A riveting history of the Mafia from 1860s Sicily to 1960s America—as narrated by a former heist expert and Gambino family mobster. The mafia has long held a powerful sway over our collective cultural imagination. But how many of us truly understand how a clandestine Sicilian criminal organization came to exert its influence over nearly every level of American society? In *Borgata: Rise of Empire*, former mobster Louis Ferrante pulls back the curtain on the criminal organization that transformed America. From the potent political cauldron of nineteenth-century Sicily to New Orleans, New York and the gangster paradise of Las Vegas, Ferrante traces the social, economic, and political forces that powered the mafia's unstoppable rise. Ferrante's vivid portrayal of early American mobsters—Lucky Luciano, Vito Genovese, Frank Costello, and Meyer Lansky—fills in crucial gaps of the mafia narrative to deliver the most comprehensive account yet of the world's most famous criminal fraternity. *Borgata: Rise of Empire*—the first in a three-volume epic history—is a groundbreaking achievement from a man who has seen it all from the inside. In this masterful accomplishment, Ferrante takes the reader from the mafia's inauspicious beginnings to the height of their power as the most influential criminal network in the country.

Once the world's tallest skyscraper, the Woolworth Building is noted for its striking but incongruous synthesis of Beaux-Arts architecture, fanciful Gothic ornamentation, and audacious steel-framed engineering. Here, in the first history of this great urban landmark, Gail Fenske argues that its design serves as a compelling lens through which to view the distinctive urban culture of Progressive-era New York. Fenske shows here that the building's multiplicity of meanings reflected the cultural contradictions that defined New York City's modernity. For Frank Woolworth—founder of the famous five-and-dime store chain—the building served as a towering trademark, for advocates of the City Beautiful movement it suggested a majestic hotel de ville, for technological enthusiasts it represented the boldest of experiments in vertical construction, and for tenants it provided an evocative setting for high-style consumption. Tourists, meanwhile, experienced a spectacular sightseeing destination and avant-garde artists discovered a twentieth-century future. In emphasizing this faceted significance, Fenske illuminates the process of conceiving, financing, and constructing skyscrapers as well as the mass phenomena of consumerism, marketing, news media, and urban spectatorship that surround them. As the representative example of the skyscraper as a “cathedral of commerce,” the Woolworth Building remains a commanding presence in the skyline of lower Manhattan, and the generously illustrated *Skyscraper and the City* is a worthy testament to its importance in American culture.

Borgata

Before the Civil War, Coney Island boasted a beach, a dozen small hotels with ramshackle bathhouses, some chowder stands and a few saloons. After the war, it was taken over by powerful individuals who made its 0.7 square miles a domain of the wealthy. By 1905, with the population of New York City at four million, the city's amusement park builders designed an entertainment wonderland on the island that even the poor could enjoy, creating a “nickel empire,” where visitors paid five cents for the subway, five cents for a Nathan's hot dog and five cents for a ride. In 1910, Coney Island saw 20 million visitors—more than Disneyland and Disney World combined could claim 70 years later, adjusted for population growth. Through the decades, the island has seen changes of fortune, floods and fires, cycles of decay and rehabilitation. Yet the ultimate power on the island was and is the government of the city of New York, which—for good or ill—has made Coney Island what it is today.

In 1939 Frank Luther Mott received a Pulitzer Prize for Volumes II and III of his *History of American Magazines*. In 1958 he was awarded the Bancroft Prize for Volume IV. He was at work on Volume V of the projected six-volume history when he died in October 1964. He had, at that time, written the sketches of the twenty-one magazines that appear in this volume. These magazines flourished during the period 1905-1930, but their “biographies” are continued throughout their entire lifespan—in the case of the ten still published, to recent years. Mott's daughter, Mildred Mott Wedel, has prepared this volume

