Included in this anthology are famous saints Francis of Assisi, Dominic, Joan of Arc, Ignatius of Loyola, Teresa of Avila but also more obscure ones, such as Raymond Lull and Hugh of Lincoln. Many of these saints were martyrs, killed in periods of persecution. Others died trying to bring the knowledge of Christ to pagan tribes. Inspirational tales of remarkable people, especially selected for their appeal and relevance to children aged about 7 to 11. The stories of these remarkable people provide richly inspiring material for children to read, or listen to. This selection of tales and legends comes from the writer's many years of teaching children, taking into account what young listeners have enjoyed or responded to, and the questions they've asked. The stories are suitable for children aged between about seven and eleven. The book includes over forty saints, ranging from

There is no greater authority on the saints than Alban Butler, and his enormous research has been the standard reference on the subject for the last two and a half centuries. This new adaptation of Butler's multi-volume *Lives of the Saints* presents a modernized text for today's reader and provides an illuminating guide to these historic, symbolic, and foundational Christian men and women. Butler's daily readings from the lives and works of the saints offer readers of all backgrounds the opportunity to engage directly with these great figures. Butler's distinctive contribution to stories about saints was to turn attention away from the superhuman, miraculous themes that are prevalent in earlier works. He gives us saints who are examples of Christian living, who provide inspiration for our own lives, in every time and circumstance. As Butler writes: "They were once what we are now, travelers on earth. They had the same weaknesses we have. We have difficulties; so had the saints." Important features of this version include mention of recently canonized saints as well as those whose path to official sainthood is still in progress. Also included in the daily readings are more obscure saints whose lives and contributions to Christianity should not be forgotten.

Loyola Kids Book of Heroes

An Alphabet of Saints for Young People

The perfect gift for seekers, the curious, and the spiritually hungry, *The Little Book of Prayers* now has a stunning new cover and a more prayer book–like format. Gathered from holy books and prayer books, from songs and spirituals, spoken traditions and poets, it is an unexpectedly approachable collection of common and uncommon prayers from around the world. The entries, one per page or spread, are chosen for their depth of feeling, beauty of expression, spiritual intensity, and sense of the universal. The book is organized into broad categories of praise, entreaty, contemplation, mourning, and grace; and two indexes—one by authorship, and the other by topic—make it immediately accessible. There are familiar prayers, like the Lord's Prayer and 23rd Psalm, which, placed in new context, shine with a renewed beauty and wisdom. You'll find prayers unfamiliar to many in the West, such as the "Opener" from the Koran or the four vows of the Bodhisattva, chanted every evening in Zen monasteries around the world. And the surprising—from the "Prayer of the Unknown Confederate Soldier" to the blues of Lightnin' Hopkins to the poetry of Rumi. God help us to live slowly: To move simply: To look softly: To allow emptiness: To let the heart create for us. Amen. —Michael Leunig You, whose day it is, make it beautiful. Get out your rainbow colors, so it will be beautiful. —Nootka Song

Lives of Saints for Young People

The Normal Christian Church Life is a record of messages given during conferences held in Shanghai and Hankow. Watchman Nee spoke to his fellow workers on the principles in the New Testament concerning the practical arrangement of the churches, the ministry, and the work. In his speaking, he honestly examined his own work before the Lord in the light of these principles, provided adjustment and encouragement to his co-workers, and confirmed through personal testimony that the practice of the normal Christian church life revealed in the New Testament can be recovered.

Stories of the Saints

Reproduction of the original: *The Lives of the Fathers, Martyrs, and Other Principal Saints* by Alban Butler

Stories of the Saints

Describes the accomplishments and struggles of twenty important saints who lived in fourteen countries during the first fifteen centuries of Christian history.

