[#Rome Gospel](#) [#Ancient Gospel](#) [#Early Christian Texts](#) [#New Testament Apocrypha](#) [#Historical Jesus Research](#)

The Rome Gospel, an intriguing yet fragmented text, offers a glimpse into the diverse and evolving landscape of early Christian beliefs. Its discovery and subsequent analysis have sparked considerable debate among scholars, prompting investigations into its potential origins, relationship to canonical Gospels, and contribution to our understanding of early Christian communities and their diverse interpretations of Jesus' life and teachings. Further research focuses on dating the manuscript, identifying its unique theological perspectives, and assessing its authenticity within the context of other apocryphal texts from the period.

All theses are reviewed to ensure authenticity and scholarly value.

An Historical and Critical Dictionary, Selected and Abridged, Volume 1 - Primary Source Edition

According to traditional Judeo-Christian-Islamic theism, God is an omniscient, omnipotent, and morally perfect agent. This volume shows that philosophy of religion needs to take seriously alternative concepts of the divine, and demonstrates the considerable philosophical interest that they hold.

HISTORICAL AND CRITICAL DICTIONARY,

Spinoza in English, is the first bibliography to document the entire 300-year record of books, monographs, dissertations and articles in English on Benedict Spinoza, as well as all translations of his works into English. Arranged alphabetically by author or editor, and internally cross-referenced in the case of anthologies and 'replies', this bibliography cites its own sources where appropriate and, in many cases, provides details on how to obtain out-of-print titles and unpublished dissertations. Additionally, it restores or corrects a good deal of earlier bibliographic detail and, beginning with titles from the mid-1800s, presents the citations in a uniform style. This second edition adds hundreds of citations, including dozens of titles hitherto overlooked, thus bringing the total to nearly 2700 on the main level (with hundreds of secondary references to later editions and reprints). It also provides an index and, occasionally, an abstract when the author's title inadequately describes the contents. As the only source of its kind, this bibliography is an indispensable reference tool for research libraries and individual scholars concerned with the life and works of Spinoza. Wayne Boucher's introduction is augmented by a preface by Professor Manfred Walther. --the most complete bibliography of works in English on Spinoza --enlarged, corrected and improved from first edition with numbered entries --uniquely comprehensive, current and authoritative --numbered entries and subject/title index for easy reference

"Here there be dragons"--this notation was often made on ancient maps to indicate the edges of the known world and what lay beyond. Heroes who ventured there were only as great as the beasts they encountered. This encyclopedia contains more than 2,200 monsters of myth and folklore, who both made life difficult for humans and fought by their side. Entries describe the appearance, behavior, and cultural origin of mythic creatures well-known and obscure, collected from traditions around the world.

Spinoza In English, A Bibliography

"Spinoza in English" is the first bibliography to bring together the entire 325-year record of books, monographs, dissertations, and articles in English on Benedict de Spinoza (1632-1677), including translations of his works into English. Well over 2100 citations are presented, bringing this record through early 1991. Arranged alphabetically by author or editor and internally cross-referenced for ease of use, this bibliography also cites its own sources where appropriate and, in many cases, provides guidance on how to obtain unpublished or out-of- print titles. Additionally, it restores or corrects a good deal of earlier bibliographic detail, identifies dozens of publications hitherto overlooked, and, beginning with titles from the mid-1800's, presents the citations in a uniform style.

A Critical Dictionary of English Literature and British and American Authors, Vol. 3

The common focus of these essays is the debate on the nature of science - often referred to by contemporaries as 'natural knowledge' - in Britain during the first half of the 19th century. A study of these debates allow us to see how British science of this period began to cast loose some of its earlier theological supports, but still relied on a moral framework to affirm its distinctive method, ethos and cultural value.

Before we can resolve or avoid an ethical problem, we need to understand what makes something ethical. Practical and Professional Ethics: Key Concepts introduces us to a series of real cases where the stakes can be high, the situations complex, and the ethical issues often difficult to see. Drawing on examples from medicine, law, science, and engineering, it offers a practical approach to thinking critically about the ethical problems that occur in our lives and professions, teaching us how to: § focus on the ethical aspects of any situation § distinguish between different kinds of ethical problems § tailor

our response to the kind of problem we face § construct arguments we can plausibly attribute to those involved § identify the role of power, discretion and moral blindness By guiding us through the concepts, issues and skills at play when we face an ethical problem, we learn how to find a solution. Ideal for students or professionals, this book provides the grounding required to become a more complex moral thinker, a quality that can be applied in a number of fields and jobs.