for publication and provided notes on changes since her father's death. No one has attempted to write the general historical chapters the author provided in the earlier volumes but which were not yet written for this last volume. A delightful autobiographical essay by the author has been included, and there is a detailed cumulative index to the entire set of this monumental work. The period 1905-1930 witnessed the most flamboyant and fruitful literary activity that had yet occurred in America. In his sketches, Mott traces the editorial partnership of H. L. Mencken and George Jean Nathan, first on *The Smart Set* and then in the pages of *The American Mercury*. He treats *The New Republic*, the liberal magazine founded in 1914 by Herbert Croly and Willard Straight; the conservative *Freeman*; and *Better Homes and Gardens*, the first magazine to achieve a circulation of one million "without the aid of fiction or fashions." Other giants of magazine history are here: we see "serious, shaggy...solid, pragmatic, self-contained" Henry Luce propel a national magazine called *Time* toward its remarkable prosperity. In addition to those already mentioned, the reader will find accounts of *The Midland*, *The South Atlantic Quarterly*, *The Little Review*, *Poetry*, *The Fugitive*, *Everybody's*, *Appleton's Booklovers Magazine*, *Current History*, *Editor & Publisher*, *The Golden Book Magazine*, *Good Housekeeping*, *Hampton's Broadway Magazine*, *House Beautiful*, *Success*, and *The Yale Review*.

Martin T. Manton was a corrupt federal appeals court judge in New York who was convicted in 1939 and sent to prison. At the time, this was a hugely important story: Manton was considered the highest-ranking judge in the United States after the nine Justices of the Supreme Court, and was nearly appointed to that august body in 1922. Yet his story has never been told in book-length form before, and never with the benefit of such exhaustive research. More than just a biography, *Justice for Sale* examines Manton's misconduct in the context of the culture of corruption and organized crime that permeated New York City in the first part of the twentieth century. Dozens of others—prominent business executives, leading Wall Street lawyers, accountants, bankers, fixers, con men, another federal judge—participated in Manton's crimes. The book profiles these unscrupulous and often colorful characters as well. It wasn't until Manhattan D.A. and future presidential candidate Thomas Dewey's successful pursuit of Manton, a federal grand jury investigation, and a sensational prosecution and trial in federal court that shocked the nation that Manton and his corrupt schemes were finally brought down.

The Work of Augustus Saint-Gaudens

At the beginning of the twentieth century, industrialization both dramatically altered everyday experiences and shaped debates about the effects of immigration, empire, and urbanization. In *American Abyss*, Daniel E. Bender examines an array of sources—eugenics theories, scientific studies of climate, socialist theory, and even popular novels about cavemen—to show how intellectuals and activists came to understand industrialization in racial and gendered terms as the product of evolution and as the highest expression of civilization. Their discussions, he notes, are echoed today by the use of such terms as the "developed" and "developing" worlds. American industry was contrasted with the supposed savagery and primitivism discovered in tropical colonies, but observers who made those claims worried that industrialization, by encouraging immigration, child and women's labor, and large families, was reversing natural selection. Factories appeared to favor the most unfit. There was a disturbing tendency for such expressions of fear to favor eugenicist "remedies." Bender delves deeply into the culture and politics of the age of industry. Linking urban slum tourism and imperial science with immigrant better-baby contests and hoboes, *American Abyss* uncovers the complex interactions of turn-of-the-century ideas about race, class, gender, and ethnicity. Moreover, at a time when immigration again lies at the center of American economy and society, this book offers an alarming and pointed historical perspective on contemporary fears of immigrant laborers.

The Skyscraper and the City

Christopher Knowlton, author of *Cattle Kingdom* and former *Fortune* writer, takes an in-depth look at the spectacular Florida land boom of the 1920s and shows how it led directly to the Great Depression. The 1920s in Florida was a time of incredible excess, immense wealth, and precipitous collapse. The decade there produced the largest human migration in American history, far exceeding the settlement of the West, as millions flocked to the grand hotels and the new cities that rose rapidly from the teeming wetlands. The boom spawned a new subdivision civilization—and the most egregious large-scale assault on the environment in the name of "progress." Nowhere was the glitz and froth of the Roaring