Butler's Lives of the Saints

The lives of the Saints are one of the most powerful ways God draws people to himself, showing us the love and the joy we can find in him. But so often, these Saints seem distant—impossibly holy or dull or unlike us in race and age and state in life. In *Saints Around the World*, you'll meet over one-hundred Saints from more than sixty countries, including Saints with different disabilities, strengths, and struggles. The beautiful illustrations and captivating storytelling will introduce you and your children to new heavenly friends while also helping you fall more in love with Jesus. Each story in this book is written not only to capture the imagination but also to speak about God's tremendous love and our call to be saints. There are stories in *Saints Around the World* for when you feel like life isn't fair, when people are being unkind to you, when you've made a terrible mistake, when you're struggling at school, when prayer is hard. And there are stories of shouting down Nazis, of fleeing a murderous villain, of making scientific discoveries, of smoking a cigar while enemy soldiers amputate your leg. There are scared Saints, brilliant Saints, weak Saints, adventurous Saints, abused Saints, overjoyed Saints, disabled Saints—and the point of every one of them is the love of God. Whether you're checking the map to find Saints who look like you or perusing the extensive indices to find Saints with your skills or struggles, you'll find countless stories in this book that remind you how very possible holiness is.

Lives of Saints for Young People

The Christian life is based upon the irrevocable promises of God, the enjoyment of all that God has prepared for us in Christ, and the transformation that results from the loving discipline of the Spirit. In *The God of Abraham, Isaac, and Jacob* Watchman Nee draws upon the experiences of the Old Testament patriarchs and presents their lives as an allegory of the complete Christian experience. From our response to God's promises by faith to our ultimate transformation into sons who are conformed to the image of Christ, we must pass through the same life experiences of Abraham, Isaac, and Jacob. Like Abraham, we have been given the promise of God for the inheritance; like Isaac, we can enjoy all that God has planned for us in Christ His Son; and like Jacob, we must experience the discipline of the Holy Spirit for the sake of our growth and transformation.

Lives of the English Saints

How is Kenneth Starr's extraordinary term as independent counsel to be understood? Was he a partisan warrior out to get the Clintons, or a saviour of the Republic? An unstoppable menace, an unethical lawyer, or a sex-obsessed Puritan striving to enforce a right-wing social morality? This volume is designed to offer an evaluation and critique of Starr's tenure as independent counsel. Relying on lengthy, revealing interviews with Starr and many other players in Clinton-era Washington, Washington Post journalist Benjamin Wittes arrives at an understanding of Starr and the part he played in one of American history's most enthralling public sagas. Wittes offers a portrait of a decent man who fundamentally misconstrued his function under the independent counsel law. Starr took his task to be ferreting out and reporting the truth about official misconduct, a well-intentioned but nevertheless misguided distortion of the law, Wittes argues. At key moments throughout Starr's probe - from the decision to reinvestigate the death of Vincent Foster, to the repeated prosecutions of Susan McDougal and Webster Hubbell to the failure to secure Monica Lewinsky's testimony quickly - the prosecutor avoided the most sensible prosecutorial course, fearing that it would compromise the larger search for truth. This approach not only delayed investigations enormously, but it gave Starr the appearance of partisan zealotry and an almost maniacal determination to prosecute the president. Wittes provides in this account of Starr's term a reinterpretation of the man, his performance, and the controversial events that surrounded the impeachment of President Clinton.

Lives of the Cambro British Saints

This is the first, and only, compendium to be written of the Lives of Orthodox Saints of the British Isles. Covering April through June, this second of four volumes provides an enlightening guide to another 160 of these inspiring and historic Orthodox men and women. These saints were not only key figures in the development of the Church; they are an intrinsic part of the fabric of the history of the British Isles, and by extension the entire Western world. As St. John of Shanghai and San Francisco reminded us, the West was Orthodox for a thousand years; he believed that in whatever land an Orthodox Christian found

himself, it was his responsibility to venerate and pray to its national and local Saints. Orthodox Saints of the British Isles offers readers from all backgrounds insight into the importance of these righteous men and women. Filled with the Grace of God, from the most humble monks to the most devout martyrs and powerful kings, their faith influenced the development and spread of Christianity not just in the British Isles, but throughout the western world.

