Exits from the Labyrinth

Can we address the issue of nationalism without polemics and restore it to the domain of social science? Claudio Lomnitz-Adler takes a major step in that direction by applying anthropological tools to the study of national culture. His sweeping and innovative interpretation of Mexican national ideology constructs an entirely new theoretical framework for the study of national and regional cultures everywhere. With an analysis of culture and ideology in internally differentiated regional spaces—in this case Morelos and the Huasteca in Mexico—Exits from the Labyrinth links rich ethnographic and historical research to two specific aspects of Mexican national ideology and culture: the history of legitimacy and charisma in Mexican politics, and the relationship between the national community and racial ideology.

Exits from the Labyrinth

Can we address the issue of nationalism without polemics and restore it to the domain of social science? Claudio Lomnitz-Adler takes a major step in that direction by applying anthropological tools to the study of national culture. His sweeping and innovative interpretation of Mexican national ideology constructs an entirely new theoretical framework for the study of national and regional cultures everywhere. With an analysis of culture and ideology in internally differentiated regional spaces—in this case Morelos and the Huasteca in Mexico—Exits from the Labyrinth links rich ethnographic and historical research to two specific aspects of Mexican national ideology and culture: the history of legitimacy and charisma in Mexican politics, and the relationship between the national community and racial ideology.

Mexican National Cinema

Examining key film texts and genres, and set in a broad historical and theoretical context, this student-friendly study provides a thorough and detailed account of the vital and complex relationship between cinema and national identity in Mexico.

A History of Boxing in Mexico

The violent sport of boxing shaped and was shaped by notions of Mexican national identity during the twentieth century. This book reveals how boxing and boxers became sources of national pride and sparked debates on what it meant to be Mexican, masculine, and modern. The success of world-champion Mexican boxers played a key role in the rise of Los Angeles as the center of pugilistic activity in the United States. This international success made the fighters potent symbols of a Mexican culture that was cosmopolitan, nationalist, and masculine. With research in archives on both sides of the border, the author uses their life stories to trace the history and meaning of Mexican boxing.

Latin American Popular Culture Since Independence

This unique reader offers an engaging collection of essays that highlight the diversity of Latin America's cultural expressions from independence to the present. Exploring such themes and events as funerals, dance and music, letters and literature, spectacles and monuments, and world's fairs and food, a group of leading historians examines the ways that a wide range of individuals with copious, at times contradictory, motives attempted to forge identity, turn the world upside down, mock their betters, forget their troubles through dance, express love in letters, and altogether enjoy life. The authors analyze case studies from Argentina, Brazil, the Dominican Republic, Ecuador, Mexico, Nicaragua, Peru, and Trinidad-Tobago, tracing as well how their examples resonate in the rest of the region. They show how people could and did find opportunities to escape, if only occasionally, their daily drudgery, making lives for themselves of greater variety than the constant quest for dominance, drive for profits, or knee-jerk resistance to the social or economic order so often described in cultural studies. Instead, this rich text introduces the complexity of motives behind and the diversity of expressions of popular culture in Latin America.

Creating the Practical Man of Modernity

Focused on the appropriation of John Dewey's ideas on progressive education in revolutionary Mexico, this book reconsiders the interpretation and application of Dewey's ideas in the world. Rodríguez examines the use of Dewey in Mexico's state-building projects as a vantage point to assess the global impact of Dewey's pedagogy. As these projects converged with Dewey's desire to employ education as a tool for effective social change, Rodríguez understands Dewey not just as a philosopher but as an integral part of the Americas' progressive movement and era.

Culture and Revolution

In the twenty years of postrevolutionary rule in Mexico, the war remained fresh in the minds of those who participated in it, while the enigmas of the revolution remained obscured. Demonstrating how textuality helped to define the revolution, *Culture and Revolution* examines dozens of seemingly ahistorical artifacts to reveal the radical social shifts that emerged in the war's aftermath. Presented thematically, this expansive work explores radical changes that resulted from postrevolution culture, including new internal migrations; a collective imagining of the future; popular biographical narratives, such as that of the life of Frida Kahlo; and attempts to create a national history that united indigenous and creole elite society through literature and architecture. While cultural production in early twentieth-century Mexico has been well researched, a survey of the common roles and shared tasks within the various forms of expression has, until now, been unavailable. Examining a vast array of productions, including popular festivities, urban events, life stories, photographs, murals, literature, and scientific discourse (including fields as diverse as anthropology and philology), Horacio Legrás shows how these expressions absorbed the idiosyncratic traits of the revolutionary movement. Tracing the formation of modern Mexico during the 1920s and 1930s, Legrás also demonstrates that the proliferation of artifacts—extending from poetry and film production to labor organization and political apparatuses—gave unprecedented visibility to previously marginalized populations, who ensured that no revolutionary faction would unilaterally shape Mexico's historical process during these formative years.

