What to Do when Your Mom Or Dad Says-- Make Your Breakfast and Lunch!

Presents easy-to-follow instructions for preparing a variety of breakfast and lunch meals.

The Sneaky Chef

Parents will do almost anything to get their kids to eat healthier, but unfortunately, they've found that begging, pleading, threatening, and bribing don't work. With their patience wearing thin, parents will

"give in" for the sake of family peace, and reach for "kiddie" favorites—often nutritionally inferior choices such as fried fish sticks, mac n' cheese, Pop-sicles, and cookies. Missy Chase Lapine, former publisher of *Eating Well* magazine, faced the same challenges with her two young daughters, and she sought a solution. Now in *The Sneaky Chef*, Lapine presents over 75 recipes that ingeniously disguise the most important superfoods inside kids' favorite meals. With the addition of a few simple make-ahead purees or clever replacements, (some may surprise you!) parents can pack more fiber, vitamins, and antioxidants in their kids' foods. Examples of "Sneaky" recipes include: No Harm Chicken Parm Power Pizza Incognito Burritos Guerilla Grilled Cheese Brainy Brownies Health-by-Chocolate Cookies Quick fixes for Jell-O(R)

Raising Boys

A friendly and practical guide to the stages and issues in boys'—? development from birth to manhood. Child of Mine

Widely considered the leading book involving nutrition and feeding infants and children, this revised edition offers practical advice that takes into account the most recent research into such topics as: emotional, cultural, and genetic aspects of eating; proper diet during pregnancy; breast-feeding versus; bottle-feeding; introducing solid food to an infant's diet; feeding the preschooler; and avoiding mealtime battles. An appendix looks at a wide range of disorders including allergies, asthma, and hyperactivity, and how to teach a child who is reluctant to eat. The author also discusses the benefits and drawbacks of giving young children vitamins.

52 Things Kids Need from a Dad

"God, please help me...another game of Candy Land..." Quite a few dads spend time with their kids. However, many have no clue what their kids really need. Enter author Jay Payleitner, veteran dad of five, who's also struggled with how to build up his children's lives. His *52 Things Kids Need from a Dad* combines straightforward features with step-up-to-the-mark challenges men will appreciate: a full year's worth of focused, doable ideas—one per week, if desired uncomplicated ways to be an example, like "kiss your wife in the kitchen" tough, frank advice, like "throw away your porn" And, refreshingly... NO exhaustive (and exhausting) lists of "things you should do" NO criticism of dads for being men and acting like men Dads will feel respected and empowered, and gain confidence to initiate activities that build lifelong positives into their kids. Great gift or men's group resource!

Epi-Paleo Rx

Neurosurgeon and wildly controversial Paleo blogger Dr. Jack Kruse gives us his first book, *Epi-paleo Rx: The Prescription for Disease Reversal and Optimal Health*. Kruse, who used his findings to lose 140 pounds and pack on muscle, takes the reader through his prescriptions for obesity, diabetes, heart disease, osteoporosis, autoimmunity, brain health, and aging. The material weaves together surprises from our Ice Age origins with the new science of epigenetics, or the effect of diet and environment on gene expression. A champion of "biohacking," the art of tinkering with one's own biology, Kruse pounces on his own profession's ineptness when it comes to chronic conditions and urges readers to take health care into their own hands. He discusses which labs to order and why, why your doctor is obligated to write you a prescription you don't need, the vital roles daylight and darkness play in metabolism, and the optimal diet for different stages of health and different times of year. Perhaps Kruse's more fascinating contributions to Paleo literature are his findings on cold therapy—the effect of cold environments, immersion in cold water, and ice pack therapy on disease reversal, pain, and optimal living. Kruse explains how our origins as cold-adapted mammals hold the key to disease reversal, using a shocking biohack to prove his theory. The *Epi-paleo Rx* is the result of Kruse's abundant research and clinical application in his practice as a neurosurgeon. Kruse questions conventional wisdom about human metabolism and chronic disease, arguing science has incomplete information when it comes to insulin resistance, diabetes, obesity, and their related illnesses. By examining the human body through

the prism of our early beginnings and the science of epigenetics, we find each of us already possesses the “owner’s manual” to reverse disease and live optimally.

A collection of the most-read articles from Janet's popular and long-running blog, *Elevating Child Care* focuses on common infant issues, including: Nourishing our babies' healthy eating habits Calming your clingy, fearful child How to build your child's focus and attention span Developing routines that promote restful sleep Eschewing the quick-fix tips and tricks of popular parenting culture, Lansbury's gentle, insightful guidance lays the foundation for a closer, more fulfilling parent-child relationship, and children who grow up to be authentic, confident, successful adults.

Elevating Child Care

"Adults squirm when the big questions come up, especially the big spiritual ones. They don't want their kids to worry, so they give answers that all say one thing: 'Don't worry. It's all okay.' "And yet the big questions still keep coming up. At every age we all need to know what life is really all about. Not just on the surface, but deep down. "Teenagers are no exception. They deserve a spiritual life all their own. One that offers the kind of comfort we hope to give our children, but is different at the same time. More full of ideas. More mature. More fitting for the whole wide future that lies ahead. "That's what I've tried to do in this book, as fully and as honestly as possible." -- Deepak Chopra

What to Do when Your Mom Or Dad Says-- don't Hang Around with the Wrong Crowd!

Everyone knows a joke about mothers-in-law, but what are the golden rules you need to become a popular one? The authors of this pioneering guide, first published in the 1930s, aimed to dramatically improve relationships for all the family with sound advice which is as relevant today as it was in the early twentieth century: 'If your opinion is not sought, don't volunteer it.' Practical tips are given on a range of issues, such as how to visit a married daughter, how best to interact with grandchildren, how not to pass comment at the dinner table and what degree of independence should be granted to married sons. The guide even contemplates living with the married couple and offers advice on how to negotiate this situation, as well as giving examples of how not to behave on your son or daughter's wedding day. Packed with amusing scenarios of provocative behaviour as well as pithy advice, and illustrated with contemporary line drawings, this charming guide will win over both novices and veterans in this much maligned role.

An award-winning food writer takes us on a global tour of what the world eats--and shows us how we can change it for the better Food is one of life's great joys. So why has eating become such a source of anxiety and confusion? Bee Wilson shows that in two generations the world has undergone a massive shift from traditional, limited diets to more globalized ways of eating, from bubble tea to quinoa, from Soylent to meal kits. Paradoxically, our diets are getting healthier and less healthy at the same time. For some, there has never been a happier food era than today: a time of unusual herbs, farmers' markets, and internet recipe swaps. Yet modern food also kills--diabetes and heart disease are on the rise everywhere on earth. This is a book about the good, the terrible, and the avocado toast. A riveting

exploration of the hidden forces behind what we eat, *The Way We Eat Now* explains how this food revolution has transformed our bodies, our social lives, and the world we live in.
