Cartelera: Spanish Language and Culture Through Film

Cartelera provides an exciting learning experience where culture takes a central role as the context for linguistic production. Based on eight highly acclaimed feature films from Spain and Latin America, this unique book is designed for students of Spanish language and culture at the intermediate to advanced level. It may be used either as the primary text in a culture, conversation, or film course, or as an enriching supplement to any existing language program. Specifically developed to exploit the content and themes presented in each of the films, the activities in Cartelera are designed to encourage language development while fostering a greater appreciation for and a heightened cultural awareness of the Spanish-speaking world. Through the use of discussion, debate, analysis, dramatization, and creative writing, students will expand their vocabulary and significantly improve their language proficiency in a stimulating environment.

Hollywood Goes Latin

In the 1920s, Los Angeles enjoyed a buoyant homegrown Spanish-language culture comprised of local and itinerant stock companies that produced zarzuelas, stage plays, and variety acts. After the introduction of sound films, Spanish-language cinema thrived in the city's downtown theatres, screening throughout the 1930s, 1940s, and 1950s in venues such as the Teatro Eléctrico, the California, the Roosevelt, the Mason, the Azteca, the Million Dollar, and the Mayan Theater, among others. With the emergence and growth of Mexican and Argentine sound cinema in the early to mid-1930s, downtown Los Angeles quickly became the undisputed capital of Latin American cinema culture in the United States. Meanwhile, the advent of talkies resulted in the Hollywood studios hiring local and international talent from Latin America and Spain for the production of films in Spanish. Parallel with these productions, a series of Spanish-language films were financed by independent producers. As a result, Los Angeles can be viewed as the most important hub in the United States for the production, distribution, and exhibition of films made in Spanish for Latin American audiences. In April 2017, the International Federation of Film Archives organized a symposium, "Hollywood Goes Latin: Spanish-Language Cinema in Los Angeles," which brought together scholars and film archivists from

all of Latin America, Spain, and the United States to discuss the many issues surrounding the creation of Hollywood's "Cine Hispano." The papers presented in this two-day symposium are collected and revised here. This is a joint publication of FIAF and UCLA Film & Television Archive.

The First Few Minutes of Spanish Language Films

The first few minutes of a film orient the viewer, offering cues for a richer, more nuanced reading. With this premise, the author provides many insights into the history of Spanish language film, encouraging an enhanced understanding of the Spanish/Hispanic canon commonly taught in courses on film. The author explores *El espíritu de la colmena* (1973), *La historia oficial* (1985), *Fresa y chocolate* (1994), *El crimen del padre Amaro* (2002), *Abre los ojos* (1997), *Te doy mis ojos* (2003) and Carlos Saura's flamenco trilogy--*Bodas de sangre* (1981), *Carmen* (1983) and *El amor brujo* (1986), among others.

Alton's Paradox

Alton's Paradox builds upon extensive archival and primary research, but uses a single text as its point of departure—a 1934 article by the Hungarian American cinematographer John Alton in the Hollywood-published *International Photographer*. Writing from Argentina, Alton paradoxically argues of cine nacional, "The possibilities are enormous, but not until foreign technicians will take the matter in their hands and with foreign organization will there be local industry." Nicolas Poppe argues that Alton succinctly articulates a line of thought commonly held across Latin America during the early sound period but little explored by scholars: that foreign labor was pivotal to the rise of national film industries. In tracking this paradox from Hollywood to Mexico to Argentina and beyond, Poppe reconsiders a series of notions inextricably tied to traditional film historiography, including authorship, (dis)continuation, intermediality, labor, National Cinema, and transnationalism. Wide-angled views of national film industries complement close-up analyses of the work of José Mojica, Alex Phillips, Juan Orol, Ángel Mentasti, and Tito Davison.