My Silver Planet

Reveals the hidden origins of kitsch in poetry from the eighteenth century. Taking its title from John Keats, *My Silver Planet* contends that the problem of elite poetry's relation to popular culture bears the indelible mark of its turbulent incorporation of vernacular poetry—a legacy shaped by nostalgia, contempt, and fraudulence. Daniel Tiffany reactivates and fundamentally redefines the concept of kitsch, freeing it from modernist misapprehension and ridicule, by tracing its origin to poetry's alienation from the emergent category of literature. Tiffany excavates the forgotten history of poetry's relation to kitsch, beginning with the exuberant revival of archaic (and often spurious) ballads in Britain in the early eighteenth century. In these controversial events of poetic imposture, Tiffany identifies a submerged pact—in opposition to the bourgeois values of literature—between elite and vernacular poetries. Tiffany argues that the ballad revival—the earliest explicit formation of what we now call popular culture—sparked a perilous but seemingly irresistible flirtation (among elite audiences) with poetic forgery that endures today in the ambiguity of the kitsch artifact: Is it real or fake, art or kitsch? He goes on to trace the genealogy of kitsch in texts ranging from nursery rhymes and poetic melodrama to the lyric commodities of Baudelaire. He scrutinizes the fascist “paradise” inscribed in Ezra Pound's *Cantos* as well as the avant-garde poetry of the New York School and its debt to pop and “plastic” art. By exposing and elaborating the historical poetics of kitsch, *My Silver Planet* transforms our sense of kitsch as a category of material culture.

The Lyre Book

"This work explores the lyric poem as an indispensable artifact at the intersection of literary and media studies and a critical index of the social history of technological change"--

Forms of Late Modernist Lyric

What do we mean when call something a lyric poem? How many kinds of lyric are there? Are there fewer now than there were in 1920 or 1820 or 1620? The purpose of *Forms of Late Modernist Lyric* is to show that our oldest styles of poetic articulation – the elegy, the ode, the hymn – have figured all too briefly in modern genealogies of lyric, and that they have proved especially seductive, curiously enough, to avant-garde practitioners in the Anglophone tradition. The poets in question – Jorie Graham, Frank O'Hara, Michael Haslam, J. H. Prynne, Claudia Rankine, and others – have thickened the texture of lyric practice at a time when the growing tendency in critical circles has been to dissolve points of difference within the genre itself. The broader aim of this volume is to demonstrate that experimental poets since 1945 have not always been rebarbative and anti-traditional, but rather that their recourse to familiar forms and shapes of thought should prompt us to reconsider late modernism as a crucial phase in the evolving history of lyric. The Work of World Literature

The contentious discourse around world literature tends to stress the 'world' in the phrase. This volume, in contrast, asks what it means to approach world literature by inflecting the question of the literary. Debates for, against, and around 'world literature' have brought renewed attention to the worldly aspects of the literary enterprise. Literature is studied with regard to its sociopolitical and cultural references, contexts and conditions of production, circulation, distribution, and translation. But what becomes of the literary when one speaks of world literature? Responding to Derek Attridge's theory of how literature 'works', the contributions in this volume explore in diverse ways and with attention to a variety of literary practices what it might mean to speak of 'the work of world literature'. The volume shows how attention to literariness complicates the ethical and political conundrums at the centre of debates about world literature.

Apparent Horizon

In his debut collection, *Some Trees* (1956), the American poet John Ashbery poses a question that resonates across his oeuvre and much of modern art: 'How could he explain to them his prayer / that nature, not art, might usurp the canvas?' When Ashbery asks this strange question, he joins a host of transatlantic avant-gardists--from the Dadaists to the 1960s neo-avant-gardists and beyond--who have dreamed of turning art into nature, of creating art that would be 'valid solely on its own terms, in the way nature itself is valid, in the way a landscape--not its picture--is aesthetically valid' (Clement Greenberg, 1939). *Invisible Terrain* reads Ashbery as a bold intermediary between avant-garde anti-mimeticism and the long western nature poetic tradition. In chronicling Ashbery's articulation of 'a completely new kind of realism' and his engagement with figures ranging from Wordsworth to Warhol, the book presents a broader case study of nature's dramatic transformation into a resolutely unnatural aesthetic resource in 20th-century art and literature. The story begins in the late 1940s with the Abstract Expressionist valorization of process, surface, and immediacy--summed up by Jackson Pollock's famous quip, 'I am Nature'--that so influenced the early New York School poets. It ends with 'Breezeway,' a poem about Hurricane Sandy. Along the way, the project documents Ashbery's strategies for literalizing the 'stream of consciousness' metaphor, his negotiation of pastoral and politics during the Vietnam War, and his investment in 'bad' nature poetry.

