Congal : a Poem in Five Books

The text's elaborate illumination also brings to life a vibrant artistic center, the Monastery of Gladzor, which long ago disappeared." "The Armenian Gospels of Gladzor includes sixty color reproductions of the manuscript's illuminated pages, ten black-and-white illustrations, and two maps along with an essay that explores the book's artistic richness and theological complexity."--BOOK JACKET.

The Armenian Gospels of Gladzor

In the few years since the attack on the World Trade Center on September 11, 2001, evil has become a central theme in the media and human consciousness: the evil of terrorism, the evil of secular culture, concern for poverty, and climate change... Yet different cultures and religious traditions have different ideas of what evil is and what its root causes are. Although there is no massive clash of cultures,

many disagreements and also conflicts in the world arise from the deep differences in views of evil. This volume explores religious views of evil. Scholars from different religions and from various parts of the world describe how people probe the depths of evil—and by necessity that of good—from their own background in various worldviews. In their explorations, almost all address the need to go beyond morality, and beyond legalistic definitions of evil and of good. They point to the radical depths of evil in the world and in human society and reinforce our intuition that there is no easy solution. But if we can gain a better understanding of what people from other worldview traditions and cultures consider evil, we are that much closer to a more peaceful world.

Apocalypse of Abraham

This volume, the first of six to be published, studies fundamental values of Islam, along with the nature of rights and the responsibilities in a general context. The authors analyse the development of social thought and morality in Islam, and ways in which they are enforced through the family and education. Particular attention is paid to the status of women, children, youth and the socially excluded. Several chapters broach specially Islamic approaches to economics, government and justice. A world religion since its inception in the seventh century A.D., Islam is today seeking vigorous answers to contemporary problems through its multi-faceted history. Issues of poverty and wealth, inequality and demands for political expression, and respect for diversity in a difficult world of conformity are dealt with in this series. The study is organized along thematic rather than chronological lines and thus it is not necessary to read the volumes in order. Volume II is in fact the first to have been published. Volume IV is forthcoming end 2002, volume V mid 2003 and volumes III and VI in 2004. This volume, the first of six to be published, studies fundamental values of Islam, along with the nature of rights and the responsibilities in a general context. The authors analyse the development of social thought and morality in Islam, and ways in which they are enforced through the family and education. The different aspects of islamic culture

This electronic version has been made available under a Creative Commons (BY) open access license. Throughout the twentieth century, everyone from Marxists to economic individualists assumed that social and political activity was driven by the rational pursuit of material gain. Today, the fundamental importance of the cultivation and preservation of identity is finally re-emerging. This book explores the rich fabric of speech, dress, diet and the built environment from which human identity is made. Synthesising methods and ideas from numerous disciplines – including history, political science, anthropology, law and sociology – it presents a picture of human life as more than just a collection of material interests. Its ultimate aim is to show that no human activity is trivial or meaningless, that everything counts and 'plumage' matters. An open access version of this book, funded by the London School of Economics and Political Science, is available under a CC-BY licence at www.manchesteropenhive.com and www.oapen.org.

A Grammar of the Motu Language of Papua

The Jeu d'Adam is an Anglo-Norman mid-twelfth-century representation of several biblical stories, including the temptation of Adam and Eve and the subsequent fall, Cain and Abel, and the prophets Isaiah and Daniel. Its framework builds on the Latin responses of the mass during the liturgical season of Septuagesima, from before Lent to Easter. This collection of essays explores whether this early play was monastic or secular, its Anglo-Norman character, and the text's musical provenance.

Cultivating political and public identity

The author presents a clear-sighted and sobering analysis of where we are today in the struggle against terrorism. Jenkins, an internationally renowned authority on terrorism, distills the jihadists' operational code and outlines a pragmatic but principled approach to defeating the terrorist enterprise. We need to build upon our traditions of determination and self-reliance, he argues, and above all, preserve our commitment to American values.

The Jeu d'Adam

This open access book explores the role of religion in England's overseas companies and the formation of English governmental identity abroad in the seventeenth century. Drawing on research into the Virginia, East India, Massachusetts Bay, Plymouth, New England and Levant Companies, it offers a comparative global assessment of the inextricable links between the formation of English overseas government and various models of religious governance across England's emerging colonial empire. While these approaches to governance varied from company to company, each sought to regulate the behaviour of their personnel, as well as the numerous communities and faiths which fell within their jurisdiction. This book provides a crucial reassessment of the seventeenth-century foundations of British imperial governance.