Ethics for Young People

The influence of professional, adult sport on youth sport is now a global concern. Children are involved in high-stakes competitive sport at national and international levels at an increasingly young age. In addition, the use of sport as a medium for positive youth development by governments and within the community has fuelled ambitious targets for young people's participation in sport at all levels. In this important study of ethical issues in and around youth sport, leading international experts argue for the development of strong ethical codes for the conduct of youth sport and for effective policy and pedagogical applications to ensure that the positive benefits of sport are optimized and the negative aspects diminished. At the heart of the discussion are the prevailing standards and expectations of youth sport in developed societies, typically consisting of the development of motor competence, the development of a safe and healthy lifestyle and competitive style, and the development of a positive self-image and good relationship skills. The book examines the recommendations emerging from the 'Panathlon Declaration' and the debates that have followed, and covers a wide range of key ethical issues, including: emotional and physical abuse aggression and violence doping and cheating values and norms teaching and coaching integrity management. Ethics in Youth Sport is focused on the application of ethical policy and pedagogies and is grounded in practice. It assumes no prior ethical training on the part of the reader and is essential reading for all students, researchers, policy makers and professionals working with children and young people in sport across school, community and professional settings.

Ethics in Youth Sport

Excerpt from Ethics for Young People Ethics is the science of morality. By science is here meant the systematic treatment of any object of study. Ethics is called a science, because it presents the principles of morality in a systematic form, and seeks to find the basis upon which they rest. A comparison with these departments of study may make more clear the nature of the subjects of which Ethics treats. There are three kinds of science. There are in the first place the sciences that treat of facts, of their relations to one another, and of the laws that govern them. It is to these that the name science is more commonly given. These sciences have to do with facts past and future as well as present. Geology pictures to us the state of the earth long ages ago, and astronomy that of the heavens. The astronomer can also foretell the position of the planets at any moment in the future, if he cares to make the calculation; and the geologist can foretell the future of the world, though with less exactness as to time. Youth Work Ethics

From the introductory chapter: The Relation of Ethics to Other Studies. ETHICS is the science of morality. By science is here meant the systematic treatment of any object of study. Ethics is called a science, because it presents the principles of morality in a systematic form, and seeks to find the basis upon which they rest. A comparison with these departments of study may make more clear the nature of the subjects of which Ethics treats. There are three kinds of science. The astronomer can also foretell the position of the planets at any moment in the future, if he cares to make the calculation; and the geologist can foretell the future of the world, though with less exactness as to time. To these sciences one fact is as important as another if it reveals the working of a general law. The insect, the dust that fills the air, in a word, anything may be an object of study. You would hardly believe, for instance, how much the frog has contributed to the knowledge of the world. The web of the frog's foot is so thin and transparent that under the microscope the blood can be seen moving. Looked at in this way the blood is perceived to be not a mere fluid. You can see what look like circular discs borne along, something like the cakes of ice that are carried by a stream in a freshet. In this way the student of anatomy can learn in a moment more about the circulation of the blood than could be taught in any other way in a much longer time. Moreover, what he sees he knows as he does not know what is merely told him, just as, though you may have learned in books about the hippopotamus, for instance, the sight of one first gives you real knowledge about it....

How does it impact on policy and practice, and on the lives of children themselves? Ethical Research With Children

Ethis is a vital issue for youth workers. Youth work projects are often established to encourage an ethical purpose among young people and this book helps youth workers to think about ways of developing ethical reflection in young people. It considers the establishment of organisations, by neighbourhoods and networks, to express an ethical purpose among young people. Youth work professionals will learn how to site their practice within the professional code and work in complex and unpredictable contexts. The book also encourages youth workers to think about the development of ethical reflection by young people.

Disconnected

Capturing the views and experiences of children and young people directly and involving them more actively in the research process are increasingly seen as essential for good research, evaluation, and policy and service development. Written by two experienced social researchers and trainers, this book provides a practical and concise introductory guide to doing research with children and young people, outlining the benefits and challenges along with key ethical, methodological and other considerations. Throughout, there are practical examples, checklists and top tips to aid the reader. Building on an established SRA training course, it offers an instructive resource for researchers, commissioners, policy makers, research users and others involved in research with children or young people.

