

Eros Magic And The Murder Of Professor Culianu

[#Eros Magic](#) [#Professor Ioan Culianu](#) [#Culianu murder investigation](#) [#history of religions Romania](#) [#esoteric studies](#)

Delve into the enigmatic world of 'Eros Magic' and the unsolved murder of renowned scholar Professor Ioan Culianu. This compelling account explores the life and mysterious death of a pivotal figure in religious studies, examining the theories and controversies that continue to surround his assassination and the potentially esoteric connections to his work.

Eros, Magic, & the Murder of Professor Culianu

Anton (writing, DePaul U.) synthesizes the research he has done since the beginning on the still-unsolved May 1991 murder of Chicago Divinity School professor Ioan Culianu, a protege of pioneering mythologist Mircea Eliade. Culianu had been taunting the communist government of his native Romania, and Anton suggests the murder was political. Annotation copyrighted by Book News, Inc., Portland, OR

Eros and Magic in the Renaissance

It is a widespread prejudice of modern, scientific society that "magic" is merely a ludicrous amalgam of recipes and methods derived from primitive and erroneous notions about nature. Eros and Magic in the Renaissance challenges this view, providing an in-depth scholarly explanation of the workings of magic and showing that magic continues to exist in an altered form even today. Renaissance magic, according to Ioan Couliano, was a scientifically plausible attempt to manipulate individuals and groups based on a knowledge of motivations, particularly erotic motivations. Its key principle was that everyone (and in a sense everything) could be influenced by appeal to sexual desire. In addition, the magician relied on a profound knowledge of the art of memory to manipulate the imaginations of his subjects. In these respects, Couliano suggests, magic is the precursor of the modern psychological and sociological sciences, and the magician is the distant ancestor of the psychoanalyst and the advertising and publicity agent. In the course of his study, Couliano examines in detail the ideas of such writers as Giordano Bruno, Marsilio Ficino, and Pico della Mirandola and illuminates many aspects of Renaissance culture, including heresy, medicine, astrology, alchemy, courtly love, the influence of classical mythology, and even the role of fashion in clothing. Just as science gives the present age its ruling myth, so magic gave a ruling myth to the Renaissance. Because magic relied upon the use of images, and images were repressed and banned in the Reformation and subsequent history, magic was replaced by exact science and modern technology and eventually forgotten. Couliano's remarkable scholarship helps us to recover much of its original significance and will interest a wide audience in the humanities and social sciences.

The True History of Merlin the Magician

Analyzes the historical impact of Merlin from the twelfth to the sixteenth centuries, during which time he was considered a political prophet and historical figure, and explores how the meaning of his magic evolved over the centuries.

Gas, Light, Electricity

Fleet-footed and capricious, the essays in *Glass, Light & Electricity* wander through landscapes both familiar and unfamiliar, finding them equal parts magical and toxic. They explore and merge public and private history through lyric meditations that use research, association, and metaphor to examine subjects as diverse as neon signs, scalping, heartbreak, and seizures. The winner of the 2019 Permafrost Prize in nonfiction, Shena McAuliffe expands the creative possibilities of form.

Renaissance Magic and the Return of the Golden Age

For all their pride in seeing this world clearly, the thinkers and artists of the English Renaissance were also fascinated by magic and the occult. The three greatest playwrights of the period devoted major plays (*The Tempest*, *Doctor Faustus*, *The Alchemist*) to magic, Francis Bacon often referred to it, and it was ever-present in the visual arts. In *Renaissance Magic and the Return of the Golden Age* John S. Mebane reevaluates the significance of occult philosophy in Renaissance thought and literature, constructing the most detailed historical context for his subject yet attempted.

Atlantis and Lemuria

This work tells the history and civilization of the submerged continents of Atlantis and Lemuria, which are chapters from the Akashic records. Contents: from the Akashic records; our Atlantian forefathers; transition of the Atlantean into the Aryan root-race; Lemurian era; woman in the third root-race; humanity before the decision of sex; beginnings of sex duality, the origin of good and evil; man's first ancestors; first, or polar, race; second, or hyperborean, race.