Indigeneity in the Mexican Cultural Imagination

Since the end of the Mexican Revolution in 1917, the state has engaged in vigorous campaign to forge a unified national identity. Within the context of this effort, Indians are at once both denigrated and romanticized. Often marginalized, they are nonetheless subjects of constant national interest. Contradictory policies highlighting segregation, assimilation, modernization, and cultural preservation have alternately included and excluded Mexico's indigenous population from the state's self-conscious efforts to shape its identity. Yet, until now, no single book has combined the various elements of this process to provide a comprehensive look at the Indian in Mexico's cultural imagination. *Indigeneity in the Mexican Cultural Imagination* offers a much-needed examination of this fickle relationship as it is seen through literature, ethnography, film and art. The book focuses on representations of indigenous peoples in post-revolutionary literary and intellectual history by examining key cultural texts. Using these analyses as a foundation, Analisa Taylor links her critique to national Indian policy, rights, and recent social movements in Southern Mexico. In addition, she moves beyond her analysis of indigenous peoples in general to take a gendered look at indigenous women ranging from the villainized Malinche to the highly romanticized and sexualized Zapotec women of the Isthmus of Tehuantepec. The contradictory treatment of the Indian in Mexico's cultural imagination is not unique to that country alone. Rather, the situation there is representative of a phenomenon seen throughout the world. Though this book addresses indigeneity in Mexico specifically, it has far-reaching implications for the study of indigenaety across Latin America and beyond. Much like the late Edward Said's *Orientalism*, this book provides a glimpse at the very real effects of literary and intellectual discourse on those living in the margins of society. This book's interdisciplinary approach makes it an essential foundation for research in the fields of anthropology, history, literary critique, sociology, and cultural studies. While the book is ideal for a scholarly audience, the accessible writing and scope of the analysis make it of interest to lay audiences as well. It is a must-read for anyone seeking a deeper understanding of the politics of indigeneity in Mexico and beyond.

Blackness in Mexico

An up-close view of the movement to make "Afro-Mexican" an official cultural category Through historical and ethnographic research, *Blackness in Mexico* delves into the ongoing movement toward recognizing Black Mexicans as a cultural group within a nation that has long viewed the non-Black Mestizo as the archetypal citizen. Anthony Jerry focuses on this process in Mexico's Costa Chica region in order to explore the relational aspects of citizenship and the place of Black people in how modern citizenship is imagined. Jerry's study of the Costa Chica shows the political stakes of the national project for Black recognition; the shared but competing interests of the Mexican government, activists, and townspeople; and the ways that the state and NGOs are working to make "Afro-Mexican" an official cultural category. He argues that that the demand for recognition by Black communities calls attention to how the Mestizo has become an intuitive point of reference for identifying who qualifies as "other." Jerry also demonstrates that while official recognition can potentially empower African descendants, it can simultaneously reproduce the same logics of difference that have brought about their social and political exclusion. One of few books to center Blackness within a discussion of Mexico or to incorporate a focus on Mexico into Black studies, this book ultimately argues that the official project for recognition is itself a methodology of mestizaje, an opportunity for the government to continue to use Blackness to define the national subject and to further the Mexican national project. A volume in the series *New World Diasporas*, edited by Kevin A. Yelvington Publication of this work made possible by a Sustaining the Humanities through the American Rescue Plan grant from the National Endowment for the Humanities.

A Companion to Diaspora and Transnationalism

A Companion to Diaspora and Transnationalism offers a ground-breaking combined discussion of the concepts of diaspora and transnationalism. Newly commissioned essays by leading scholars provide interdisciplinary perspectives that link together the concepts in new and important ways. A wide-ranging collection which reviews the most significant developments and provides valuable insights into current key debates in transnational and diaspora studies. Contains newly commissioned essays by leading scholars, which will both influence the field, and stimulate further insight and discussion in the future. Provides interdisciplinary perspectives on diaspora and transnationalism which link the two concepts in new and important ways. Combines theoretical discussion with specific examples and case studies.

Perspectives on Las Américas

Perspectives on Las Américas: A Reader in Culture, History, and Representation charts new territory by demonstrating the limits of neatly demarcating the regions of 'Latin America' and the 'United States'. This landmark volume presents key readings that collectively examine the historical, cultural, economic, and political integration of Latina/os across the Americas, thereby challenging the barriers between Latina/o Studies and Latin American/Caribbean Studies. Brings together key readings that collectively examine the historical, cultural, economic, and political integration of Latina/os across the Americas. Charts new territory by demonstrating the limits of neatly demarcating the regions of 'Latin America' and the 'United States'. Challenges the barriers between Latina/o Studies and Latin American/Caribbean Studies as approached by anthropologists, historians, and other scholars. Offers instructors, students, and interested readers both the theoretical tools and case studies necessary to rethink transnational realities and identities.

Indian and Nation in Revolutionary Mexico

During the 1920s and 1930s in Mexico, both intellectuals and government officials promoted ethnic diversity while attempting to overcome the stigma of race in Mexican society. Programs such as the Indigenista movement represented their efforts to redeem the Revolution's promise of a more democratic future for all citizens. This book explores three decades of efforts on the part of government officials, social scientists, and indigenous leaders to renegotiate the place of native peoples in Mexican society. It traces the movement's origins as a humanitarian cause among intellectuals, the involvement of government in bringing education, land reform, cultural revival, and social research to Indian communities, and the active participation of Indian peoples. Traditionally, scholars have seen Indigenismo as an elitist formulation of the "Indian problem." Dawson instead explores the ways that the movement was mediated by both elite and popular pressures over time. By showing how Indigenismo was used by a variety of actors to negotiate the shape of the revolutionary state—from anthropologist Manuel Gamio to President Lázaro Cárdenas—he demonstrates how it contributed to a new "pact of domination" between indigenous peoples and the government. Although the power of the Indigenistas was limited by the fact that "Indian" remained a racial slur in Mexico, the indígenas capacitados empowered through Indigenismo played a central role in ensuring seventy years of PRI hegemony. In studying the confluence of state formation, social science, and native activism, Dawson's book offers a new perspective for understanding the processes through which revolutionary hegemony emerged.