Historical Dictionary of Spanish Cinema

Spanish cinema is emerging as one of the most exciting, fascinating, and special cinemas in the world. Not only are others viewing Spanish films, but they are adopting Spanish producers and Spanish actors as their own. While Spanish cinema has been maturing for a long time and has been producing excellent directors, actors, and films for decades—including during the dark times of the Franco regime—now is it winning numerous fans not only at home but also abroad. And with directors like Pedro Almodóvar, actors and actresses like Javier Bardem and Penélope Cruz, and films such as *Abre los ojos* and *Alatriste* to build upon, the outlook for Spanish Cinema appears brighter than ever. The Historical Dictionary of Spanish Cinema provides a better understanding of the role Spanish cinema has played in film history through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on producers, directors, film companies, actors, and films.

Comparison of novel and film: La Familia de Pascual Duarte

Essay from the year 2002 in the subject Romance Languages - Spanish Studies, grade: 1,8 (A-), University College Cork (Spanish), course: HS 2057 Cinema & Identity in Spain & Latin America,

language: English, abstract: The film version of the novel *La Familia de Pascual Duarte* by Camilo José Cela is written and directed by Ricardo Franco Rubio and was first screened in 1975. Without any background knowledge the film seems hard to follow, boring and depressing, but by watching it with background knowledge, just as Spanish history, Spanish cinema history, the novel itself or by watching the film for the second time one can realise, that it is a very demanding film full of symbols, of small important details which all have a second meaning, a hidden meaning. Turning a novel into a film is a very complex task, one cannot just take the book and, without changing anything, trying to make a film out of it. There are huge differences between reading a book and watching the same thing on screen: "the analysis of a literary text reveals the manner in which linguistic and literary tools such as graphemes, syntax, tropes, shadings, and narrative strategies create a story and its characters. The cinematic rendering of that verbal fiction is accomplished by means of cinematic tools such as mise-en-scène, photography and camera work, editing, sound, narrative strategies, and choice of actors."1 So there must be some changes, because some details of books that are good to read, are not necessarily good to watch! It is difficult to say, when is a film version of a novel "good" or "bad", because the filmmakers work with other instruments, in a "good" film version we do not see exactly the same, that we imagined while reading the book. By comparing the novel to the film there are similarities and differences, in the film there are characters and scenes left out but also things added, which do not appear in the book. "Novel and film share several basic structural elements. 1) Both focus on the text's central character, Pascual Duarte, an agricultural labourer living with his family in an isolated, unnamed village in Extremadura, Spain. The time frame is principally the first three decades of the twentieth century. 2) Both texts present a case of individual violence that, while enacted within a circumscribed social sphere, resonates with meaning on a national level. 3) Both texts, hindered by the censorship of the Franco years, mask the significance of the social and historical context for criminal behaviour. 4) Both texts actively engage the receptor in the task of providing a motive for the extremely violent behaviour exhibited by the protagonist."2

Land of Necessity

Published in cooperation with the William P. Clements Center for Southwest Studies, Southern Methodist University. In *Land of Necessity*, historians and anthropologists unravel the interplay of the national and transnational and of scarcity and abundance in the region split by the 1,969-mile boundary line dividing Mexico and the United States. This richly illustrated volume, with more than 100 images including maps, photographs, and advertisements, explores the convergence of broad demographic, economic, political, cultural, and transnational developments resulting in various forms of consumer culture in the borderlands. Though its importance is uncontestable, the role of necessity in consumer culture has rarely been explored. Indeed, it has been argued that where necessity reigns, consumer culture is anemic. This volume demonstrates otherwise. In doing so, it sheds new light on the history of the U.S.-Mexico borderlands, while also opening up similar terrain for scholarly inquiry into consumer culture. The volume opens with two chapters that detail the historical trajectories of consumer culture and the borderlands. In the subsequent chapters, contributors take up subjects including smuggling, tourist districts and resorts, purchasing power, and living standards. Others address home décor, housing, urban development, and commercial real estate, while still others consider the circulation of cinematic images, contraband, used cars, and clothing. Several contributors discuss the movement of people across borders, within cities, and in retail spaces. In the two afterwords, scholars reflect on the U.S.-Mexico borderlands as a particular site of trade in labor, land, leisure, and commodities, while also musing about consumer culture as a place of complex political and economic negotiations. Through its focus on the borderlands, this volume provides valuable insight into the historical and contemporary aspects of the big "isms" shaping modern life: capitalism, nationalism, transnationalism, globalism, and, without a doubt, consumerism. This monumental collection of over one thousand proverbs from Palestine and across the Arabic-speaking world provides an informative and entertaining treasure trove of knowledge for anyone with interest in this remarkable culture. The central role of proverbs in daily speech originates from a universal reverence in Arab culture for language and especially poetry. The Arabic language has enjoyed a long tradition of both secular and religious poetry, beginning with the pre-Islamic Jahiliyya poets and continuing today in popular verse. Arabs everywhere take great pride in this tradition and in the Arabic language itself, a pride which is evident in the frequent usage of proverbs in literature, the media and every-day conversation. Given the integral role of proverbs in Palestinian life, and