Invisible Terrain

Some would call *Neptune Park* a graphic novel--minus the pictures. Mumblecore, infidel pamphlet, lazy cento, its archive harbors a voice that sounds real enough--a verbal tranny--culled from the unhoused parley of shame (and its sisters), suburban squats, queer idylls, and teenage millionaires. Turning disparate texts and sources against the sensibilities of their origin, *Neptune Park* develops a phraseology--a synthetic vernacular--veering from contemporary pidgin and biblical homilies to Mother Goose and Virgilian epic. At once degraded in its lyric appetite and Sapphic in its emotional and stanzaic compression, *Neptune Park* fabricates an allegory of dissolution, sympathy, and remorse.

Neptune Park

It's become commonplace in contemporary culture for critics to proclaim the death of poetry. Poetry, they say, is no longer relevant to the modern world, mortally wounded by the emergence of new media technologies. In *Poetry Unbound*, Mike Chasar rebuts claims that poetry has become a marginal art

form, exploring how it has played a vibrant and culturally significant role by adapting to and shaping new media technologies in complex, unexpected, and powerful ways. Beginning with the magic lantern and continuing through the dominance of the internet, Chasar follows poetry's travels off the page into new media formats, including silent film, sound film, and television. Mass and nonprint media have not stolen poetry's audience, he contends, but have instead given people even more ways to experience poetry. Examining the use of canonical as well as religious and popular verse forms in a variety of genres, Chasar also traces how poetry has helped negotiate and legitimize the cultural status of emergent media. Ranging from *Citizen Kane* to *Leave It to Beaver* to best-selling Instapoet Rupi Kaur, this book reveals poetry's ability to find new audiences and meanings in media forms with which it has often been thought to be incompatible. Illuminating poetry's surprising multimedia history, *Poetry Unbound* offers a new paradigm for understanding poetry's still evolving place in American culture.

Poetry Unbound

This first critical book of essays on the poetry of Peter Gizzi shows how his work extends the traditions of nineteenth- and twentieth-century modernism while also reclaiming the living presence of the "lyric" in its capacity to sing of the human predicament. Gizzi is author of seven critically acclaimed books of poetry, including most recently *Threshold Songs* and *Archeophonics*, a finalist for the National Book Award in 2016. Lauded contributors, including Ben Lerner, Michael Snediker, Marjorie Perloff, and Charles Altieri, explore Gizzi's poetry for its embodiment of an American tradition—extending the poetics of Whitman, Dickinson, and Stevens, amongst others—while also exhibiting a twenty-first-century sensibility, perpetuating a new grammar and syntax to capture our place in the world today. Each essayist, in turn, works through close-readings of some of the most important poems of our times, enriching our understanding of a poetry of the mind which never loses track of what it means to feel.

Victorian Poetry

In the aftermath of World War II, the United States emerged as the dominant imperial power, and in US popular memory, the Second World War is remembered more vividly than the American Revolution. *American Literature in Transition, 1940–1950* provides crucial contexts for interpreting the literature of this period. Essays from scholars in literature, history, art history, ethnic studies, and American studies show how writers intervened in the global struggles of the decade: the Second World War, the Cold War, and emerging movements over racial justice, gender and sexuality, labor, and de-colonization. One recurrent motif is the centrality of the political impulse in art and culture. Artists and writers participated widely in left and liberal social movements that fundamentally transformed the terms of social life in the twentieth century, not by advocating specific legislation, but by changing underlying cultural values. This book addresses all the political impulses fueling art and literature at the time, as well as the development of new forms and media, from modernism and noir to radio and the paperback.

In the Air

Twenty-first-century culture is obsessed with books. In a time when many voices have joined to predict the death of print, books continue to resurface in new and unexpected ways. From the proliferation of "shelfies" to Jane Austen-themed leggings and from decorative pillows printed with beloved book covers to bookwork sculptures exhibited in prestigious collections, books are everywhere and are not just for reading. Writers have caught up with this trend: many contemporary novels depict books as central characters or fetishize paper and print thematically and formally. In *Bookishness*, Jessica Pressman examines the new status of the book as object and symbol. She explores the rise of "bookishness" as an identity and an aesthetic strategy that proliferates from store-window décor to experimental writing. Ranging from literature to kitsch objects, stop-motion animation films to book design, Pressman considers the multivalent meanings of books in contemporary culture. Books can represent shelter from—or a weapon against—the dangers of the digital; they can act as memorials and express a sense of loss. Examining the works of writers such as Jonathan Safran Foer, Jennifer Egan, Mark Z. Danielewski, and Leanne Shapton, Pressman illuminates the status of the book as a fetish object and its significance for understanding contemporary fakery. Bringing together media studies, book history, and literary criticism, *Bookishness* explains how books still give meaning to our lives in a digital age.

