Consensus Organizing: A Community Development Workbook

A person doesn't have to be a consensus organizer to think like one. Consensus Organizing: A Community Development Workbook—A Comprehensive Guide to Designing, Implementing, and Evaluating Community Change Initiatives helps students and practitioners begin to think like consensus organizers and incorporate this way of strategic thinking into their lives and their work. Through a wide range of exercises, role-play activities, case scenarios, and discussion questions, this workbook presents the conceptual framework for consensus organizing and provides a practical and experiential approach to understanding and applying consensus organizing to address a range of issues. This workbook is designed to be used by itself or along with Mike Eichler's text Consensus Organizing: Building Communities of Mutual Self Interest (SAGE, 2007). Accompanying Website Instructors and students have access to the many activities and cases on the accompanying website at www.sagepub.com/ohmer-workbookstudy.

Consensus Organizing

The authors put the theory of consensus organising into practice through activities, case studies and the practical application of examples to real life situations.

Consensus Organizing: A Community Development Workbook

A person doesn't have to be a consensus organizer to think like one. Consensus Organizing: A Community Development Workbook—A Comprehensive Guide to Designing, Implementing, and Evaluating Community Change Initiatives helps students and practitioners begin to think like consensus organizers and incorporate this way of strategic thinking into their lives and their work. Through a wide range of exercises, role-play activities, case scenarios, and discussion questions, this workbook presents the

conceptual framework for consensus organizing and provides a practical and experiential approach to understanding and applying consensus organizing to address a range of issues. This workbook is designed to be used by itself or along with Mike Eichler's text *Consensus Organizing: Building Communities of Mutual Self Interest* (SAGE, 2007). Accompanying Website Instructors and students have access to the many activities and cases on the accompanying website at www.sagepub.com/ohmer-workbookstudy.

Community Organization and Development

This book traces the development of community development/organization as it evolved separately in Britain and the United States, and how the social and political situations in each country determined the various shapes and directions it took. In presenting a comprehensive history of the subject, *Community Organization and Development* draws on local and international factors that have helped to shape its application and fortunes across varied settings. Recent economic and social pressures, the changing demographics of developed economies, and the rise of social and cultural diversity all contribute to the need for a comprehensive model that can be deployed to effect the necessary social changes required for sustained change with stability. The history of this intervention technique throws up many examples from which insight can be gained for the present time, and Wales is used as an example of how national policy and local development could be combined for maximum effect. Community development should become reliable and quantifiable, and the comprehensive model developed here demonstrates how and when it should be deployed.

Social Work Skills for Community Practice

Focuses on skill-building to facilitate positive social change With straightforward content enriched by practical and applicable learning experiences, this comprehensive text prepares social work students for careers in community organizing and macro practice. It focuses on building the social work skills required for organizing communities, including cause-based coalitions, geographically/identity-based communities, and health and human service organizations, to achieve culturally relevant, equity- and justice-driven social change. The second edition presents new information that includes self-care for the community practitioner, social work grand challenges, cultural humility, community dialogue, trauma-informed and resiliency-focused community development, environmental justice, and many other topics. Emphasizing community practice through the application of macro, mezzo, and micro social work skills, the book uses frameworks drawn from generalist social work practice as well as core competencies identified by CSWE's EPAS. Its focus on a broad range of community practice models makes it accessible to all social workers. The text also highlights the importance of technology as a tool for social work macro practice with skill-building activities. Vivid case vignettes, applied and experiential learning activities, and team and individual-based assignments reinforce content and emphasize skill-building, along with abundant resources for further learning. New to the Second Edition: Presents a framework for self-care for the community practitioner Highlights the importance of community practitioner readiness, competency, and leadership Introduces a new trauma-informed and resiliency-focused approach for community development Discusses strategic compatibility for interorganizational collaboration Introduces youth-based participatory research and empowerment evaluations Key Features: Focuses on skill-building for community engagement and organizing, facilitating community dialogue, and conducting assessments Covers planning and implementing community change initiatives and evaluating and disseminating knowledge from change activities Provides case vignettes to reinforce content and abundant resources for additional learning Offers a complete ancillary package that includes chapter PowerPoints, Test Bank, and an Instructor's Manual with suggested individual and group activities and more

Social Work Practice with Groups, Communities, and Organizations

A solid, theory-to-practice guide to contemporary mezzo and macro social work Written by a renowned team of scholars, *Social Work Practice with Groups, Communities, and Organizations* focuses on the contemporary theory and practice of social work. Each chapter delves deeply into the key theoretical considerations surrounding a particular practice area, exploring the clinical implications of each. Spanning the full range of both mezzo and macro practice areas, the authors thoroughly look at the assessment of and interventions with group, community, organizational, and institutional settings. The most authoritative book in this field, *Social Work Practice with Groups, Communities, and Organizations* features: A focus on evidence-based approaches to assessment and intervention

for each practice area discussed Comprehensive coverage of the most important new and emerging practice technologies in mezzo and macro social work Current and emerging demographic, social, political, and economic trends affecting mezzo and macro practice An array of pedagogical aids, including Key Terms, Review Questions for Critical Thinking, and Online Resources Content closely aligned with social work accreditation standards (EPAS) Providing a solid review of the entire scope of contemporary mezzo and macro social work practice, *Social Work Practice with Groups, Communities, and Organizations* is both an indispensable educational text for students and a valuable working resource for practitioners who work with groups, communities, and organizations of all sizes.

Macro Practice in Social Work for the 21st Century

Macro Practice in Social Work for the 21st Century, Second Edition offers a modern approach to building effective career skills in macro practice. Author Steve Burghardt inspires students by tracing the careers of macro-practitioners from grass roots organizers to agency executives. By focusing on how practitioners can make meaningful, strategic choices regardless of their formal roles and responsibilities, this Second Edition takes a refreshing new approach on the key issues of how to respond to diversity and oppression, the use of the internet for organization, the limits of "virtual trust," understanding where "micro" and "macro" meet in practice, and co-leadership development.

Progressive Community Organizing

The second edition of *Progressive Community Organizing* offers a concise intellectual history of community organizing and social movements while also providing practical tools geared toward practitioner skill building. Drawing from social-constructionist, feminist and critical traditions, *Progressive Community Organizing* affirms the practice of issue framing and offers two innovative frameworks that will change the way students of organizing think about their work. *Progressive Community Organizing* is ideal for both undergraduate and graduate courses focused on community theory and practice, community organizing, community development, and social change and service learning. The second edition presents new case studies, including those of a welfare rights organization and a youth-led LGBTQ organization. There are also new sections on the capabilities approach, queer theory, the Civil Rights movement, and the practices of self-inquiry and non-violent communication. Discussion of global justice has been expanded significantly and includes an account of a transnational action-research project in post-earthquake Haiti. Each chapter contains discussion questions, written and web resources, and a list of key terms; a full, free-access companion website is also available for the book.

