Intro

Are there medications you have patients go home with automatically if they're starting EGFR inhibitors, without waiting for rash or other symptoms to develop?

Can patients take Biotin while on Tarceva (erlotinib)?

Do you have any recommendations just for general skin care practices for cancer patients?

Are there any preventive interventions for skin care in areas receiving radiation therapy?

What interventions can be pursued to minimize hair loss with anti-cancer treatments known to cause this?

If an EGFR inhibitor produces a problematic skin rash that then subsides, does this suggest that the therapy is becoming ineffective?

How should patients manage the cracks in the skin at the fingertips that sometimes occurs with more chronic use of EGFR inhibitors? Cordran tape, or some other alternative?

Are there any topical antibiotics that you recommend people use for these skin cracks?

Is there any understanding of why perimenopausal women may experience greater side effects/skin related side effects than other patients?

Not all chemo meds cause hair loss

Cold Cap therapy could be an option for you.

Hair loss occurs everywhere.

Nails may be affected.

Neuropathy is a common side effect.

Your taste will change.

You will likely have nausea.

Drink lots of water for the days around chemo!

Your mouth may be affected.

Talk to your doctor about preserving your fertility.

You will be tired.

10. You will be "foggy" aka chemo brain.

You can live a pretty normal life.

Karl Schwarzschild (1873-1916)

Karl Schwarzschild (1873-1916) gilt weltweit als einer der begabtesten und bedeutendsten Astronomen aller Zeiten und als Mitbegründer der Astrophysik. Geboren in Frankfurt am Main, wirkte er von 1901 bis 1909 als Professor für Astronomie und Direktor der Sternwarte in Göttingen und von 1909 bis 1916 als Direktor des Astrophysikalischen Observatoriums in Potsdam. Im Laufe seines allzu kurzen Lebens veröffentlichte Schwarzschild etwa 150 wissenschaftliche Arbeiten, viele davon von fundamentaler Bedeutung für die Entwicklung der Astronomie und Astrophysik. Aus Anlass seines 100. Todestages fand am 19. Mai 2016 in einer seiner früheren Wirkungsstätten, der heutigen Historischen Sternwarte in Göttingen, ein Gedenk-Kolloquium statt. Die schriftlichen Fassungen der dabei gehaltenen Vorträge sind, ergänzt um einen am 8. September 2016 anlässlich der Eröffnung der Schwarzschild-Ausstellung in der Fakultät für Physik gehaltenen Vortrag, im vorliegenden Band abgedruckt.

Black Holes: The Reith Lectures

"It is said that fact is sometimes stranger than fiction, and nowhere is that more true than in the case of black holes. Black holes are stranger than anything dreamed up by science fiction writers." In 2016 Professor Stephen Hawking delivered the BBC Reith Lectures on a subject that fascinated him for decades – black holes. In these flagship lectures the legendary physicist argued that if we could only understand black holes and how they challenge the very nature of space and time, we could unlock the secrets of the universe.

Unlocking the Universe

Have you ever wondered how our universe began? Or what it takes to put humans on the moon? Do you know what happens in the microscopic world of a life-saving vaccine? What would you do if you could travel through space and time? Embark on the adventure of a lifetime in this beautiful collection of up-to-the-minute essays, mind-blowing facts and out-of-this-world colour photographs, by the world's leading scientists including Professor Stephen Hawking himself. This edition features brand-new content from Dr Mary Dobson: Plagues, Pandemics and Planetary Health. This unmissable volume was curated by Stephen and Lucy Hawking, whose series of children's books *George's Secret Key* was a global hit. George's stories are punctuated with fascinating real-life facts and insights from leading scientists and now this incredible non-fiction has been collected into one bumper volume, with new content from key scientific figures and up-to-the-minute facts and figures for readers in 2021. READERS LOVE UNLOCKING THE UNIVERSE: "Despite its scientific content the essays are written in a very accessible style and the many topics investigated which range from the physical explanations of the universe to earth science to robotics and future predictions. Highly recommended for curious minds from around 10 years upwards" - Sue Warren, Blogger "My 9 y.o. loves this book. We've previously discussed a lot of the concepts, but this seems to answer questions I hadn't thought of, but my son wanted to know"

Deutsche Nationalbibliographie und Bibliographie der im Ausland erschienenen deutschsprachigen Veröffentlichungen

Albert Einstein wasn't afraid to think for himself. Working as a clerk in the patent office in Bern, Switzerland, he wrote papers with fantastical theories--that light is both a wave and a particle that matter can become energy, and energy can become matter; that space can "bend," and time is relative. His revolutionary theories turned the world of physics upside down, and earned him a Nobel Prize. Einstein and the Time Machine tells the story of one of the greatest thinkers of the 20th century, as well as the basics of his Theory of Relativity.

Einstein and the Time Machine

New in the critically acclaimed Little People, BIG DREAMS series, discover the incredible life of Maria Montessori, the pioneering teacher and researcher. Maria grew up in Italy at a time when girls didn't receive an equal education to boys. But Maria's mother was supportive of her dreams, and Maria

went on to study medicine. She later became an early childhood expert--founding schools with her revolutionary educational theories and changing the lives of many children. This moving book features stylish and quirky illustrations and extra facts at the back, including a biographical timeline with historical photos and a detailed profile of the educator's life. Little People, BIG DREAMS is a best-selling series of books and educational games that explore the lives of outstanding people, from designers and artists to scientists and activists. All of them achieved incredible things, yet each began life as a child with a dream. This empowering series offers inspiring messages to children of all ages, in a range of formats. The board books are told in simple sentences, perfect for reading aloud to babies and toddlers. The hardcover versions present expanded stories for beginning readers. Boxed gift sets allow you to collect a selection of the books by theme. Paper dolls, learning cards, matching games, and other fun learning tools provide even more ways to make the lives of these role models accessible to children. Inspire the next generation of outstanding people who will change the world with Little People, BIG DREAMS!

Superspace and Supergravity

From the first day, school had always been torture for Gregory, but his expulsion from school in sixth grade allows him to find his own path and deal with his parents' fights and his beloved grandfather's illness.

Zitty

Lindroos constructs an alternative interpretation on history, time, politics and art, approached through the moment of the Now (Jetztzeit). In the first section, she elaborates the critique of chronologic-linear way of understanding history. Through a close reading of Benjamin's "Work of Art" essay, the second section examines the problems of origins, authenticity and traditions of art through the ideas of artistic avant-garde and politicization of aesthetics. The end of the book discusses the concept of image and the new images as an Image-Space (Bildraum) of action.

Maria Montessori

Even if you don't consider yourself a numbers person, you are a numbers person. The time has come to put numbers in their place. Not high up on a pedestal, or out on the curb, but right where they belong: beside words. It is not an overstatement to say that numbers dictate the way we live our lives. They tell us how we're doing at school, how much we weigh, who might win an election and whether the economy is booming. But numbers aren't as objective as they may seem; behind every number is a story. Yet politicians, businesses and the media often forget this - or use it for their own gain. Sanne Blauw travels the world to unpick our relationship with numbers and demystify our misguided allegiance, from Florence Nightingale using statistics to petition for better conditions during the Crimean War to the manipulation of numbers by the American tobacco industry and the ambiguous figures pedalled during the EU referendum. Taking us from the everyday numbers that govern our health and wellbeing to the statistics used to wield enormous power and influence, *The Number Bias* counsels us to think more wisely.

35 Kilos of Hope

his book is the first to make the case that women's changing role in European and American society was critical to Dada.

Now-time Image-space

Suitable for advanced undergraduates and graduate students, this self-contained overview covers the classical Schwarz lemma, Poincaré distance on the unit disc, hyperbolic manifolds, holomorphic curvature, and the analytic Radon-Nikodym property. 1989 edition.

The Number Bias How Numbers Lead and Mislead Us

This is a comprehensive sourcebook on the world's most famous vampire, with more than 700 citations of domestic and international Dracula films, television programs, documentaries, adult features, animated works, and video games, as well as nearly a thousand comic books and stage adaptations. While they vary in length, significance, quality, genre, moral character, country, and format, each of the cited works adopts some form of Bram Stoker's original creation, and Dracula himself, or a recognizable vampiric semblance of Dracula, appears in each. The book includes contributions from Dacre Stoker,

David J. Skal, Laura Helen Marks, Dodd Alley, Mitch Frye, Ian Holt, Robert Eighteen-Bisang, and J. Gordon Melton.

Women in Dada

Written by a carefully selected consortium of researchers working in the field, this book fills the gap for an up-to-date summary of the observational and theoretical status. As such, this monograph includes all used wavelengths, from radio to gamma, the FERMI telescope, a history and theory refresher, and jets from gamma ray bursts. For astronomers, nuclear physicists, and plasmaphysicists.

The Schwarz Lemma

The bestselling follow-up to Hawking's phenomenal million-copy hardcover bestseller *A Brief History of Time* is now available in trade paperback. These 14 pieces reveal Hawking variously as the scientist, the man, the concerned world citizen, and--always--the rigorous and imaginative thinker.

German books in print

A Frequency Dictionary of German is an invaluable tool for all learners of German, providing a list of the 4,034 most frequently used words in the language. Based on a 4.2 million-word corpus which is evenly divided between spoken, fiction and non-fiction texts, the dictionary provides a detailed frequency-based list plus alphabetical and part of speech indexes. All entries in the rank frequency list feature the English equivalent, a sample sentence plus an indication of major register variation. The dictionary also contains twenty-one thematically organized lists of frequently used words on a variety of topics as well as eleven special vocabulary lists. A Frequency Dictionary of German aims to enable students of all levels to maximize their study of German vocabulary in an efficient and engaging way.

Dracula in Visual Media

When Charles Darwin published *The Origin of Species* in 1859, he shocked the world. In it he claimed that humans were just another animal species that had evolved from more primitive life forms. Years earlier, Darwin had collected thousands of animal specimens during a five-year voyage around the world, specimens that he used to make his case for biologic evolution through natural selection. *Darwin and the True Story of the Dinosaurs* tells the story of the brilliant naturalist who changed humankind's understanding of its origins.