Crafting Mexico

After Mexico's revolution of 1910–1920, intellectuals sought to forge a unified cultural nation out of the country's diverse populace. Their efforts resulted in an "ethnicized" interpretation of Mexicanness that intentionally incorporated elements of folk and indigenous culture. In this rich history, Rick A. López explains how thinkers and artists, including the anthropologist Manuel Gamio, the composer Carlos Chávez, the educator Moisés Sáenz, the painter Diego Rivera, and many less-known figures, formulated and promoted a notion of nationhood in which previously denigrated vernacular arts—dance, music, and handicrafts such as textiles, basketry, ceramics, wooden toys, and ritual masks—came to be seen as symbolic of Mexico's modernity and national distinctiveness. López examines how the nationalist project intersected with transnational intellectual and artistic currents, as well as how it was adapted in rural communities. He provides an in-depth account of artisanal practices in the village of Olinalá, located in the mountainous southern state of Guerrero. Since the 1920s, Olinalá has been renowned for its lacquered boxes and gourds, which have been considered to be among the "most Mexican" of the nation's arts. Crafting Mexico illuminates the role of cultural politics and visual production in Mexico's transformation from a regionally and culturally fragmented country into a modern nation-state with an inclusive and compelling national identity.

Elite Cultures

What makes an elite? This authoritative new volume examines elite groups in power across Europe, North America, Mexico, Peru, Indonesia and Africa to answer this question fully at a time of their increasing dominance.

Contemporary Theatre in Mayan Mexico

From the dramatization of local legends to the staging of plays by Shakespeare and other canonical playwrights to the exploration of contemporary sociopolitical problems and their effects on women and children, Mayan theatre is a flourishing cultural institution in southern Mexico. Part of a larger

movement to define Mayan self-identity and reclaim a Mayan cultural heritage, theatre in Mayan languages has both reflected on and contributed to a growing awareness of Mayans as contemporary cultural and political players in Mexico and on the world's stage. In this book, Tamara Underiner draws on fieldwork with theatre groups in Chiapas, Tabasco, and Yucatán to observe the Maya peoples in the process of defining themselves through theatrical performance. She looks at the activities of four theatre groups or networks, focusing on their operating strategies and on close analyses of selected dramatic texts. She shows that while each group works under the rubric of Mayan or indigenous theatre, their works are also in constant dialogue, confrontation, and collaboration with the wider, non-Mayan world. Her observations thus reveal not only how theatre is an agent of cultural self-definition and community-building but also how theatre negotiates complex relations among indigenous communities in Mayan Mexico, state governments, and non-Mayan artists and researchers.

Jesus in Our Wombs

In *Jesus in Our Wombs*, Rebecca J. Lester takes us behind the walls of a Roman Catholic convent in central Mexico to explore the lives, training, and experiences of a group of postulants--young women in the first stage of religious training as nuns. Lester, who conducted eighteen months of fieldwork in the convent, provides a rich ethnography of these young women's journeys as they wrestle with doubts, fears, ambitions, and setbacks in their struggle to follow what they believe to be the will of God. Gracefully written, finely textured, and theoretically rigorous, this book considers how these aspiring nuns learn to experience God by cultivating an altered experience of their own female bodies, a transformation they view as a political stance against modernity. Lester explains that the Postulants work toward what they see as an "authentic" femininity--one that has been eclipsed by the values of modern society. The outcome of this process has political as well as personal consequences. The Sisters learn to understand their very intimate experiences of "the Call"--and their choices in answering it--as politically relevant declarations of self. Readers become intimately acquainted with the personalities, family backgrounds, friendships, and aspirations of the Postulants as Lester relates the practices and experiences of their daily lives. Combining compassionate, engaged ethnography with an incisive and provocative theoretical analysis of embodied selves, *Jesus in Our Wombs* delivers a profound analysis of what Lester calls the convent's "technology of embodiment" on multiple levels--from the phenomenological to the political.

Mexican American Colonization During the Nineteenth Century

This study examines various cases of return migration from the United States to Mexico throughout the nineteenth century. Mexico developed a robust immigration policy after becoming an independent nation in 1821, but was unable to attract European settlers for a variety of reasons. As the United States expanded toward Mexico's northern frontiers, Mexicans in those areas now lost to the United States were subsequently seen as an ideal group to colonize and settle the fractured republic.

The Cultural Production of the Educated Person

Eleven historical-ethnographic case studies examine the social and cultural projects of modern schools, and the contestations, dramatic and not, that emerge in and around and against them. These case studies, ranging from Taiwan to South Texas, build upon an original joining of anthropology, critical education theory, and cultural studies. The studies advance the concept of cultural production as a way of understanding the dynamics of power and identity formation underlying different forms of "education." Using the concept of the "educated person" as a culture-specific construct, the authors examine conflicts and points of convergence between cultural practices and knowledges that are produced in and out of schools.

Race and Nation in Modern Latin America

This collection brings together innovative historical work on race and national identity in Latin America and the Caribbean and places this scholarship in the context of interdisciplinary and transnational discussions regarding race and nation in the Americas. Moving beyond debates about whether ideologies of racial democracy have actually served to obscure discrimination, the book shows how notions of race and nationhood have varied over time across Latin America's political landscapes. Framing the themes and questions explored in the volume, the editors' introduction also provides an overview of the current state of the interdisciplinary literature on race and nation-state formation. Essays on the postindependence period in Belize, Brazil, Colombia, Cuba, Mexico, Panama, and Peru consider

how popular and elite racial constructs have developed in relation to one another and to processes of nation building. Contributors also examine how ideas regarding racial and national identities have been gendered and ask how racialized constructions of nationhood have shaped and limited the citizenship rights of subordinated groups. The contributors are Sueann Caulfield, Sarah C. Chambers, Lillian Guerra, Anne S. Macpherson, Aims McGuinness, Gerardo Renique, James Sanders, Alexandra Minna Stern, and Barbara Weinstein.

