contains papers presented in a symposium on child discourse at the annual meeting of the American Anthropological Association in Mexico City in November 1974. Three other papers, one presented by Edelsky at the same meeting, and two by Dore and Garvey, are also included to broaden the scope of methods and issues considered. Organized into three parts, this book generally aims at describing and analyzing social and linguistic knowledge of a child in utilizing language to project socially appropriate identities and to engage in purposive social acts. Part I focuses on children's speech events, while Part II centers more on function and act. The last part takes into consideration the social aspect of language usage among children.

A TIME Magazine Top 10 Children's Book of 2015! Ducks growing out of bananas? A mouse catching a cat? What's wrong with this book from the creator of *The Very Hungry Caterpillar*? Yes, there's something strange, something funny and even downright preposterous on every page of this book. But it's not a mistake – it's nonsense! And it's also surrealism. Nonsense lies at the heart of many beloved nursery rhymes. Children readily accept odd statements like "the cow jumped over the moon" and "the dish ran away with the spoon." This fanciful bending of reality is also basic to surrealism. In this book, nonsense and surrealism combine to spark creativity and imagination. What's true? What's impossible? What's absolutely absurd? From Eric Carle, creator of the classic, *The Very Hungry Caterpillar*, comes a book to make children laugh and think, preparing them for a lifetime of loving both words and art. Following on the heels of *The Artist Who Painted a Blue Horse* (an homage to the artist Franz Marc and expressionism) and *Friends*, with its semi-abstract artwork, *The Nonsense Show* forms a trilogy of sorts, dedicated to introducing young readers to different styles of artwork without ever overlooking the need to, first and foremost, appeal to children and their love of play. One of the true legends and pioneers of picture book making continues to expand and challenge the genre. Praise for *The Nonsense Show* * "Carle creates fun and laughter in this homage to the surrealist artist René Magritte. [P]erfect for storytimes and silly times all round. Carle hits it out of the nonsense park!"—Booklist, starred review * "A sure hit as a read-aloud and a definite purchase for picture book collections."—School Library Journal, starred review * "A picture book made to incite pleasure and joy."—Kirkus Reviews, starred review *

"[The Nonsense Show], with its cleanly designed white pages, makes the unexpected elements of the imagery stand out and prompts questions and wonder."—Horn Book, starred review

Child Discourse

Young Children and Racial Justice provides a framework for good practice in racial equality for everyone working in the early years sector. It provides an accessible overview of racism, and explores how children learn their attitudes towards people who are different to themselves. Covering key areas such as prejudice, discrimination and Government policy, the book addresses current and contentious issues such as terminology, terrorism, community cohesion, skin colour, living in mainly white areas, name-calling, unlearning racism and dealing with racist incidents. Designed for use in professional development, with case studies, references and accessible articles for students, this book gives practitioners the tools and knowledge to implement race equality policies and action plans.

Whisperin' Bill: An Unprecedented Life in Country Music presents a revealing portrait of Bill Anderson, one of the most prolific songwriters in the history of country music. Mega country music hits like "City Lights," (Ray Price), "Tips Of My Fingers," (Roy Clark, Eddy Arnold, Steve Wariner), "Once A Day," (Connie Smith), "Saginaw, Michigan," (Lefty Frizzell), and many more flowed from his pen, making him one of the most decorated songwriters in music history. But the iconic singer, songwriter, performer, and TV host came to a point in his career where he questioned if what he had to say mattered anymore. Music Row had changed, a new generation of artists and songwriters had transformed the genre, and the Country Music Hall of Fame member and fifty-year Grand Ole Opry star was no longer relevant. By 1990, he wasn't writing anymore. Bad investments left him teetering at bankruptcy's edge. His marriage was falling apart. And in Nashville, a music town where youth often carries the day, he was a museum piece--only seen as a nostalgia act, waving from the stage of the Grand Ole Opry. Anderson was only in his fifties when he assumed he had climbed all the mountains he was intended to scale. But in those moments plagued with self-doubt, little did he know, his most rewarding climb lie ahead. A follow-up to his 1989 autobiography, this honest and revealing book tells the story of a man with an unprecedented gift, holding on to it in order to share it. Known as "Whisperin' Bill" to

generations of fans for his soft vocalizations and spoken lyrics, Anderson is the only songwriter in country music history to have a song on the charts in each of the past seven consecutive decades. He has celebrated chart-topping success as a recording artist with eighty charting singles and thirty-seven Top Ten country hits, including "Still," "8 x 10," "I Love You Drops," and "Mama Sang A Song." A six-time Song of the Year Award-winner and BMI Icon Award recipient, Anderson has taken home many CMA and ACM Award trophies and garnered multiple GRAMMY nominations. His knack for the spoken word has also made him a successful television host, having starred on "The Bill Anderson Show," "Opry Backstage," "Country's Family Reunion," and others. Moreover, his multi-faceted success extends far beyond the country format with artists like James Brown, Aretha Franklin, Dean Martin, and Elvis Costello recording his songs. Today, thanks to the support of musical peers and a few famous friends who believed in him, Anderson continues to forge the path of lyrical integrity in music, harnessing his ability to craft a song that tells a familiar story, grabs you by the heart and moves you. Modern day examples include "Whiskey Lullaby" (Brad Paisley and Allison Krauss), "Give It Away" (George Strait), "A Lot of Things Different" (Kenny Chesney), and "Which Bridge to Cross" (Vince Gill). A product of a long-gone Nashville, Anderson worked to reinvent himself, and this biography documents Anderson's fifty-plus-year career--a career he once thought unattainable. Richly illustrated with black-and-white photos of Anderson interacting with the superstars of American music, including such legends as Patsy Cline, Vince Gill, and Steve Wariner, this book highlights Anderson's trajectory in the business and his influence on the past, present, and future of this dynamic genre.

Let's Start the Music

This series of books uses fiction, non-fiction and poetry texts, as well as phonics, as a basis to help young children in the Early Years develop their literacy skills. It brings together the early learning goals of the foundation stage and the national literacy strategy objectives, using structured play, games and fun activities to put across the relevant teaching points in an enjoyable way, while simultaneously nurturing a love of literature. Each book presents structured activities based around suggested focus texts. To help practitioners save time in planning and organizing, the materials needed and the preparation required for each session are described in detail. The activities have been designed to cater to different achievement levels, and can be adapted or added to according to the needs of individual children and settings. Follow-up activities are also suggested, to bring in wider aspects of the Early Learning Goals and the NLS objectives. Elements of this book include exploring well-loved traditional stories and quality familiar modern stories by established authors; using the texts as a basis to focus on specific literacy goals and objectives; using the texts as a stimulus for games and play activities that help to teach literacy skills; planning and preparation for each literacy session, including materials needed and scripted sessions; ideas for working and playing with the whole group and smaller groups to consolidate the literacy skill; and extension ideas and activities.