Unconquerable Nation

This authoritative work provides an essential perspective on terrorism by offering a rare opportunity for analysis and reflection at a time of ongoing violence, threats, and reprisals. Some of the best international specialists on the subject examine terrorism's complex history from antiquity to the present day and find that terror, long the weapon of the weak against the strong, is a tactic as old as warfare itself. Beginning with the Zealots of the first century CE, contributors go on to discuss the Assassins of the Middle Ages, the 1789 Terror movement in Europe, Bolshevik terrorism during the Russian Revolution, Stalinism, "resistance" terrorism during World War II, and Latin American revolutionary movements of the late 1960s. Finally, they consider the emergence of modern transnational terrorism, focusing on the roots of Islamic terrorism, al Qaeda, and the contemporary suicide martyr. Along the way, they provide a groundbreaking analysis of how terrorism has been perceived throughout history. What becomes powerfully clear is that only through deeper understanding can we fully grasp the present dangers of a phenomenon whose repercussions are far from over. This updated edition includes a new chapter analyzing the rise of ISIS and key events such as the 2015 Paris attacks.

Filmatised in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

A clear-eyed, critical examination of the social, political, and economic costs of hosting the 2016 summer Olympics. The selection of Rio de Janeiro as the site of the summer 2016 Olympic Games set off jubilant celebrations in Brazil—and created enormous expectations for economic development and the advancement of Brazil as a major player on the world stage. Although the games were held without major incident, the economic, environmental, political, and social outcomes for Brazil ranged

from disappointing to devastating. Corruption scandals trimmed the fat profits that many local real estate developers had envisioned, and the local government was driven into bankruptcy. At the other end of the economic spectrum, some 77,000 residents of Rio's poorest neighborhoods—the favelas—were evicted and forced to move, in many cases as far as 20 or 30 miles to the west. Hosting the games ultimately cost Brazil \$20 billion, with little positive to show for the investment. Rio 2016 assembles the views of leading experts on Brazil and the Olympics into a clear-eyed assessment of the impact of the games on Brazil in general and on the lives of Cariocas, as Rio's residents are known. Edited by sports economist Andrew Zimbalist, the other contributors include Juliana Barbassa, Jules Boykoff, Jamil Chade, Stephen Essex, Renata Latuf, and Theresa Williamson.

Second-person storytelling is a continually present and diverse technique in the history of literature that appears only once in the oeuvre of an author. Based on key narratives of the post-war period, Evgenia Iliopoulou approaches the phenomenon in an inductive way, starting out from the essentials of grammar and rhetoric, and aims to improve the general understanding of second-person narrative within literature. In its various forms and typologies, the second person amplifies and expands the limits of representation, thus remaining a narrative enigma: a small narrative gesture - with major narrative impact.

#1 New York Times bestselling author Sherrilyn Kenyon brings us back to the astonishing world of the Dark-Hunters in Stygian, with a hero misunderstood by many . . . but most of all by himself. Born before man recorded time, I lived for thousands of years believing myself to be something I'm not. Someone I'm not. Lied to and betrayed by gods, Daimons and Dark-Hunters, I've struggled to find my way in a world where I've been cursed since the moment I was prematurely ripped from my mother and planted into the womb of an innocent woman who thought me her son. Trained as a slayer and predator, I learned to fit in and stay low. To become a tool for evil. Until I was sent to kill the one woman I couldn't. My hesitation cost her her life. Or so I thought. In an act of betrayal that makes all the others pale in comparison, I've learned that this world is an illusion and that my Phoebe still lives. Now I will have to travel into the very pits of Hades to try and save her, even as everyone around me attempts to steal what little soul I have left. There's only one person at my back and I'm not sure I can trust her either, for she was born of an enemy race. Yet sometimes the road to redemption is one that singes us to our very core. And if I fail to find the answers I need to save Phoebe, more than just my wife will die. We will lose the world. Both human and Daimon.