Twenties more excessive than in Florida. Here was Vegas before there was a Vegas: gambling was condoned and so was drinking, since prohibition was not enforced. Tycoons, crooks, and celebrities arrived en masse to promote or exploit this new and dazzling American frontier in the sunshine. Yet, the import and deep impact of these historical events have never been explored thoroughly until now. In *Bubble in the Sun* Christopher Knowlton examines the grand artistic and entrepreneurial visions behind Coral Gables, Boca Raton, Miami Beach, and other storied sites, as well as the darker side of the frenzy. For while giant fortunes were being made and lost and the nightlife raged more raucously than anywhere else, the pure beauty of the Everglades suffered wanton ruination and the workers, mostly black, who built and maintained the boom, endured grievous abuses. Knowlton breathes dynamic life into the forces that made and wrecked Florida during the decade: the real estate moguls Carl Fisher, George Merrick, and Addison Mizner, and the once-in-a-century hurricane whose aftermath triggered the stock market crash. This essential account is a revelatory—and riveting—history of an era that still affects our country today.

Beginning with the State Fair as a window on Indiana as a whole, Martin interprets the Hoosier state and its history, from the Civil War and its impact on the state to the period during and just after World War II. As he says, "It is a conception of Indiana as a pleasant, rather rural place inhabited by people who are confident, prosperous, neighborly, easygoing, tolerant, shrewd."

A History of American Magazines, Volume V: 1905-1930

As a Ziegfeld Follies girl and film actress, Justine Johnstone (1895-1982) was celebrated as "the most beautiful woman in the world." Her career took an unexpected turn when she abruptly retired from acting at 31. For the remainder of her life, she dedicated herself to medical research and social activism. As a cutting-edge pathologist, she contributed to the pre-penicillin treatment of syphilis at Columbia University, participated in the development of early cancer treatments at Caltech, and assisted Los Angeles physicians in oncology research. As a divorced woman in the 1940s, she adopted and raised two children on her own. She later helped find work for blacklisted Hollywood screenwriters and became a prominent participant in social and political causes. The first full-length biography of Johnstone chronicles her extraordinary success in two male-dominated fields--show business and medical science--and follows her remarkable journey into a fascinating and fulfilling life.

In 1899, one of America's wealthiest men assembled an interdisciplinary team of experts--many of whom would become legendary in their fields--to join him, entirely at his expense, on a voyage to the largely unknown territory of Alaska. The Harriman Expedition remains unparalleled in its conception and execution. This book follows the team closely: where they went, what they did, and what they learned--including finding early evidence of glacial retreat, assessing the nature and future of Alaska's natural resources, making important scientific discoveries, and collecting an astonishing collection of specimens. A second thread involves the lives and accomplishments of the members of the party, weaving biographical strands into the narrative of the journey and the personal experiences they shared. This is the first comprehensive, scholarly treatment of the Harriman Alaska Expedition since the 1980s. It features the diaries, letters home, and post-Expedition writings, including unpublished autobiographies, generated by the members of the party.

Justice for Sale

Robert W. Rydell contends that America's early world's fairs actually served to legitimate racial exploitation at home and the creation of an empire abroad. He looks in particular to the "ethnological" displays of nonwhites—set up by showmen but endorsed by prominent anthropologists—which lent scientific credibility to popular racial attitudes and helped build public support for domestic and foreign policies. Rydell's lively and thought-provoking study draws on archival records, newspaper and magazine articles, guidebooks, popular novels, and oral histories.

Introducing the new Fisher Investment Series, comprised of engaging and informative titles written by renowned money manager and bestselling author Ken Fisher. This series offers essential insights into the worlds of investing and finance. Over the course of nearly two centuries, the innovations, mistakes, and scandals of different market participants have played an important role in shaping today's financial markets. Now, in *100 Minds That Made the Market*, Ken Fisher delivers cameo biographies of these pioneers of American financial history. From Joe Kennedy's "sexcapades" to Jesse Livermore's suicide, this book details the drama, the dirt, and the financial principles of an amazingly inventive group of financial minds. Fisher digs deep to uncover the careers, personal lives, and contributions of these individuals, and leads you through the lessons that can be learned from each one. Here you have 100 of the best teachers -- some you already know, some you will feel you know, and some you may not have previously discovered -- whose experiences will undoubtedly enhance your understanding of the markets. With a few pages dedicated to each person, *100 Minds That Made the Market* quickly captures the essence of the people and ideas that have influenced the evolution of the financial industry.