American Literature in Transition, 1940–1950

Techno-Magism explores how British Romantic literature abuts and is organized around both print and non-print media. The book explores not only the print, pictorial art, and theater of early nineteenth-century England and Europe but also communicative technologies invented after the British Romantic period, such as photography, film, video, and digital screens. This proleptic abutting points to one way we can understand the implicit exceptionality wagered by reading Romanticism through media studies and media theory. Techno-Magism argues that both media studies and the concept of mediation in general can benefit from a more robust confrontation with, or recovery of, the arguments of deconstruction, an unavoidable consequence of thinking about the relationship between Romanticism and media. The book thinks that relationship through the catachrestic practice of a techno-magism, a technics of inscription always outside the causalities of a dialectical economy. The book further pursues two interrelated ideas: the structural incommensurability of the cut and the unapologetic presentism of the constellation. Marked by its late capitalist moment of composition, the book explores the continuity between the social character of Romantic and post-Romantic media, in terms of commodity culture, revolution, and the ecological devastation of the anthropocene.

Bookishness

Poetics of Social Engagement emphasizes the ways in which innovative American poets have blended art and social awareness, focusing on aesthetic experiments and investigations of ethnic, racial, gender, and class subjectivities. Rather than consider poetry as a thing apart, or as a tool for asserting identity, this volume's poets create sites, forms, and modes for entering the public sphere, contesting injustices, and reimagining the contemporary. Like the earlier anthologies in this series, this volume includes generous selections of poetry as well as illuminating poetics statements and incisive essays. This unique organization makes these books invaluable teaching tools. A companion website will present audio of each poet's work. Techno-Magism

The variety of contemporary American poetry leaves many readers overwhelmed. The critic, scholar, and poet Stephen Burt sets out to help. Beginning in the early 1980s, where critical consensus ends, he presents 60 poems, each with an original essay explaining how the poem works, why it matters, and how it speaks to other parts of art and culture.

American Poets in the 21st Century

The eighteenth-century naturalist Erasmus Darwin (grandfather of Charles) argued that plants are animate, living beings and attributed them sensation, movement, and a certain degree of mental activity, emphasizing the continuity between humankind and plant existence. Two centuries later, the understanding of plants as active and communicative organisms has reemerged in such diverse fields as plant neurobiology, philosophical posthumanism, and ecocriticism. The Language of Plants brings together groundbreaking essays from across the disciplines to foster a dialogue between the biological sciences and the humanities and to reconsider our relation to the vegetal world in new ethical and political terms. Viewing plants as sophisticated information-processing organisms with complex communication strategies (they can sense and respond to environmental cues and play an active role in their own survival and reproduction through chemical languages) radically transforms our notion of plants as unresponsive beings, ready to be instrumentally appropriated. By providing multifaceted understandings of plants, informed by the latest developments in evolutionary ecology, the philosophy of biology, and ecocritical theory, The Language of Plants promotes the freedom of imagination necessary for a new ecological awareness and more sustainable interactions with diverse life forms. The Poem Is You

Timothy Morton argues that ecological awareness in the present Anthropocene era takes the form of a strange loop or Möbius strip, twisted to have only one side. Deckard travels this oedipal path in *Blade Runner* (1982) when he learns that he might be the enemy he has been ordered to pursue. Ecological awareness takes this shape because ecological phenomena have a loop form that is also fundamental to the structure of how things are. The logistics of agricultural society resulted in global warming and hardwired dangerous ideas about life-forms into the human mind. Dark ecology puts us in an uncanny position of radical self-knowledge, illuminating our place in the biosphere and our belonging to a species in a sense that is far less obvious than we like to think. Morton explores the logical foundations of the ecological crisis, which is suffused with the melancholy and negativity of coexistence yet evolving, as we explore its loop form, into something playful, anarchic, and comedic. His work is a skilled fusion of humanities and scientific scholarship, incorporating the theories and findings of philosophy, anthropology, literature, ecology, biology, and physics. Morton hopes to reestablish our ties to nonhuman beings and to help us rediscover the playfulness and joy that can brighten the dark, strange loop we traverse.