You Need a Schoolhouse

Discusses the friendship between Booker T. Wahington, founder of the Tuskegee Institute, and Julius Rosenwald, president of Sears, Roebuck and Company and how, through their friendship, they were able to build five thousand schools for African Americans in the Southern states.

The Hounds of Actaeon

Prelude. Diana, the huntsman and the stag -- Eroticism and magic from the ancient world to the Renaissance -- High tide in the Sea of Pneuma. Animal magnetism and hypnosis -- Eros in the era of the multitudes. Le Bon, Trotter, Freud and the libido of the masses -- From the Land of Oz to the Banana Republic -- Wilhelm Reich's Modern Heresy. Pneuma in fascism and the natural sciences -- Economy, neurosis, and spectacle. Capitalism and magic -- Communalism, cybernetics, and the digital economy -- Marketing, war, and demiurgy -- The digital tide. From real to virtual pneuma -- The polymorphous demon. Magic in the post-Soviet era -- Epilogue. Hounds of hunt, hounds of hell.

The Longevity Seekers

People have searched for the fountain of youth everywhere from Bimini to St. Augustine. But for a steadfast group of scientists, the secret to a long life lies elsewhere: in the lowly lab worm. By suppressing the function of just a few key genes, these scientists were able to lengthen worms' lifespans up to tenfold, while also controlling the onset of many of the physical problems that beset old age. As the global population ages, the potential impact of this discovery on society is vast—as is the potential for profit. With *The Longevity Seekers*, science writer Ted Anton takes readers inside this tale that began with worms and branched out to snare innovative minds from California to Crete, investments from big biotech, and endorsements from TV personalities like Oprah and Dr. Oz. Some of the research was remarkable, such as the discovery of an enzyme in humans that stops cells from aging. And some, like an oft-cited study touting the compound resveratrol, found in red wine—proved highly controversial, igniting a science war over truth, credit, and potential profit. As the pace of discovery accelerated, so too did powerful personal rivalries and public fascination, driven by the hope that a longer, healthier life was right around the corner. Anton has spent years interviewing and working with the scientists at the frontier of longevity science, and this book offers a behind-the-scenes look at the state-of-the-art research and the impact it might have on global public health, society, and even our friends and family.

With spectacular science and an unforgettable cast of characters, *The Longevity Seekers* has all the elements of a great story and sheds light on discoveries that could fundamentally reshape human life.

Ghost Road Blues

A small town once haunted by a serial killer braces for a new evil in this debut horror novel by the New York Times bestselling author of *Ink*. Thirty years ago, a blues musician called the Bone Man killed the devil at the crossroads, only to be beaten and hung like a scarecrow in a cornfield—or so the story goes. Today, the people of Pine Deep celebrate their town's grisly past by luring tourists to the famous haunted hayride, full of chills and scares. But this year as Halloween approaches, "The Spookiest Town in America" will learn the true meaning of fear. Its residents will see the real face of evil lurking behind the masks of ordinary people. They will feel it—in their hearts, in their bones, in their nightmares. Because evil never dies. It only grows stronger . . . Winner of the Bram Stoker Award for Best First Novel First in the Pine Deep Trilogy Praise for *Ghost Road Blues* "Maberry supplies plenty of chills, both Earth-bound and otherworldly, in this atmospheric horror novel . . . This is horror on a grand scale, reminiscent of Stephen King's heftier works." —Publishers Weekly Praise for Jonathan Maberry "Jonathan Maberry's horror is rich and visceral. It's close to the heart . . . and close to the jugular." —Kevin J. Anderson "Maberry has the chops to craft stories at once intimate, epic, real, and horrific." —Bentley Little "Maberry spins great stories. His (Pine Deep) vampire novels are unique and masterful." —Richard Matheson "Maberry's works will be read for many, many years to come." —Ray Bradbury

Pseudo-Dionysius

Here are the complete works of the enigmatic fifth- and sixth-century writer known as the Pseudo Dionysius, prepared by a team of six research scholars.