Community Intervention

Community Intervention: Clinical Sociology Perspectives showcases important efforts to improve the quality of life in communities around the world. The book, a project of the clinical sociology division of the International Sociological Association, describes the interdisciplinary field of clinical sociology in relation to community improvement. The first part of the book covers important concepts and tools for community intervention and identifies a variety of approaches to community research with an emphasis on research that centrally involves community members. The chapters in the second part of the volume focus on projects in a broad range of countries, covering topics such as involving residents in urban renewal projects, developing healthy communities, encouraging socioeconomic development, improving the life of immigrants, helping communities deal with climate change, establishing human rights cities, encouraging empowerment and creating an inclusive community. A unique feature of the book is the inclusion of profiles about some of the outstanding work in community intervention over the last 100 years. These profiles are of Nobel Peace Prize winner Jane Addams; community activist Saul Alinsky; human rights and environmental activist Wangari Maathai and participatory action research pioneer Orlando Fals Borda. Written by scholar-practitioners as well as analysts, the book provides essential commentary regarding community intervention efforts.

Macro Practice in Social Work for the 21st Century

This book develops a new paradigm suited to the quickly shifting dynamics of a globalized society, both more reliant on social networking, and yet seeking common connection and community.

Global Youth

Youth violence is not a unique phenomenon, and, in fact, youth have been plagued with challenges throughout the centuries that have placed them at risk of violent tendencies. These challenges include poverty, inadequate healthcare, limited educational opportunities, exploitation, gender inequality, substance abuse, mental health concerns, homelessness, gang involvement, and family dysfunction. Further, these challenges are not unique to youth within the United States; however, these experiences may differ in terms of chronicity, intensity, and impact. In all youth, these challenges create stress and trauma that compromise well-being. This book explores the challenges that youth experience, and provides context to better understand the factors related, and contributing, to those issues. The chapters describing realistic and practical violence prevention and remediation programs, which are both innovative and effective, are particularly unique. Additionally, there are a number of chapters that discuss the latest technological advances in helping young people, as well as evidence-based assessments and evaluations to help those who work with young people understand the needs of at-risk youth.

The Handbook of Community Practice

Encompassing community development, organizing, planning, & social change, as well as globalisation, this book is grounded in participatory & empowerment practice. The 36 chapters assess practice, theory & research methods.

Measures for Community and Neighborhood Research

Measures for Community and Neighborhood Research, by Mary L. Ohmer, Claudia Coulton, Darcy A. Freedman, Joanne L. Soback, and Jaime Booth, is the first book of its kind to compile measures focused on communities and neighborhoods in one accessible resource. Organized into two main sections, the first provides the rationale, structure and purpose, and analysis of methodological issues, along with a conceptual and theoretical framework; the second section contains 10 chapters that synthesize, analyze, and describe measures for community and neighborhood research, with tables that summarize highlighted measures. The book will get readers thinking about which aspects of the neighborhood may be most important to measure in different research designs and also help researchers, practitioners, funders, and others more closely examine the impact of their work in communities and neighborhoods.

Implementation Monitoring and Process Evaluation

Implementation Monitoring and Process Evaluation by Ruth P. Saunders is a practical guide that helps readers understand and use the steps that program planners and evaluators take in implementing and monitoring a new program, policy, or practice in an organizational setting. The book covers the entire process, from planning, to carrying out the plan, and summarizing, reporting, and using the results. A wide range of real-world examples in the book are drawn from health, education, non-profit organizations, and public administration, and an extended case study, Your Turn boxes, and worksheet templates help readers apply concepts to their own projects. Ideal for practitioners, researchers, and students, this book can be used as a primary text for a process evaluation or an implementation monitoring course or as a supplemental text in a broader program evaluation course.

Rules of the Game

Concise, empowering, and inspirational, this introduction to promoting change offers practical knowledge, and features more than 150 guidelines brought to life with down-to-earth, often humorous language. Replete with the wisdom of more than four decades of experience in the field, Mark S. Homan demystifies the community change process by providing nuts-and-bolts rules for success, including eight essential steps for building an organized change effort. Homan's outline for community change is invaluable in any setting, from grassroots organizations to governments or community agencies. Writing in a conversational, informal style, Homan leads readers through the basic things they need to know about themselves, about others, and about the change process itself. As they put these ideas into action, they will identify skills, attitudes, and choices important to their success as a change agent in the community.

Roots to Power

The third edition of the manual for community organizers tells readers how to most effectively implement community action for social change, clearly laying out grassroots organizing principles, methods, and best practices. Written for those who want to improve their own lives or the lives of others, this thoroughly revised how-to manual presents techniques groups can use to organize successfully in pursuit of their dreams. The book combines time-tested, universal principles and methods with cutting-edge material addressing new opportunities and challenges. It covers basic concepts and best practices and offers step-by-step guidelines on things an organizer needs to know, such as how to identify issues, formulate strategies, set goals, recruit participants, and much more. The work focuses on six organizing arenas: turf/geography, faith-based, issue, identity, shared experience, and work-related. It offers new or expanded material addressing community development, use of social media, internal organizational dynamics, electoral organizing, evaluation/assessment, and prevention of burnout for key leaders. There are also nuts-and-bolts articles by experts who address topics such as action research, lobbying, legal tactics, and grassroots fundraising. Numerous case examples, charts, worksheets, and small group exercises enrich the discussion and bring the material to life.

Practical Health Promotion

The third edition of this popular introductory textbook has been revised to provide a totally up-to-date and hands-on guide to the practical aspects of health promotion. Focusing on the range of skills needed to become an effective practitioner, it takes readers step-by-step through the different settings in which health promotion takes place and the various tools they might employ, including chapters on health promotion through the lifespan, one-to-one communication, working with groups, advocacy, social media, workplace settings and planning and management. As well as incorporating the most recent government policies and initiatives in public health, there is new and expanded material on issues such as community initiatives and alliances, social media, health literacy, understanding health behaviours, stress in the workplace and much more. Throughout the text there are activities to develop students' understanding and encourage reflective practice. Each chapter opens with a list of the central issues and learning objectives which are reinforced with real-life case studies. The key terms highlighted are clearly explained and checklists dispersed throughout the book, enabling practical application. The new edition of Practical Health Promotion will continue to be the ideal and indispensable guide for students at all levels. It will inspire anyone involved with health care to find practical ways of promoting change.

Social Work Methods and Skills

This brilliantly systematic and comprehensive textbook provides an integrated approach to social work theory, methods and skills as the bedrock of all social work practice. Recognizing social work as a diverse activity that is rooted in common foundations, it explains how practice both shapes and is shaped by professional purpose. The text also explores the diverse range of social work practice methods available and aims to equip the reader with a foundation in the history and application of these varied approaches. Offering a step-by-step discussion that will empower readers to critically develop and refine their professional toolkit for purposeful and innovative intervention, this original rationale is an essential resource for any social work student or practitioner looking to build, or consolidate, their understanding of the range of methods and skills available for effective professional practice.