indeed throughout all Arab cultures, the study of such proverbs as used by Palestinians offers a unique perspective on the beliefs and values shared among all Arabs.

In 2015, the Mexican state counted how many of its citizens identified as Afro-Mexican for the first time since independence. *Finding Afro-Mexico* reveals the transnational interdisciplinary histories that led to this celebrated reformulation of Mexican national identity. It traces the Mexican, African American, and Cuban writers, poets, anthropologists, artists, composers, historians, and archaeologists who integrated Mexican history, culture, and society into the African Diaspora after the Revolution of 1910. Theodore W. Cohen persuasively shows how these intellectuals rejected the nineteenth-century racial paradigms that heralded black disappearance when they made blackness visible first in Mexican culture and then in post-revolutionary society. Drawing from more than twenty different archives across the Americas, this cultural and intellectual history of black visibility, invisibility, and community-formation questions the racial, cultural, and political dimensions of Mexican history and Afro-diasporic thought.

Including essays by leading film historians, the book offers groundbreaking historical research on film censorship in major film production countries and explore such innovative themes as film censorship and authorship, religion, and colonialism.

Exploraciones Curso Intermedio (with Student Activities Manual)

This collection offers a new lens through which to examine Spain's cinema production following the isolation imposed by the Franco regime. The seventeen key films analyzed in the volume span a period of 35 years that have been crucial in the development of Spain, Spanish democracy and Spanish cinema. They encompass different genres (horror, thriller, melodrama, social realism, documentary), both popular (*Los abrazos rotos/Broken Embraces*, *Vicky Cristina Barcelona*) and more select art house fare (*En la ciudad de Sylvia/In the City of Sylvia*, *El espíritu de la colmena/Spirit of the Beehive*) and are made in English (as both first and second language), Basque, Castilian, Catalan and French. Offering an expanded understanding of "national" cinemas, the volume explores key works by Guillermo del Toro and Lucrecia Martel alongside an examination of the ways in which established auteurs (Almodóvar, José Garci, Carlos Saura) and younger generations of filmmakers (Cesc Gay, Amenábar, Bollaín) have harnessed cinematic language towards a commentary on the nation-state. The result is a bold new study of the ways in which film has created new prisms that have determined how Spain is positioned in the global marketplace.

Popular Proverbs

India's greatest film-maker on the art and craft of films Exactly fifty years ago, in 1955, the release of *Pather Panchali* heralded the arrival of a master in the world of cinema. Over the next forty years, Satyajit Ray came to be regarded as one of the world's finest film-makers ever. Today, more than a decade after his death, he continues to be India's most respected name in international film circles. Apart from his achievements as a director, Ray was also a prolific writer of novels, short stories, and essays on cinema. *Speaking of Films* brings together some of Ray's most memorable writings on film and film-making. With the masterly precision and clarity that characterize his films, Ray discusses a wide array of subjects: the structure and language of cinema with special reference to his adaptations of Tagore and Bibhuti Bhushan Bandopadhyay, the appropriate use of background music and dialogue in films, the relationship between a film-maker and a film critic, and important developments in cinema like the advent of sound and colour. He also writes about his own experiences, the challenges of working with rank amateurs, and the innovations called for when making a film in the face of technological, financial and logistical constraints. In the process, Ray provides fascinating behind-the-scenes glimpses of the people who worked with him—the intricacies of getting Chhabi Biswas, who had no ear for music, to play a patron of classical music in Jalsaghar; the incredible memory of the seventy-five-year-old Chunibala Devi, Indir Thakrun of *Pather Panchali*, and her remarkable attention to details. This first-ever translation