Relativistic Jets from Active Galactic Nuclei

Grad-school dropout Matt Fuller is toiling as a lowly research assistant at MIT when, while measuring quantum relationships between gravity and light, his calibrator disappears - and reappears, one second later. In fact, every time Matt hits the reset button, the machine goes missing twelve times longer. After tinkering with the calibrator, Matt is convinced that what he has in his possession is a time machine. And by simply attaching a metal box to it, he learns to send things through time - including a pet-store turtle, which comes back no worse for wear. With a dead-end job and a girlfriend who left him for another man, Matt has nothing to lose by taking a time machine trip for himself. So he borrows an old car, stocks it with food and water, and ends up in the near future - under arrest for the murder of the car's original owner, who dropped dead after seeing Matt disappear before his eyes. The only way to beat the rap is to continue time travelling until he finds a place in time safe enough to stop for good. But such a place may not exist...

Black Holes and Baby Universes and Other Essays

A major work by this prominent Caribbean author and philosopher, available for the first time in English

A Frequency Dictionary of German

Eight centuries from now-- long after the Big Mistake and the death of Old Earth-- humanity is again on the brink of war. Galactic war this time.

Darwin and the True Story of the Dinosaurs

Describes the life and accomplishments of the famous physicist and mathematician, detailing the advances he made in the fields of motion, universal gravitation, and calculus.

Popular Astronomy

This book discusses the geometrical aspects of Kaluza-Klein theories. The ten chapters cover topics from the differential and Riemannian manifolds to the reduction of Einstein-Yang-Mills action. It would definitely prove interesting reading to physicists and mathematicians, theoretical and experimental.

The Accidental Time Machine

Ever since Albert Einstein's General Theory of Relativity burst upon the world in 1915, some of the world's most brilliant minds have sought to decipher the mysteries bequeathed by that legacy. Einstein himself was resistant to its implications, but physicists, astronomers and cosmologists have argued over his theory ever since.

Big Book of Stars and Planets

Seminar paper from the year 2004 in the subject English Language and Literature Studies - Linguistics, grade: 3,0, University of Münster (Englisches Seminar), language: English, abstract: The task will be to examine the given extract in terms of style, narration and possible meaning emerging from the text and it's mostly foregrounded elements. Further ambitions are to analyze how Gilman uses autobiographical elements for an implied authorship and to discuss the problem of interpretation. This question arises automatically, when dealing only with extracts from, therefore not complete, texts, and will be deepened in the concluding chapter: "Reconsideration".

Poetics of Relation

When Lucas Campbell, who broke her heart ten years earlier, returns to town, bar owner Colleen O'Rourke is tempted to give him a second chance, but wary of being hurt again.

Hyperion Cantos

While moving image advertising has been around us, everywhere, for at least a century, the topic has tended to be overlooked by cinema studies. This far-reaching new collection makes an incisive contribution to a new field of study, by exploring the history, theory and practice of moving image advertising, and emphasising the dynamic and lasting relationships between print, film, broadcasting and advertising cultures. In chapters written by an international ensemble of leading scholars and archivists, the book covers a variety of materials from pre-show advertising films to lantern slides and sponsored 'educations'. With case studies of advertising campaigns and archival collections from a range of different countries, and giving consideration to the problems that advertising materials pose for preservation and presentation, this rich and expansive text testifies to the need for a new approach to this burgeoning subject that looks beyond the mere study of promotional film.

Newton and the Antigravity Formula

The mysterious Time Tombs are opening and the Shrike that has risen from them may well control the fate of all mankind. The Ousters are laying siege to the Hegemony of Man and the AIs we created have turned against us to build the Ultimate Intelligence: God. The God of Machines. His genesis could mean annihilation for man. Something is drawing the hegemony, the Ousters, the AIs, the entire universe to the Shrike. Winner of the BSFA Award for best novel, 1991.

Riemannian Geometry, Fiber Bundles, Kaluza-Klein Theories and All That....

This title is an examination of the role and relevance of international bureaucracies in global environmental governance. After a discussion of theoretical context, research design, and empirical methodology, the book presents nine in-depth case studies of bureaucracies.

Black Holes and Time Warps

After Honor Holland agrees to a marriage of convenience to help British professor Tom Barlow stay in the country, she begins to wonder if there isn't something more between them. Original.

The Yellow Wallpaper - A Stylistic Analysis

Vince Kunda, moves out of the shadowy world of espionage and subterfuge into that of crime as he travels to the small mining town of Kalulushi on the Copperbelt after hearing of the death of an acquaintance. The death was supposedly by a car accident, but the news is brought to his attention by two floaters with Zambian Intelligence, Groovy Joe and Chris 'Kimsey' Lusambo. That starts alarm bells ringing in his head because the two had recently fled from Zambia into the Democratic Republic of Congo with the police on their backs after they had committed a series of serious crimes. The two rarely operates within the confinements of the law. Vince suspects that the car accident may not have actually been an accident, and he finds plenty of reasons to believe so when he hits town. In Kalulushi, he finds the disturbing influence of a self proclaimed, self ordained prophet called Benson Chali, also known as the Supreme One, who receives 'revelations' and sees 'visions' after sniffing on genkem, a highly toxic gas produced by mixing petrol and glue. Vince however suspects the man to be nothing but a con artist out to make a quick buck. Vince has also got to ignore the attention of the local agents from Counter Intelligence, who spring into action as soon as he is spotted in town. However, most disturbing is the fear that maybe Chu Chu Fumbei, who had fled the country with Groovy Joe and Chris 'Kimsey', may have had a hand in the fatal accident. He was, after all, a regular visitor to the Bwalya residence, despite being known to be an international criminal wanted by the United Nations for having committed atrocities in the eastern Congo. There is also Stephania Bwalya, the sister to the deceased and a wife to a former minister who Vince had helped flee Zimbabwe on the eve of the military coup that brought down the government, except that she has now ungratefully forgotten whatever help he had rendered to her. Having stayed so long in the dark murky world of spies, he is fully aware that taking things at face value may not be such a good idea, not with Chu Chu Fumbei hovering about in the background.

Waiting on You

Twelve-year-old Simon Thorn's life is almost unrecognisable from just a few months ago. He has a twin brother, an uncle he never knew and his first real friends at the secret Animalgam Academy. Not only is he an Animalgam, he's also the Beast King – heir along with his brother to a bloodline more powerful and dangerous than any other. The only piece missing in this new life is his mother, held captive by his evil grandfather, Orion, who wants to rule the five kingdoms. Simon sets off cross-country with his friends to the reptile kingdom to rescue her. He battles Orion's forces and rogue Animalgams, as well as their own doubts and torn loyalties along the way. Because if they don't stop him from gathering the pieces of a terrible weapon, Orion is going to steal all of the Animalgams' abilities away ... starting with Simon and those he loves most first. Packed with even more action and characters to love in a thrilling, immersive world, this sequel is an exciting next chapter in the series.

Films that Sell

In this comprehensive and interdisciplinary volume, former NASA Chief Historian Steven Dick reflects on the exploration of space, astrobiology and its implications, cosmic evolution, astronomical institutions, discovering and classifying the cosmos, and the philosophy of astronomy. The unifying theme of the book is the connection between cosmos and culture, or what Carl Sagan many years ago called the "cosmic connection." As both an astronomer and historian of science, Dr. Dick has been both a witness to and a participant in many of the astronomical events of the last half century. This collection of papers presents his reflections over the last forty years in a way accessible to historians, philosophers, and scientists alike. From the search for alien life to ongoing space exploration efforts, readers will find this volume full of engaging topics relevant to science, society, and our collective future on planet Earth and beyond.

The Fall of Hyperion

In his philosophical reflections on the art of lingering, acclaimed cultural theorist Byung-Chul Han argues that the value we attach today to the *vita activa* is producing a crisis in our sense of time. Our attachment to the *vita activa* creates an imperative to work which degrades the human being into a labouring animal, an animal laborans. At the same time, the hyperactivity which characterizes our daily routines robs human beings of the capacity to linger and the faculty of contemplation. It therefore becomes impossible to experience time as fulfilling. Drawing on a range of thinkers including Heidegger,

Nietzsche and Arendt, Han argues that we can overcome this temporal crisis only by revitalizing the vita contemplativa and relearning the art of lingering. For what distinguishes humans from other animals is the capacity for reflection and contemplation, and when life regains this capacity, this art of lingering, it gains in time and space, in duration and vastness.

Managers of Global Change

Teenaged Amy, a cryogenically frozen passenger on the spaceship Godspeed, wakes up to discover that someone may have tried to murder her

The Perfect Match

The first book in the New York Times bestselling series that inspired the hit CW television show. No one has set foot on Earth in centuries -- until now. Ever since a devastating nuclear war, humanity has lived on spaceships far above Earth's radioactive surface. Now, one hundred juvenile delinquents -- considered expendable by society -- are being sent on a dangerous mission: to recolonize the planet. It could be their second chance at life...or it could be a suicide mission. CLARKE was arrested for treason, though she's haunted by the memory of what she really did. WELLS, the chancellor's son, came to Earth for the girl he loves -- but will she ever forgive him? Reckless BELLAMY fought his way onto the transport pod to protect his sister, the other half of the only pair of siblings in the universe. And GLASS managed to escape back onto the ship, only to find that life there is just as dangerous as she feared it would be on Earth. Confronted with a savage land and haunted by secrets from their pasts, the hundred must fight to survive. They were never meant to be heroes, but they may be mankind's last hope.