The Cute tracks the astonishing impact of a single aesthetic category on post-war and contemporary art, and on the vast range of cultural practices and discourses on which artists draw. From robots and cat videos to ice cream socials, *The Cute* explores the ramifications of an aesthetic 'of' or 'about' minorness - or what is perceived to be diminutive, subordinate, and above all, unthreatening - on the shifting forms and contents of art today. This anthology is the first of its kind to show how contemporary artists have worked on and transformed the cute, and in ways that not only complexify its meaning, but reshape their own artistic practices. Artists surveyed include Peggy Ahwesh, Cosima Von Bonin, Nayland Blake, Paul Chan, Henry Darger, Adrian Howells, Juliana Huxtable, Larry Johnson, Mike Kelley, Dean Kenning, Wyndham Lewis, Jeff Koons, Sean-Kierre Lyons, Mammalian Diving Reflex, Tala Madani, Annette Messenger, Mariko Mori, Charlemagne Palestine, Mika Rottenberg, Allen Ruppersberg, Jack Smith, Carolee Schneeman, Kara Walker, Andy Warhol, Yoshitomo Nara. Writers include Sasha Archibald, Roland Barthes, Leigh Claire La Berge, Ian Bogost, Lauren Berlant, Jennifer Doyle, Lee Edelman, Stephen Jay Gould, Angelik Vizcarrondo-Laboy, Bridget Minamore, Juliane Rebentisch, Frances Richard, John Roberts, Friedrich Schiller, Peter Schjeldahl, Kanako Shiokawa.

Dark Ecology

Bringing thinking from the arts and digital humanities into dialogue with one another, this book investigates what it means to be alive in a world that is structured by technology, the media, and an ever expanding sense of a global community. In this unique time in our history, when we are bombarded by signs and symbols and constantly connected into gadgets, apps, and networks, it has become increasingly difficult to navigate what has been dubbed a 'post-truth' world. Critiques taken from post-colonial studies and neoanimism help challenge the paranoia that has become endemic and, indeed, symptomatic to global realities we are now witnessing. This pertains not only to the ecological degradation of the planet but also to the lingering remnants of eurocentrism and racism that have taken the forms of nationalism and fascism. As a guide, an updated version of what Michel Foucault called an arts of existence may help us sail in these treacherous and confusing waters. Diving into post-structuralist French theory, through American feminism, and emerging out of media studies, this book argues for an ethical and aesthetic form of self-fashioning that runs counter to processes of subjection and mediatization. This craft of life, as Plato called it, is a space of disjunction and liberation, between subjectivity and other, where something new and different has the potential to emerge and mould to our likeness.

Poetry has long been regarded as the least accessible of literary genres. But how much does the obscurity that confounds readers of a poem differ from, say, the slang that seduces listeners of hip-hop? *Infidel Poetics* examines not only the shared incomprehensibilities of poetry and slang, but poetry's genetic relation to the spectacle of underground culture. Charting connections between vernacular poetry, lyric obscurity, and types of social relations—networks of darkened streets in preindustrial cities, the historical underworld of taverns and clubs, the subcultures of the avant-garde—Daniel Tiffany shows that obscurity in poetry has functioned for hundreds of years as a medium of alternative

societies. For example, he discovers in the submerged tradition of canting poetry and its eccentric genres—thieves' carols, drinking songs, beggars' chants—a genealogy of modern nightlife, but also a visible underworld of social and verbal substance, a demimonde for sale. Ranging from Anglo-Saxon riddles to Emily Dickinson, from the icy logos of Parmenides to the monadology of Leibniz, from Mother Goose to Mallarmé, *Infidel Poetics* offers an exhilarating account of the subversive power of obscurity in word, substance, and deed.

Arts of Subjectivity: A New Animism for the Post-Media Era

Bobbing alongside Margery Kempe—an illiterate medieval mystic who dictated the first autobiography in English—the ragged voice of Cry Baby Mystic finds itself drawn into strange predicaments that are not its own and ferried into abandoned spaces by the gearing of stardom and shame. The revolving sentences overheard by the reader--a muffled chorus of Brechtian aftershocks--survive only as traces of sorrow now craved by all who have known it: sound gossiping the unsound, the excess of the pilgrim. A person climbs out and never comes home.