Social Work in Health Emergencies

This is the first comprehensive book that provides accessible, international knowledge for practitioners, students and academics about social work in health emergencies and spans fields of practice across world regions with particular reference to the COVID-19 pandemic. Divided into three sections: • Regional, Historical and Social Work Perspectives takes a journey through world regions during the first six months of the pandemic as it unfolded, explores the lessons found in the history of pandemics and situates public health social work practice in the values of the profession. Situating the diversity of challenges and opportunities in context, in turn, influences current and future social work practice. • Social Work Practice, Issues and Responses explores social work practice innovations and responses across eleven key practice fields. International authors feature social work responses during the COVID-19 health emergency from different regions of the world. • Preparing for the Future analyses broader concepts, innovations and the implications for future practices as social work enters a new era of service delivery. The 20 chapters explore the convergence of pandemic, politics and planet which is critiqued within a framework of the profession's ethics and values of human dignity, human rights and social justice. Social work's place in public health is firmly situated and built on the premise

that the value social work brings to the table deserves recognition and should be documented to inform the development of the profession and future practice and how social work must carry lessons forward to prepare for the next pandemic. The book is relevant to a wide range of audiences, including practitioners, educators and students in social work, human services, international development and public health, as well as policy makers and researchers.

The British National Bibliography

This workbook applies the CDC Framework for Program Evaluation in Public Health. The purpose of this workbook is to help public health program managers, administrators, and evaluators develop a joint understanding of what constitutes an evaluation plan, why it is important, and how to develop an effective evaluation plan in the context of the planning process. This workbook is intended to assist in developing an evaluation plan but is not intended to serve as a complete resource on how to implement program evaluation.

Resources in Education

As a palliative medicine physician, you struggle every day to make your patients as comfortable as possible in the face of physically and psychologically devastating circumstances. This new reference equips you with all of today's best international approaches for meeting these complex and multifaceted challenges. In print and online, it brings you the world's most comprehensive, state-of-the-art coverage of your field. You'll find the answers to the most difficult questions you face every day...so you can provide every patient with the relief they need. Equips you to provide today's most effective palliation for terminal malignant diseases • end-stage renal, cardiovascular, respiratory, and liver disorders • progressive neurological conditions • and HIV/AIDS. Covers your complete range of clinical challenges with in-depth discussions of patient evaluation and outcome assessment • ethical issues • communication • cultural and psychosocial issues • research in palliative medicine • principles of drug use • symptom control • nutrition • disease-modifying palliation • rehabilitation • and special interventions. Helps you implement unparalleled expertise and global best practices with advice from a matchless international author team. Provides in-depth guidance on meeting the specific needs of pediatric and geriatric patients. Assists you in skillfully navigating professional issues in palliative medicine such as education and training • administration • and the role of allied health professionals. Includes just enough pathophysiology so you can understand the "whys" of effective decision making, as well as the "how tos." Offers a user-friendly, full-color layout for ease of reference, including color-coded topic areas, mini chapter outlines, decision trees, and treatment algorithms. Comes with access to the complete contents of the book online, for convenient, rapid consultation from any computer.

Developing an Effective Evaluation Plan

Ensure you have a solid understanding of community and public health nursing with this industry standard text! Public Health Nursing: Population-Centered Health Care in the Community, 10th Edition provides up-to-date information on issues such as infectious diseases, natural and man-made disasters, and healthcare policies affecting individuals, families, and communities. This new edition has been thoroughly updated to reflect current data, issues, trends and practices presented in an easy-to-understand, accessible format. Additionally, real-life scenarios show examples of health promotion and public health interventions. Ideal for BSN and Advanced Practice Nursing programs, this comprehensive, bestselling text will provide you with a greater understanding of public health nursing! Focus on Quality and Safety Education for Nurses boxes give examples of how quality and safety goals, knowledge, competencies and skills, and attitudes can be applied to nursing practice in the community. Healthy People boxes highlight goals and objectives for promoting the nation's health and wellness over the next decade. Linking Content to Practice boxes provide examples of the nurse's role in caring for individuals, families, and populations in community health settings. Evidence-Based Practice boxes illustrate the use and application of the latest research findings in public/community health nursing. UNIQUE! Separate chapters on healthy cities, the Intervention Wheel, and nursing centers describe different approaches to community health initiatives. Levels of Prevention boxes identify specific nursing interventions at the primary, secondary, and tertiary levels. End-of-chapter Practice Application scenarios, Key Points, and Clinical Decision-Making activities promote application and in-depth understanding of chapter content. UPDATED Content and figures reflect current data, issues, trends, and practices. How To boxes provide you with practical application practice. NEW! Check

Your Practice boxes added throughout feature scenarios and discussion questions to promote active learning.

Palliative Medicine E-Book

Sections include: "A theory of change approach to evaluation\

Public Health Nursing E-Book

This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

New Approaches to Evaluating Community Initiatives: Theory, measurement, and analysis

Whether you work in the corporate world, a nonprofit organization, or the government sector, you likely face the need to work with others to solve problems and make decisions on a daily basis. And you've undoubtedly been frustrated by how laborious and conflict-ridden such group efforts can be. At all levels--from neighborhood block associations to boards of directors of multinational corporations--the consensus building process is highly effective in an increasingly fragmented, contentious society. In addition, the old top-down methods such as Robert's Rules of Orders often prompt more problems than they solve. Consensus helps you to implement better, more creative solutions. It provides a winning alternative to top-down decision making--and even parliamentary procedure. By learning to build consensus, stakeholders come to understand and respect one another's perspectives. The consensus building process allows participants to find solutions and forge agreements that meet everyone's needs--and provides a meaningful basis for effective, long-range implementation of decisions. The Consensus Building Handbook provides a blueprint to help make the process work in your organization, including a practical, quick-reference Short Guide. Plus, you'll find in-depth commentary and seventeen case studies with in-depth commentaries to provide the theoretical basis for this approach. --From publisher's description.

The Green Book

How do communities protect and improve the health of their populations? Health care is part of the answer but so are environmental protections, social and educational services, adequate nutrition, and a host of other activities. With concern over funding constraints, making sure such activities are efficient and effective is becoming a high priority. Improving Health in the Community explains how population-based performance monitoring programs can help communities point their efforts in the right direction. Within a broad definition of community health, the committee addresses factors surrounding the implementation of performance monitoring and explores the "why" and "how to" of establishing mechanisms to monitor the performance of those who can influence community health. The book offers a policy framework, applies a multidimensional model of the determinants of health, and provides sets of prototype performance indicators for specific health issues. Improving Health in the Community presents an attainable vision of a process that can achieve community-wide health benefits.

Programs and Services for Federal Court Personnel Available from the Court Education Division

The first new form of community organizing since Saul Alinsky, this book connects the poor to the rest of society. Written in a logical, teachable, and pragmatic style, Consensus Organizing: Building Communities of Mutual Self Interest is a model of social change for the 21st century. Through real examples, author Mike Eichler illustrates how anyone can practice consensus organizing and help the poor, forgotten, and disempowered.