The Bite of the Black Widow

The New York Times bestselling author duo Amie Kaufman and Meagan Spooner's sweeping science fiction Starbound Trilogy comes to a close with this dazzling final installment about the power of courage and hope in humanity's darkest hour. Gideon Marchant is an underworld hacker known as the Knave of Hearts, ready to climb and abseil his way past the best security measures on the planet to expose LRI's atrocities. Sofia Quinn, charming con artist, can work her way into any stronghold without missing a beat. When a foiled attempt to infiltrate LRI Headquarters forces them into a fragile alliance, it's impossible to know who's playing whom--and whether they can ever learn to trust each other. With their lives, loves, and loyalties at stake, only by joining forces with the Icarus survivors and Avon's protectors do they stand a chance of taking down the most powerful corporation in the galaxy---before LRI's secrets destroy them all.

Law of Values; Silver Key; Arcana Or Stock and Share Key

Sepharial (1864-1929) had a life-long dislike of luck. He challenged himself to find what he called "scientific rules" that would eliminate chance. And, according to his own accounts, he succeed. In Law of Values, he suggests buying stocks immediately after they have been clobbered by Saturn, with the price as low as it will get, and then selling the stock immediately after being hit by Jupiter, when the price is likely to be as high as it will ever go. And living off dividends between the two. In The Silver Key, a book on horse-racing, Sepharial examines, and discards, conventional numerology, colours and symbols, in favor of a method based on the Moon, weights and tides. His results are impressive. The Arcana, or Stock and Share Key, was one of a number of secret financial manuscripts which Sepharial sold by subscription only. In it, you will discover the secret to using the Meridian in day trading. Sepharial also gives instructions for using dispositors and decans. This is first time the Arcana has appeared in print. Astrologers looking to improve their techniques, as well as investors looking to improve their portfolios, will find these books of interest.

The Arcana

This Is A New Release Of The Original 1920 Edition.

The Law of Values

This is one of the oddest books of financial advice ever written, one that ascribes astrological import to the movement of dollars and assigns signs of the zodiac to countries (England is, apparently an Aries, and France a Leo). Here we learn that Saturn brings "national depression due to political reversals" and Mercury "a sense of instability," that the Boer War may have been triggered by Neptune (the planet, not the deity), and that by learning how to read the stars the earthbound investor may prosper. It remains unclear whether Sepharial, who published this curious work in 1912, saw dark celestial clouds brewing for October 1929. "Sepharial" was the pseudonym of British mystic WALTER GORN-OLD (1864-1929), one of the most prolific writers on and teachers of astrology in modern times, and the first president of the British Astrological Society. Among his more than 60 books are Astrology Explained, Cosmic Symbolism, Science of Foreknowledge, and The Silver Key.

The Silver Key

Sepharial was.. "the prince of English astrologers." - The Referee. "the foremost living astrologer." - Evening News In The Silver Key:, which is subtitled "A Guide to Speculators," Sepharial tests the accuracy of astrological prediction on horseracing. The winning result is achieved through a mix of numerology, astrology, and other occult methods. Chapters include the Science of Numbers, Names and Numbers, Winning Colours, and The Lunar Key. Sepharial's method is still in use - with some success - today. This Cosimo Classic is based on the book's Second Edition. AUTHOR BIO: SEPHARIAL (1864-1929) was born Walter Richard Old in Birmingham, England. At the age of 22 he had a mystical experience and spent the rest of his life seeking his true self and trying to unravel the future through astrology and other methods. After a scrape with Blavatsky's Theosophical society he changed his name to Walter Gornold, though by the end of the 19th century he was better known as Sepharial. He produced six children and authored nearly 60 books. Sepharial was the first president of the British Astrological Society, and counted among his friends such people as H.P. Blavatsky, Alan Leo, and Charles Carter, who believed that Sepharial was more than a mere astrologer and brilliant at almost everything he touched.

Sepharial's Arcana and Keys

Sepharial's Arcanas or Keys are his rarest and most important writings, being distilled applications of his most important techniques and systems. To originally acquire these writings Sepharial required a written application and signature of a non-disclosure agreement. Due to these restrictions, these writings have always been the hardest writings of Sepharial to find. This collection contains a sampling of these writings. The Arcana Of Stock & Share Key, and Key To Sugar Values, are direct facsimiles of the original documents. The Master Key, Golden Key & Eclipse System are transcribed reproductions, of these very rare works primarily focused on forecasting of horse races. About the Master Key, Sepharial said, "This system is deemed to be the final word in racing Systems. It embodies the result of 11 years of observation and research and is itself the easiest and most reliable of the many attempts that have been made to fathom the profundities of racing problems and it is claimed that The Master Key leaves others behind and gives the best results." The Golden Key, Sepharial comments, "is only published in typed script under an agreement which secures privacy and non-publication. This is the method I have employed in regard to all my Arcana. It would have been quite easy for me to have published the Golden Key as a book and in all probability it would have sold in thousands at a good price. But in doing so I should have emasculated its working value to all who possessed it." The Eclipse System was written sometime after the Golden Key, to which it refers, and it mentions recent racing from 1917. Some consider this Sepharial's most reliable system. The Solar Lunar Values & Solar Apex Method are brief summaries of the rules applied by these systems. Altogether this is the most complete collection of these rare materials ever offered, and should serve as an excellent guide into Sepharial's deepest work.

Arcana Or Stock & Share Key, & Key To Sugar Values

First published in 1898, this is a very different astrology book from what we have now. There are extensive delineations for the signs of the zodiac, especially when found on the ascendant. There are delineations of planets in signs when they are in the first house or are the chart ruler, in both cases, describing the physical appearance. There are delineations of planets in the various houses, which will also serve for the planetary rulerships of the houses. There are only sketchy notes on aspects. So far as the "pure astrology" of planets in signs, in houses, in aspect, there is almost nothing at all. The reason is found in the second part of the book. We are not reading the chart as a psychological abstraction. We are, instead, looking for specific traits, attempting to answer specific questions. Will we have a profession? What kind of marriage? What kind of children? Will we vanquish our enemies, or submit to them? What kind of illness? We then find the house(s) of the horoscope which rule the question, and then delineate the signs & planets we find there. These are, by the way, the sort of questions that clients would ask, if they only knew we could give answers! The sort of things that astrologers themselves want to know. In the process we learn how to read a chart & get real meaning from it. We get ideas from one section and then apply them to other sections. There are hundreds and hundreds of useful aphorisms, except that Sepharial doesn't label them as such. Get this book, study it, underline key passages, scribble in the margins. You will learn more from this book than most all others put together.

The Manual of Astrology, the Standard Work

The title of this book, *The Triple Witching Hour*, is a Wall Street term for the end of the financial quarter. It has nothing to do with broomsticks and is unknown outside of the Street. In his third book of essays, Roell starts, appropriately enough, with an analysis of Occupy Wall Street, a short-lived protest movement which was brutally suppressed. This book will tell you why OWS failed and why astrology is essential for planning protest movements, or, for that matter, weddings and children, though you won't find them in this book. Roell then takes off the gloves. In an extraordinary bare-knuckle essay, *Astrology Under Our Feet*, Roell proves astrology does not fall from an empty sky, but is generated by the earth itself. We are soaked in astrology, from birth to death. Why the hostility from science? Roell finds the origins of modern science in the French Renaissance, which produced an Enlightenment that was a consensus dictat. It was based on a simplistic "science" vs: "superstition," which was formed at the very outset. In reality the Enlightenment was a clash between rich city vs: poor rural, bookish vs: hand-me-down. The Enlightenment amounts to city folk who do not know where milk comes from. Roell declares science to be a series of consensus-based fads. Over the long run, he says, as much quirky as correct. Proof? Roell says to read old science journals. Roell then sketches a new world with astrology, most particularly a new medicine, based on solid astrological analysis, rather than scientific guesswork. Roell declares astrology, like engineering but unlike science, to be based upon fundamental realities and is therefore permanent and unchanging. Along the way in this book, he adds lots of celebrity and political riff-raff for your amusement, a masterful tour de force of astrology at work. Enjoy!

The Triple Witching Hour

Most text-books, including the one for which I am personally responsible, are mainly of an analytical character and do not attempt to guide the reader far along the path that leads to proficiency in horoscopic delineation. In fact, few attempts have been made to attack this problem, and for a good reason—it is so difficult. Delineation is an art and it cannot be taught as one teaches merely factual knowledge. It comes with experience, if the student have the right inborn aptitudes; that is all that can be said. However, there seems to me to be a sort of border-land that lies beyond the realms of purely text-book teaching and yet is within the scope of instruction. No one can make a student into a good delineator, and, on the other hand, almost anyone with moderate teaching ability can inculcate the alphabet of astrology: between these two extremes there is a field wherein, I think, experience can help inexperience and some general principles can be formulated and explained. This is what I have attempted here, illustrating my ideas in separate chapters that deal with important classes of psychological condition. This book is designed to follow *The Principles of Astrology* and may be read in conjunction with *The Astrological Aspects* and *The Encyclopaedia of Psychological Astrology*. Charles E.O. Carter

Some Principles of Horoscopic Delineation

In Astrology it has long been known that the sign of the zodiac, rising in the east at birth (the ascending sign), largely determines physical appearance. In this book David Anrias shows what each sign looks like when rising. He goes further and, dividing each sign into 10 degree sections (known as "decanates"), shows how appearance changes, from early degrees, to middle degrees, to late degrees of the same sign. All 36 drawings are by the author himself, who was an accomplished artist and a keen observer. Twelve of these you will find in the frontispiece, the remaining 24 are in Book 1, chapter 7. While other artists have sketched the twelve basic types, and one or two have given variations on some of them, Anrias is the only astrological artist/writer to make systematic sketches of all 36 variations. Anrias follows this with deft character sketches. If a given decanate (the third decanate of Libra, for example) produces a distinct face, it also produces a distinct personality. Of this book, Dr. H., of Regulus Astrology LLC (author of *A Rectification Manual*; *America is Born*) writes, "I find Anrias' use of the decans based on triplicities more accurate than Chaldean decans for application in physiognomy judgments." DAVID ANRIAS, the pen-name of Brian Ross, served with the British forces in World War I. A natural sensitive, after the war he joined the Theosophical Society, studied in India, and was associated with Jiddu Krishnamurti's ill-fated Order of the Star in the East. He strenuously disagreed with Krishnamurti's decision to dissolve it. Anrias's intense study of theosophy and metaphysics enlivens his astrology, making his book most fascinating reading.

