#### The Palgrave Handbook of Institutional Ethnography

The Institute of Education has been closely involved with post-apartheid developments in education policy in South Africa. The book examines the current policy dilemmas in South Africa. It also provides a sophisticated exploration of the tensions that can occur between and among policy makers and policy researchers as a local vision is translated into reality in a global context. At the same time, the book provides clear evidence of the value as well as the difficulty of continuing dialogue between these groups, which might usefully be heeded in those countries where such interaction too rarely takes place.

#### Guide to the National Quality Standard

Patient-reported outcomes (PROs) are measures of how patients feel or what they are able to do in the context of their health status; PROs are reports, usually on questionnaires, about a patient's health conditions, health behaviors, or experiences with health care that individuals report directly, without modification of responses by clinicians or others; thus, they directly reflect the voice of the patient. PROs cover domains such as physical health, mental and emotional health, functioning, symptoms and symptom burden, and health behaviors. They are relevant for many activities: helping patients and their clinicians make informed decisions about health care, monitoring the progress of care, setting policies for coverage and reimbursement of health services, improving the quality of health care services, and tracking or reporting on the performance of health care delivery organizations. We address the major methodological issues related to choosing, administering, and using PROs for these purposes, particularly in clinical practice settings. We include a framework for best practices in selecting PROs, focusing on choosing appropriate methods and modes for administering PRO measures to accommodate patients with diverse linguistic, cultural, educational, and functional skills, understanding measures developed through both classic and modern test theory, and addressing complex issues relating to scoring and analyzing PRO data.

#### Education in Retrospect

This volume presents the major outcomes of the third edition of the *Future of Higher Education – Bologna Process Researchers Conference (FOHE-BPRC 3)* which was held on 27-29 November 2017. It acknowledges the importance of a continued dialogue between researchers and decision-makers and benefits from the experience already acquired, this way enabling the higher education community to bring its input into the 2018-2020 European Higher Education Area (EHEA) priorities. The *Future of Higher Education – Bologna Process Researchers Conference (FOHE-BPRC)* has already established itself as a landmark in the European higher education environment. The two previous editions (17-19 October 2011, 24-26 November 2014), with approximately 200 European and international participants each, covering more than 50 countries each, were organized prior to the Ministerial Conferences, thus encouraging a consistent dialogue between researchers and policy makers. The main conclusions of the FOHE Conferences were presented at the EHEA Ministerial Conferences (2012 and 2015), in order to make the voice of researchers better heard by European policy and decision makers. This volume is dedicated to continuing the collection of evidence and research-based policymaking and further narrowing the gap between policy and research within the EHEA and broader global contexts. It aims to identify the research areas that require more attention prior to the anniversary 2020 EHEA Ministerial Conference, with an emphasis on the new issues on rise in the academic and educational community. This book gives a platform for discussion on key issues between researchers, various direct higher education actors, decision-makers, and the wider public. This book is published under an open access CC BY license.