The Consensus Building Handbook

Research Methods for Community Change: A Project-Based Approach, Second Edition is an in-depth review of all of the research methods that communities can use to solve problems, develop their resources, protect their identities, and build power. With an engaging writing style and numerous real world examples, Randy Stoecker shows how to use a project-based research model in the community to: diagnose a community condition; prescribe an intervention for the condition; implement

the prescription; and evaluate its impact. At every stage of this model there are research tasks, from needs and assets assessments to process and outcome studies. Readers also learn the importance of involving community members at every stage of the project and in every aspect of the research, making the research part of the community-building process.

Improving Health in the Community

This 'Handbook on Planning, Monitoring and Evaluating for Development Results' is an updated edition of the 2002 edition of 'Handbook on Monitoring and Evaluation for Results'. It seeks to address new directions in planning, monitoring and evaluation in the context of the United Nations Development Programme (UNDP) corporate strategic plan, the requirements of the UNDP evaluation policy approved by the Executive Board in 2006 and the United Nations Evaluation Group (UNEG) 'Standards for Evaluation in the UN System'. The updated Handbook also incorporates information recommended by key users of the Handbook during various workshops held by UNDP units.

Consensus Organizing

Artificial Intelligence (AI) has the potential to address some of the biggest challenges in education today, innovate teaching and learning practices, and ultimately accelerate the progress towards SDG 4. However, these rapid technological developments inevitably bring multiple risks and challenges, which have so far outpaced policy debates and regulatory frameworks. This publication offers guidance for policy-makers on how best to leverage the opportunities and address the risks, presented by the growing connection between AI and education. It starts with the essentials of AI: definitions, techniques and technologies. It continues with a detailed analysis of the emerging trends and implications of AI for teaching and learning, including how we can ensure the ethical, inclusive and equitable use of AI in education, how education can prepare humans to live and work with AI, and how AI can be applied to enhance education. It finally introduces the challenges of harnessing AI to achieve SDG 4 and offers concrete actionable recommendations for policy-makers to plan policies and programmes for local contexts. [Publisher summary, ed]

Research Methods for Community Change: A Project-Based Approach

Regarded as one of the most influential management books of all time, this fourth edition of Leadership and Organizational Culture transforms the abstract concept of culture into a tool that can be used to better shape the dynamics of organization and change. This updated edition focuses on today's business realities. Edgar Schein draws on a wide range of contemporary research to redefine culture and demonstrate the crucial role leaders play in successfully applying the principles of culture to achieve their organizational goals.

Getting climate ready

This book is the result of the WHO European Working Group on Health Promotion Evaluation which examined the current range of qualitative and quantitative evaluation methods to provide guidance to policy-makers and practitioners. It includes an extensive c

Maths Problem Solving Year 3

Maths Problem Solving - Year 3 is the third of six books in the Maths Problem Solving series. The books have been written for teachers to use during the numeracy lesson. They cover the 'solving problem' objectives from the numeracy framework. This book contains three chapters; Making decisions, Reasoning about numbers or shapes and Problems involving 'real life', money or measures. The books are designed in such a way that each section has six stages of questions to be worked through. Every stage is split into three levels, for example 1a, 1b or 1c, based on achievement. Each corresponding question from these levels follow the same line of questioning, so that when the teacher talks about a certain question, the solution process is the same for each level but the complexity of the sum varies.

Maths Problem Solving Year 1

Maths Problem Solving – Year 1 is the first of six books in the Maths Problem Solving series. The books have been written for teachers to use during the numeracy lesson. They cover the »solving problem^{1/4} objectives from the numeracy framework. This first book contains four chapters; Making decisions, Reasoning about numbers or shapes, Problems involving »real life^{1/4}, money or measures and Organizing and using data. The books are designed in such a way that each section has six stages of questions to be worked through. Every stage is split into three levels, for example 1a, 1b or 1c, based on achievement. Each corresponding question from these levels follow the same line of questioning, so that when the teacher talks about a certain question, the solution process is the same for each level but the complexity of the sum varies.

Little Acorns

Promote mastery by making problem solving and reasoning a part of every maths lesson. - Hours of ready-to-go activities for every content domain- Teaching guidance and worked examples for each of the 11 strategies- Pupil friendly target sheet to track how you are promoting mastery Editable word files on the CD-ROM Promote mastery for all pupils by adding 11 key problem solving and reasoning strategies to your lessons. - Clear teaching guidance and worked examples for each of the 11 strategies to systematically embed mastery- Hours of ready-to-go problem solving questions linked to the strategies for each content domain- Problem solving target sheet of all 11 key strategies to track how you are promoting mastery for all pupils Editable word documents on the CD-ROM. What you told us: You wanted to start incorporating a mastery approach without buying into expensive schemes or turning around your timetable. One way to do this is to quickly and easily add regular problem solving and reasoning questions to your existing maths lessons. Author and leading mathematics consultant, Sarah-Anne Fernandes: "Deepening understanding in maths isn't just for 'more able' pupils. By making problem solving and reasoning an integral part of daily teaching using 11 key strategies, mastery can become accessible to all."

Year 1 Everyday Problem Solving and Reasoning

Maths Problem Solving - Year 4 is the fourth of six books in the Maths Problem Solving series. The books have been written for teachers to use during the numeracy lesson. They cover the 'solving problem' objectives from the numeracy framework. This book contains three chapters; Making decisions, Reasoning about numbers or shapes and Problems involving 'real life', money or measures. The books are designed in such a way that each section has six stages of questions to be worked through. Every stage is split into three levels, for example 1a, 1b or 1c, based on achievement. Each corresponding question from these levels follow the same line of questioning, so that when the teacher talks about a certain question, the solution process is the same for each level but the complexity of the sum varies.

Maths Problem Solving Year 4

All pupils - able children included - need to be taught strategies to enable their thinking skills to progress. They also need help with developing different approaches to problem solving. A sustained piece of work that requires perseverance, logical strategies, and refinement of method and extension of the original task is not the same as a straightforward quick-fix type problem. Both types of problem solving need to be taught. This book presents a series of activities that can be used with whole classes to provide a curriculum for the teaching of problem solving and the development of thinking skills. Each tried and tested investigation is clearly explained with ideas on how to introduce the task to a class, full solutions and resource sheets. Activities include making 10p: a task to encourage systematic listing; tables and chairs: working systematically and spotting patterns; polygons and polyhedra: investigating diagonals, triangles, faces, edges and vertices; hidden faces: investigating different shapes and sizes of dice; and pond borders: investigating area and perimeter.