Against the Modern World

Against the Modern World is the first history of Traditionalism, an important yet surprisingly little-known twentieth-century anti-modern movement. Comprising a number of often secret but sometimes very influential religious groups in the West and in the Islamic world, it affected mainstream and radical politics in Europe and the development of the field of religious studies in the United States, touching the lives of many individuals. French writer Rene Guenon rejected modernity as a dark age and sought to reconstruct the Perennial Philosophy - the central truths behind all the major world religions. Guenon stressed the urgent need for the West's remaining spiritual and intellectual elite to find personal and collective salvation in the surviving vestiges of ancient religious traditions. A number of disenchanted intellectuals responded to his call. In Europe, America, and the Islamic world, Traditionalists founded institutes, Sufi brotherhoods, Masonic lodges, and secret societies. Some attempted unsuccessfully to guide Fascism and Nazism along Traditionalist lines; others later participated in political terror in Italy. Traditionalist ideas were the ideological cement for the alliance of anti-democratic forces in post-Soviet Russia, and in the Islamic world entered the debate about the relationship between Islam and modernity. Although its appeal in the West was ultimately limited, Traditionalism has wielded enormous influence in religious studies, through the work of such Traditionalists as Ananda Coomaraswamy, Huston Smith, Mircea Eliade, and Seyyed Hossein Nasr.

The Tree of Gnosis

This pioneering study interprets the mythology of dualism from Gnosticism to the medieval Cathars to modern nihilism. Couliano shows that, far from being "historically" transmitted, the underlying connection between all dualistic worldviews is a perennial and immensely appealing mindset.

The New Science Journalists

In *The New Science Journalists*, Editors Ted Anton and Rick McCourt have gathered the best of the new science writing into one illuminating volume. What is new about the work of these journalists lies in the scale, pace, and uses of their writing. These writers bridge the gap between members of the science community and a society hungry for news about their work, acting not only as reporters and commentators, but also as investigators, researchers, detectives, and storytellers. The editors have showcased three very different kinds of writers. The first group explores the complexities of our universe with childlike wonder, and includes Diane Ackerman, John Seabrook, and Elisabeth Rosenthal. The

second group, relentless investigators who expose the inside stories of scientific research, includes Deborah Blum, Robert Capers, Eric Lipton, and John Crewdson. And the third group of writers, who dig through data uncovering trends that researchers themselves miss, features Timothy Ferris, E.O. Wilson, James Gleick, and many more. These writers are helping to broaden the very boundaries of science by making complex topics such as chemistry, physics, biotechnology, and ecology accessible and entertaining to readers of every kind. Combining superb prose and compelling subjects, *The New Science Journalists* examines some of the most fascinating issues of our times.

Planet of Microbes

This book takes readers into the latest discoveries about early microbial life, where findings from the earth's furthest extremes are seeking to reshape the future of our planet and ourselves. As scientists take the next step in applying the lessons of popular and controversial research, the world's tiniest, and sometimes most dangerous, microorganisms are being tapped as allies in achieving better health and sustainable energy, while revealing fundamental clues to the mystery of where we came from.--Provided by publisher.

The Spirit of the Downs

The chalk downs of Sussex possess a fascinating history of spell-craft, spirit-lore, rural magic, and a rich tradition of image sorcery. With its situation at the crossroads of eastern and western England, as well as its proximity to the sea, it has witnessed centuries of cultural migrations, which have resulted in a remarkably diverse admixture of spiritual traditions. In Martin Duffy's second major work for Three Hands Press, the eternal strata of Sussex magic and folklore are brought forth in a richly woven narrative that brings these powerful and archaic traditions to life.