of Bishay Chalachitra, a seminal collection of essays on cinema, *Speaking of Films* retains the lucidity and simplicity that is a hallmark of Ray's writing, and gives an invaluable insight into the mind of a genius.

Finding Afro-Mexico

Exploring the culture and media of the Americas, this handbook places particular emphasis on collective and intertwined experiences and focuses on the transnational or hemispheric dimensions of cultural flows and geocultural imaginaries that shape the literature, arts, media and other cultural expressions in the Americas. The Routledge Handbook to the Culture and Media of the Americas charts the pervasive, asymmetrical flows of cultural products and capital and their importance in the development of the Americas. The volume offers a comprehensive understanding of how inter-American communication is constituted, framed and structured, and covers the artistic and political dimensions that have shaped literature, art and popular culture in the region. Forty-six chapters cover a range of inter-American key concepts and dynamics, divided into two parts: Literature and Music deals with inter-American entanglements of artistic expressions in the Western Hemisphere, including music, dance, literary genres and developments. Media and Visual Cultures explores the inter-American dimension of media production in the hemisphere, including cinema and television, photography and art, journalism, radio, digital culture and issues such as freedom of expression and intellectual property. This multidisciplinary approach will be of interest to a broad array of academic scholars and students in history, sociology, political science; and cultural, postcolonial, gender, literary, globalization and media studies.

Nordic Film Cultures and Cinemas of Elsewhere introduces a new concept to Nordic film studies as well as to other small national, transnational and world cinema traditions. Examining overlooked 'elsewheres', the book presents Nordic cinemas as international, cosmopolitan, diasporic and geographically dispersed, from their beginnings in the early silent period to their present 21st-century dynamics. Exploring both canonical works by directors like Ingmar Bergman and Lars von Trier, as well as a wide range of unknown or overlooked narratives of movement, synthesis and resistance, the book offers a new model of inquiry into a multi-varied Scandinavian cultural lineage, and into small nation and pan-regional world cinemas.

Spanish Cinema 1973-2010

A scathing attack on Wall Street's illegal ties to Nazi Germany before WWII—and the postwar white-washing of Nazi business leaders by the US government Prior to World War II, German industry was controlled by an elite group who had used their money and influence to help bring the Nazi Party to power. After the Allies had successfully occupied Germany and removed the Third Reich, the process of reconstructing the devastated nation's economy began under supervision of the US government. James Stewart Martin, who had assisted the Allied forces in targeting key areas of German industry for aerial bombardment, returned to Germany as the director of the Division for Investigation of Cartels and External Assets in American Military Government, a position he held until 1947. Martin was to break up the industrial machine these cartels controlled and investigate their ties to Wall Street. What he discovered was shocking. Many American corporations had done business with German corporations who helped fund the Nazi Party, despite knowing what their money was supporting. Effectively, Wall Street's greed had led them to aid Hitler and hinder the Allied effort. Martin's efforts at decartelization were unsuccessful though, largely due to hindrance from his superior officer, an investment banker in peacetime. In conclusion, he said, "We had not been stopped in Germany by German business. We had been stopped in Germany by American business." This exposé on economic warfare, Wall Street, and America's military industrial complex includes a new introduction by Christopher Simpson, author of *Blowback: America's Recruitment of Nazis and Its Destructive Impact on Our Domestic and Foreign Policy*, and a new foreword from investigative journalist Hank Albarelli.