Contemporary Colonialities in Mexico and Beyond

Contemporary Colonialities in Mexico and Beyond explores the changing dynamic of coloniality by focusing on how modern cultural products connect to the foundational structures of colonialism. The book examines how these structures have perpetuated discourses of racial, ethnic, gender, and social exclusion rooted in Mexico's history. Given the intimate relationship between coloniality and modernity, the volume addresses three central questions: How does the Mexican colonial history influence the definition of Mexico from within and outside its borders? What issues rooted in coloniality recur over time and space? And finally, how do cultural products provide a concrete and tangible way of studying coloniality, its history, and its evolution? The book analyses how literary works, movies, television series, and social media posts reconfigure colonial difference and spatialization. Supported by careful historical and cultural contextualization, these analyses will allow readers to appreciate contemporary Mexico vis-à-vis culture and borderland issues in the United States and debates on imperial memory in Spain. Ultimately, Contemporary Colonialities in Mexico and Beyond presents a handbook for readers looking to learn more about coloniality as a pervasive part of global interactions today.

Rural Resistance in the Land of Zapata

In Rural Resistance in the Land of Zapata, Tanalís Padilla shows that the period from 1940 to 1968, generally viewed as a time of social and political stability in Mexico, actually saw numerous instances of popular discontent and widespread state repression. Padilla provides a detailed history of a mid-twentieth-century agrarian mobilization in the Mexican state of Morelos, the homeland of Emiliano Zapata. In so doing, she brings to the fore the continuities between the popular struggles surrounding the Mexican Revolution and contemporary rural uprisings such as the Zapatista rebellion. The peasants known in popular memory as Jaramillistas were led by Rubén Jaramillo (1900–1962). An agrarian leader from Morelos who participated in the Mexican Revolution and fought under Zapata, Jaramillo later became an outspoken defender of the rural poor. The Jaramillistas were inspired by the legacy of the Zapatistas, the peasant army that fought for land and community autonomy with particular tenacity during the Revolution. Padilla examines the way that the Jaramillistas used the legacy of Zapatismo but also transformed, expanded, and updated it in dialogue with other national and international political movements. The Jaramillistas fought persistently through legal channels for access to land, the means to work it, and sustainable prices for their products, but the Mexican government increasingly closed its doors to rural reform. The government ultimately responded with repression, pushing the Jaramillistas into armed struggle, and transforming their calls for local reform into a broader critique of capitalism. With Rural Resistance in the Land of Zapata, Padilla sheds new light on the decision to initiate armed struggle, women's challenges to patriarchal norms, and the ways that campesinos framed their demands in relation to national and international political developments.

Confronting Antisemitism from Perspectives of Philosophy and Social Sciences

The five volumes provide a compendium of the history of and discourse about antisemitism - both as a unique cultural and religious category. Antisemitic stereotypes function as religious symbols that express and transmit a belief system of Jew-hatred, which are stored in the cultural and religious memories of the Western and Muslim worlds. This volume explores the phenomenon from the perspectives of Philosophy and Social Sciences.

The Dictator's Seduction

The dictatorship of Rafael Trujillo, who ruled the Dominican Republic from 1930 until his assassination in 1961, was one of the longest and bloodiest in Latin American history. The Dictator's Seduction is a cultural history of the Trujillo regime as it was experienced in the capital city of Santo Domingo. Focusing on everyday forms of state domination, Lauren Derby describes how the regime infiltrated civil society by fashioning a "vernacular politics" based on popular idioms of masculinity and fantasies of race and class mobility. Derby argues that the most pernicious aspect of the dictatorship was how it appropriated

quotidian practices such as gossip and gift exchange, leaving almost no place for Dominicans to hide or resist. Drawing on previously untapped documents in the Trujillo National Archives and interviews with Dominicans who recall life under the dictator, Derby emphasizes the role that public ritual played in Trujillo's exercise of power. His regime included the people in affairs of state on a massive scale as never before. Derby pays particular attention to how events and projects were received by the public as she analyzes parades and rallies, the rebuilding of Santo Domingo following a major hurricane, and the staging of a year-long celebration marking the twenty-fifth year of Trujillo's regime. She looks at representations of Trujillo, exploring how claims that he embodied the popular barrio antihero the tiguere (tiger) stoked a fantasy of upward mobility and how a rumor that he had a personal guardian angel suggested he was uniquely protected from his enemies. The Dictator's Seduction sheds new light on the cultural contrivances of autocratic power.

Markets and Cultural Voices

This intriguing work explores the world of three amate artists. A native tradition, all of their painting is done in Mexico, yet, the finished product is sold almost exclusively to wealthy American art buyers. Cowen examines this cultural interaction between Mexico and the United States to see how globalization shapes the lives and the work of the artists and their families. The story of these three artists reveals that this exchange simultaneously creates economic opportunities for the artists, but has detrimental effects on the village. A view of the daily village life of three artists connected to the larger art world, this book should be of particular interest to those in the fields of cultural economics, Latino studies, economic anthropology and globalization.