Inanna, Queen of Heaven and Earth

Translation and retelling of the Inanna stories from the Sumerian.

Kharis

Kharis: Hellenic Polytheism Explored delves into the many aspects of the revival of Greek paganism, from its ancient roots to its contemporary practice. It is written as an introduction for those new to Hellenismos, and as a reference for more experienced devotees. It covers not only the basics of worship, but also how to adapt the ancient religion to our modern lives, cultivate relationships with the gods and spirits, and create a deeply satisfying spiritual life. The emphasis of this book is on the concept of kharis - the reciprocity so implicit in the practice of Hellenic polytheism both in antiquity and today. From the simplest prayer or libation, to direct encounters with deities, the principle of reciprocal favor governs the heart of this religion and facilitates for each worshipper a real and profound connection with the divine.

Bold Science

Science is at a crossroads. Cold War-era easy money for grand-scale projects has become a thing of the past. And yet, in this new environment, science seems to be reinvigorating itself, moving away from an overly specialized, bureaucratic mindset to a more streamlined, multidisciplinary approach. In a number of fields, innovative teams led by gifted researchers are combining imaginative methods with inexpensive tools to chip away at the previously impenetrable secrets of the body, the mind, the planet, and the universe. In the process, they are demonstrating the same kind of inspired drive toward discovery that led Galileo to invent the telescope. *Bold Science* examines this "scientific new wave" by profiling the work of some remarkable researchers: gene hunter Craig Venter, neuroscientist Susan Greenfield, astronomer Geoffrey Marcy, immunologist Polly Matzinger, cosmologist Saul Perlmutter, ecologist Gretchen Daily, and evolutionist Carl Woese. Headstrong, iconoclastic, visionary, these scientists have risen to the pinnacles of their fields at a pivotal moment—and are producing amazing breakthroughs with bold, sometimes controversial methods. In exploring their scientific lives and times, *Bold Science* shows readers why we are at the dawning of a new era of understanding ourselves and our universe.

Soliman and Perseda, by Thomas Kyd

Soliman and Perseda, written c. 1588 and first published in 1592 or 1593, is a late Elizabethan romantic tragedy by Thomas Kyd, author of *The Spanish Tragedy*. It dramatises the triangular relationship of the Turkish emperor Soliman, his captive Perseda and her beloved Erastus, and the fortunes of the comic servant Piston and the braggart knight Basilius, against the fictionalised backdrop of the Turkish invasion of Rhodes in the early sixteenth century. The introduction to this facsimile edition contains the fullest analysis of the text to date. It also provides an account of the play's editorial history, a detailed analysis of its original printing, and lists of all erroneous readings in the first quarto, together with significant differences between the first and second quartos. This edition provides the best access we have to an important play by one of Shakespeare's leading early contemporaries.

The Archidoxes of Magic

This Is A New Release Of The Original 1920 Edition.