"Epic Negation examines the dialectical turn of modernist poetry over the interwar period, arguing that late modernism inverts the method of Ezra Pound's "poem including history" to conceive a negated mode of epic, predicated on the encryption of disarticulated historical content. Compelled to register the force of a totality it cannot represent, this negated epic reorients the function of poetic language and reference, remaking the poem, and late modernism generally, as a critical instrument of dialectical reason. Part I reads *The Waste Land* alongside the review it prefaced, *The Criterion*, arguing that the poem establishes the editorial method with which T. S. Eliot constructs the review's totalizing account of culture. Dividing the epic's critical function from its style, Eliot not only includes history differently, but also formulates an intricately dialectical account of the interwar crisis of bourgeois culture, formed in the image of a Marxian critique it opposes. Part II turns to the second war's onset, tracing the dislocated formal effects of an epic gone underground. In the elegies and pastorals of W. H. Auden and Louis MacNeice, lyric forms divulge the determining force of unmentionable but universal events, dividing experience against consciousness. With H.D.'s war trilogy, produced in a terse exchange with Freud's *Moses*, even the poetic image lapses, associating epic with the silent historical force of the unconscious as such"--

"Word of Mouth brings together the insights of queer and lyric theory to tell the story of how gossip modeled forms of sociality and voice that poets experimented with over the course of the twentieth century. Through a set of case studies of culturally diverse American poets--Gertrude Stein, Langston Hughes, Frank O'Hara, James Merrill, and others--who absorbed and contended with the loose talk that swirled about them and their work, the book argues that gossip became a vehicle for the performance of alternative sexualities and concomitant meditations on alternative modes of poetic practice. At the heart of this argument is a queer revaluation of modern lyric poetry. Attending to gossip's key role in modern and contemporary poetry enables a recognition of the unpredictable ways that conventional understandings of the modern lyric poem--as, for example, an utterance smudging the lines between private and public, knowing and unknowing, intimacy and strangeness--have been shaped by, and afforded a uniquely suitable space for, the expression of queer sensibilities. More than simply mapping a curious poetic mode, then, *Word of Mouth* contributes a crucial, and largely neglected, queer perspective to current lyric studies and its renewed scholarly debate over the practices and forms of lyric poetry. The book presents new and instructive queer contexts for understanding the influential

formal achievements of Stein, Hughes, O'Hara, and Merrill, and uncovers the unexpected ways that the history of the modern lyric intertwines with histories of sexuality"--

Poetic Modernism in the Culture of Mass Print

The contentious discourse around world literature tends to stress the 'world' in the phrase. This volume, in contrast, asks what it means to approach world literature by inflecting the question of the literary. Debates for, against, and around 'world literature' have brought renewed attention to the worldly aspects of the literary enterprise. Literature is studied with regard to its sociopolitical and cultural references, contexts and conditions of production, circulation, distribution, and translation. But what becomes of the literary when one speaks of world literature? Responding to Derek Attridge's theory of how literature 'works', the contributions in this volume explore in diverse ways and with attention to a variety of literary practices what it might mean to speak of 'the work of world literature'. The volume shows how attention to literariness complicates the ethical and political conundrums at the centre of debates about world literature. In this volume: Derek Attridge on the work of translation Lorna Burns on world literature and postcolonialism Francesco Giusti on gestural community Benjamin Lewis Robinson on the world without literature Rashmi Varma on extractivism and indigeneity Dirk Wiemann on a literary ethics of commitment Jarad Zimble on world literary criticism With an afterword by Emil Apter

Word of Mouth

Marked by names such as W. B. Yeats, James Joyce and Patrick Pearse, the decade 1910–1920 was a period of revolutionary change in Ireland, in literature, politics and public opinion. What fed the creative and reformist urge besides the circumstances of the moment and a vision of the future? The leading experts in Irish history, literature and culture assembled in this volume argue that the shadow of the past was also a driving factor: the traumatic, undigested memory of the defeat and death of the charismatic national leader Charles Stewart Parnell (1846-1891). The authors reassess Parnell's impact on the Ireland of his time, its cultural, religious, political and intellectual life, in order to trace his posthumous influence into the early twentieth century in fields such as political activism, memory culture, history-writing, and literature.

The Work of World Literature

Vladimir Nabokov, bilingual writer of dazzling masterpieces, is a phenomenon that both resists and requires contextualization. This book challenges the myth of Nabokov as a sole genius who worked in isolation from his surroundings, as it seeks to anchor his work firmly within the historical, cultural, intellectual and political contexts of the turbulent twentieth century. Vladimir Nabokov in Context maps the ever-changing sites, people, cultures and ideologies of his itinerant life which shaped the production and reception of his work. Concise and lively essays by leading scholars reveal a complex relationship of mutual influence between Nabokov's work and his environment. Appealing to a wide community of literary scholars this timely companion to Nabokov's writing offers new insights and approaches to one of the most important, and yet most elusive writers of modern literature.