Understanding Research with Children and Young People

Currently, most books on youth research available on the market focus on 'how to' conduct youth research or the research process itself. This edited collection proposes to take this process a step further and discuss the complexities of youth research from a practical and theoretical context. In total, five themes are examined – conceptualising young people, ethics and consent, the digital, voice, participation and unexpected tensions. In this book, authors from six countries explore the complexities of researching with young people across disciplines and national contexts. Offering a closeup examination of their own research experiences, the authors address the complexities of researching with young people beyond simple questions of protection from harm and coercion by problematising notions of 'resilience', 'participation', 'risk' and 'voice'. This edited collection takes the reader through an exploration of its key themes and, in doing so, presents a cast of candid and insightful accounts from youth researchers situated within the humanities and social sciences.

Youth Work Ethics

In recent decades, advances in biomedical research have helped save or lengthen the lives of children around the world. With improved therapies, child and adolescent mortality rates have decreased significantly in the last half century. Despite these advances, pediatricians and others argue that children have not shared equally with adults in biomedical advances. Even though we want children to benefit from the dramatic and accelerating rate of progress in medical care that has been fueled by scientific research, we do not want to place children at risk of being harmed by participating in clinical studies. Ethical Conduct of Clinical Research Involving Children considers the necessities and challenges of this type of research and reviews the ethical and legal standards for conducting it. It also considers problems with the interpretation and application of these standards and conduct, concluding

that while children should not be excluded from potentially beneficial clinical studies, some research that is ethically permissible for adults is not acceptable for children, who usually do not have the legal capacity or maturity to make informed decisions about research participation. The book looks at the need for appropriate pediatric expertise at all stages of the design, review, and conduct of a research project to effectively implement policies to protect children. It argues persuasively that a robust system for protecting human research participants in general is a necessary foundation for protecting child research participants in particular.

ETHICS FOR YOUNG PEOPLE

Social Research with Children and Young People

In this volume the authors provide a comprehensive demonstration of the competencies involved in clinical child psychology, offering an evidence-based best practices model of intervention informed by an integration of multiple professional competencies from a range of specialty areas.

Complexities of Researching with Young People

Ethical considerations are raising new questions about the involvement and participation of children in research. By considering the ethical issues that can arise when working with and doing research with young children from birth to five years, this book examines a wide range of topics including: - involving young children in research - informed consent - research tools with children under five - researching children with special needs - researching vulnerable groups - researching other cultures - multi-agency working - loss and bereavement - ethical practices when studying early childhood - safe-guarding young children - inspection - ethics and leadership Examples from education, health and social work are examined, and there are chapter overviews, activities, case studies, points for discussion and recommendations for further reading and useful Websites in each chapter; which help to engage the reader and facilitate critical thinking and reflective practice. This is a comprehensive guide to a developing field for the early years student and practitioner.

Ethical Conduct of Clinical Research Involving Children

Concern is growing about children's rights and the curtailment of those rights through the excesses of neoliberal governance. This book discusses children's spatial and citizenship rights, and the ways young people and their families push against diminished rights. Armed initially with theoretical concerns about the construction of children through the political status quo and the ways youth rights are spatially segregated, the book begins with a disarmingly simple supposition: Young people have the right to make and remake their spaces and, as a consequence, themselves. This book de-centers monadic ideas of children in favor of a post-humanist perspective, which embraces the radical relationality of children as more-than-children/more-than-human. Its empirical focus begins with the struggles of Slovenian Izbrisani ('erased') youth from 1992 to the present day and reaches out to child rights and youth activists elsewhere in the world with examples from South America, Eastern Europe and the USA. The author argues that universal child rights have not worked and pushes for a more radical, sustainable ethics, which dares to admit that children's humanity is something more than we, as adults, can imagine. Chapters in this groundbreaking contribution will be of interest to students, researchers and practitioners in the social sciences, humanities and public policy.

Guide Right: Ethics for Young People (1902)

"Doing Ethical Research with Children is an invaluable resource for all student and practitioner-researchers who wish to honour children as active agents and significant voices in research. The book guides the reader through the processes of ethical research with (not on!) children, positioning the child as competent and capable. It includes practical guidance and examples of research so that issues that may emerge during a research project can be anticipated. My advice is - do not embark on an Early Years research project before reading it!" Lyn Trodd, Chair of the National Sector-Endorsed

