Most producers and directors acknowledge the crucial role of the screenplay, yet the film script has received little academic attention until recently, even though the screenplay has been in existence since the end of the 19th century. *Analysing the Screenplay* highlights the screenplay as an important form in itself, as opposed to merely being the first stage of the production process. It explores a number of possible approaches to studying the screenplay, considering the depth and breadth of the subject area, including: the history and early development of the screenplay in the United States, France and Britain the process of screenplay writing and its peculiar relationship to film production the assumption that the screenplay is standardised in form and certain stories or styles are universal the range of writing outside the mainstream, from independent film to story ideas in Bhutanese film production to animation possible critical approaches to analysing the screenplay. *Analysing the Screenplay* is a comprehensive anthology, offering a global selection of contributions from internationally renowned, specialist authors. Together they provide readers with an insight into this fascinating yet complex written form. This anthology will be of interest to undergraduate and postgraduate students on a range of Film Studies courses, particularly those on scriptwriting.

Screenwriting Fundamentals

Screenwriting Fundamentals: The Art and Craft of Visual Writing takes a step-by-step approach to screenwriting, starting with a blank page and working through each element of the craft. Written in an approachable anecdote-infused style that's full of humor, Bauer shows the writer how to put the pieces together, taking the process of screenwriting out of the cerebral and on to the page. Part One of the book covers character, location, time-frame and dialogue, emphasizing the particularity in writing for a visual medium. Part Two of the book focuses on the narrative aspect of screenwriting. Proceeding incrementally from the idea and story outline, through plotting and writing the treatment, the workshop-in-a-book concludes with writing the First Draft. A unique emphasis on the visual elements of storytelling because the camera is always present—the screenplay must act as a guide for the director and the editor. A "workshop in a book" approach that walks the reader step-by-step through a screenplay—focusing on character, location, time frame, visual components, and transitions—with plenty of exercises that generate material for the narrative writing process. A process-oriented approach, combined with a lighthearted tone and approachable style, that allows the reader to ease into the daunting task of writing a First Draft and takes them all the way through to the end— First Draft in hand.

Writing a Screenplay

The recent explosion of unsolicited material written for the world's greatest, sexiest entertainment medium has largely produced a mountain of wasted paper. Truth is, the many who write from scratch, no matter how talented, have more chance of winning the lottery than creating an excellent script. The few who achieve success do so because they have shed the blood, sweat and tears necessary to master the elaborate art and craft of Screenwriting. This book explodes the myth that a screenplay is the easiest literary form to master, navigates a relatively painless path through the Screenwriting labyrinth, and offers an easy to digest step-by-step guide to writing a script from inception to completion. What's in it? The main areas covered are: Motivation; Research & Development; Genre; Idea; Story & Plot; Audience; Character; Action & Setting; Structure; Format; Dialogue; Synopses & Treatments; Drafts; Marketing & The Industry. There's also a glossary of commonly used jargon to further demystify the process.

Script Development

This book offers the first international look at how script development is theorised and practiced. Drawing on interviews, case studies, discourse analysis, creative practices and industry experiences, it brings together scholars and practitioners from around the world to offer critical insights into this core, but often hidden, aspect of screenwriting and screen production. Chapters speculate and reflect upon how creative, commercial and social practices – in which ideas, emotions, people and personalities combine, cohere and clash – are shaped by the practicalities, policies and rapid movements of the screen industry. Comprising two parts, the book first looks 'into' script development from a theoretical perspective, and second looks 'out from' the practice to form practitioner-led perspectives of script development. With a rising interest in screenwriting and production studies, and an increased appetite for practice-based research, the book offers a timely mapping of the terrain of script development, providing rich foundations for both study and practice.

Writing the Character-Centered Screenplay, Updated and Expanded edition

"We need good screenwriters who understand character." Everywhere Andrew Horton traveled in researching this book—from Hollywood to Hungary—he heard the same refrain. Yet most of the standard how-to books on screenwriting follow the film industry's earlier lead in focusing almost exclusively on plot and formulaic structures. With this book, Horton, a film scholar and successful screenwriter, provides the definitive work on the character-based screenplay. Exceptionally wide-ranging—covering American, international, mainstream, and "off-Hollywood" films, as well as television—the book offers creative strategies and essential practical information. Horton begins by placing screenwriting in the context of the storytelling tradition, arguing through literary and cultural analysis that all great stories revolve around a strong central character. He then suggests specific techniques and concepts to help any writer—whether new or experienced—build more vivid characters and screenplays. Centering his discussion around four film examples—including *Thelma & Louise* and *The Silence of the Lambs*—and the television series, *Northern Exposure*, he takes the reader step-by-step through the screenwriting process, starting with the development of multi-dimensional characters and continuing through to rewrite. Finally, he includes a wealth of information about contests, fellowships, and film festivals. Espousing a new, character-based approach to screenwriting, this engaging, insightful work will prove an essential guide to all of those involved in the writing and development of film scripts.

Screenwriting

Screenwriters often joke that "no one ever paid a dollar at a movie theater to watch a screenplay." Yet the screenplay is where a movie begins, determining whether a production gets the "green light" from its financial backers and wins approval from its audience. This innovative volume gives readers a comprehensive portrait of the art and business of screenwriting, while showing how the role of the screenwriter has evolved over the years. Reaching back to the early days of Hollywood, when moonlighting novelists, playwrights, and journalists were first hired to write scenarios and photoplays, *Screenwriting* illuminates the profound ways that screenwriters have contributed to the films we love. This book explores the social, political, and economic implications of the changing craft of American screenwriting from the silent screen through the classical Hollywood years, the rise of independent cinema, and on to the contemporary global multi-media marketplace. From *The Birth of a Nation* (1915), *Gone With the Wind* (1939), and *Gentleman's Agreement* (1947) to *Chinatown* (1974), *American Beauty* (1999), and *Lost in Translation* (2003), each project began as writers with pen and ink, typewriters, or computers captured the hopes and dreams, the nightmares and concerns of the periods in which they were writing. As the contributors take us behind the silver screen to chronicle the history of screenwriting, they spotlight a range of key screenplays that changed the game in Hollywood and beyond. With original essays from both distinguished film scholars and accomplished screenwriters, *Screenwriting* is sure to fascinate anyone with an interest in Hollywood, from movie buffs to industry professionals.

Though screenwriting is an essential part of the film production process, in Britain it is yet to be fully recognised as a form in itself. In this original study, Jill Nelmes brings the art of screenwriting into sharp focus, foregrounding the role of the screenwriter in British cinema from the 1930s to the present day. Drawing on otherwise unseen drafts of screenplays, correspondence and related material held in the Special Collections of the BFI National Archive, Nelmes's close textual analysis of the screenplay in its many forms illuminates both the writing and the production process. With case studies of a diverse range of key writers – from individuals such as Muriel Box, Robert Bolt and Paul Laverty, to teams such as the Carry On writers – Nelmes exposes the depth and breadth of this thriving field.
