## Language Network

Written with a range of international contexts in mind, this highly flexible, 6-level course provides coverage of the Cambridge Primary English as a Second Language syllabus. Consisting of an appealing, magazine style Student Book, extensive Workbook and supportive Teacher's Guide, the course offers progression within and across levels. The Workbooks link closely to the Student Books, providing additional activities related to the key topics presented in the Students Books. Learners are

able to practise the four skills - Reading, Writing, Speaking and Listening - and build their confidence and understanding of the key vocabulary and language structures covered in the syllabus. 'Thinking Deeper' tasks and projects challenge learners to stretch themselves by spending longer thinking about a topic and investigating it further. The workbooks should be used together with the Student Books, to provide full syllabus coverage and give learners the opportunity to reinforce and consolidate their learning, while developing fluency and accuracy. Provides support as part of a set of resources for the Cambridge Primary curriculum framework from 2011. This title is endorsed by Cambridge Assessment International Education.

### Language for Daily Use

Building on... Achievement in Year 9 English works well as a stand alone homework book but it is best teamed with its accompanying textbook How to... Achieve in Year 9 English. It will help teachers to quickly and effectively set useful homework, capitalising on the teaching, rather than using isolated activities and 'busy' work that has little relevance to your course of study. Each unit has several focuses. One relates to the basic skills of English while the second focuses on aspects of language and its uses. Students should be able to complete each unit within an hour.

Performance assessment is a hot topic in school systems, and educators continue to analyze its costs, benefits, and feasibility as a replacement for high-stakes testing. Until now, researchers and policy-makers have had to dig to find out what we know and what we still have to learn about performance assessment. Beyond the Bubble Test: How Performance Assessments Support 21st Century Learning

synthesizes the latest findings in the field, and not a moment too soon. Statistics indicate that the United States is in danger of falling behind if it fails to adapt to our changing world. The memory and recall strategies of traditional testing are no longer adequate to equip our students with the skills they need to excel in the global economy. Instead teachers need to engage students in deeper learning, assessing their ability to use higher-order skills. Skills like synthesizing information, understanding evidence, and critical problem-solving are not achieved when we teach to multiple-choice exams. Examples in *Beyond the Bubble Test* paint a useful picture of how schools can begin to supplement traditional tests with something that works better. This book provides new perspectives on current performance assessment research, plus an incisive look at what's possible at the local and state levels. Linda Darling-Hammond, with a team of leading scholars, bring together lessons learned, new directions, and solid recommendations into a single, readily accessible compendium. *Beyond the Bubble Test* situates the current debate on performance assessment within the context of testing in the United States. This comprehensive resource also looks beyond our U.S. borders to Singapore, Hong Kong, and other places whose reform-mindedness can serve as an example to us.

Maryland Comprehensive Assessment Program (MCAP) Test Practice

This test prep is good for kids who are on the fence and having trouble passing, or need to increase their margin. These kids will often say "I DON'T KNOW WHERE TO START" when explaining their confusion. This book address that problem with three approaches. 1) In contrast with the other study guides that use random questions in their practice exams; this book collated the questions into chapters based on the logic to solve them. The 8th grade book is divided into nine chapters. They are Logic, Arithmetic, Geometry, Fractions, Reading Graphs and tables, Measurements including a ruler, basic statistics, order of operations, and Algebra. This book teaches basics then goes into practice exams with word problems. Once the student is proficient with the questions organized into chapters then they are ready for random questions. 2) This study guide has thousands of practice problems. I have placed over 3100 videos on YouTube showing you how to work the problems 3) I reviewed several years of past exams and placed enfases on the easiest and most common questions. Mastering these questions should yield a 75% to 80%. If a student is already achieving this percentage; the other guides or web site with random questions and covering all material might be best. A book might be better for your student than the web sites for two reasons. 1) The more common and easiest questions are using a ruler to measure. The web designers don't know the size of your computer screen and can't determine if the student has measured correctly. We can get a high percentage of these problems easily. 2) When studying on a computer there are too many websites with the answers. With a book; parents can have greater assurance the work is being done. This book is developed by a trained professional out of concern. It is not the product of a large publishing house. It is the results of one person who wants to help. Best Regards Mark Shannon

#### Making the Grade: Grades 7-8

The Self-Directed Learning Handbook offers teachers and principals an innovative program for customizing schooling to the learning needs of individual students-- and for motivating them to take increasing responsibility for deciding what and how they should learn. Whether the students are struggling or proficient, the program is designed to nurture their natural passion for learning and mastery, challenging them to go beyond the easy and familiar so they can truly excel. The program can be introduced in stages in any middle or high school classroom and enables students of diverse abilities to design and pursue independent course work, special projects, or even artistic presentations, community field work or apprenticeships. Using this approach, the students take on an increasingly autonomous, self-directed role as they progress. The heart of the program is the action contract (or learning agreement) whereby the student sets challenging yet attainable goals, commits to a path for achieving them, and evaluates the results. Special emphasis is placed on developing skills and competencies that can serve the student well in his or her academic and career endeavors.

Introduction with Jack Hibbs and his new **book**, „Living ...

Learning to fight deception/deceptive practices to unify the church.

Battling cancel culture to preach the truth.

The state of the United States.

Battling some of the largest forms of deception facing America right now.

Where there is deceptive and dark times also lies prophetic times. What does prophecy tell us about the days in which we live?

What role does technology play in the days of deception, specifically AI?

Final thoughts from Erick and Jack Hibbs.