Foundation Degree in Early Years Network (SEFDEY), University of Hertfordshire, UK "Doing Ethical Research with Children provides an invaluable guide to understanding and managing the ethical implications of research projects with children. The highly accessible format includes useful case-study examples, questions and checklists and the four-phased approach supports the reader to reflect on ethical considerations at every stage of the research process. This book is a welcome and essential resource that positions ethical perspectives at the heart of research activity with children." Shirley Allen, Senior Lecturer Early Childhood Studies, Middlesex University, UK "This is an admirably clear and well-structured book that will be invaluable for anyone serious about research with children. The authors write from long experience, and provide a very helpful 'step by step' guide that is always underpinned by deeply principled, insightful considerations that exemplify good practice and respect for children. The use of real examples along with the authors' questions, invite the reader to reflect on their own thinking and actions, and the extensive checklists and sample documentation provide clear guidance that will be a valuable support for students and their supervisors, researchers, and practitioners alike. I look forward to making good use of this book in my own work and in my work with students of early childhood." Sue Robson, Principal Lecturer, Subject Leader for Early Childhood Studies University of Roehampton, London, UK This book provides a step-by-step guide to approaching your research project and will support you in developing, conducting and disseminating research relating to children and childhood with an ethical imperative. Doing Ethical Research with Children will help you focus and identify many of the key issues surrounding research with children. The book presents an overview of both contemporary and traditional perspectives relating to child related research practices. The authors combine relevant theoretical and practical information, offering a guide to the essential elements for conducting ethical research with children. You are prompted to consider and systematically address these elements, with the help of: Real world 'points to ponder', offering unique insights 'Over to you' reflection activities Case studies considering ethical dilemmas Written specifically as a guide and reflection tool for beginning researchers studying early years and childhood, the book follows the research journey from conceptualisation to dissemination and looks at the unique considerations for research involving children.

Specialty Competencies in Clinical Child and Adolescent Psychology

What should happen when doctors and parents disagree about what would be best for a child? When should courts become involved? Should life support be stopped against parents' wishes? The case of Charlie Gard, reached global attention in 2017. It led to widespread debate about the ethics of disagreements between doctors and parents, about the place of the law in such disputes, and about the variation in approach between different parts of the world. In this book, medical ethicists Dominic Wilkinson and Julian Savulescu critically examine the ethical questions at the heart of disputes about medical treatment for children. They use the Gard case as a springboard to a wider discussion about the rights of parents, the harms of treatment, and the vital issue of limited resources. They discuss other prominent UK and international cases of disagreement and conflict. From opposite sides of the debate Wilkinson and Savulescu provocatively outline the strongest arguments in favour of and against treatment. They analyse some of the distinctive and challenging features of treatment disputes in the 21st century and argue that disagreement about controversial ethical questions is both inevitable and desirable. They outline a series of lessons from the Gard case and propose a radical new 'dissensus' framework for future cases of disagreement. This new book critically examines the core ethical questions at the heart of disputes about medical treatment for children. The contents review prominent cases of disagreement from the UK and internationally and analyse some of the distinctive and challenging features around treatment disputes in the 21st century. The book proposes a radical new framework for future cases of disagreement around the care of gravely ill people.

Ethical Practice in Early Childhood

A report of the responses of 2000 young people to a questionnaire on morality and values. The questionnaire was part of a larger study which aimed to document and understand the moral landscapes of young people aged 11-16 from different and varied communities across England, and Northern Ireland. Their views on baseline, attitudinal questions are compared to those of other young people and adults across Europe. Similarities and differences are examined in relation to gender, social class, age, religious affiliation, location and ethnicity.

Young People, Rights and Place

This book provides an interdisciplinary perspective on working with young people, focusing on education, health and social work, and draws on projects and perspectives from the United Kingdom, the United States, Canada and Australia. The volume highlights the ethical challenges and dilemmas as these and other services are integrated and addresses how ethical practices are confronted and shared across disciplines. The first section looks at professional practice; the second foregrounds children's and young people's voices and is especially concerned with children and young people as co-researchers. Subjects addressed within the text include sex education, health education, custodial care, confidentiality and gaining consent, ethical issues around ICT and researching with vulnerable populations. The book is intended for both scholars and practitioners. It places examples in clearly articulated theoretical frameworks as well as considering professional principles and practice.