Mircea Eliade Once Again

THE NEW YORK TIMES BESTSELLER As seen on The Joe Rogan Experience! A groundbreaking dive into the role psychedelics have played in the origins of Western civilization, and the real-life quest for the Holy Grail that could shake the Church to its foundations. The most influential religious historian of the 20th century, Huston Smith, once referred to it as the "best-kept secret" in history. Did the Ancient Greeks use drugs to find God? And did the earliest Christians inherit the same, secret tradition? A profound knowledge of visionary plants, herbs and fungi passed from one generation to the next, ever since the Stone Age? There is zero archaeological evidence for the original Eucharist – the sacred wine said to guarantee life after death for those who drink the blood of Jesus. The Holy Grail and its miraculous contents have never been found. In the absence of any hard data, whatever happened at the Last Supper remains an article of faith for today's 2.5 billion Christians. In an unprecedented search for answers, *The Immortality Key* examines the archaic roots of the ritual that is performed every Sunday for nearly one third of the planet. Religion and science converge to paint a radical picture of Christianity's founding event. And after centuries of debate, to solve history's greatest puzzle. Before the birth of Jesus, the Ancient Greeks found salvation in their own sacraments. Sacred beverages were routinely consumed as part of the so-called Ancient Mysteries – elaborate rites that led initiates to the brink of death. The best and brightest from Athens and Rome flocked to the spiritual capital of Eleusis, where a holy beer unleashed heavenly visions for two thousand years. Others drank the holy wine of Dionysus to become one with the god. In the 1970s, renegade scholars claimed this beer and wine – the original sacraments of Western civilization – were spiked with mind-altering drugs. In recent years, vindication for the disgraced theory has been quietly mounting in the laboratory. The constantly advancing fields of archaeobotany and archaeochemistry have hinted at the enduring use of hallucinogenic drinks in antiquity. And with a single dose of psilocybin, the psychopharmacologists at Johns Hopkins and NYU are now turning self-proclaimed atheists into instant believers. But the smoking gun remains elusive. If these sacraments survived for thousands of years in our remote prehistory, from the Stone Age to the Ancient Greeks, did they also survive into the age of Jesus? Was the Eucharist of the earliest Christians, in fact, a psychedelic Eucharist? With an unquenchable thirst for evidence, Muraresku takes the reader on his twelve-year global hunt for proof. He tours the ruins of Greece with its government archaeologists. He gains access to the hidden collections of the Louvre to show the continuity from pagan to Christian wine. He unravels the Ancient Greek of the New Testament with the world's most controversial priest. He spelunks into the catacombs under the streets of Rome to decipher the lost symbols of Christianity's oldest monuments. He breaches the secret archives of the Vatican to unearth manuscripts never before translated into English. And with leads from the archaeological chemists at UPenn and MIT, he unveils the first scientific data for the ritual use of psychedelic drugs in classical antiquity. *The Immortality Key* reconstructs the suppressed history of women consecrating a forbidden, drugged Eucharist that was later banned by the Church Fathers. Women who were then targeted as witches during the Inquisition, when Europe's sacred pharmacology largely disappeared. If the scientists of today have resurrected this technology, then Christianity is in crisis. Unless it returns to its roots. Featuring a Foreword by Graham Hancock, the NYT bestselling author of *America Before*.

Rosicrucian and Masonic Origins

A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program for monographs. Visit www.luminosoa.org to learn more. How do keyboards make music playable? Drawing on theories of media, systems, and cultural techniques, *Keys to Play*

spans Greek myth and contemporary Japanese digital games to chart a genealogy of musical play and its animation via improvisation, performance, and recreation. As a paradigmatic digital interface, the keyboard forms a field of play on which the book's diverse objects of inquiry—from clavichords to PCs and eighteenth-century musical dice games to the latest rhythm-action titles—enter into analogical relations. Remapping the keyboard's topography by way of Mozart and Super Mario, who head an expansive cast of historical and virtual actors, *Keys to Play* invites readers to unlock ludic dimensions of music that are at once old and new.

The Immortality Key

From the ancient misty Highlands of Scotland to modern-day America come the secrets of solitary Witchcraft practice. *Scottish Witchcraft* explores "PectiWita," or the craft of the Picts, the mysterious early Keltic people. The Scottish PectiWita tradition differs in many ways from the Wicca of England—there is little emphasis on the worship of the gods (though it is there), but more on the living & blending of magick into everyday life. Many people attracted to modern-day Wicca are unable to contact or join a coven. PectiWita is a path for the solitary Witch; & here, for the first time, are full details of this solitary branch of the Old Ways. Learn the history of the Picts, their origins & beliefs. Learn how to make simple tools & use them to work magic. Through step-by-step instructions you are brought into touch & then into complete harmony with all of nature. Explore their celebrations, talismans, song & dance, herbal lore, runes & glyphs, & recipes. Learn how to practice the religion in the city & with groups. Ray Buckland's contact with the late Aidan Breac, a descendent of th