KS2 Maths

Maths Problem Solving – Year 1 is the first of six books in the Maths Problem Solving series. The books have been written for teachers to use during the numeracy lesson. They cover the »solving problem^{1/4} objectives from the numeracy framework. This first book contains four chapters; Making decisions, Reasoning about numbers or shapes, Problems involving »real life^{1/4}, money or measures and Organizing and using data. The books are designed in such a way that each section has six stages of questions to be worked through. Every stage is split into three levels, for example 1a, 1b or 1c, based on achievement. Each corresponding question from these levels follow the same line of questioning, so that when the teacher talks about a certain question, the solution process is the same for each level but the complexity of the sum varies.

Using and Applying Mathematics at Key Stage 1

Stimulate children to work collaboratively with Maths Plus Groups Work -- and have fun too! Groups Work Year 1 Teacher Book provides 15 problem-solving group activities.

Maths Problem Solving Year 1

'Picture Maths' offers a new approach to teaching mathematical problem solving to help engage and raise attainment of visual learners. Picture based activities develop a deeper level of understanding by putting maths problems into real life contexts and help to make maths relevant. They can also be discussed on the whiteboard to stimulate mathematical discussion.

Groups Work

These photocopiable sheets are intended for Year 1 use at school and at home. They include activities on making decisions; reasoning about numbers and shapes and problems; problems involving real life contexts and money; measures and the organizing and using of data.

Picture Maths

It's the first day of school and Jake is feeling nervous. He'd rather stay at home and play. Will an exciting day with his new class change his mind? Join Jake and his new friends as he finds out that starting school can be a real adventure. Download the full eBook and explore supporting teaching materials at www.twinkl.com/originals Join Twinkl Book Club to receive printed story books every half-term at www.twinkl.co.uk/book-club (UK only).

Developing Numeracy

Part of the 'Rising Stars Maths' series, this title gives clear guidance on how to teach key problem solving and reasoning concepts so that pupils can use reasoning in every lesson.

Jake's First Day

Use manipulatives 10 minutes a day with these simple at-a-glance activities Just 6 weeks of these activities will give children a richer and deeper mastery of maths by demonstrating abstract ideas and core mathematical concepts in a variety of representations and problem-solving contexts. Use

manipulatives 10 minutes a day with these simple at-a-glance activities - Easy to implement activities for all curriculum areas- Filled with photos for easy reference- Uses a variety of everyday objects and common maths resources Part of the Making Mathematics Count research project from the North Star Teaching Alliance, the approach has been fully trialled to success in primary schools across the country

Division Word Problems

This Student Book provides full support for AQA's new linear Further Maths specification. Covering both the compulsory content (further pure) and all the optional content (mechanics, statistics and discrete maths), it offers dedicated problem-solving exercises, along with abundant worked examples.

Problem Solving and Reasoning

Maths Problem Solving - Year 5 is the fifth book in the Maths Problem Solving series. The books have been written for teachers to use during the numeracy lesson. They cover the 'solving problem' objectives from the numeracy framework. This book contains three chapters; Making decisions, Reasoning about numbers or shapes and Problems involving 'real life', money or measures. The books are designed in such a way that each section has six stages of questions to be worked through. Every stage is split into three levels, for example 1a, 1b or 1c, based on achievement. Each corresponding question from these levels follow the same line of questioning, so that when the teacher talks about a certain question, the solution process is the same for each level but the complexity of the sum varies.

Year 1 Hands-On Maths: 10 Minutes of Concrete Manipulatives a Day for Maths Mastery (Hands-on Maths)

New 2017 Cambridge A Level Maths and Further Maths resources help students with learning and revision. Written for the OCR AS/A Level Mathematics specifications for first teaching from 2017, this print Student Book covers the content for AS and the first year of A Level. It balances accessible exposition with a wealth of worked examples, exercises and opportunities to test and consolidate learning, providing a clear and structured pathway for progressing through the course. It is underpinned by a strong pedagogical approach, with an emphasis on skills development and the synoptic nature of the course. Includes answers to aid independent study.

AQA A Level Further Maths: Year 1 + Year 2

Learning how to use and apply maths to solve problems is a critical aspect of children's mathematical development during their time at primary school. Our We Can Do It series offers stimulating problem-solving challenges that inspire genuine mathematical thinking.

Maths Problem Solving Year 5

Features 50 photocopiable problem solving activities. This title covers number, handling data, shape, space and measurement. It provides interesting activities for early finishers.

A Level Mathematics for OCR A Student Book 1 (AS/Year 1)

A Maths Resource for Ages 5-7 in Key Stage 1. The aim of this maths resource is to improve children and adults understanding of arithmetic questions. The strategies to be practiced and learned can be applied to differing number sentences, the formal written methods of the four operations, fraction calculations in arithmetic and reasoning and problem solving scenarios. The 4 headings used within this book are explained as follows. Understanding the Number Sentence - put the number sentence into context, using a real life scenario or explain it, as it is written in figures and/or words as seen. Concrete Objects - physical math resources or general resources that can be used to aid the understanding and working out of the number sentences. (Search the internet for the maths resources) Strategy to Apply - a way of working out the number sentences in written format accurately and in an efficient manner. The strategy can also be a mental calculation as well. Pictorial Representations - how the number sentences can be illustrated in a way to aid the understanding of the strategy to be applied.

Power Maths Year 1 Textbook 1A

The 'Maths Additions' range of supplementary resources provide focused teaching material that targets specific needs and offer classroom solutions. 'Investigative Maths' provides teachers with an

easy-to-use, no preparation resource that enables children to develop their investigative skills in the daily maths lesson.

We Can Do It! Year 1 Using and Applying Maths Challenges

Teach children problem-solving strategies with these imaginative and creative maths problems. This book shows how once children have learned the different approaches they can become independent creative thinkers and systematically apply their skills. * Problems are set in creative contexts to engage and motivate children. * Plenty of visual and hands-on resources used to cater for different learning styles. * Support for more and less able provided. * Plenty of follow-up suggestions for further work for children to apply their knowledge. * Full colour examples of pupil work included.

Maths Problems Galore

Pupils can quickly get to grips with KS2 problem solving and reasoning by completing activities categorised by topic and question type. Fully in line with the new National Curriculum.

Ks1 Maths Arithmetic Calculations for Year 1

Ten dinosaur friends are playing hide-and-seek. Can you help to find them all? Download the full eBook and explore supporting teaching materials at www.twinkl.com/originals Join Twinkl Book Club to receive printed story books every half-term at www.twinkl.co.uk/book-club (UK only).

Investigative maths

This series contains primary teaching resources for each school year running from year one to year six. It is designed to help children practice and consolidate the problem solving strand of the National Numeracy Strategy, whilst at the same time developing other key mathematical skills and concepts.