Because of You: Understanding Second-Person Storytelling

This book studies the variety of organizational strategies selected to cope with critical uncertainties during crises. This research formulates and applies an institutional sense-making model to explain the selection of strategies for coping with uncertainties during crises to answer the question why some organizations select a rule-based strategy to cope with uncertainties, whereas others pursue a more ad hoc-based strategy. It finds that the level of institutionalization does not affect strategy selection in the initial phase of responding to crises; that three rigidity effects can be identified in the selection of sense-making strategies once organizations have faced the failure of their selected strategies; that discontinuities in the feedback loop of sense-making do not necessarily move organizations to switch their sense-making strategies, but interact with institutionalization to contribute to switching sense-making strategies. This book bridges the gap between institutional thinking and crisis management theorizing. A major step forward in the world of crisis management studies! —Professor Arjen Boin, Leiden University, the Netherlands In a world of increasingly complex, sociotechnical systems interacting in high-risk environments, Professor Lu's analysis of how organizations manage uncertainty is both timely and profound. —Professor Louise K. Comfort, Director, Center for Disaster Management, University of Pittsburgh, USA Prof. Lu greatly enhances our understanding of how organizations cope with uncertainty and make sense of their challenges under the pressures of catastrophe. —Dr. Arnold M. Howitt, Faculty Co-Director, Program on Crisis Leadership, Harvard Kennedy School, USA This book provides not only a theory of crisis management but also a key concept around which research and practice can be conducted. —Professor Naim Kapucu, Director of School of Public Administration, University of Central Florida, USA A generic institutional model for analyzing and managing hazards, disasters and crises worldwide. —Professor Joop Koppenjan, Erasmus University Rotterdam, the Netherlands This book has done an excellent job in opening the black box of how organizations make sense of the crisis situations they face and develop strategies to respond. It should be read by all of us who wish for a peaceful and safe world. —Professor Lan Xue, Dean of School of Public Policy and Management, Tsinghua University, China

Comparing the Literatures

The names Albrecht Dürer and Hans Holbein the Younger evoke the dazzling accomplishments of Renaissance panel painting and printmaking, but they may not summon images of stained glass. Nevertheless, Dürer, Holbein, and their southern German and Swiss contemporaries designed some of the most splendid works in the history of the medium. This lavish volume is a comprehensive survey of

the contribution to stained glass made by these extraordinarily gifted draftsmen and the equally talented glass painters who rendered their compositions in glass. Included are discussions of both monumental church windows and smaller-scale stained-glass panels made for cloisters, civic buildings, residences, and private chapels. The subjects of these rarely seen drawings and panels range from religious topics to secular themes, including love, planets, hunts, and battles. Focusing on stained glass produced in Germany and Switzerland from about 1495 to 1530, *Painting on Light* includes drawings by Dürer, Holbein, Albrecht Altdorfer, Hans Baldung Grien, Jörg Breu the Elder, Hans Burgkmair, Urs Graf, Hans von Kulmbach, Hans Leu the Younger, Niklaus Manuel Deutsch, Hans Schäufelein, Hans Weiditz, and others. This informative book is published in conjunction with an exhibition at the Getty Museum from July 11 through September 24, 2000, and from November 7, 2000, to January 4, 2001, at the Saint Louis Art Museum.

Lying to Ourselves :.

Building on *A People's History of the United States*, this radical world history captures the broad sweep of human history from the perspective of struggling classes. An "indispensable volume" on class and capitalism throughout the ages—for readers reckoning with the history they were taught and history as it truly was (Howard Zinn) From the earliest human societies to the Holy Roman Empire, from the Middle Ages to the Enlightenment, from the Industrial Revolution to the end of the twentieth century, Chris Harman provides a brilliant and comprehensive history of the human race. Eschewing the standard accounts of "Great Men," of dates and kings, Harman offers a groundbreaking counter-history, a breathtaking sweep across the centuries in the tradition of "history from below." In a fiery narrative, he shows how ordinary men and women were involved in creating and changing society and how conflict between classes was often at the core of these developments. While many scholars see the victory of capitalism as now safely secured, Harman explains the rise and fall of societies and civilizations throughout the ages and demonstrates that history moves ever onward in every age. A vital corrective to traditional history, *A People's History of the World* is essential reading for anyone interested in how society has changed and developed and the possibilities for further radical progress.