Man and the Zodiac

In this book, Charles Carter (1887-1968) seeks a method of astrological forecasting that produces accurate results without the complicated calculations of Primary Directions. To quote Carter, an ideal directional system should fulfil four criteria: 1. No important event should pass without a direction. 2. No direction should pass without an event. 3. Events and directions should correspond narrowly in time. 4. Events and directions should correspond in character. (from page 10) To achieve these goals, Carter examined a number of symbolic systems. Symbolic because they were not based on any actual planetary movement, but rather, were arcs, arbitrarily chosen and then uniformly applied to all factors in the natal chart. In this book, he presents the best of his research. Among the systems of exceptional merit are the One degree, the Naibod (59'8"), the Duodenary (20'30"), the Sub-duodenary (12'30"), the Septenary (4 2/7 o), Novenary (30'20") and the Fractional Measure, which is based on natal aspects. Along the way, Carter's restless mind tackled the subject of death. Here, he discovered what he termed the Measure of Death. He says while it does not always forecast death, the Measure of Death is always present at death. Carter found symbolic directions to have real value in astrological forecasting. His work remains unique. This book was first published in 1929.

Symbolic Directions in Modern Astrology

I am a Chironic astrologer. You won't find that word in the dictionary, but there are quite a few of us, and our number is increasing day by day. We are astrologers who believe that discovering the truth is more important than personal theories, and also that we should always keep our minds open to the ideas of others. By the time you finish reading this book you will know even more about what a Chironic astrologer is. Perhaps you, too, may like to become one. Who knows, perhaps you already are one. - Zane Stein

Essence and Application, a View from Chiron

Here is a collection of essays from AstroAmerica's acclaimed weekly Newsletter, along with an assortment of other essays of interest. Highlights include: The key to using house rulers and dispositors in reading a chart. Numerous tricks to interpret intercepted signs. Reincarnation and the natal chart. Aphorisms, what they are, how they work. The secret to politicians and their charts. The best ways to make money with astrology. A new, unique, history of astrology. How to rectify a chart using character, not math. Why Western astrology is just as good as Vedic. The surprising secret of the ancient Greek Antikythera mechanism: It's an astrological tool. Specially written for this book, a revolutionary new theory of astrology, based on planetary resonance in a defined clock-work mechanism. Discover the Earth's secret third zodiac. Interspersed, slice-of-life, stream-of-consciousness essays. What it's like to live in America in the first years of the 21st century. The author was introduced to astrology in the early 1980's and has studied intensely since the mid-1990's. He previously published AstroAmerica's Daily Ephemeris. This is his first book of essays.

Skeet Shooting for Astrologers

Charles Carter (1887-1968) wrote this book in London during World War II. It was his first book in more than a dozen years. In this book, Carter turns his attention to fundamentals. Why the planets are what they are. How the Sun differs from the Moon. How Jupiter and Mercury are interrelated. Having had his fill of aspects in terms of the planets, in this book Carter tells us of aspects in terms of signs and the elements they represent. A planet in a fire sign, in square to a planet in an earth sign, Carter says, is an obviously difficult combination: Fire consumes earth, or, earth smothers fire. On the other hand, air/water squares are much less stressful. Carter was particularly fascinated by the nativities of Benito Mussolini and Adolf Hitler, his contemporaries. Charts for both men are given. Mussolini he declares to be a "bombastic Italian dictator," but Hitler remained a puzzle. _____ Charles E.O. Carter, one of the leading astrologers of the 20th century, was President of the Astrological Lodge at the Theosophical Society from 1920 to 1952. He was first Principal of the Faculty of Astrological Studies, which he helped found in 1948. He edited The Astrologer's Quarterly from 1926 until 1959. Essays on the Foundations of Astrology was first published in 1947.

Essays on the Foundations of Astrology

Most introductory astrology books, such as this one, are content to teach you the ABC's of astrology: Planets, signs, houses, aspects, pretty much in that order. You're then congratulated that, by the time you reach the end of the book, you can look up the individual pieces and spit out canned interpretations, by rote. Vivian Robson (1890-1942, a man, by the way), expected better. Here is an example: Having

found the significator of the matter concerned interpret all aspects to it as things and people affecting it. Suppose Jupiter were chief significator of money and afflicted by Saturn. We should judge that money matters would be hampered by poor conditions, depressing surroundings, ill-health, or whatever Saturn signified in that horoscope. In other words, we should give Jupiter the chief consideration as significator of the matter enquired into, and interpret the action of Saturn in its relation to Jupiter, and not vice-versa. On the other hand if Saturn were the significator we should judge that fits of generosity or extravagance would affect the finances, because Jupiter is expansive in its action, and its afflicting aspect would cause trouble and loss. This general judgment is then refined by taking into account the sign and house occupied by the aspecting planet, and the houses it rules. Thus, suppose with Saturn as significator that Jupiter threw an adverse aspect from the 5th house. Then we should judge that the extravagance would arise from too much indulgence in pleasure, or from gambling, or other matters ruled by the 5th house. This would be modified by the sign containing Jupiter. A water sign would incline more to self-indulgence, a fiery one to gambling, a sign ruled by Venus to expenditure on women, and so on, thus enabling us to enlarge on the judgement obtained from the house position alone. We should next look to see what houses Jupiter ruled. If it ruled the 3rd we should judge expense and extravagance over journeys, relatives and other third house matters, and by blending the influences, that gambling losses (5th) would come through the advice of relatives (3rd) or some other appropriate blending. . . . This, however, is not the only way the influences would work. . . . There is method to be used, and it is one which needs considerable practice, but it is well-worth the trouble involved, and the student will himself be amazed to find how accurately the most trifling details may be predicted. As a word of advice to the beginner I would say - Do not be afraid to let yourself go in this way. You will make many mistakes to start with, but it is the only way to make your Astrology of practical use. There is too great a tendency nowadays to float about in a comfortable haze of so-called esotericism. The first need of Astrology is accuracy and definition, not pseudo-religious speculation, and it is only by concentrating on the practical and scientific side that we can really make Astrology of service, and obtain for it the recognition it deserves. (pgs. 110-113: go have a look) Someday a picture of the man will be found. Until then, read his books!

A Beginner's Guide to Practical Astrology

People often ask if there is "proof" for astrology. Astrologers are not so much worried about proving astrology, as they are in using it to reveal nuance and detail. In 1929, after writing four previous books, Charles Carter (1887-1968) set his sights on discovering the astrological reasons why accidents happen, and which people are most prone to them. In part he wanted to test if astrological fundamentals were true or not. Carter knew that astrology works, but does it work the way it has long claimed, or, if it does not, can the real rules be discovered by analysis? This book is divided into two broad sections. In the first, Carter compiles raw sign and house placements of Sun, Moon and planets, along with the angular separation of pairs of planets, to determine which planets, in which signs, in which houses, and which specific angles, produce the most accidents overall. The results are surprising. In the second section, Carter analyzes specific accidents for common traits. Sixteen different classes of accidents are analyzed, among them drowning, gunshots, burns, falls, and railway accidents. While the number of individual cases were limited, Carter was able to determine critical degree areas. New in this edition, a list of local influences derived from Carter's work, and a useful index. This book was first published in 1932.

The Astrology of Accidents

Contrary to modern beliefs, the medieval world was not one of superstition and ignorance. True, they lacked what we know as science, but on the other hand, they were in possession of a coherent philosophy of life, handed down to them from the Greeks and Romans, which had been further hammered out in a thousand ways over the course of centuries. When luck was with them (the period was, above all, poor), medieval peoples were surprisingly successful in dealing with the problems of everyday life. With minds open, we come to the medieval world as if it was a strange alien planet. Because their philosophy was different, their observations were different, and, therefore, their solutions were different. Some were good. Some were not. The best of them are worthy of our attention, for they can teach us much. The author, Joseph Blagrove (1610-1682), was a country doctor who lived in Reading, England, in part as he lacked the license that would let him practice openly in London. Fundamentally, he was an astrological herbalist. To this, he brought an eclectic mix of observation, experimentation, folk knowledge, and his own unique genius. Free of modern conceptions, he was able to view and treat the diseases of his day in ways that were revolutionary.

Astrological Practice of Physick

From the Introduction: You have economic hard times to thank for this book. I am by profession a bookseller. In 2007, a friend suggested a newsletter as a way of enhancing book sales. I think she had monthly specials, promo sheets and upcoming new titles in mind, but I was too dense for that. Instead I wrote on topics of my own fancy. The first two years, 2007-9, when the newsletter appeared monthly were, well, dreadful. The week that Venus went retrograde in March, 2009, with the stock market stabilizing after months of plunging, I shifted from a monthly single-page newsletter, to a weekly three-pager. I followed a three-page format for a couple of years. Most of the worth-while essays were compiled in my first book, *Skeet Shooting for Astrologers*. Two years later in March, 2011, with the economy ever more bleak and myself running out of ideas, I started writing celebrity delineations and in the process broke out of a rigid format. The delineation of Jon Stewart, of the Daily Show, was the first of these. Retrograde Venus has turned up in a surprising number of the charts I've written about, given its rarity, among them, the chart for the Republican Party, as well as the charts for Rep. Ron Paul, Mayor Michael Bloomberg, Jon Stewart, and some others. No, my Venus is not retrograde. Essays are in order of publication, in part as I think organizing by topic makes for a boring block of reading. The book starts with the last of the 2-column essays from the original 3-page weekly. Meanwhile the economy is now in the fifth year of straight decline. I do wish the people in charge of the country would just send us all envelopes stuffed with cash. I can live on barter just as well as money, but when that happens there will be no authors, there will be no books, there will be no commerce. Money has its uses.