Maths Problem Solving Ages 5-7

Exam Board: Edexcel Level: AS/A-level Subject: Mathematics First Teaching: September 2017 First Exam: June 2019 Endorsed for Edexcel Build your students' confidence in applying mathematical techniques to solving problems with resources developed with leading Assessment Consultant Keith Pledger and Mathematics in Education and Industry (MEI). - Build reasoning and problem-solving skills with practice questions and well-structured exercises that build skills and mathematical techniques. - Develop a fuller understanding of mathematical concepts with real world examples that help build connections between topics and develop mathematical modelling skills. - Address misconceptions and develop problem-solving with annotated worked examples. - Supports students at every stage of their learning with graduated exercises that build understanding and measure progress. - Provide clear paths of progression that combine pure and applied maths into a coherent whole. - Reinforce Year 1 content with short review chapters - Year 2 only.

Maths Problem Solving Year 6

Teach children problem-solving strategies with these imaginative and creative maths problems. This book shows how once children have learned the different approaches they can become independent creative thinkers and systematically apply their skills. * Problems are set in creative contexts to engage and motivate children. * Plenty of visual and hands-on resources used to cater for different learning styles. * Support for more and less able provided. * Plenty of follow-up suggestions for further work for children to apply their knowledge. * Full colour examples of pupil work included.

Problem Solving and Reasoning Pupil Book 4 (Busy Ant Maths)

Karri really wants to go to the Mummy and Daughter Disco in town. "But I don't have a mummy in my family," she said. "Does that mean I can't go?" Follow one brave koala as she sets out on a mission to make every family feel part of the party. Download the full eBook and explore supporting teaching materials at www.twinkl.com/originals Join Twinkl Book Club to receive printed story books every half-term at www.twinkl.co.uk/book-club (UK only).

Hide-a-Saurus

This spiral bound photocopiable book contains 25 problem-solving activities, each activity is presented so that it can be cut up to make a collection of cards. The cards are written specifically for children operating at levels 3 to 6 of the National Curriculum in mathematics and as such will be appropriate for use in both primary and early secondary phases of education.

Maths Facts

Primary Problem-Solving in Mathematics

(Free Sample) Ecology, Environment, Bio-diversity, and Climate Change TextGuide for Civil Services UPSC & State PSC Prelim & Main Exams | Previous Year Questions ... Expert's Advice, Prelims & Mains Pointers |

The primary goal of this book is to enable effective, updated and easy preparation for UPSC and State PSC exams. Both the structure and content of the book have been carefully designed to serve the triple purposes of self-study, revision, and expert guidance to the aspirant. # Each chapter begins with Learning Outcomes, Chapter Analysis and Issues to Ponder to introduce the topics covered, develop curiosity, and capture student's interest. # The book is filled with infographics at relevant places which is helpful to learn answer writing presentations of Mains exam writing. # The infographics or images are such that they can be memorized and elaborated in words for answer making. # Further, this is a Text-Guide in the sense that it combines the theoretical knowledge of a textbook with the practical, strategic aspects of a Guide. # This Text-Guide aims to solve all content and guidance-related problems of a student at once. # It is powered with a section called 'Expert's Advice' where the author directly addresses, guides and instructs the student using his expert knowledge. # This will help the student to understand which sections are most important, what can be asked in future, and what should not be skipped strictly from exam point-of-view. # In terms of the content, the differences between Ecology and Environment and between Environmental Studies and Environmental Sciences have been clearly maintained throughout the book. # The writing style is lucid, concise and cross-referential. Sections from all chapters are linked with questions that previously appeared in Prelims and Mains, thus helping you keep the big picture in mind. # Prelims Confusing Terms Simplified, Prelims Pointers, Mains Pointers, Think Tank, and In short are mentioned throughout the book wherever necessary. # A separate Chapter with short revision notes encompassing the crux of the whole book, by the name of SNAPSHOT, is provided at the end of the Book. # This book is a comprehensive text-guide with exhaustive discussion in 45 Chapters. The theory is enriched with Previous year Prelims Questions, NCERT based MCQs and Mains related questions and answers. # There is detailed emphasis on concepts and anecdotes through factsheets in all the chapters.

Geography Optional For UPSC Mains: Previous Years Solved and Practice Model Questions

Geography Optional Solved Previous Years' and Model Questions For UPSC Civil Services and other competitive exams Geography is a highly popular optional subject in the UPSC mains exam. It is especially popular with candidates with a science or engineering background because of the nature of the subject itself. It is a science and this makes it attractive for such candidates. It is also popular because of the overlap with the syllabus for UPSC Geography Optional pros and cons There are many benefits of taking geography as an optional in the civil services mains exam like overlap, scientific nature of the subject, etc. There are also a few hiccups such as the rather vast syllabus. In this section, we discuss the pros and cons of the Geography optional in the IAS mains exam. Advantages of Geography optional Geography, as an optional, has a number of advantages which will help candidates up their final tally in the UPSC exam. Overlap with General Studies There is tremendous overlap with the GS paper I. This is true for both the prelims and the mains exams. Overlap with the Mains GS papers: There is a whole section for Geography in the GS paper I. Even some topics like tribal issues, reorganisations, etc. are covered in the optional subject. About 80 – 100 marks worth questions are asked in the General Studies I paper which you would have covered while preparing for your optional. Even though there are not many topics in GS II with a direct overlap, some topics from International Relations finds links with Geography such as geopolitics of the Indian Ocean region, SAARC, India and her neighbours, BIMSTEC, and so on. Opinion-based questions like in geopolitics and regional geography is also a part of international relations and current affairs. In GS III, the topics that can be covered from the Geography optional include agriculture, cross-border crimes, planning, development, infrastructure, industries and resources, transportation, demographic dividend, etc. Geography also has a lot of overlap with subjects

like economy, environment and conservation. Help in the UPSC Personality Test Even in the interview, you may be asked about the regional geography of your hometown, such as the climate, soil type, vegetation, etc. which can be answered better with specialised knowledge of geography. Nature of the subject Geography is a multidisciplinary subject. Hence, it is popular with a lot of candidates with a science/engineering background. Once the concepts or the theory behind any phenomenon are understood, you can easily write the answers in your own words. Scoring subject Many consider geography a scoring subject because of many factors:

- In theories, there are conceptual and fact-based questions where there is less margin to reduce marks.
- You can draw diagrams, flowcharts and tables to represent your answers better and drive the point home. A single good diagram speaks for about a hundred words. This saves time in the mains exam.
- Map-based questions are particularly scoring.