Yaqui Homeland and Homeplace

In this illuminating book, anthropologist Kirstin Erickson explains how members of the Yaqui tribe, an indigenous group in northern Mexico, construct, negotiate, and continually reimagine their ethnic identity. She examines two interconnected dimensions of the Yaqui ethnic imagination: the simultaneous processes of place making and identification, and the inseparability of ethnicity from female-identified spaces, roles, and practices. Yaquis live in a portion of their ancestral homeland in Sonora, about 250 miles south of the Arizona border. A long history of displacement and ethnic struggle continues to shape the Yaqui sense of self, as Erickson discovered during the sixteen months that she lived in Potam, one of the eight historic Yaqui pueblos. She found that themes of identity frequently arise in the stories that Yaquis tell and that geography and location—space and place—figure prominently in their narratives. Revisiting Edward Spicer's groundbreaking anthropological study of the Yaquis of Potam pueblo undertaken more than sixty years ago, Erickson pays particular attention to the "cultural work" performed by Yaqui women today. She shows that by reaffirming their gendered identities and creating and occupying female-gendered spaces such as kitchens, household altars, and domestic ceremonial spaces, women constitute Yaqui ethnicity in ways that are as significant as actions taken by males in tribal leadership and public ceremony. This absorbing study contributes new empirical knowledge about a Native American community as it adds to the growing anthropology of space/place and gender. By inviting readers into the homes and patios where Yaqui women discuss their lives, it offers a highly personalized account of how they construct—and reconstruct—their identity.

The Gender/sexuality Reader

Textbook on gender.

American Gitanos in Mexico City

This book provides a detailed and comprehensive description of the Gitano community of Mexico City. The ethnographic study showcases the interplay between cultural reproduction, economic reproduction, and the Gitano / non-Gitano opposition. The first part of the book discusses how the cultural identity of this community is reproduced based on migratory processes, social relations and the dynamics of kinship and gender roles to understand the contradiction between value systems and practices in a patriarchal society. In the second part, emphasis is placed on the economic dynamism of this group in its interactions with the majority society in the context of informal economy and the group's articulation with space and mobility in the territory. The analysis problematizes territorial mobility and circulation regimes based on fieldwork carried out in the process of active participation with Gitano families selling textile clothes and accessories through the country.

Choreographing Mexico

2023 de la Torre Bueno® First Book Award, Dance Studies Association The impact of folkloric dance and performance on Mexican cultural politics and national identity. The years between 1910 and 1940 were formative for Mexico, with the ouster of Porfirio Díaz, the subsequent revolution, and the creation of the new state. Amid the upheaval, Mexican dance emerged as a key arena of contestation regarding what it meant to be Mexican. Through an analysis of written, photographic, choreographic, and cinematographic renderings of a festive Mexico, *Choreographing Mexico* examines how bodies in motion both performed and critiqued the nation. Manuel Cuellar details the integration of Indigenous and regional dance styles into centennial celebrations, civic festivals, and popular films. Much of the time, this was a top-down affair, with cultural elites seeking to legitimate a hegemonic national character by incorporating traces of indigeneity. Yet dancers also used their moving bodies to challenge the official image of a Mexico full of manly vigor and free from racial and ethnic divisions. At home and abroad, dancers made nuanced articulations of female, Indigenous, Black, and even queer renditions of the nation. Cuellar reminds us of the ongoing political significance of movement and embodied experience, as folklórico maintains an important and still-contested place in Mexican and Mexican American identity today.

Debating the Past

This volume describes a modern regional culture as it struggles to build a distinct cultural identity through the diversity of musical styles. This book will be invaluable to ethnomusicologists and anthropologists interested in Latin America."--BOOK JACKET.

The Art of Being In-between

DIVAsks how elite native intermediaries conversant in Spanish language, legal rhetoric, and personal demeanor shaped the political and cultural landscape of colonialism./div

Radio Nation

The role of mass communication in nation building has often been underestimated, particularly in the case of Mexico. Following the Revolution, the Mexican government used the new medium of radio to promote national identity and build support for the new regime. Joy Hayes now tells how an emerging country became a radio nation. This groundbreaking book investigates the intersection of radio broadcasting and nation building. Hayes tells how both government-controlled and private radio stations produced programs of distinctly Mexican folk and popular music as a means of drawing the country's regions together and countering the influence of U.S. broadcasts. Hayes describes how, both during and after the period of cultural revolution, Mexican radio broadcasting was shaped by the clash and collaboration of different social forces--including U.S. interests, Mexican media entrepreneurs, state institutions, and radio audiences. She traces the evolution of Mexican radio in case studies that focus on such subjects as early government broadcasting activities, the role of Mexico City media elites, the "paternal voice" of presidential addresses, and U.S. propaganda during World War II. More than narrative history, Hayes's study provides an analytical framework for understanding the role of radio in building Mexican nationalism at a critical time in that nation's history. *Radio Nation* expands our appreciation of an overlooked medium that changed the course of an entire country.

Decentering the Nation

This book considers how global capitalism has upset the symbolic economy of "Mexican" cultural discourse. It focuses on the cultural processes through which people contest ideas about race, gender, and sexuality; reframe ideas of memory, history, and belonging; and negotiate the experiences of dislocation that affect them.

Alcohol and Nationhood in Nineteenth-Century Mexico

Drawing on an analysis of issues surrounding the consumption of alcohol in a diverse range of source materials, including novels, newspapers, medical texts, and archival records, this lively and engaging interdisciplinary study explores sociocultural nation-building processes in Mexico between 1810 and 1910. Examining the historical importance of drinking as both an important feature of Mexican social life and a persistent source of concern for Mexican intellectuals and politicians, Deborah Toner's *Alcohol and Nationhood in Nineteenth-Century Mexico* offers surprising insights into how the nation

was constructed and deconstructed in the nineteenth century. Although Mexican intellectuals did indeed condemn the physically and morally debilitating aspects of excessive alcohol consumption and worried that particularly Mexican drinks and drinking places were preventing Mexico's progress as a nation, they also identified more culturally valuable aspects of Mexican drinking cultures that ought to be celebrated as part of an "authentic" Mexican national culture. The intertwined literary and historical analysis in this study illustrates how wide-ranging the connections were between ideas about drinking, poverty, crime, insanity, citizenship, patriotism, gender, sexuality, race, and ethnicity in the nineteenth century, and the book makes timely and important contributions to the fields of Latin American literature, alcohol studies, and the social and cultural history of nation-building.