Duels at Dawn

The year before he wrote his famous book on fixed stars, Vivian Robson (1890-1942) wrote this one. In it, he put the distillation of four years intense work, spent in the British Museum Reading Room, where he studied very nearly every astrology book ever written, in English and Latin. To this day, he is virtually the only man to have ever undertaken a study of this magnitude. What makes the Student's Text-Book of Astrology unique is its unparalleled wealth of detail. Topics include Personal Appearance, Character and Mind, Health and Accidents, Finance, Occupation, and much more. For each, Robson gives specific rules of judgment and then supplies aphorisms collected from many ancient sources. The result is one of the most comprehensive astrology books ever written." . . . [I]n private conversation he would talk for hours on the science of which he was a master. Indeed, his knowledge, not only of astrology but of many other sciences, was phenomenal; and few who enjoyed his conversation could fail to go away with an enhanced knowledge of whatever subject had been under discussion. He will be remembered best by his two chief books, *A Student's Text-book of Astrology* and *The Fixed Stars and Constellations in Astrology*. Of these the former is deservedly popular and the latter is a classic, containing as it does a mass of information dating from the days of Greek mythology up to modern times." - C.E.O. Carter "I have heard him converse knowledgeably on a dozen and one different subjects. I really believe he knew something about everything, but so far as astrology was concerned his versatility showed forth in a phenomenal knowledge of his subject. To converse on astrology with him, even if only for one short hour, was inevitably to gain something new and valuable in the way of experience and information." - Dorothy Ryan In this Memorial Edition, Obituaries by Charles Carter and George H. Bailey; Prof. Hugh S. Torrens' monograph, *Curator Turned Astrologer*; an Appreciation, by

Dorothy Ryan; an Afterword by the publisher, David R. Roell, a newly prepared index, Robson's Death Certificate, and more. The finest of all of Vivian Robson's books, back in print at last.

A Student's Text-Book of Astrology Vivian Robson Memorial Edition

In this book, Charles Carter (1887-1968) shows how the Zodiac of twelve constellations describes an ideal world. In other words, how the soul - the ideal - reveals itself in astrological terms. In the process, Carter invents a new form of rulerships, based on the traditional exaltations, which includes the outer planets. Carter also teases us with his unpublished system of numerology, which was based on 12, rather than the usual 10. As astrology is based around the numbers 2, 3, 4 and 12 (not 5 or 10), a base-12 number system is of immediate interest. Realizing his subject was abstract and unlikely to appeal to all, Carter also includes innovative ideas on directing, and on transits. The result is a book that fascinates on many levels. Charles E.O. Carter, one of the leading astrologers of the 20th century, was President of the Astrological Lodge at the Theosophical Society from 1920 to 1952. He was first Principal of the Faculty of Astrological Studies, which he helped found in 1948. He edited The Astrologer's Quarterly from 1926 until 1959. The Zodiac and the Soul was first published in 1928, with revisions in 1947, 1960, and 1968, the year of his death.

The Zodiac and the Soul

"Why were no bankers put in prison after the financial crisis of 2008? Why do CEOs seem to commit wrongdoing with impunity? The problem goes beyond banks deemed Too Big to Fail to almost every large corporation in America--to pharmaceutical companies and auto manufacturers and beyond. [This book]--an inside reference to prosecutors too scared of failure and too daunted by legal impediments to do their jobs--explains why"--Amazon.com.

The Laws of Values

[T]here is a system of interpretation in numerology which is supported by experience, but has its origin beyond the realm of the phenomenal worlds. If no such system existed, it would be impossible to prove the geometrical relations of thought. But this is done daily by those who make use of numbers for purposes of divination.-from "Chapter II: Geometrical Relations of Thought"Originally published in two volumes in 1913, this classic of the art of numerology builds upon the work of the ancient Greeks, Aryans, and Egyptians to describe the dramatic effect that numbers exert upon the world all around us. Part I introduces numerological theories and practices, including how to read others' thoughts through numbers, predict and influence success and failure, and understand "chance" events. Part II explores the geometry of nature and how it affects us, numbers that sway human will, and much more. For practitioners of the paranormal arts and those interested in the history of science and pseudoscience, this is a fascinating and essential book. "Sepharial" was the pseudonym of British mystic WALTER GORN-OLD (1864-1929), one of the most prolific writers on and teachers of astrology in modern times. Among his many works are Astrology Explained, Cosmic Symbolism, Science of Foreknowledge, and The Silver Key.

The Silver Key

This is the book that made its author Henry George suddenly famous. From the year 1879 to the present the doctrines of 'Progress and Poverty' have been familiar to all who are interested in social problems. The book has been read by many to whom Political Economy is still 'the dismal science', and it has been circulated in cheap editions by the thousand among the classes to which it holds out such an alluring prospect. 'Progress and Poverty' has become a classic in labor literature. Its doctrines have been accepted not only by many who see in them a means of personal rescue from distress and want, but by many others who are convinced by the reasoning of the author. Clergymen, in the Catholic as well as in the Protestant church, have become Mr. George's disciples, and business and professional men have gladly sat at his feet.

Old Moore's Monthly Messenger

This two-volume set brings together a collection of writings and speeches by James Wilson, one of only six signers of both the Declaration of Independence and the United States Constitution. His works had a significant impact on the deliberations that produced the cornerstone documents of American democracy.

The Chickenshit Club

Irwin Chusid profiles a number of "outsider" musicians - those who started as "outside" and eventually came "in" when the listening public caught up with their radical ideas. Included are The Shaggs, Tiny Tim, Syd Barrett, Joe Meek, Captain Beefheart, The Cherry Sisters, Daniel Johnston, Harry Partch, Wesley Willis, and others.

The Whole Duty of Man According to the Law of Nature

NATIONAL BESTSELLER WINNER OF THE NATIONAL BOOK AWARD In this groundbreaking biography, T.J. Stiles tells the dramatic story of Cornelius "Commodore" Vanderbilt, the combative man and American icon who, through his genius and force of will, did more than perhaps any other individual to create modern capitalism. Meticulously researched and elegantly written, *The First Tycoon* describes an improbable life, from Vanderbilt's humble birth during the presidency of George Washington to his death as one of the richest men in American history. In between we see how the Commodore helped to launch the transportation revolution, propel the Gold Rush, reshape Manhattan, and invent the modern corporation. Epic in its scope and success, the life of Vanderbilt is also the story of the rise of America itself.

The Kabala of Numbers

Filmmaker Alejandro Jodorowsky's insights into the Tarot as a spiritual path • Works with the original Marseille Tarot to reveal the roots of Western wisdom • Provides the key to the symbolic language of the Tarot's "nomadic cathedral" • Transforms a simple divination tool into a vehicle for self-realization and healing Alejandro Jodorowsky's profound study of the Tarot, which began in the early 1950s, reveals it to be far more than a simple divination device. The Tarot is first and foremost a powerful instrument of self-knowledge and a representation of the structure of the soul. The *Way of Tarot* shows that the entire deck is structured like a temple, or a mandala, which is both an image of the world and a representation of the divine. The authors use the sacred art of the original Marseille Tarot--created during a time of religious tolerance in the 11th century--to reconnect with the roots of the Tarot's Western esoteric wisdom. They explain that the Tarot is a "nomadic cathedral" whose parts--the 78 cards or "arcana"--should always be viewed with an awareness of the whole structure. This understanding is essential to fully grasp the Tarot's hermetic symbolism. The authors explore the secret associations behind the hierarchy of the cards and the correspondences between the suits and energies within human beings. Each description of the Major Arcana includes key word summaries, symbolic meanings, traditional interpretations, and a section where the card speaks for itself. Jodorowsky and Costa then take the art of reading the Tarot to a depth never before possible. Using their work with Tarology, a new psychological approach that uses the symbolism and optical language of the Tarot to create a mirror image of the personality, they offer a powerful tool for self-realization, creativity, and healing.

Progress and Poverty

The pacy, sensitive and formidably argued history of the causes of the First World War, from acclaimed historian and author Christopher Clark **SUNDAY TIMES** and **INDEPENDENT BOOKS OF THE YEAR 2012** The moments that it took Gavrilo Princip to step forward to the stalled car and shoot dead Franz Ferdinand and his wife were perhaps the most fateful of the modern era. An act of terrorism of staggering efficiency, it fulfilled its every aim: it would liberate Bosnia from Habsburg rule and it created a powerful new Serbia, but it also brought down four great empires, killed millions of men and destroyed a civilization. What made a seemingly prosperous and complacent Europe so vulnerable to the impact of this assassination? In *The Sleepwalkers* Christopher Clark retells the story of the outbreak of the First World War and its causes. Above all, it shows how the failure to understand the seriousness of the chaotic, near genocidal fighting in the Balkans would drag Europe into catastrophe. Reviews: 'Formidable ... one of the most impressive and stimulating studies of the period ever published' Max Hastings, *Sunday Times* 'Easily the best book ever written on the subject ... A work of rare beauty that combines meticulous research with sensitive analysis and elegant prose. The enormous weight of its quality inspires amazement and awe ... Academics should take note: Good history can still be a good story' *Washington Post* 'A lovingly researched work of the highest scholarship. It is hard to believe we will ever see a better narrative of what was perhaps the biggest collective blunder in the history of international relations' Niall Ferguson '[Reading *The Sleepwalkers*], it is as if a light had been turned on a half-darkened stage of shadowy characters cursing among themselves without reason ... [Clark] demolishes the standard view ... The brilliance of Clark's far-reaching history is that we

are able to discern how the past was genuinely prologue ... In conception, steely scholarship and piercing insights, his book is a masterpiece' Harold Evans, New York Times Book Review 'Impeccably researched, provocatively argued and elegantly written ... a model of scholarship' Sunday Times Books of the Year 'Superb ... effectively consigns the old historical consensus to the bin ... It's not often that one has the privilege of reading a book that reforges our understanding of one of the seminal events of world history' Mail Online 'A monumental new volume ... Revelatory, even revolutionary ... Clark has done a masterful job explaining the inexplicable' Boston Globe 'Superb ... One of the great mysteries of history is how Europe's great powers could have stumbled into World War I ... This is the single best book I have read on this important topic' Fareed Zakaria 'A meticulously researched, superbly organized, and handsomely written account Military History Clark is a masterly historian ... His account vividly reconstructs key decision points while deftly sketching the context driving them ... A magisterial work' Wall Street Journal About the author: Christopher Clark is Professor of Modern History at the University of Cambridge and a Fellow of St Catharine's College. He is the author of *The Politics of Conversion*, *Kaiser Wilhelm II and Iron Kingdom*. Widely praised around the world, *Iron Kingdom* became a major bestseller. He has been awarded the Officer's Cross of the Order of Merit of the Federal Republic of Germany.