A San Francisco Songster, 1849-1939

More than nine million soldiers died in World War I. At the same time, a US-led effort saved nearly ten million civilians from starvation behind the lines during the German occupation, yet one of America's greatest humanitarian efforts is virtually unknown today. In this gripping book, Jeffrey B. Miller tells the remarkable history of two American and Belgian citizen-created organizations that led a massive food relief program for civilians trapped in German-occupied Belgium and northern France. Herbert Hoover, then a successful international businessman, was the driving force behind the effort, coercing and bullying the governments of Germany, Great Britain, France, and the United States to allow a group of idealistic young volunteers to organize in occupied Belgium and coordinate the distribution of tons of food and clothing to desperate Belgians. These crusaders, known as CRB delegates, had to maintain strict neutrality as they watched the Belgians suffer under the harsh German regime. Miller tells compelling stories of German brutality, Belgian relief efforts, and the idealistic Americans who went into German-occupied Belgium from October 1914 up to May 1917, when they were forced to leave after the April entry into the war of the United States. Yanks interweaves the history of the time with fascinating personal stories of volunteers, diplomats, a young Belgian woman who started a dairy farm to feed Antwerp's children, the autocratic head of the Belgian relief organization, and the founder of the American organization, who would become known to the world as the Great Humanitarian and later, largely because of his work in Belgium and post-war Europe, would become the thirty-first president of the United States. New York City's elite women who turned a feminist cause into a fashionable revolution In the early twentieth century over two hundred of New York's most glamorous socialites joined the suffrage movement. Their names—Astor, Belmont, Rockefeller, Tiffany, Vanderbilt, Whitney and the like—carried enormous public value. These women were the media darlings of their day because of the extravagance of their costume balls and the opulence of the French couture clothes, and they leveraged their social celebrity for political power, turning women's right to vote into a fashionable cause. Although they were dismissed by critics as bored socialites “trying on suffrage as they might the latest couture designs from Paris,” these gilded suffragists were at the epicenter of the great reforms known collectively as the Progressive Era. From championing education for women, to pursuing careers, and advocating for the end of marriage, these women were engaged with the swirl of change that swept through the streets of New York City. Johanna Neuman restores these women to their rightful place in the story of women's suffrage. Understanding the need for popular approval for any social change, these socialites used their wealth, power, social connections and style to excite mainstream interest and to diffuse resistance to the cause. In the end, as Neuman says, when change was in the air, these women helped push women's suffrage over the finish line.

When buying a property, on completion isit best to remove the current tenants and give it a refurb or keep the tenants as they already have a good renting history

Hey Samuel I'm interested in rent to rent, my question is when you walk into an estate agent what is the first thing you say to them about rent to rent. And when you tell an agent is will be done as a corporate let, but corporate let is when you rent out to your employees what if you don't have employees but you want to rent it out to working professional.

what legal documents do you need for a rent to rent. and also how do you work out the roi on a deal/ detailed steps. i have a rough idea

Hello Samuel, I'm 20 years old and work in a estate agents as I wanted to gain knowledge about property to eventually become a property investor like yourself. I have around 20k just sat in the bank not making me any money what would you recommend me doing to get started on my property investing journey?

How would you invest 30K?

Hi Samuel, if you have an 8 bed property - would you convert it to two 4-bed HMOs or keep it as an 8-bed HMO bearing in mind the costs involved with conversion to two flats? Or could you consider converting the property to four 2-bed single let flats? Thanks!

I want to get into deal sourcing, what is the best way to get started. Ps the crash course was epic!!!

Can you do brrr strategy through buy to let mortgage ?

Hey Samuel... I've found a 4 bed and a 5 bed next door to each other in one of the top 5 growth cities... 3 miles from city centre (+ Uni + hospital)... Have you had experience of buying 2 adjoining properties in a single transaction? Is that even possible? Yet to offer but numbers show Infinite return on a BRRR HMO strategy...

If you purchase a cheapish 2 bed BTL up north for around 70-80k, would you advise a single let or rent it out to two separate tenants?