The Argument of the Book of Job Unfolded

Despite the relevance of Eustathios to both Classical and Byzantine studies, no monograph and no collective volume in English has yet been devoted to his figure. This book attempts to fill in this gap by addressing the various facets of his output - above all his commentaries on Homer, Dionysius the Periegete, Pindar, and the Iambic Canon on the Pentecost; but also his historiographical work, his speeches and his theological production receive due attention. The book also tackles several aspects of Eustathios' style (proverbs, allusions, etc.), and the meaning of his work in the context of his historical moment. Addressed at specialists but also at graduate students with an interest in the reception of Classical antiquity and in Byzantine civilisation, the volume gathers papers by leading scholars from various countries, and it opens up new paths of research in several areas of philology and history, above all by interweaving and juxtaposing Eustathios' dimension as an Homerist and an immensely learned classical scholar with his capacities as an orator, a highly praised teacher, a rhetorically refined

writer of Greek prose, an historian of his own turbulent times, and an archbishop who had to fulfil his everyday duties.

"What an astonishing life and what a remarkable biography. Lewis Barney's sojourn on the hard edge of the American frontier is a forgotten epic. Not only does this book tell of an amazing personal odyssey from his birth in upstate New York in 1808 to his death in Mancos, Colorado, in 1894, but Barney's tale represents a living evocation of some of the most significant themes in American history. Frederick Jackson Turner theorized that the frontier shaped our national character, but Lewis Barney's life stands as a testament to the real impact of the westering experience on a man and his family. Ron Barney's detailed biography of Lewis Barney provides a participant's view of Mormonism's first six decades of controversy, hardship, and triumph, viewed from the bottom of the social heap. Despite his wide-ranging experience and endless sacrifices, Lewis Barney was a worker in the Mormon vineyard, not one of the princes of the Kingdom of God whose lives have been so exhaustively celebrated. Barney's lack of status in this complex hierarchy adds tremendously to the value of this study, since so much nineteenth-century LDS biography has ignored the lives of ordinary people to celebrate a surprisingly small elite whose experiences were far different from those of the general Mormon population." —Will Bagley, editor of the series *Kingdom in the West: The Mormons and the American Frontier* and editor of *The Pioneer Camp of the Saints: The 1846-1847 Mormon Trail Journals* of Thomas Bullock.

Nothing

This book did not evolve from the Dawkins/McGrath debate, but that is where it ended comfortably. In 1978, when I was sixteen years old, I was asked in a public event to talk for continuous twenty minutes over a subject chosen randomly. The chosen subject was 'NOTHING'! I continued talking about 'NOTHING' until I graduated from the medical school over ten years later. One day, I was called to resuscitate a dying man .but there was 'nothing' in my hand to do. During that complex emotional, spiritual and scientific struggle, and while his arm was getting very cold in my hand, my eyes focused in on his eyes I saw his pupils dilating then they stopped fixed dilated, which is the final irreversible sign of brain death In a fraction of a second I saw what I never thought I would be able to see .I saw: 'NOTHING'; which was obviously a view through the eyes of the dead! That was a fascinating journey against time in the history of the universe to the moment just before the first ever matter had existed...In that journey, gradually all natural phenomena vanished one by one .first was time, then the directions, then the space and finally the language vanished ..and when the first ever matter that caused our existence vanished, there was absolutely 'NOTHING'! When I read Dawkins' 'The God Delusion', I realised that no one could take God's life .when I read McGrath book 'The Dawkins' Delusion' I realised that some Christians still prefer God to be dead! In between the two extremes, I found 'NOTHING: A View Through the Eyes of the Dead' is a perfect Islamic contribution to this debate, at least, while the Muslim nation is too busy burning more flags after the Mohammed's cartoons spread out of Denmark once again to other countries!

The Meme Machine

Humans are extraordinary creatures, with the unique ability among animals to imitate and so copy from one another ideas, habits, skills, behaviours, inventions, songs, and stories. These are all memes, a term first coined by Richard Dawkins in 1976 in his book *The Selfish Gene*. Memes, like genes, are replicators, and this enthralling book is an investigation of whether this link between genes and memes can lead to important discoveries about the nature of the inner self. Confronting the deepest questions about our inner selves, with all our emotions, memories, beliefs, and decisions, Susan Blackmore makes a compelling case for the theory that the inner self is merely an illusion created by the memes for the sake of replication.

