Do you often think what would be the best wine? Or how to find your own favourite wine. Would you like it easier to talk about wines and wine grapes? Because of the abundance of wines, it's much easier to get to know them starting with the different types of grapes. To this end, Wine Grape Varieties of the World from a European Point of View offers good support by listing about 930 varieties, many with several synonyms. Almost every variety now has a brief description of the aroma. The book first lists the ten most favoured grape varieties, and after this the varieties are listed by countries and by wine regions. 58 countries are included. Finally, you can find maps of wine regions, a description of the most common varieties, and an alphabetical index of the wine grape varieties including a large number of synonyms. This reference book is the same size as the screen of a tablet, handy for viewing at your home as well as packing it in your bag or suitcase as a guide to local wines. It is also available as an eBook for all platforms. This makes it easy to search all the grape varieties for instance of a particular wine region or a particular country. The book can be previewed before a possible decision to buy it e.g. by clicking the following link. <https://sites.google.com/view/suosikkiviinisi-findyourwine/> The link also gives you useful guidance, if you decide to buy it. If the link is not active, you can paint it. Then, click the right mouse button and choose Move to the address. Or, you can paint the link and copy and paste it to the address field of your browser.

It provides a forum for presenting high-quality theoretical and applied works, and promoting and fostering interdisciplinary research and international cooperation. The intended audience is researchers and practitioners who seek the latest developments and applications in the field of data science and classification.

#### Storia dei confini d'Italia. Il Centro Italia. Toscana, Marche, Umbria, Lazio

In questo volume sono classificate e descritte le monete emesse in Toscana (esclusa la città di Firenze, zecca che è stata oggetto del secondo e terzo volume, rispettivamente con le monete della Repubblica di Firenze e le monete del Granducato di Toscana), nelle Marche e in Umbria. Nella collezione del Museo Nazionale del Bargello le zecche di Lucca e Pisa sono numericamente bene rappresentate, anche con esemplari di rilievo, ma è la zecca di Siena, con ben 451 esemplari, la più importante tra quelle comprese in questo volume. Delle zecche non toscane sono presenti esemplari interessanti, e spesso in metallo prezioso, di Pesaro e Urbino, a testimonianza dei buoni rapporti dei granduchi medicei con quelle signorie. Nel complesso, sono presenti in questa parte della collezione del Museo alcune monete del tutto inedite e molte altre che risultano essere delle varianti a quelle fino ad oggi pubblicate. Le 1235 monete descritte nel volume sono state classificate sulla base dell'opera "Corpus Nummorum Italicorum" e per ciascuna di esse la scheda tecnica riporta dati e riferimenti bibliografici.

This book focuses on the questions of how territorial differences in productivity levels and unemployment rates arise in the first place and why territorial differences in labor market performance persist over time. Unemployment divergence and unemployment club convergence have been touched on in a large number of works and have recently also been studied using spatial econometric analysis. In this book we aim to develop the debate to include several important new topics, such as: the reasons why structural changes in some sectors cause slumps in some regions but not in others; the extent to which agglomeration factors explain regional imbalances; the degree of convergence / divergence across EU countries and regions; the role of labor mobility in reducing / increasing regional labor market imbalances; the impact of EU and country-level regional policy in stimulating convergence and the (unsatisfactory) role of active labor market policy in stimulating labor supply in the weakest economic areas.

This is the first book in English reviewing and updating the geology of the whole Apennines, one of the recent most uplifted mountains in the world. The Apennines are the place from which Steno (1669)

first stated the principles of geology. The Apennines also represent amongst others, the finding/testing sites of processes and products like volcanic eruptions, earthquakes, olistostromes and mélanges (argille scagliose), salinity crisis, geothermal fluids, thrust-top basins, and turbidites (first represented in a famous Leonardo's painting). As such, the Apennines are a testing and learning ground readily accessible and rich of any type of field data. A growing literature is available most of which is not published in widely available journals. The objective of the book is to provide a synthesis of current data and ideas on the Apennines, for the most part simply written and suitable for an international audience. However, sufficient details and in-depth analyses of the various complex settings have been presented to make this material useful to professional scholars and to students of senior university courses.

#### Cibi di strada. Italia del nord, Toscana, Umbria, Marche

This book offers a comprehensive overview of contemporary issues of regional development. It places particular emphasis on its socio-economic and socio-political determinants which accompany the problem of existing and ever-widening differences in the level of regional development in various parts of Europe. In order to diagnose the scale of those differences and to indicate the main forces behind the divergence of development, the authors propose an original systematisation of regional development factors, drawing attention to the need to consider them within the framework of present-day socio-economic megatrends. The proposed approach to the development factors is also used for the author's operationalisation of the concept of territorial capital, which is at the centre of regional place-based policy. The wide spatial aspect of the analysis (national and local) and its extensive temporal scope (2004-2019) yields unique results and creates an important element of added value for this book, which shows the regularities of the process of regional development in Europe at three spatial levels - pan-European, national and intra-regional. Furthermore, it indicates the challenges faced by regionalists who attempt to carry out research on different territorial levels with a diverse number of units (205 EU regions, 16 Polish voivodeships, 2,478 Polish local units) and extended observation periods (2004-2017). The solutions proposed by the authors, who show the potential of overcoming the barriers resulting from limited access to complete and comparable statistical data series, should be inspiring for many researchers. The unique results of direct research carried out on a large sample of respondents and entrepreneurs via diverse field research techniques constitute a valuable source of information on local conditions that impact contemporary development processes in less developed regions. Their value is even greater because they were carried out in a unique laboratory created by the authors for testing the regularity of formation and impact of socio-economic development factors in various locally determined conditions of this process. It consists of purposefully selected test units (LAU2). Located in a less developed region, they represent all growth types and functional test units identified in the course of the research. Consequently, the results obtained may be generalised and applied to other areas showing similar features of territorial capital. The monograph is addressed primarily to a wide group of regionalists connected with economic and social sciences as well as to practitioners involved in the implementation of development policies at various levels.