Keys to Play

Now updated with groundbreaking research, this award-winning classic examines the construction of sexual identity in biology, society, and history. Why do some people prefer heterosexual love while others fancy the same sex? Is sexual identity biologically determined or a product of convention? In this brilliant and provocative book, the acclaimed author of *Myths of Gender* argues that even the most fundamental knowledge about sex is shaped by the culture in which scientific knowledge is produced. Drawing on astonishing real-life cases and a probing analysis of centuries of scientific research, Fausto-Sterling demonstrates how scientists have historically politicized the body. In lively and impassioned prose, she breaks down three key dualisms -- sex/gender, nature/nurture, and real/constructed -- and asserts that individuals born as mixtures of male and female exist as one of five natural human variants and, as such, should not be forced to compromise their differences to fit a flawed societal definition of normality.

Scottish Witchcraft

Memory is our most treasured asset. Seldom has such a complex subject been presented in a compelling narrative, where the intellect, the curious, and the recipient of horrific memories can grasp its meaning. *Mnemosyne: A Love Affair with Memory* is such a story. The two main characters, Larry L. Franklin and Richard Semon, lived in different centuries on opposite sides of the world, with memory as the common obsession that ties the two stories together. Franklin was diagnosed with posttraumatic stress disorder brought on by physical and sexual childhood abuse. He had lived for decades without knowing the cause of his misery. If not for his mother's revelations, he might never have seen the memories that nearly cost him his sanity. Long-term therapy, self-exploration, and an able psychotherapist brought him back from the dark side. Richard Semon was a world-renowned nineteenth-century evolutionary biologist. His reputation crumbled when he fell in love with a fellow professor's wife, who chose to leave her husband and children for a life with Richard. The university fired Richard, his peers turned away, and the one-time-professor turned private-thinker/philosopher dedicated the remainder of his life to the study of memory. Peer rejection and the later death of his wife drove Richard into a deep depression followed by suicide. This is a work of creative nonfiction written in the form of a hybrid memoir. The complexities of memory, together with the mysteries of a spiritual journey, yearned for an approach different from the strictly fact-based, nonmetaphorical strategies most common in nonfiction. Long before the written word, the ancient Greeks conveyed the complications of mortal life and left veiled advice for future generations through stories, myths, and legends. They brought human qualities and quests to life through the exploits of an assortment of gods, goddesses, and other mythological creatures. Even now, artists sometimes use Greek mythology to explain the seemingly unexplainable. I chose *Mnemosyne*, the goddess of memory, as a conduit for the deeper, more abstract aspects of my own and Richard Semons' navigation of the spiritual world. Personifying

memory as the Greeks did seemed appropriate to my quest, as it was to Richard Semons. Writers of memoir depend on their relationship to memory, are smitten with it, are obsessed by it, and chase it down the halls of recollection, always in pursuit of an entity that disappears around every next corner, much like an elusive lover who bids the beloved to come hither, but who then flees, disappearing and reappearing in a seemingly endless chase. When memory finally turns to face the one chasing her, the embrace can be both wonderful and terrible. This was so for Richard Semon, and it was so for me. Memory reaches back in time and challenges the accuracy of what one recalls in that embrace. I wrote what I remember; nothing more, nothing less.

Sexing the Body

A supernatural tour of bookstores and libraries around the world, focusing on the ghost stories from haunted locations. Throughout history, books have inspired, informed, entertained, and enriched us. They have also kept us up through the night, thrilled us, and lured into their endless depths. *Tomes of Terror* is a celebration and an eerie look at the siren call of literature and the unexplained and fascinating stories associated with bookish locations around the world. Mark Leslie's latest paranormal page-turner is a compendium of true stories of the supernatural in literary locales, complete with hair-raising first-person accounts. You may even recognize a spectre of your local library lurking in these true stories and photographs. If you have ever felt an indescribable presence hanging about a quiet bookshop, then you'll enjoy these fascinating and haunting tales.