Disadvantages of Geography optional The chief pitfall of this optional is that it has a vast syllabus. Also, the competition in this subject is also huge as almost 4000 candidates opt for this optional subject. Geography optional strategy How to start? To start with this optional, the NCERTs and GC Leong are excellent sources. NCERTs present the concepts in a clear and simple language. They are easy to read and understand, especially if you are a newbie to the subject. Both the NCERTs and GC Leong have very good diagrams which are very important for scoring marks in this subject. Geography and current affairs Until a few years ago, many questions asked used to be static in this subject and only Paper II had more of a dynamic nature. But now, most of the questions asked (both in Papers I and II) are linked to current affairs. It is very important to maintain a separate file of notes for Geography-related current affairs. The newspapers are the best source for this. Almost on a daily basis, you will find some news or editorials on topics like agriculture, industries, fisheries, monsoons, climate change, conservation, wildlife, energy, etc. So, you must jot down important and exam-related points from those news items. For example, the discovery of a new species of flora can be a potential question for the prelims. Along with the notes, you must also preserve any map or diagram given in the newspapers related to the event. Another example, if a particular year saw crop failure, you must understand the climatic reason behind it and the underlying phenomenon of seasons. Please remember, more than the raw facts and numbers, it is the underlying phenomenon or concept that is more important to study. In 2018, Paper I had a question directly linked to current events. Explain the unusual intensity of dust storms and thunder storms across India in the pre-monsoon period of year 2018. (10 marks) Atlas by your side It is essential that you keep an atlas by your side while preparing for this optional. Whether it is the static or the dynamic portions you are reading, having an atlas by your side will help you visually see what you are reading about. This will help you understand the concepts better and also helps in better retention. For example, when you learn about the geo-politics of the Indian Ocean region, an atlas will help you locate the countries and islands that are important to the issue. Note making Notes are very important during preparation, particularly when you are tackling a vast subject like geography. Make sure you make notes only for those topics for which textbooks do not provide a readable content. Otherwise, it would be a waste of time. Do not make notes for every topic. Note making is especially important for current affairs. Your sources for notes should be newspapers, magazines like Down to Earth, government reports, Economic Survey, etc. Augment your notes with diagrams and flowcharts. Previous year question papers It is important to solve previous year papers as it gives you a sense of the most important topics. Maps You must practice maps as these questions if done correctly, fetch great marks. It is advisable to prepare region-wise maps from standard textbooks covering topics like physical features, terrain, soil, rivers, agriculture, monsoons, industries, resources, drainage, etc. Types of questions There are basically three types of questions in the Geography optional. Direct questions These are direct questions straight from the syllabus such as the difference between tropical and temperate cyclones and the like. In such cases, since everybody writes the same thing, it is important to present your answer appealingly. Make the answer neat and precise. Draw diagrams wherever possible. Open-ended questions For these questions, there is more freedom to add positive and negative aspects of concepts. You should also cover multiple dimensions of the issue or concept asked in the question. As usual, do include drawings and map locations if possible. Map-based questions Practice the map-based questions that were asked in the last 20 years in the IAS mains. Practice daily so that you can internalise important locations, markings, etc. Answer writing in geography Diagrams are very important. They help you explain concepts with fewer words. You can save time by including diagrams in your answers. They also fetch more marks. For example, in a question where you are writing about the intensity of the energy crisis in the world, you can draw a map of the world showing the areas of low crisis, moderate crisis and severe crisis. Try to incorporate aspects of both physical and human geography in your answers. Wherever possible, try to present the human angle also. This will also provide an administrative angle to the issue. For example, in a question about Himalayan and Peninsular drainage systems, you can talk about the differences in cropping patterns

also. According to topper Pratham Kaushik, when you write answers, make them along the lines of the syllabus like illustrated below: Examine the role of small towns in the regional development process. Divide your answer into the following segments: Population and Settlement, Regional Development and Planning, Industries, Resources, Agriculture, Transport and Trade, Political Geography, and Cultural Setting. This will make the answer more diverse and multidimensional. Tackling the huge syllabus It is important to read the syllabus thoroughly before starting with the preparation. Basically, we can divide the syllabus into three: 1. Physical Geography 2. Human Geography 3. Indian Geography The first two sections form a part of Paper I and Indian Geography forms a part of Paper II. When you prepare, try to link paper I and paper II. Topics like population, regional development, climatology, settlement geography and so on can be used for both papers. Examples from one section can be used to make your answers for the other section more relevant. General tips for geography optional preparation There are two papers in geography optional and the syllabus together is huge. Get well-acquainted with the topics and check the trends in previous years' questions to figure out which topics are most frequently asked about. 1. For every topic, refer two-three sources to ensure you have the most authentic information and there is no chance of an error in your knowledge. 2. Set a realistic goal for your study table and understand that this amount of syllabus will require 2-3 months at least to be completed. Hence start your study accordingly. 3. Instead of making all the notes alone, rely more on class notes from tutors which you will find in plenty online. Shabbir and Himanshu Sir are some of the top-recommended tutors whose notes are even referred by toppers like Pratham Kaushik (AIR- 5, CSE- 2017). 4. Paper-1 in Geography optional covers two topics- namely, physical geography and human geography. Determine beforehand the section from which you want to attempt the maximum questions and plan your study table accordingly. 5. Practices find interrelations between the topics explored in the syllabus for each paper. This way you can enrich your answers. When you are able to link the topics, you can make your answers more substantial with better references and even statistics, as needed. All the best!!

UPSC Mains Geography (Optional) Question Papers

UPSC Mains Geography (Optional) Question Papers (2010-2019) Contents: UPSC MAINS - GEOGRAPHY OPTIONAL Papers 2019 UPSC MAINS - GEOGRAPHY OPTIONAL Papers 2018 UPSC MAINS - GEOGRAPHY OPTIONAL Papers 2017 UPSC MAINS - GEOGRAPHY OPTIONAL Papers 2016 UPSC MAINS - GEOGRAPHY OPTIONAL Papers 2015 UPSC MAINS - GEOGRAPHY OPTIONAL Papers 2014 UPSC MAINS - GEOGRAPHY OPTIONAL Papers 2013 UPSC MAINS - GEOGRAPHY OPTIONAL Papers 2012 UPSC MAINS - GEOGRAPHY OPTIONAL Papers 2011 UPSC MAINS - GEOGRAPHY OPTIONAL Papers 2010

Agriculture Optional - UPSC CSE (IAS) Mains: Solved Previous Years and Model Questions

Agriculture is a very scoring optional subject in the UPSC civil services Mains exam. Aspirants with an academic background in Agriculture, Zoology, Botany and related fields can opt this as their optional for UPSC IAS Mains Exam. The optional is tough for aspirants without any background in biology or agriculture, so needless to say, such aspirants should stay away from this optional. Agriculture is a technical subject, however, with the correct strategy; candidates can do really well in this optional subject in their very first attempt. The Paper I of Agriculture Optional paper is akin to the GS Paper chiefly concentrates on-farm practices and the basic concepts of agriculture. But Paper-II of Agriculture optional covers the technical terms such as Cell Theory, cell structure and so on, which is an eliminating factor if not studied comprehensively. Salient features: 160+ Mains questions (Previous years + Model/Current/Trending) in tune with the UPSC standard and pattern detailed and well-researched synopsis for each question topic-wise segregation of questions for a quick revision solutions to 2020 UPSC Agriculture Optional provided online. Topic Covered: •Ecology •Agronomy •Weed science •Forestry •Soil science and nutrient management •Soil and water conservation •Agricultural economics •Agricultural extension •Cell biology •Plant breeding •Seed production and technology •Plant physiology •Horticulture and landscape gardening •Plant protection techniques •Food production and nutrition management All the best!!