Parnell and his Times

"What began in 1959 as a simple homage to the modernist poet H.D. (Hilda Doolittle) developed into an expansive and unique quest for a poetics that would fuel Duncan's great work into the 1960s and 1970s. A meditation on both the roots of modernism and its manifestation in the writings of H.D., Djuna Barnes, Ezra Pound, D.H. Lawrence, Gertrude Stein, William Carlos Williams, Virginia Woolf, and many others, Duncan's wide-ranging work is especially notable for illuminating the role women played in creating literary modernism"--From publisher description.

Exploring the related cultural forms of architecture and literature in the modern era

The H.D. Book

Twentieth-century Spanish poetry has received comparatively little attention from critics writing in English. Andrew Debicki now presents the first English-language history published in the United States to examine the sweep of modern Spanish verse. More important, he is the first to situate Spanish poetry in the context of European modernity, to trace its trajectory from the symbolists to the postmodernists.

Avoiding the rigid generational schemes and catalogs of names found in traditional Hispanic literary histories, Debicki offers detailed discussions of salient books and texts to construct an original and compelling view of his subject. He demonstrates that contemporary Spanish verse is rooted in the modern tradition and poetics that see the text as a unique embodiment of complex experiences. He then traces the evolution of that tradition in the early decades of the century and its gradual disintegration from the 1950s to the present as Spanish poetry came to reflect features of the postmodern, especially the poetics of text as process rather than as product. By centering his study on major periods and examining within each the work of poets of different ages, Debicki develops novel perspectives. The late 1960s and early 1970s, for example, were not merely the setting for a new aestheticist generation but an era of exceptional creativity in which both established and new writers engendered a profound, intertextual, and often self-referential lyricism. This book will be essential reading for specialists in modern Spanish letters, for advanced students, and for readers inter-ested in comparative literature.

Architecture and Modern Literature

A comparative account of the musical and cultural acts of Zappa and his cohort, collaborator and antagonist Captain Beefheart. Written in the iconoclastic spirit of Zappa's art, this book traces the mixed media experiments of California freakdom through the dada blues of Beefheart, mapping out the pleasures of imaginative excess.

Spanish Poetry of the Twentieth Century

"In this bold, speculative, and immensely learned study . . . Tiffany['s concept of] lyric substance--the 'sense' of materiality supplied to us by poets like Wallace Stevens and Marianne Moore--constitutes a world whose inaccessibility is legitimized by the principles of scientific materialism. Thus lyric, too long on the periphery of materialist discourse, emerges as being squarely in its center."—Marjorie Perloff, Stanford University, author of *The Futurist Moment* and *Wittgenstein's Ladder* "A lyrical inquiry into the circle of ideas: materialism, science, poetics. Winding through the whole is a fascinating exploration of toys--children's toys, physicists' toy models, philosophers' robots, nuclear weaponeers' toy towns. . . . My hope is that this book will contribute to a growing interest not in cleaving science from the arts but rather in exploring, poetically, the language, images and things that illuminate both." —Peter Galison, Mallinckrodt Professor of the History of Science and Physics, Harvard University "A brilliant achievement, synthesizing the history of science and poetics, technology and the arts, in an iconology of materialism. . . All that is solid melts into air in this book, but just as quickly the airy poems of our climate condense into material, objective forms, weird gadgets, and objects of scientific research. . . A wonderful feast of learning and wit." —W. J. T. Mitchell, University of Chicago, author of *Picture Theory* and *Iconology* "In clear-eyed and gorgeous prose, *Toy Medium* moves the question of Art's encounter with Science to an utterly original point of conflagration: where matter is mostly not matter. . . . Going to the bottom of the Imagination, where it still truly involves images, Tiffany explores how we have learned to see the inscrutable via our imagistic grasp of materiality. . . . This book is daring, brilliant, and deeply clever."—Jorie Graham, Boylston Professor of English, Harvard University, author of *Materialism* and winner of the Pulitzer Prize

Imperial Leather chronicles the dangerous liaisons between gender, race and class that shaped British imperialism and its bloody dismantling. Spanning the century between Victorian Britain and the current struggle for power in South Africa, the book takes up the complex relationships between race and sexuality, fetishism and money, gender and violence, domesticity and the imperial market, and the gendering of nationalism within the zones of imperial and anti-imperial power.