Mnemosyne

The dark history of the *Necronomicon*—one of the world's most feared and fascinating books—told by the one man who saw it all...and lived to tell the tale. The *Necronomicon* is one of the most controversial books ever published. The master of Gothic suspense, H.P. Lovecraft, wrote about a mystical and dreaded grimoire, known as the *Necronomicon*—an ancient text written by an Arab that, if it were to fall into the wrong hands, could have disastrous consequences. But no one thought the *Necronomicon* had any basis in the world outside of Lovecraft's fiction. Until... Simon was a young man drawn to the mysterious world of the occult through his association with several Eastern Orthodox religions and his friendship with the owner of an occult bookstore in Brooklyn. In 1972 he stumbled upon a stolen text in a friend's apartment, unaware that what he held in his hands was the real *Necronomicon*—something long thought to be a creation of Lovecraft's brilliant mind and deft pen. After an arduous translation, done in the utmost secrecy (since the tome was in fact stolen), Simon and his close circle of friends unveiled the now-infamous grimoire to a clamoring public. In *Dead Names*, Simon tells the amazing true story that surrounds the *Necronomicon*. From the main players' humble beginnings in the pageantry-filled and secret world of Eastern Orthodox religion, to the accidental discovery of the *Necronomicon*, to the Son of Sam murders, the JFK assassination, the brilliant William S. Burroughs, and the eventual suspicious deaths of almost everyone involved with the grimoire, this book is an enthralling account of a book steeped in legend, lies, and murder.

Tomes of Terror

Cory Doctorow's *Attack Surface* is a standalone novel set in the world of New York Times bestsellers *Little Brother* and *Homeland*. Most days, Masha Maximow was sure she'd chosen the winning side. In her day job as a counterterrorism wizard for an transnational cybersecurity firm, she made the hacks that allowed repressive regimes to spy on dissidents, and manipulate their every move. The perks were fantastic, and the pay was obscene. Just for fun, and to piss off her masters, Masha sometimes used her mad skills to help those same troublemakers evade detection, if their cause was just. It was a dangerous game and a hell of a rush. But seriously self-destructive. And unsustainable. When her targets were strangers in faraway police states, it was easy to compartmentalize, to ignore the collateral damage of murder, rape, and torture. But when it hits close to home, and the hacks and exploits she's devised are directed at her friends and family—including boy wonder Marcus Yallow, her old crush and archrival, and his entourage of naïve idealists--Masha realizes she has to choose. And whatever choice she makes, someone is going to get hurt.

The Tragedy of Philosophy (Philosophy and Dogma)

Over 800 entries examine the facts, evidence, and leading theories of a variety of unsolved murders, robberies, kidnappings, serial killings, disappearances, and other crimes.

Dead Names

Discover everything you ever wanted to know about secret societies like the Freemasons, the historical mystery of Atlantis, why King Arthur, Leonardo da Vinci and Hitler are key figures, plus conspiracy theories, forgotten sciences and ancient wisdom.