La Santa Muerte in Mexico

For over a decade the cult of La Santa Muerte has grown rapidly in Mexico and the United States. Thousands of people—ranging from drug runners and mothers to cabdrivers, soldiers, police, and prison inmates—invoke the protection of La Santa Muerte. Devotees seek her protection through practicing popular vows, attending public rosaries and masses at street altars, and constructing and maintaining home altars. This book examines La Santa Muerte's role in people's daily lives and explores how popular religious practices of worship and devotion developed around a figure often associated with illicit activities. She represents life with the possibility of respite but without ultimate redemption, and she speaks to the complexities of lives lived at the fringes of violence, insecurity, impunity, and economic hardship. The essays collected here move beyond the visually arresting sight of La Santa Muerte as a tattoo or figurine, suggesting that she represents a major movement in Mexico.

Music, Power, and Politics

Music, Power, and Politics presents sixteen different cultural perspectives on the concept of music as a site of socio-political struggle. Essays by scholars from around the world explore the means by which music's long-acknowledged potential to persuade, seduce, indoctrinate, rouse, incite, or even silence listeners, has been used to advance agendas of power and protest. The essays included examine: music used to convey political ideology in Nazi Germany, apartheid-era South Africa, and modern-day North Korea postcolonial musical efforts to reclaim ethnic heritage in Serbia and the Caribbean music as a means of establishing new cultural identities for recently empowered social groups in the UK and Brazil the subversion of racial stereotypes through popular music in the USA music as a tool of popular resistance to oppressive government policies in modern day Iran and the Bolivian Andes

Anthropology of Our Times

This anthology represents the culmination of a series of public discussions with some of the leading international anthropologists of today —organized by the editor, Sindre Bangstad—at the House of Literature in Oslo, Norway. Thus, it provides fresh and original insights into the lives and work of these leading scholars. It features conversations with Didier Fassin, Angelique Haugerud, Ruben Andersson, Claudio Lomnitz, David Price, Magnus Marsden, Richard Ashby Wilson, and Parvis Ghassem-Fachandi, in addition to an introduction by Sindre Bangstad and a preface by Thomas Hylland Eriksen.

Citizens and Believers

This book shows the centrality of religion to the making of the 1910 Mexican revolution. It goes beyond conventional studies of church-state conflict to focus on Catholics as political subjects whose religious identity became a fundamental aspect of citizenship during the first three decades of the twentieth century.

Intersectional Feminism in the Age of Transnationalism

Intersectional Feminism in the Age of Transnationalism: Voices from the Margins explores the limitations of the transnationalist approach to feminism and questions the neoliberal emphasis on individual freedom and consumer choice as the central goals of feminist activism. The contributions to the volume discuss such varied topics as fiction by Edwidge Danticat, Judith Ortiz-Cofer, and Diamela Eltit; visual art of Laura Aguilar and Maruja Mallo; films directed by Lucrecia Martel; a TV series based on a novel by María Dueñas; the art-activism of Ani Ganza and Zinha Franco; and the philosophical thought of Gloria Anzaldúa. All chapters proceed from the belief in the continued usefulness of intersectionality

as a valuable category of critical analysis that is particularly necessary at the time when the effects of neoliberal globalization are undermining many familiar categories of critical inquiry.

Border Dilemmas

A historical analysis of the conflicting ideas about race and national belonging held by Mexicans and Euro-Americans in southern New Mexico during the late nineteenth century and early twentieth.

A Nation of Villages

During the period 1769-1850, republican national institutions slowly replaced colonial and monarchical rule. This was a turbulent time in rural Mexico. It was a period of political instability marked by violent peasant rebellions that were longer, more violent, and involved more people than those that occurred in the colonial era. Mexican villagers became skilled insurrectionists. In this book, Michael Ducey analyzes the peasant rebellions in Mexico's Huasteca region over that time, beginning with short-lived colonial riots, progressing through a long and brutal insurrection associated with the war of independence and several region-wide uprisings, and culminating in the "Caste War of the Huasteca" of the 1840s. He asks not just why villagers revolted but how their discontent fit into the political drama of early national Mexico. Ducey shows how the war offered opportunities for villagers to settle scores with members of the local elite as peasants discovered new ways of imagining the state. They were far from being the isolated traditionalists who occasionally rebelled against political or economic change described in older scholarship. At least until the 1848-1850 Caste War, political disputes were more important than land. This region's peasants were both remarkably diverse and politically astute. Villagers adapted colonial political culture and later republican ideas to fashion local institutions that fit their own needs. Over the course of a hundred years, peasant tactics and political discourse evolved in a constant dialogue with the changing political climate, shifting from rhetorical statements of loyalty to the king to proclamations of federalism and their rights as citizens. *A Nation of Villages* ably demonstrates that rural villagers were more aware of elite ideologies than urban rulers were of the villagers's political ideas. This long-term analysis of one region illuminates how rural people helped shape the republican state.

The Development and Applications of Social Learning Theory

First multi-year cumulation covers six years: 1965-70.

Current Catalog

This book explores why Africa has not managed to achieve sustainable, self-regenerating development. The work situates problems in the practices employed by national political elites, donors and lenders to African development, and book offers a studied alternative that can positively change Africa's development direction - The Participatory Social Learning Approach.