PMF IAS Environment for UPSC 2022-23

Ace UPSC Environment Prelims and Mains Questions like a boss with PMF IAS Environment. PMF IAS Environment is a must-have book for UPSC/IAS Civil Services & Indian Forest Service (IFS) Exam Aspirants. One-Stop Solution: PMF IAS Environment is the only book that you will need to cover the subject of Environment and Ecology thoroughly. It is the most comprehensive yet simple solution for

Environment and Ecology for UPSC exams. PMF IAS Environment is the highest-rated Environment and Ecology book on various e-commerce platforms. Highlights of PMF IAS Environment: - Holistic coverage of UPSC/IAS Prelims + Mains syllabus. - Extraordinary Colorful Images, Infographics and Maps. (You will no longer need those boring books). - Colour Coding and Highlighting to Identify Prelims and Mains Focus Content. (Comes in handy in quick revision). - Lucid Language with One-liners, Two-liners & Short Sentences. (Helps you concentrate longer). - 2011-20 Prelims Questions are thoroughly solved under relevant headings. The explanations are comprehensive and help you understand how to tackle the questions asked by UPSC. - Important Current Affairs are smartly integrated under relevant sections. This helps you understand how to link dynamic content with static content. - Protected Area Network (National Parks, Tiger Reserves, WLS, etc.) is thoroughly covered along with the relevant maps. - Best-in-class print and page quality. You can use highlighters worry-free. Additional Perks: 1) Free Monthly and Half-Yearly Current Affairs PDF compilations on the PMF IAS website. 2) Free Environment Video series on Youtube (to be continued from April 2022).

[Updated] Agriculture Optional Solved Previous Years' and Model Questions for UPSC Civil Services Mains Exam 2023

180+ Mains questions (Previous years + Model/Current/Trending) in tune with the UPSC standard and pattern detailed and well-researched synopsis for each question topic-wise segregation of questions for a quick revision solutions to 2023 UPSC Agriculture Optional provided online. Agriculture is a very scoring optional subject in the UPSC civil services Mains exam. Aspirants with an academic background in Agriculture, Zoology, Botany and related fields can opt this as their optional for UPSC IAS Mains Exam 2023. The optional is tough for aspirants without any background in biology or agriculture, so needless to say, such aspirants should stay away from this optional. Agriculture is a technical subject, however, with the correct strategy; candidates can do really well in this optional subject in their very first attempt. The Paper I of Agriculture Optional paper is akin to the GS Paper chiefly concentrates on-farm practices and the basic concepts of agriculture. But Paper-II of Agriculture optional covers the technical terms such as Cell Theory, cell structure and so on, which is an eliminating factor if not studied comprehensively. The syllabus of UPSC IAS Mains exam Agriculture optional is not lengthy and hence, aspirants can finish it easily. The Paper-II is like the Botany Paper II. So candidates having a background in Botany can also tackle this paper if they have decent knowledge and comprehension of the subject. Several topics in agriculture have direct overlap with the GS papers, particularly in Geography and Economy. Tips for UPSC Agriculture Optional: 1. Candidates should have a good familiarity regarding the syllabus of Agriculture optional. 2. Candidates ought to be familiar with the fundamental concepts of agriculture to handle Paper II. 3. Make diagrams, short notes and flowcharts while preparing to make revision a lot easier. 4. Aspirants should focus on the economic dimensions as well as sustainability also. Candidates should remain in touch with the latest government data on agriculture-related statistics that are to be sourced from government sources like the agriculture ministry website and the Economic Survey. The most important part of the UPSC Exam preparation is trying to solve the old UPSC Mains question papers. For this optional too, candidates should read through the UPSC Previous year papers to form an idea about the exam pattern and trends.

5 Years UPSC IAS Mains Topic-wise Solved Papers (2019 to 2015) for Paper B (Compulsory English), Paper I (Essay), & Paper II - V (General Studies Papers 1 to 4)

IAS is one of the most sought after career these days. For an aspirant to be successful in this exam, he must have a thorough knowledge of India - social, political, economical, geographical, international climate. Students need to start well in advance such that they not only attain the fundamental knowledge but also gain the ability to generate their opinion and ideas about a topic. The IAS Foundation Book is an attempt in the same direction. Undergraduate Students and class 11/ 12 students who aspire for this career can start with this book. The book provides 175+ articles from diverse areas like History, Geography of the World , Polity Governance, Constitution, Social Justice, International relations, Technology, Economic Development, Bio diversity, Environment, Security, Disaster Management, Ethics, Integrity and Aptitude. These articles not just provide you the complete update on the topic but will also guide you to analyse and explore the various issues associated with it. The articles are followed by exercises constituting vocabulary questions, comprehension questions, related general awareness questions and opinion creation/ analytical questions. The book provides answers to the 1st three type of questions. The opinion creation/ analytical questions are open-ended and requires a lot of thinking and analysis before answering. It is one of the most powerful book that will expose you to the most sensitive issues, ideas, events, people or places.

7 Years UPSC IAS/ IPS Mains Essay Year-wise Solved Papers (2013 - 2019)

This open access book discusses the impact of human-induced global climate change on the regional climate and monsoons of the Indian subcontinent, adjoining Indian Ocean and the Himalayas. It documents the regional climate change projections based on the climate models used in the IPCC Fifth Assessment Report (AR5) and climate change modeling studies using the IITM Earth System Model (ESM) and CORDEX South Asia datasets. The IPCC assessment reports, published every 6–7 years, constitute important reference materials for major policy decisions on climate change, adaptation, and mitigation. While the IPCC assessment reports largely provide a global perspective on climate change, the focus on regional climate change aspects is considerably limited. The effects of climate change over the Indian subcontinent involve complex physical processes on different space and time scales, especially given that the mean climate of this region is generally shaped by the Indian monsoon and the unique high-elevation geographical features such as the Himalayas, the Western Ghats, the Tibetan Plateau and the adjoining Indian Ocean, Arabian Sea, and Bay of Bengal. This book also presents policy relevant information based on robust scientific analysis and assessments of the observed and projected future climate change over the Indian region.

Assessment of Climate Change over the Indian Region

Climate Change: Evidence and Causes is a jointly produced publication of The US National Academy of Sciences and The Royal Society. Written by a UK-US team of leading climate scientists and reviewed by climate scientists and others, the publication is intended as a brief, readable reference document for decision makers, policy makers, educators, and other individuals seeking authoritative information on the some of the questions that continue to be asked. Climate Change makes clear what is well-established and where understanding is still developing. It echoes and builds upon the long history of climate-related work from both national academies, as well as on the newest climate-change assessment from the United Nations' Intergovernmental Panel on Climate Change. It touches on current areas of active debate and ongoing research, such as the link between ocean heat content and the rate of warming.

Environment Studies