Sophia in Exile

Description Some 218,000 men and women with severe psychiatric disorders are incarcerated in an American prison or county jail. Most committed violent crimes -- sometimes murder -- while propelled by a crazed mind untreated with medications and therapeutic care. **Cherry Blossoms & Barren Plains: A woman's journey from mental illness to a prison cell**, is such a story. My work explores the life of Rebecca Bivens, who beat her five-year-old stepdaughter to death. In 1998, a jury found Rebecca guilty but mentally ill, and sentenced her to life in prison. Together, Rebecca and I began a story that became larger than her own. It grew into a narrative of Rebecca's mental illness with all of its ramifications: from the lack of society's understanding of a disease that plagues millions of people each day, to the strain on our national budget; and the residual effects on family and friends ill equipped to handle the demands of someone who suffers from a severe mental illness. **About the Author** Larry L. Franklin is 66 years old and resides in Makanda, Illinois. Franklin holds Bachelor's and Master's degrees in Music, and performed in the U.S. Navy Band, located in Washington, D. C., from 1976 to 1971. From 1972 through 1975, Larry taught music at Southern Illinois University. In 1976, he completed requirements for a Certified Financial Planner designation and maintained a successful investment business until 2007, when he retired to devote his energies to writing. In 2003, Larry received an MFA in Creative Non-Fiction from Goucher College in Baltimore, Maryland. Each professional pursuit left Franklin with an unsatisfying emptiness that pushed him into marathon running, where he pounded the country roads longing for an answer just around the bend. Then, in 1998, and without warning, repressed memories broke through his subconscious mind like a runaway train, and left him afraid to leave his home. He was diagnosed with Post Traumatic Stress Disorder (PTSD) with dissociative features. What followed were years of psychotherapy where he explored a physically and sexually abusive childhood. Now his problems have been reduced to a persistent mild depression which is controlled by medication and talk therapy. The therapeutic process unleashed his creative side, a new-found ability to write, and an unquenchable curiosity about the human mind. Larry now devotes his time writing about the mentally ill and victims of injustice who yearn for a voice

Attack Surface

The roots of coincidence and conspiracy in American politics, crime, and culture are investigated in this examination of the connections between religion, political conspiracy, and occultism. Readers are presented with startling connections between Nobel Prize-winning physicist Wolfgang Pauli, Carl Jung, and synchronicity; serial killers, multiple personality disorder, and demonic possession; and magic, surrealism, and mind control. Not a work of speculative history, this exposé is founded on primary source material and historical documents. Fascinating secrets are divulged involving Hollywood icons such as Marilyn Monroe, David Lynch, and Jane Fonda as well as links between the Cotton Club murders, the Bluegrass conspiracy, and the Son of Sam cult.

The Encyclopedia of Unsolved Crimes

What is a grimoire? The word has a familiar ring to many people, particularly as a consequence of such popular television dramas as *Buffy the Vampire Slayer* and *Charmed*. But few people are sure exactly what it means. Put simply, grimoires are books of spells that were first recorded in the Ancient Middle East and which have developed and spread across much of the Western Hemisphere and beyond over the ensuing millennia. At their most benign, they contain charms and remedies for natural and supernatural ailments and advice on contacting spirits to help find treasures and protect from evil. But at their most sinister they provide instructions on how to manipulate people for corrupt purposes and, worst of all, to call up and make a pact with the Devil. Both types have proven remarkably resilient and adaptable and retain much of their relevance and fascination to this day. But the grimoire represents much more than just magic. To understand the history of grimoires is to understand the spread of Christianity, the development of early science, the cultural influence of the print revolution, the growth of literacy, the impact of colonialism, and the expansion of western cultures across the oceans. As this book richly demonstrates, the history of grimoires illuminates many of the most important developments in European history over the last two thousand years.

Sethian Gnosticism and the Platonic Tradition

Alice and JJ are in love, and amid their tender revelations of intimacy, JJ's former stint in a mental institution comes to light, as well as his sexual relationships with Bird, a young woman, and with Kin, a man. It was a three-way love that saved his life. When Bird and Kin reenter JJ's and Alice's life--Kin now living with AIDS--Alice must redefine the meaning and the boundaries of love.

Many people forget that the Byzantine Empire actually

was the Roman Empire, namely the surviving eastern half
 Well, the East had better geography so that the barbarian invaders
 of the fourth to fifth centuries could not reach Egypt and the Levant.
 Constantinople was built as an impregnable fortress
 and so the barbarian hordes could not pass the Bosphorus
 After the fall of the West, the East fought many enemies on all sides
 Yet the massive Theodosian land walls and the invention of Greek