Sorting Africa's Developmental Puzzle

Recent Trends in Social Learning Theory offers a convenient overview of the state of social learning theory. This book is organized into six chapters. Chapter 1 provides a detailed discussion of the social learning theory, followed by an analysis of the theoretical views on the social reinforcement issue in Chapter 2. The contiguity theory of modeling and important role played by symbolic coding processes in imitation are described in Chapter 3. Chapter 4 elaborates the developmental analysis of imitation, while Chapter 5 outlines an empirical and theoretical overview of the status of punishment and its role in the development of self-control in children. The last chapter summarizes the contributions compiled in this text. This publication is recommended for students and professionals in child development and social and clinical psychology.

National Library of Medicine Current Catalog

From the 1930's to the 1970's, Harry Harlow's experimental findings have changed the way psychologists view learning, thinking, and motivation. The papers selected for From Learning to Love study behavior principles and describe better techniques for examining them. They discuss in depth the development of learning, motivation, and the affectional system as well as the interrelationships between love, aggression, and fear. A comprehensive collection, From Learning to Love is a valuable resource for psychiatrists, child care specialists, and parents who want to understand how their children develop.

Choice

Perché un richiamo al Samurai? È un riferimento simbolico, è un riferimento alla imperturbabilità della loro mente. Nell' "imperturbabilità" della mente c'è posto per la benevolenza, per la pietà filiale e religiosa per cui, secondo un antico detto si dice che "l'eroe è forte come una montagna, lieve come la brezza". Questa qualificazione interiore di limpida, inalterabile mente è comune al guerriero ed al contemplante. La disciplina ascetica alla quale i samurai si sottoponevano evidenzia che nella Via del Guerriero è data la preminenza gerarchica alla contemplazione dalla quale l'azione discende. Questo non è un manuale di auto-aiuto se non nella misura in cui ti può aiutare a capire di più su come funzioni e sul fatto che hai la possibilità di cambiare qualcosa di te, forse non tutto, se lo ritieni opportuno. Il processo di cambiamento verso l'eccellenza personale ti vedrà protagonista ma ha necessità di essere supportato da professionisti del cambiamento.

The Chilalo Agricultural Development Unit as a Strategy of Rural Transformation

One of the most frequently cited scholars in the social and behavioral sciences, Charles E. Osgood, has assembled his most important writings in this volume for the Centennial Psychology series. Osgood's prolific contributions cover four decades of research and center on the human cognitive processes and their functional characteristics at three levels of human ecology: in individual humans, across human cultures, and for survival of the human species. Oliver Tzeng's introduction, presenting Osgood's life as well as the evolution of his three major themes, is followed by eleven selections. A comprehensive bibliography of Osgood's writings completes this volume. Social and Behavioral Psychologists will find Language, Meaning, and Culture an extremely rich encounter. The three major themes of Osgood's entire professional life were set in motion during his undergraduate years. This volume divides Osgood's most important papers among these themes: Psycholinguistic Research and Theory; Cross Cultural Universals of Affective Meaning; Psycho-Social Dynamics and the Prospects for Mankind.

Psychology and Social Action

Vols. for 1980- issued in three parts: Series, Authors, and Titles.

Recent Trends in Social Learning Theory

This volume explores and demonstrates how measurement, methodology, and evaluation in psychology have been influenced by preeminent scholar Lee Sechrest. Researchers present their recent studies and acknowledge the role Sechrest has played as a mentor and leader in the field.

Motives, Personality, and Society

Social Learning and Cognition examines the cognitive mechanisms of social learning and the social learning determinants of cognitive competencies. The explanatory principles of social learning are applied to the highest manifestations of human intellect: judgment, language, and thought. The book also explicates a social learning perspective on the social origins of complex abilities, and how these progressively evolve as children grow older. Comprised of four chapters, this book begins with a discussion on the interrelationships among cognition, behavior change, and social learning. Cognitive explanations for human behavior, and the kinds of evidence cited by cognitive theorists in support of their position, are considered, along with the major psychological theories that address abstract, rule-governed activities. The second chapter deals with children's acquisition and refinement of language, paying particular attention to the objections and misunderstandings raised by psycholinguists to counter modeling explanations of language learning. The third chapter examines relational judgments and categorical decisions and presents evidence showing that diverse modeling procedures can be powerful influences on language and verbal behavior. The final chapter summarizes and integrates research bearing upon the effect of modeling influences on a wide diversity of conceptual activities, ranging from the formation of simple concepts to elaborate intellectual demands that involve complex styles of reasoning and strategies for seeking and organizing information. This monograph is intended for advanced undergraduates, graduate students, and professionals from such diverse fields as child development, social psychology, psychiatry, social work, clinical psychology, education, and rehabilitation.

Studies in Learning and Memory

"The clinical psychologist after leaving the university and obtaining his first job is subject to two major pressures. On one hand is the pressure created by his training, which directs him toward caution, skepticism of generalizations, and a desire to restrict his activities to sound scientific principles, tested methods, and "approved" theories. On the other hand, his professional co-workers have little patience with his academic qualifications of statements and his long-winded statements of probabilities. They are averse to trying things out on patients. They want something done and want it done immediately. Under these pressures the clinical psychologist is usually forced to compromise. He may maintain the scientific rigor of his experimental methods in research, but in his daily work, because of the need to help patients immediately, he relies more and more on experience and empirical methods. Because of these pressures, the practice of clinical psychology in many instances is unsystematic and confused when viewed from logical or rigorous scientific viewpoints. This confusion, however, is not a necessary condition but the result of the failure of the clinical psychologists' training program to translate and relate the basic knowledge of experimental and theoretical psychology into the practical situations of the clinic, the hospital, and the school. The purpose of this book is to arrive at a systematic theory from which may be drawn specific principles for actual clinical practice, and to illustrate some of the more important applications of the theory to the practice. Rather than attempt to apply this theory to all the problems facing the clinical psychologists, we have chosen to apply it to only two of the clinician's most important problems--the measurement of personality (personality diagnosis) and psychotherapy. Even in these broad areas the application ++

Models of Learning, Memory, and Choice

An exploration of contemporary advances in social learning theory with special emphasis on the important roles played by cognitive, vicarious, and self-regulatory processes.