Two Treatises of Government

It would perhaps be premature to make any definite pronouncement as to the scientific position in regard to the psychic phenomenon known as "scrying," and certainly presumptuous on my part to cite an authority from among the many who have examined this subject, since all are not agreed upon the nature and source of the observed phenomena. Their names are, moreover, already identified with modern scientific research and theory, so that to associate them with experimental psychology would be to lend colour to the idea that modern science has recognized this branch of knowledge. Nothing, perhaps, is further from the fact, and while it cannot in any way be regarded as derogatory to the highest scientist to be associated with others, of less scientific attainment but of equal integrity, in this comparatively new field of enquiry, it may lead to popular error to institute a connection. It is still fresh in the mind how the Darwinian hypothesis was utterly misconceived by the popular mind, the suggestion that man was descended from the apes being generally quoted as a correct expression of Darwin's theory, whereas he never suggested any such thing, but that man and the apes had a common ancestor, which makes of the ape rather a degenerate lemur than a human ancestor. Other and more prevalent errors will occur to the reader, these being due to the use of what is called "the evidence of the senses"; and of all criteria the evidence of sensation is perhaps the most faulty. Logical inference from deductive or inductive reasoning has often enough been a good monitor to sense-perception, and has, moreover, pioneered the man of science to correct knowledge on more than one occasion. But as far as we know or can learn from the history of human knowledge, our senses have been the chiefest source of error. It is with considerable caution that the scientist employs the evidence from sense alone, and in the study of experimental psychology it is the sense which has first to be corrected, and which, in fact, forms the great factor in the equation. A person informs me that he can see a vision in the crystal ball before him, and although I am in the same relation with the "field" as he, I cannot see anything except accountable reflections. This fact does not give any room for contradicting him or any right to infer that it is all imagination. It is futile to say the vision does not exist. If he sees it, it does exist so far as he is concerned. There is no more a universal community of sensation than of thought. When I am at work my own thought is more real than any impression received through the sense organs. It is louder than the babel of voices or the strains of instrumental music, and more conspicuous than any object upon which the eye may fall. These external impressions are admitted or shut out at will. I then know that my thought is as real as my senses, that the images of thought are as perceptible as those exterior to it and in every way as objective and real. The thought-form has this advantage, however, that it can be given a durable or a temporary existence, and can be taken about with me without being liable to impost as "excess luggage." In the matter of evidence in psychological questions, therefore, sense perceptions are only second-rate criteria and ought to be received with caution.

Collected Works of James Wilson

Praise for *How I Became a Quant* "Led by two top-notch quants, Richard R. Lindsey and Barry Schachter, *How I Became a Quant* details the quirky world of quantitative analysis through stories told by some of today's most successful quants. For anyone who might have thought otherwise, there are engaging personalities behind all that number crunching!" --Ira Kawaller, Kawaller & Co. and the Kawaller Fund "A fun and fascinating read. This book tells the story of how academics, physicists,

mathematicians, and other scientists became professional investors managing billions." --David A. Krell, President and CEO, International Securities Exchange "How I Became a Quant should be must reading for all students with a quantitative aptitude. It provides fascinating examples of the dynamic career opportunities potentially open to anyone with the skills and passion for quantitative analysis." --Roy D. Henriksson, Chief Investment Officer, Advanced Portfolio Management "Quants"--those who design and implement mathematical models for the pricing of derivatives, assessment of risk, or prediction of market movements--are the backbone of today's investment industry. As the greater volatility of current financial markets has driven investors to seek shelter from increasing uncertainty, the quant revolution has given people the opportunity to avoid unwanted financial risk by literally trading it away, or more specifically, paying someone else to take on the unwanted risk. How I Became a Quant reveals the faces behind the quant revolution, offering you?the?chance to learn firsthand what it's like to be a?quant today. In this fascinating collection of Wall Street war stories, more than two dozen quants detail their roots, roles, and contributions, explaining what they do and how they do it, as well as outlining the sometimes unexpected paths they have followed from the halls of academia to the front lines of an investment revolution.

Songs in the Key of Z

A critical history of European sovereignty and property rights as the foundation of the international order in 1300-1870.

A Manual of Occultism

Visitors to the Arctic enter places that have been traditionally imagined as otherworldly. This strangeness fascinated audiences in nineteenth-century Britain when the idea of the heroic explorer voyaging through unmapped zones reached its zenith. The Spectral Arctic re-thinks our understanding of Arctic exploration by paying attention to the importance of dreams and ghosts in the quest for the Northwest Passage. The narratives of Arctic exploration that we are all familiar with today are just the tip of the iceberg: they disguise a great mass of mysterious and dimly lit stories beneath the surface. In contrast to oft-told tales of heroism and disaster, this book reveals the hidden stories of dreaming and haunted explorers, of frozen mummies, of rescue balloons, visits to Inuit shamans, and of the entranced female clairvoyants who travelled to the Arctic in search of John Franklin's lost expedition. Through new readings of archival documents, exploration narratives, and fictional texts, these spectral stories reflect the complex ways that men and women actually thought about the far North in the past. This revisionist historical account allows us to make sense of current cultural and political concerns in the Canadian Arctic about the location of Franklin's ships.

America's Best BBQ—Homestyle

Take your backyard cookouts to a new level. “Davis and Kirk explore the world of competition barbecue and share tips and recipes straight from the champs.” —The Edwardsville Intelligencer It began with one simple question: What do championship barbecuers love to cook for themselves, when there are no rules but the simple laws of physics and basic chemistry? With more than thirty years of barbecue contest experience apiece, Ardie A. Davis, professional barbecue judge and barbecue historian extraordinaire, and KC Baron of Barbeque Paul Kirk, with a slew of awards under his belt—including seven world championships—were just the guys to ask it. America's Best BBQ—Homestyle collects the best backyard cookout recipes from people who have gone pro. Some of the recipes are former competition winners that have earned a constant place at the family table. Others are foods that teams like to make (and share) while they tend their fires on contest day. A few are old family recipes passed down for generations. And some are even the result of ingenious experiments in the kitchen and at the grill. Most are easy. All are sure to win the hearts of friends and neighbors at your next family cookout. Also included are tips and advice on everything from meal prep to gadgets, some basics to get you started, a few tall tales from the pits, and tons of photos of the dishes and the pitmasters who make them. This is the only book you need to become “the envy of the subdivision, the pride of the campground, and the host with the most at the next tailgate party” (The Self Taught Cook).

America's Best BBQ - Homestyle

Take your backyard barbecue to a whole new level! Davis and Kirk tossed out the rulebooks and collected the best backyard barbecue recipes from pitmasters who have gone pro. Some are competition winners, some are family recipes passed down for generations, and all are sure to win praise at your next barbecue.

America's Best BBQ

Hungry for something different? Then try America's Best BBQ. Here, two of the world's top barbecue experts present their favorite barbecue recipes from across America. Only Ardie and Paul, the go-to sources on barbecue, can earn the trust--and the secret recipes--from some of the nation's barbecue legends. Tasty sides include tips, tricks, techniques, fun memorabilia, full-color photos, and firsthand recollections of tales from the pits culled from over a century of combined barbecue experience. With more than 100 recipes for mouthwatering starters, moist and flavorful meats, classic side dishes, sauces and rubs, and decadent desserts, this book should come with its own wet-nap. * Whether it's spicy or sweet, Texas or Memphis, this is the best collection of American barbecue recipes. * Ardie's BBQ alter ego, Remus Powers, PhD, has earned profiles in many barbecue books, tons of magazines, and more than a few national newspapers. He's graced the Food Network and PBS, appearing in various documentaries on 'cue and great American cuisine. * Paul has appeared on The Today Show, Discovery Channel, CBS This Morning, Talk Soup, and Anthony Bourdain's A Cook's Tour: In Search of the Perfect Meal. He was also featured in AARP's Modern Maturity Magazine, Saveur, and The Calgary Herald, and he has written articles for Food and Wine, Fine Cooking, and Chili Pepper magazine.

America's Best Ribs

In addition to 100 mouthwatering recipes for rock-your-world ribs and delicious sides and desserts to complement them, this more-than-a-cookbook also includes tips for competitive barbecuing, juicy stories and lore from backyards and competitions, and tons of full-color photographs that showcase America's barbecue scene at its best--

Dr. BBQ's Big-Time Barbecue Cookbook

Delicious slow-smoked barbecue is a star-spangled American specialty, and there's nobody who knows how to put a barbecue smile on people's faces like Ray Lampe, the barbecue chef better known as Dr. BBQ. In Dr. BBQ's Big-Time Barbecue Cookbook, Ray shows every backyard chef how to bring the slow-smoked goodness of real barbecue to the table with a minimum of fuss and a maximum of finger-lickin' goodness. In chapters devoted to equipment, tools, and fuel, he shows readers how easy it is to prepare authentic barbecue with the best rubs, marinades, and mops this side of Arthur Bryant's. Dr. BBQ parts with some of his most treasured recipes so that your picnic table can groan with the likes of: Dr. BBQ's Big-Time Competition Brisket Dirty Dick's Cajun Ribeye Roast Meat Loaf for Lisa Marie Kansas City--Style Pork Butt Backyard Championship Ribs Chicago-Style Rib Tips Cured and Pecan-Smoked King Salmon Dr. BBQ's Sweet and Spicy Pork Loin Paradise Ridge Stuffed Lobster Sherry Butter Turkey Pork Chops Rancheros In a book filled with great recipes, surefire techniques, and tall tales from the barbecue trail, Dr. BBQ brings the best of American barbecue to you and your family.