A boy walks into a fire station, pale with the shock of discovery. A middle school teacher worries when her colleague is late for work. By day's end, when the body is identified as local math teacher Adam Merkel, a small Nevada town will be rocked to its core. Adam Merkel left a university professorship in Reno to teach middle school in Lovelock seven months before he died. A quiet, seemingly unremarkable man, he connected with just one of his students: Sal Prentiss, a lonely sixth grader who lives with his uncles on a desolate ranch in the hills. The two outcasts developed a tender, trusting friendship that brought each of them hope in the wake of tragedy. But it is Sal who finds Adam's body, charred almost beyond recognition, half a mile from his uncles' compound. Nora Wheaton, the middle school's social studies teacher, dreamed of a life far from Lovelock only to be dragged back on the eve of her college graduation to care for her disabled father, a man she loves but can't forgive. She sensed in the new math teacher a kindred spirit--another soul bound to Lovelock by guilt and duty. After Adam's death, she delves into his past for clues to who killed him and finds a dark history she understands all too well. But the truth about his murder may lie closer to home. For Sal Prentiss's grief seems heavily shaded with fear, and Nora suspects he knows more than he's telling about how his favorite teacher died. As she tries to earn the wary boy's trust, she finds he holds not only the key to Adam's murder, but an unexpected chance at the life she thought she'd lost. Weaving together the last months of Adam's life, Nora's search for answers, and a young boy's anguished moral reckoning, this unforgettable thriller brings a small American town to vivid life, filled with complex, flawed characters wrestling with the weight of the past, the promise of the future, and the bitter freedom that forgiveness can bring.

Too poor to pay his pregnant wife's hospital bill, Vannak Anan Prum left his village in Cambodia to seek work in Thailand. Men who appeared to be employers on a fishing vessel promised to return him home after a few months at sea, but instead Vannak was hostaged on the vessel for four years of hard labor. Amid violence and cruelty, including frequent beheadings, Vannak survived in large part by honing his ability to tattoo his shipmates--a skill he possessed despite never having been trained in art or having had access to art supplies while growing up. As a means of escape, Vannak and a friend jumped into the water and, hugging empty fish-sauce containers because they could not swim, reached Malaysia in the dark of night. At the harbor, they were taken into a police station . . . then sold by their rescuers to work on a plantation. Vannak was kept as a laborer for over a year before an NGO could secure his return to Cambodia. After five years away, Vannak was finally reunited with his family. Vannak documented his ordeal in raw, colorful, detailed illustrations, first created because he believed that without them no one would believe his story. Indeed, very little is known about what happens to the men and boys who end up working on fishing boats in Asia, and these images are some of the first records. In regional Cambodia, many families still wait for men who have disappeared across the Thai border, and out to sea. The Dead Eye and the Deep Blue Sea is a testament to the lives of these many fishermen who are trapped on boats in the Indian Ocean.

The Dead Eye and the Deep Blue Sea

Starting from the premise that philosophers' deaths have been as interesting as their lives, Simon Critchley looks at the strange circumstances in which some philosophers have died and then confronts the big themes - in this case, what 'a good death' means and how to live with the knowledge of death. The book consists of short entries on various philosophers, cataloguing the manner of their demises and linking this to their central ideas, from the Pre-Socratics to Rousseau, Kant and Nietzsche among many others. The book concludes with Critchley's thoughts on the ideal of the philosophical death as a way of denouncing contemporary delusions and sophistries, what Francis Bacon saw as the Idols of the Tribe, the Den, the Market-Place and the Theatre (incidentally, Bacon died in a particularly cold winter in London in 1626 from a cold contracted after trying to stuff a chicken with snow as an experiment in refrigeration).

Dead Eyes Volume 1

This book provides an exciting foray into the use of emerging Mixed Reality techniques for examining and analysing archaeological landscapes. Mixed Reality provides an opportunity to merge the real world with virtual elements of relevance to the past, including 3D models, soundscapes, smellscape and other immersive data. By using Mixed Reality, the results of sophisticated desk-based GIS analyses can be experienced directly within the field and combined with body-centered phenomenological analysis to create an embodied GIS. The book explores the potential of this methodology by applying it in the Bronze Age landscape of Leskernick Hill, Bodmin Moor, UK. Since Leskernick Hill has (famously) already been the subject of intensive phenomenological investigation, it is possible to compare the insights gained from 'traditional' landscape phenomenology with those obtained from the use of Mixed Reality, and effectively combine quantitative GIS analysis and phenomenological fieldwork into one embodied experience. This mixing of approaches leads to the production of a new innovative method which not only provides new interpretations of the settlement on Leskernick Hill but also suggests avenues for the future of archaeological landscape research more generally. The book will be of interest to anyone studying or working in the fields of landscape archaeology, digital techniques in archaeology, archaeological theory or GIS.