#### In the Woad Blue. History of a Plant and a Colour

Profound changes have occurred in the demography and sociology of Italian fertility since Napoleonic times. Using the statistical system instituted in 1861 with national unification, Massimo Livi-Bacci provides a systematic and detailed analysis of fertility trends in Italy in the nineteenth and twentieth centuries. He brings to light the main features of the secular decline: its rapid occurrence in the northern and central areas; the widening urban-rural gap; the shaping of social and economic differences; and the late, slow downward trend in the South. Multivariate statistical analysis enables the author to measure the changing relationship between fertility and social or economic phenomena. Historical evidence illustrates the effect on fertility of mass emigration and Fascist policy as well as of social changes such as those in agrarian structure, mobility, and communications. An altered attitude toward procreation is evident in some parts of Italy in the early nineteenth century. The decline becomes apparent in certain northern and central regions in the 1870s and 1880s and it appears at the aggregate national level in the 1890s. Originally published in 1977. ## Sur la route des vins italiens

L'Italie se dispute chaque année avec la France le titre du plus grand producteur de vins au monde. Les vins italiens restent pourtant peu ou mal connus de ce côté des Alpes : les français ne connaissent de leur voisin que les vins de Toscane, le Lambrusco ou le Prosecco, ce dernier rentrant dans la composition du Spritz dont la consommation a explosé ces dernières années. Pourtant l'Italie produit bien d'autres vins qui comptent parmi les meilleurs et les plus prisés du monde. Ettore Scarlino propose avec cet ouvrage de découvrir la diversité et la richesse de la production viticole italienne : variété des climats et des sols, des cépages autochtones ainsi que des producteurs de renom. A la découverte des vins italiens est le premier ouvrage en France consacré au sujet.

## Itinéraire descriptif, historique et artistique de l'Italie et de la Sicile

Lonely Planet : un guide de référence, à la fois pratique et culturel, pour découvrir le nord de l'Italie Un guide tout en couleurs, pour découvrir le nord de l'Italie : la Lombardie, la Ligurie, la Vénétie, le Piémont, le Frioul-Vénétie Julienne, les Dolomites et l'Émilie-Romagne, en passant par Milan et les lacs. Des photos illustrant les sites les plus spectaculaires et les curiosités de chaque région : la Riviera italienne en Ligurie, le Grand Canal de Venise, les petits villages des Cinque Terre près de Gêne, les sommets spectaculaires des Alpes, les villas et palais des lacs italiens (lac Majeur, lacs d'Orta et d'Iseo, lacs de Côme et de Garde), les sentiers du parc national du Grand Paradis. Un chapitre consacré à la cuisine du Nord de l'Italie, peut-être la plus riche du pays : la truffe et autres délices du Piémont, le parmesan ou les pâtes à la bolognaise de l'Émilie-Romagne, le risotto de Lombardie, le prosecco de Vénétie... Le design et la mode, emblèmes de Milan, capitale du Nord et poumon économique de l'Italie. Tout sur les trésors culturels et architecturaux de la région : Venise, Giotto à Padoue, Vérone, La Cène de Léonard de Vinci à Milan, les résidences royales de la maison de Savoie autour de Turin. Un chapitre très complet sur les activités de plein air.

### Guide to the Wines of Spain

Over the course of some two centuries following the conquests and consolidations of Spanish rule in the Americas during the late fifteenth and early sixteenth centuries—the period designated as the Baroque—new cultural forms sprang from the cross-fertilization of Spanish, Amerindian, and African traditions. This dynamism of motion, relocation, and mutation changed things not only in Spanish America, but also in Spain, creating a transatlantic Hispanic world with new understandings of personhood, place, foodstuffs, music, animals, ownership, money and objects of value, beauty, human nature, divinity and the sacred, cultural proclivities—a whole lexikon of things in motion, variation, and relation to one another. Featuring the most creative thinking by the foremost scholars across a number of disciplines, the Lexikon of the Hispanic Baroque is a uniquely wide-ranging and sustained exploration of the profound cultural transfers and transformations that define the transatlantic Spanish world in the Baroque era. Pairs of authors—one treating the peninsular Spanish kingdoms, the other those of the Americas—provocatively investigate over forty key concepts, ranging from material objects to metaphysical notions. Illuminating difference as much as complementarity, departure as much as continuity, the book captures a dynamic universe of meanings in the various midst of its own re-creations. The Lexikon of the Hispanic Baroque joins leading work in a number of intersecting fields and will fire new research—it is the indispensable starting point for all serious scholars of the early modern Spanish world.

Nature, money, work, care, food, energy, and lives: these are the seven things that have made our world and will shape its future. In making these things cheap, modern commerce has transformed, governed, and devastated Earth. In *A History of the World in Seven Cheap Things*, Raj Patel and Jason W. Moore present a new approach to analyzing today's planetary emergencies. Bringing the latest ecological research together with histories of colonialism, indigenous struggles, slave revolts, and other rebellions and uprisings, Patel and Moore demonstrate that throughout history, crises have always prompted fresh strategies to make the world cheap and safe for capitalism. At a time of crisis in all seven cheap things, innovative and systemic thinking is urgently required. This book proposes a radical new way of understanding-and reclaiming-the planet in the turbulent twenty-first century.