It includes a step by step guide on preparing these meals and how to make each dish special. These recipes will make you a master of the grill, a true champion in their own backyard. Includes a recipe journal for your own barbecue recipes.

John Willingham's World Champion Bar-B-q

Bar-B-Q aficionados from around the world pilgrimage to Memphis for John Willingham's famous, braggin' rights Bar-B-Q Feisty debates have erupted right there, in the midst of fire and smoke, over whether Willingham's ribs with Memphis-style sauce or his World Champion Brisket rubbed with Hot Seasoning are his best. And no one goes home before they've had his gooey, rich shoofly pie. Authentic Bar-B-Q is as American as the Fourth of July, but often it takes a search party to find the real thing. Now, for the first time, John Willingham, winner of more major grand champion Bar-B-Q awards than anyone else in history, shares his celebrated recipes for a complete Bar-B-Q feast. At the heart of this book are Willingham's acclaimed recipes for mouthwatering beef, pork, fish, and chicken Bar-B-Q. Here are clear instructions for determining what type of cooker to use; laying a perfect fire to minimize smoke and maximize taste; preparing and using assorted dry rubs and marinades; getting a rich, marbled taste out of any cut of meat. The result is such triumphs as Grilled Pork Loin Roast, tender on the inside, golden on the outside; fresh, subtle Herbed Shrimp with Basil; Honey Mustard-Glazed Ribs that can be prepared in a snap; and Hot Sauce-Marinaded Chicken. But it's not just the perfectly

prepared meats and sauces on which Willingham lavishes special attention. No Bar-B-Q feast would be complete without starters, salads, fixin's, slaws, and dessert. And Willingham has the blue ribbon recipes for them all. Take, for example, his Smokin' Fastball Wings cooked overhickory or apple wood, melt-in-your-mouth Angel Biscuits, or stand-up spicy Cajun Coleslaw. To cool off, there's Grandma's Raisin Bread Pudd'n with Rum Sauce, Old-Fashioned Custard Pie, or rich Maple Sauce spooned over ice cream to mention just a few, for dessert. John Willingham explains what real Bar-B-Q is and isn't--and provides the techniques and tips that have won him accolades but are so simple even a backyard 'cuer can use them. Down-home and authentic, John Willingham's World Champion Bar-B-Q is the sourcebook for weekend enthusiasts and world-class chefs ready to follow in the Willingham tradition of creating delicious Bar-B-Q masterpieces.

Brother Jimmy's BBQ

"New York's favorite go-to barbecue chain is revealing its best-kept secrets" (New York Daily News). According to owner Josh Lebowitz and executive chef Eva Pesantez, the foundation of Brother Jimmy's success is the food. Incredible ribs. Country-fried steak. Pulled pork sandwiches. Blackened chicken. And of course, the delicious sides: from mac 'n' cheese to black-eyed peas. But beyond the food, there's something more—Brother Jimmy's is the place where people go to have a good time. Now, the restaurant's recipes are presented for the first time, with more than one hundred recipes for starters, sides, beef, pork, chicken, seafood, rubs & sauces, and drinks & cocktails. From Hush Puppies with Maple Butter to Shrimp and Corn Fritters to Classic Pulled Pork with Slaw, these are the only recipes you'll need to re-create your favorite restaurant recipes in your own kitchen.

Daily Soup Cookbook

The meal-in-a-bowl brews at the Daily Soup, a Manhattan food chain, excite customer devotion. Now Leslie Kaul, the stores' executive chef, along with the owners, offer The Daily Soup Cookbook, a collection of 200 favorite recipes for soups, stews, and stocks. These straightforward formulas, drawn from a globe-spanning repertoire, will please cooks of all kinds, from beginners to the accomplished. Organized by ingredients such as vegetables, beans, grains, and fruit, the recipes include old favorites like French Onion and Chicken Matzoh Ball soups, as well as less familiar brews such as Jamaican Pumpkin soup, Shrimp and Scallop Seviche, and Poblano Corn Chowder. In addition to a chapter devoted to chilis—Braised Pork Chili with Black Beans and Corn is a particular winner--the authors provide notes on ingredients and techniques, historical asides, and a series of tongue-in-cheek sidebars, offering, for example, the Periodic Table of Soups and Baby Names for the New Millennium ("Art E. Choke" is one). If these digressions aren't always apt, there are always the soups, with several pi+ce de r+sistance examples--Peking Duck; Lamb, Artichoke, and Rosemary Stew; and Saffron Mussel soup--guaranteed to please. A final section on stocks provides basic soup building-block information, and Things to Do with Leftover Soups offers next-day options, should any of the delicious bowls not be devoured instantly. --Arthur Boehm

Bobby Flay's Barbecue Addiction

The man who got America fired up about grilling now extends his serious outdoor skills to low and slow barbecue and the intoxicating flavors of wood smoke. You've always known the best grilling recipes come from chef-restaurateur and Food Network star Bobby Flay. Now, just as on his Emmy award-winning show of the same name, Bobby turns his attention to true barbecue in Bobby Flay's Barbecue Addiction. With this book you get the best of both worlds and can decide whether to barbecue Tuscan Rosemary Smoked Whole Chickens or quickly grill some Pimiento Cheese-Bacon Burgers, depending upon your craving. Here is everything you need for a great backyard bash: pitchers of cold drinks, such as Sparkling Bourbon Lemonade, and platters of starters to share, like Grilled Shrimp Skewers with Cilantro-Mint Chutney, and inventive sides, including New Potato-Corn Chowder Salad. You'll also find tons of helpful information on the pros and cons of different cookers, fuels, woods, and grilling gear; how to light and tend a fire; how to tell when your steaks are done; as well as Bobby's top ten tips for the perfect cookout. With 150 recipes and 100 color photographs, Bobby Flay's Barbecue Addiction is the new outdoor cooking manifesto for fellow worshippers of smoke, fire, and good times.

Big Bob Gibson's BBQ Book

Winners of the World Championship BBQ Cook-Off for six years in a row and with hundreds of other contest ribbons as well, nobody does barbecue better than Big Bob Gibson Bar-B-Q in Decatur,

Alabama. Chris Lilly, executive chef of Big Bob Gibson Bar-B-Q and great-grandson-in-law of Big Bob himself, now passes on the family secrets in this quintessential guide to barbecue. From dry rubs to glazes and from sauces to slathers, Lilly gives the lowdown on Big Bob Gibson Bar-B-Q's award-winning seasonings and combinations. You'll learn the unique flavors of different woods and you'll get insider tips on creating the right heat—be it in a charcoal grill, home oven, or backyard ground pit. Then, get the scoop on pulled pork, smoked beef brisket, pit-fired poultry, and, of course, ribs. Complete the feast with sides like red-skin potato salad and black-eyed peas. And surely you'll want to save room for Lilly's dessert recipes such as Big Mama's Pound Cake. Loaded with succulent photographs, easy-to-follow instructions, and colorful stories, Big Bob Gibson's BBQ Book honors the legacy of Big Bob Gibson—and of great barbeque.

Damn Delicious

The debut cookbook by the creator of the wildly popular blog Damn Delicious proves that quick and easy doesn't have to mean boring. Blogger Chungah Rhee has attracted millions of devoted fans with recipes that are undeniable 'keepers'—each one so simple, so easy, and so flavor-packed, that you reach for them busy night after busy night. In Damn Delicious, she shares exclusive new recipes as well as her most beloved dishes, all designed to bring fun and excitement into everyday cooking. From five-ingredient Mini Deep Dish Pizzas to no-fuss Sheet Pan Steak & Veggies and 20-minute Spaghetti Carbonara, the recipes will help even the most inexperienced cooks spend less time in the kitchen and more time around the table. Packed with quickie breakfasts, 30-minute skillet sprints, and speedy takeout copycats, this cookbook is guaranteed to inspire readers to whip up fast, healthy, homemade meals that are truly 'damn delicious!'

Fire and Smoke

Grill like a pro with 100 expert recipes—and tips—in this cookbook from Big Bob Gilson Bar-B-Q's executive chef, Chris Lilly. World champion pitmaster Chris Lilly combines the speed of grilling with the smoky flavors of low-and-slow barbecue for great meals any night of the week, no fancy equipment required. Cook trout in a cast-iron skillet nestled right in smoldering coals for a crispy yet tender and flaky finish. Roast chicken halves in a pan on a hot grill, charring the skin while capturing every bit of delicious juice. Infuse delicious smoke flavors into fruits and vegetables, even cocktails and desserts. Fire and Smoke gives you 100 great reasons to fire up your grill or smoker tonight.

Sally's famous recipes include award-winning Salted Caramel Dark Chocolate Cookies, No-Bake Peanut Butter Banana Pie, delectable Dark Chocolate Butterscotch Cupcakes, and yummy Marshmallow Swirl S'mores Fudge. Find tried-and-true sweet recipes for all kinds of delicious: Breads & Muffins Breakfasts Brownies & Bars Cakes, Pies & Crisps Candy & Sweet Snacks Cookies Cupcakes Healthier Choices With tons of simple, easy-to-follow recipes, you get all of the sweet with none of the fuss!

Sugar Rebels

Crazy, fun, colourful baking powered by positivity and strength – that's Sugar Rebels! Sugar Rebels is the book that fans of The Scrان Line have been waiting for. It features its host and creator Nick Makrides' signature delicious and sometimes outrageous cupcakes, macarons and cakes – some old favourites, some exciting new recipes – presented alongside the story of The Scrان Line and Nick's path to success online and as a role model for the LGBTQI+ community.