Speaking of Films

Cosmopolitan Film Cultures in Latin America examines how cinema forged cultural connections between Latin American publics and film-exporting nations in the first half of the twentieth century. Predating today's transnational media industries by several decades, these connections were defined by active economic and cultural exchanges, as well as longstanding inequalities in political power and cultural capital. The essays explore the arrival and expansion of cinema throughout the region, from the first screenings of the Lumière Cinématographe in 1896 to the emergence of new forms of cinephilia and cult spectatorship in the 1940s and beyond. Examining these transnational exchanges through the lens of the cosmopolitan, which emphasizes the ethical and political dimensions of cultural consumption, illuminates the role played by moving images in negotiating between the local, national, and global, and between the popular and the elite in twentieth-century Latin America. In addition, primary historical documents provide vivid accounts of Latin American film critics, movie audiences, and film industry workers' experiences with moving images produced elsewhere, encounters that were deeply rooted in the local context, yet also opened out onto global horizons.

In recent decades the explosive growth of globalization and regional integration has fuelled parallel growth in multilingual conferences. Although conference interpreting has come of age as a profession, interpreter training programs have had varied success, pointing to the need for an instructional manual which covers the subject comprehensively. This book seeks to fill that need by providing a structured syllabus and an overview of interpretation accompanied by exercises in various aspects of the art. It is meant to serve as a practical guide for interpreters and as a complement to interpreter training programs in the classroom and online, particularly those for students preparing for conference interpreting in international governmental and business settings. This expanded second edition includes additional exercises and provides direct links to a variety of web-based resources and practice speeches, also including additional language combinations.

Chilly Scenes of Winter

This book is a study of the Basque variety spoken in Lekeitio (Vizcaya). As such we have intended to make a direct contribution to Basque dialectology, aiming at setting certain standards for research in this area. In addition, we believe that some of the materials assembled in this work will be of interest to a larger audience beyond Basque specialists. It is for this reason that we decided to write the present book in English. In our opinion, certain linguistic aspects are treated in more detail here than in any previous work on any other Basque variety. A case in point would be accentuation, both at the lexical level and in its relation to the syntactic process of focalization.

Nordic Film Cultures and Cinemas of Elsewhere

In this cross-cultural history of narrative cinema and media from the 1910s to the 1930s, leading and emergent scholars explore the transnational crossings and exchanges that occurred in early cinema between the two world wars. Drawing on film archives from around the world, this volume advances the premise that silent cinema freely crossed national borders and linguistic thresholds in ways that became far less possible after the emergence of sound. These essays address important questions about the uneven forces—geographic, economic, political, psychological, textual, and experiential—that underscore a non-linear approach to film history. The "messiness" of film history, as demonstrated here, opens a new realm of inquiry into unexpected political, social, and aesthetic crossings of silent cinema.

José Limón (1908-1972) was one of the leading figures of modern dance in the twentieth century. Hailed by the New York Times as "the finest male dancer of his time" when the José Limón Dance Company debuted in 1947, Limón was also a renowned choreographer who won two Dance Magazine Awards and a Capezio Dance Award, two of dance's highest honors. In addition to directing his own dance company, Limón served as artistic director of the Lincoln Center's American Dance Theater and also taught choreography at the Juilliard School for many years. In this volume, scholars and artists from fields as diverse as dance history, art history, Mesoamerican ethnohistory, Mexican American studies, music studies, and Mexican history come together to explore one of José Limón's masterworks, the ballet *La Malinche*. Offering many points of entry into the dance, they examine *La Malinche* from various angles, such as Limón's life story and the influence of his Mexican heritage on his work, an analysis of the dance itself, the musical score composed by Norman Lloyd, the visual elements of

props and costumes, the history and myth of La Malinche (the indigenous woman who served the Spanish conquistador Hernán Cortés as interpreter and mistress), La Malinche's continuing presence in Mexican American culture, and issues involved in a modern restaging of the dance. Also included in the book is a DVD written and directed by Patricia Harrington Delaney that presents the ballet in its entirety, accompanied by expert commentary that sets La Malinche within its artistic and historical context.