The Dada Painters and Poets

The past is what happened. History is what we remember and write about that past, the narratives we craft to make sense out of our memories and their sources. But what does it mean to look at the past and

to remember that "nothing happened"? Why might we feel as if "nothing is the way it was"? This book transforms these utterly ordinary observations and redefines "Nothing" as something we have known and can remember. "Nothing" has been a catch-all term for everything that is supposedly uninteresting or is just not there. It will take some—possibly considerable—mental adjustment before we can see Nothing as Susan A. Crane does here, with a capital "n." But Nothing has actually been happening all along. As Crane shows in her witty and provocative discussion, Nothing is nothing less than fascinating. When Nothing has changed but we think that it should have, we might call that injustice; when Nothing has happened over a long, slow period of time, we might call that boring. Justice and boredom have histories. So too does being relieved or disappointed when Nothing happens—for instance, when a forecasted end of the world does not occur, and millennial movements have to regroup. By paying attention to how we understand Nothing to be happening in the present, what it means to "know Nothing" or to "do Nothing," we can begin to ask how those experiences will be remembered. Susan A. Crane moves effortlessly between different modes of seeing Nothing, drawing on visual analysis and cultural studies to suggest a new way of thinking about history. By remembering how Nothing happened, or how Nothing is the way it was, or how Nothing has changed, we can recover histories that were there all along.

Imperial Leather

In her extensive Introduction, Lawton has highlighted the historical development of the movement and has related futurism both to the Russian national scene and to avant-garde movements worldwide.

Nothing Happened

Focusing on the necrophilic dimension of Pound's poetry and the inflections of materiality enabled by the modernist image, Tiffany finds a continuum between Decadent practice and the avant-garde, between the image's prehistory and its political afterlife, between the "corpse language" of Victorian poetry and a conception of the "radioactive" image

Words in Revolution

Thomas Mann predicted that no manner or mode in literature would be so typical or so pervasive in the twentieth century as the grotesque. Assuredly he was correct. The subjects and methods of our comic literature (and much of our other literature) are regularly disturbing and often repulsive -- no laughing matter. In this ambitious study, John R. Clark seeks to elucidate the major tactics and topics deployed in modern literary dark humor. In Part I he explores the satiric strategies of authors of the grotesque, strategies that undercut conventional usage and form: the de-basement of heroes, the denigration of language and style, the disruption of normative narrative technique, and even the debunking of authors themselves. Part II surveys major recurrent themes of grotesquerie: tedium, scatology, cannibalism, dystopia, and Armageddon or the end of the world. Clearly the literature of the grotesque is obtrusive and ugly, its effect morbid and disquieting -- and deliberately meant to be so. Grotesque literature may be unpleasant, but it is patently insightful. Indeed, as Clark shows, all of the strategies and topics employed by this literature stem from age-old and spirited traditions. Critics have complained about this grim satiric literature, asserting that it is dank, cheerless, unsavory, and negative. But such an interpretation is far too simplistic. On the contrary, as Clark demonstrates, such grotesque writing, in its power and its prevalence in the past and present, is in fact conventional, controlled, imaginative, and vigorous -- no mean achievements for any body of art.

Radio Corpse

The second volume of writings by Los Angeles artist Mike Kelley, focusing on his own work. What John C. Welchman calls the "blazing network of focused confluences" from which Mike Kelley's styles are generated is on display in all its diversity in this second volume of the artist's writings. The first volume, *Foul Perfection*, contained thematic essays and writings about other artists; this collection concentrates on Kelley's own work, ranging from texts in "voices" that grew out of scripts for performance pieces to expository critical and autobiographical writings. *Minor Histories* organizes Kelley's writings into five sections. "Statements" consists of twenty pieces produced between 1984 and 2002 (most of which were written to accompany exhibitions), including "Ajax," which draws on Homer, Colgate- Palmolive, and Longinus to present its eponymous hero; "Some Aesthetic High Points," an exercise in autobiography that counters the standard artist bio included in catalogs and press releases; and a sequence of "creative writings" that use mass cultural tropes in concert with high art mannerisms—approximating

in prose the visual styles that characterize Kelley's artwork. "Video Statements and Proposals" are introductions to videos made by Kelley and other artists, including Paul McCarthy and Bob Flanagan and Sheree Rose. "Image-Texts" offers writings that accompany or are part of artworks and installations. This section includes "A Stopgap Measure," Kelley's zestful millennial essay in social satire, and "Meet John Doe," a collage of appropriated texts. "Architecture" features an discussion of Kelley's Educational Complex (1995) and an interview in which he reflects on the role of architecture in his work. Finally, "Ufology" considers the aesthetics and sexuality of space as manifested by UFO sightings and abduction scenarios.