FROM THE AUTHOR OF THE SUNDAY TIMES NUMBER ONE BESTSELLER *THE CALLER* 'Thirty-seven years in the force, and if I was allowed to choose just one thing to erase from my mind, what's inside that room would be it.' In a completely unexpected turn of events, the detectives find themselves joining forces with the FBI to track down a serial killer whose hunting ground sees no borders; a psychopath who loves what he does because to him murder is much more than just killing – it's an art form. The Altar of the Dead

Blake was never one for taking chances. He lived in a world of statistics and probabilities where everything could be controlled. That world disappeared the day the dead got up and began attacking the living. Now he must struggle to survive and to make sense of a new and chaotic world that is quickly spiraling out of control. Rise of the Dead chronicles the first week of events beginning from the moment the dead rise. While the story is a fast-paced thrill ride through an ever-growing zombie horde, the novel aims to draw upon familiar themes as those found in the Romero classics. Along the way, Blake finds himself thrust among other unlikely survivors who must adapt to the realities of the undead world or join the legion of zombies. They must do more than fight off the undead. The survivors must fight against their conditioned apathy towards humanity.

Rise of the Dead

Dennis Glenn was a shy, socially awkward teenager when he met Elise Pinera, the daughter of a funeral home owner. His family struggled in life. Her family was well-healed. They came from different social classes. Still, they fell in love with each other. Her family tried to keep them apart, but their love was too strong. They married despite her family's wishes. With time, her family came to terms with their marriage. They even paid for Dennis to attend mortuary school. When he graduated, Anthony Pinera offered him a job in the family crematorium. The crematorium only operated between 11pm and 7am. The hours suited Dennis well. He didn't especially like being around people. He was a loner. The graveyard shift provided him solitude, quiet and the opportunity to work alone. He enjoyed his time in the crematorium. That was until bodies began piling up in the refrigeration room. There was something unusual about those bodies. Their eyes were open. They would not close. They looked up at him every night. He believed that they were trying to tell him something. Sometimes, he thought that he heard their screams as he dropped the corpses into the cremation furnace. A series of tragedies struck the Pinera family. First, Gloria Booker, the ex-stepmother of Elise, died in a car accident. Then, Elise's parents were killed in a gas explosion at their house. All three of the bodies were cremated by Dennis. But, that was just the beginning of a series of events that made Dennis realize that something evil was happening in the Pinera Family Funeral Home. His questions resulted in threats. The threats materialized into action. Dennis had no way out. He couldn't go to the police. They owned the police. He was driving down a dead-end road that could only end in death. His family was in danger. In one final attempt to save himself and his family, Dennis searched for the evidence that would bring down the funeral home owners. His efforts that night resulted in a fire at the funeral home that killed five people. It also resulted in several murders at the crematorium. But did any of this really happen?

'A gentle book and, like death itself, sometimes an unexpectedly kind one' Neil Gaiman 'This is an absorbing and important book, seeking out stories so many shy away from and telling them with such respect, humanity, heart and, yes, wit. Without exaggeration, an awe-inspiring achievement' Nigella Lawson _____ We are surrounded by death. It is in our news, our nursery rhymes, our true-crime podcasts. Yet from a young age, we are told that death is something to be feared. How are we supposed to know what we're so afraid of, when we are never given the chance to look? Fuelled by a childhood fascination with death, journalist Hayley Campbell searches for answers in the people who make a living by working with the dead. Along the way, she encounters mass fatality investigators, embalmers, and a former executioner who is responsible for ending 62 lives. She meets gravediggers who have already dug their own graves, visits a cryonics facility in Michigan, goes for late-night Chinese with a detective, and questions a man whose job it is to make crime scenes

disappear. Through Campbell's incisive and candid interviews with these people who see death every day, she asks: Why would someone choose this kind of life? Does it change you as a person? And are we missing something vital by letting death remain hidden? A dazzling work of cultural criticism, *All the Living and the Dead* weaves together reportage with memoir, history, and philosophy, to offer readers a fascinating look into the psychology of Western death. _____ 'Campbell is a gorgeous writer, capturing the exquisite pathos and gallows humour found in folks who spend their lives working with the dead' Caitlin Doughty, New York Times bestselling author of *Smoke Gets in Your Eyes*