Barbecue Sauces, Rubs, and Marinades--Bastes, Butters & Glazes, Too

Every griller's secret weapon! Transform meats and seafood, vegetables and desserts into world-class barbecue with the flavor foundations, wet and dry, that give grilled food its character, personality, depth, and soul. Chile-fired rubs, citrusy marinades, buttery bastes, pack-a-wallop sauces, plus mops, slathers, sambals, and chutneys—this cornucopia of more than 200 recipes draws on irresistible Thai,

Mexican, Indian, Cajun, Jamaican, Italian, and French cuisines, plus those big flavor building blocks from America's barbecue belt. Barbecue Hall of Famer Steven Raichlen shows how to add the expert touch to every dish in your repertoire, from transforming a simple steak to electrifying an exotic kebab. Includes a step-by-step guide to building a signature barbecue sauce and recipes for more than 30 outrageous main dishes.

Melba's American Comfort

Wilson invites you to experience the delicious foods of her heritage. She melds the down-home country cooking of her Southern roots with the urban cultural influences of New York City. Also included is a treasure trove of delightful stories and wisdom from the heart of her bustling kitchen.

Cool Smoke

Five time Barbecue World Champion Tuffy Stone's complete guide to barbeque Flame, smoke, and meat—these simple elements combine to make great barbecue. Creating the perfect bite of tender, spicy, smoky barbecue is a science and an art form, and Tuffy Stone—five time World Champion Pitmaster, co-host and judge of Destination America's BBQ Pitmasters, and co-owner of the award-winning Q Barbecue restaurants—has mastered it. Cool Smoke is the distillation of all his years of experience and wisdom. Inside you'll find a wealth of barbecue information including: - How to choose the right cooker - The best way to trim a cut of meat - How to prepare your own brines, rubs, and sauces - Insider tips and hints for taking on the competition circuit - Over 100 creative, delicious recipes to make you a barbecue master The recipes include classic barbecue dishes with updated preparations like Smoked Ribs with Cherry Barbecue Sauce, Dove Breasts with Crispy Bacon and Chipotle White Sauce, and even the Holy Grail of barbecue: the Whole Hog. As no plate of 'cue is complete without a generous helping of sides, there are also recipes for Corn Pudding with Poblano Pepper, Collard Greens with Pepper Relish, and Pineapple Hot Pot, along with delicious desserts like Frozen Coconut Lime Pie. For backyard barbecuers who are interested in taking on the competition circuit, Cool Smoke offers tips and tricks from one of the best in the business. Stone's competition secrets—gleaned from more than a decade of success on the circuit—have never before been shared beyond the walls of his cook school in Richmond, Virginia. Cool Smoke gives an insider's look behind the scenes and offers advice on creating perfect competition turn-ins that have made Stone a World Champion five times over. With mouthwatering recipes, over 200 hundred color photos, essential guides to cookers and equipment, and expert advice, Tuffy Stone's Cool Smoke is the definitive guide to all things barbecue.

Paul Kirks Championship Barbecue

The secret's in the sauce! Every backyard chef yearns to be known for that special brew that earns him or her a reputation as a barbecue pro. Paul Kirk's Championship Barbecue Sauces gives the outdoor cook a tasty head start. At its heart are over 50 sauces, from Granddad's Hotshot Sauce, Sweet Kansas City Sauce, and The Rib Doctor's Sauce to Smoky Peach Sauce and Berry Berry Sauce. Dozens of marinades get any food ready for the fire, and a bounty of rubs and mops will turn the most casual griller into a certified pitmaster. For extra pleasures once the food is served, there are zesty salsas and relishes, and even homemade mustards and ketchups. Each recipe points to the meats, fish, or vegetables it complements best. And, in several sections called "Master Classes," readers learn how to concoct their own signature rubs and sauces out of the basic components: sugars, salts, acids, and spices.

Franklin Steak

The be-all, end-all guide to cooking the perfect steak—from buying top-notch beef, seasoning to perfection, and finding or building the ideal cooking vessel—from the James Beard Award-winning team behind the New York Times bestseller Franklin Barbecue. "This book will have you salivating by the end of the introduction."—Nick Offerman Aaron Franklin may be the reigning king of brisket, but in his off-time, what he really loves to cook and eat at home is steak. And it's no surprise that his steak is perfect, every time—he is a fire whisperer, after all, and as good at grilling beef as he is at smoking it. In Franklin Steak, Aaron and coauthor Jordan Mackay go deeper into the art and science of cooking steak than anyone has gone before. Want the real story behind grass-fed cattle? Or to talk confidently with your butcher about cuts and marbling? Interested in setting up your own dry-aging fridge at home? Want to know which grill Aaron swears by? Looking for some tricks on building an amazing all-wood fire? Curious about which steak cuts work well in a pan indoors? Franklin Steak has you covered. For

any meat lover, backyard grill master, or fan of Franklin's fun yet authoritative approach, this book is a must-have.

The Chicago Food Encyclopedia

The Chicago Food Encyclopedia is a far-ranging portrait of an American culinary paradise. Hundreds of entries deliver all of the visionary restaurateurs, Michelin superstars, beloved haunts, and food companies of today and yesterday. More than 100 sumptuous images include thirty full-color photographs that transport readers to dining rooms and food stands across the city. Throughout, a roster of writers, scholars, and industry experts pays tribute to an expansive--and still expanding--food history that not only helped build Chicago but fed a growing nation. Pizza. Alinea. Wrigley Spearmint. Soul food. Rick Bayless. Hot Dogs. Koreatown. Everest. All served up A-Z, and all part of the ultimate reference on Chicago and its food.

L.A. Mexicano

Richly photographed and authentically local, LA Mexicano showcases LA's famously rich and complex Mexican-food culture, including recipes; profiles of chefs, bakers, restaurateurs, and vendors; and neighborhood guides. Part cookbook, part food journalism, and part love song to LA, it's the definitive resource for home cooks, hungry Angelenos, and food-loving visitors. With a foreword by Taco USA's Gustavo Arellano.

Franklin Barbecue

NEW YORK TIMES BESTSELLER • A complete meat and brisket-cooking education from the country's most celebrated pitmaster and owner of the wildly popular Austin restaurant Franklin Barbecue. When Aaron Franklin and his wife, Stacy, opened up a small barbecue trailer on the side of an Austin, Texas, interstate in 2009, they had no idea what they'd gotten themselves into. Today, Franklin Barbecue has grown into the most popular, critically lauded, and obsessed-over barbecue joint in the country (if not the world)—and Franklin is the winner of every major barbecue award there is. In this much-anticipated debut, Franklin and coauthor Jordan Mackay unlock the secrets behind truly great barbecue, and share years' worth of hard-won knowledge. Franklin Barbecue is a definitive resource for the backyard pitmaster, with chapters dedicated to building or customizing your own smoker; finding and curing the right wood; creating and tending perfect fires; sourcing top-quality meat; and of course, cooking mind-blowing, ridiculously delicious barbecue, better than you ever thought possible.

Food for Life

Hosting a party is overwhelming enough; let the experts at Cook's Illustrated reduce some of the strain with this perfectly curated selection of "only the best": the 75 best appetizer recipes ever to come out of the test kitchen. An innovative organization makes it simple to put together a well-balanced spread that hits all the high points, from something dipable to snacks to munch by the handful to elegant two-bite treats. Chapters mix cocktail party classics and modern finger foods and satisfy a variety of menus, abilities, and styles. Invite Cook's Illustrated to your next soiree to guarantee the all-time best party for you and your guests.

All Time Best Appetizers

This bento cookbook contains 30 recipes to make your lunchtime colorful and full of nutrition. These bento box recipes will help you maintain your daily calorie intake as these recipes are healthy and free from unhealthy fats with each bento recipe containing a balanced amount of carbohydrates and proteins. These bento recipes are suitable for both kids and adults. There are clear instructions given where you can substitute one ingredient with another or the tools that are required to make a particular recipe and the substitute if you don't have that tool available. All in all this cookbook is your complete guide towards portion control.

Bento Cookbook

Everybody has one in their collection. You know—one of those old, spiral- or plastic-tooth-bound cookbooks sold to support a high school marching band, a church, or the local chapter of the Junior League. These recipe collections reflect, with unimpeachable authenticity, the dishes that define communities: chicken and dumplings, macaroni and cheese, chess pie. When the Southern Foodways Alliance began curating a cookbook, it was to these spiral-bound, sauce-splattered pages that they turned for their model. Including more than 170 tested recipes, this cookbook is a true reflection of southern foodways and the people, regardless of residence or birthplace, who claim this food as their own. Traditional and adapted, fancy and unapologetically plain, these recipes are powerful expressions of collective identity. There is something from—and something for—everyone. The recipes and the stories that accompany them came from academics, writers, catfish farmers, ham curers, attorneys, toqued chefs, and people who just like to cook—spiritual Southerners of myriad ethnicities, origins, and culinary skill levels. Edited by Sara Roahen and John T. Edge, written, collaboratively, by Sheri Castle, Timothy C. Davis, April McGreger, Angie Mosier, and Fred Sauceman, the book is divided into chapters that represent the region's iconic foods: Gravy, Garden Goods, Roots, Greens, Rice, Grist,

Yardbird, Pig, The Hook, The Hunt, Put Up, and Cane. Therein you'll find recipes for pimento cheese, country ham with redeye gravy, tomato pie, oyster stew, gumbo z'herbes, and apple stack cake. You'll learn traditional ways of preserving green beans, and you'll come to love refried black-eyed peas. Are you hungry yet?

The Southern Foodways Alliance Community Cookbook

Presents a collection of barbeque recipes, provides a history of the Kansas City Barbeque Society, and includes tips for competitive barbequing.