Contributions to Differential Psychology

Furnishes an overview of recent theoretical and experimental advances in the field of social learning, exploring the origins of behavior, antecedent and consequent determinants, and cognitive control.
--Publisher.

From Learning to Love

Psychologists, researchers, teachers, and students need complete and comprehensive information in the fields of psychology and behavioral science. The Corsini Encyclopedia of Psychology, Volume Three has been the reference of choice for almost three decades. This indispensable resource is updated and expanded to include much new material. It uniquely and effectively blends psychology and behavioral science. The Fourth Edition features over 1,200 entries; complete coverage of DSM disorders; and a bibliography of over 10,000 citations. Readers will benefit from up-to-date and authoritative coverage of every major area of psychology.

Personality, Motivation, and Action

The following collection of papers, while mostly theoretical in nature, includes a number of experimental articles that have served as vehicles for elaborating the behavior theory approach of the writer. Consisting of twenty previously published articles and two new papers, the volume offers a kind of behavior or activity sample of a psychologist who has not only been concerned with attempting to bring the kind of order into psychological phenomena that theories provide, but has also had an abiding interest in the nature and role of theory per se in this scientific endeavor. This latter interest is reflected especially in the papers that have been grouped into Part I of the book. Primarily concerned with philosophical and methodological problems of psychology, i.e., its philosophy of science, these articles discuss both empirical questions relating to the requirements that scientific concepts must fulfill in order to be both testable and significant and the nature and role of theoretical structures in providing for scientific explanation in psychology. Part II contains a heterogeneous collection of papers concerned both with the basic theoretical structure of learning phenomena developed by the author from simple conditioning studies and with extrapolations of this theory to more complex types of behavior such as are involved in simple T-maze, complex serial mazes, and paired associates learning in humans. In Part III of the volume, three early theoretical articles on discrimination learning, the phenomenon of transposition, and the continuity-noncontinuity issue are followed by representative empirical studies concerned with testing of the theoretical schema.

Tra i fiori il ciliegio tra gli uomini il guerriero

Models of human nature and causality; Observational learning; Enactive learning; Social diffusion and innovation; Predictive knowledge and forethought; Incentive motivators; Vicarious motivators; Self-regulatory mechanisms; Self-efficacy; Cognitive regulators.

Leaves from Many Seasons

Providing a critical evaluation of the assets and limitations of contextualism for doing research in psychology and education, the authors compare contextualism, modified contextualism and mechanism as approaches to doing science, as well as their merits in studying closed versus open systems.

Stress, Attitudes, and Decisions

This 2-volume work includes approximately 1,200 entries in A-Z order, critically reviewing the literature on specific topics from abortion to world systems theory. In addition, nine major entries cover each of the major disciplines (political economy; management and business; human geography; politics; sociology; law; psychology; organizational behavior) and the history and development of the social sciences in a broader sense.

Personality, Genetics, and Behavior

"A subject-author-institution index which provides titles and accession numbers to the document and report literature that was announced in the monthly issues of Resources in education" (earlier called Research in education).

Boys and Girls

The book follows the sequence of a child's development from the time of conception through adolescence. It considers the major theories of gender role development, reviewing and evaluating the key claims and evidence for each. The author moves beyond the traditional focus on the family to examine other influences such as teachers, peers, children's literature, and television.

Boys and Girls at Play

This new text offers a unique developmental focus on gender. Gender development is examined from infancy through adolescence, integrating biological, socialization, and cognitive perspectives. The book's current empirical focus is complemented by a lively and readable style that includes anecdotes about children's everyday experiences. The book's accessibility is further enhanced with the use of bold face to highlight key terms when first introduced along with a complete glossary of these terms. All three of the authors are respected researchers in divergent areas of children's gender role development and each of them teaches a course on the topic. The book's primary focus is on gender role behaviors – how they develop and the roles biological and experiential factors play in their development. The first section of the text introduces the field and outlines its history. Part 2 focuses on the differences between the sexes, including the biology of sex and the latest research on behavioral sex differences, including motor and cognitive behaviors and personality and social behaviors. Contemporary theoretical perspectives on gender development – biological, social and environmental, and cognitive approaches – are explored in Part 3 along with the research supporting these models. The social agents of gender development, including children themselves, family, peers, the media, and schools are addressed in the final part. Cutting-edge and comprehensive, this is the perfect text for those who have been searching for an advanced undergraduate and/or graduate book for courses in gender development, the psychology of sex roles and/or gender and/or women or men, taught in departments of psychology, human development, and educational psychology. Although chapters have been designed to be read sequentially, a full author citation is included the first time a reference is used within an individual chapter rather than only the first time it is used in the book, making it easy to assign chapters in a variety of orders. This referencing system will also appeal to scholars interested in using the book as a resource to review a particular content area.

Gender Development

Gender Development is the first book to examine gender from a truly developmental perspective and fills a real need for a textbook and source book for college and graduate students, parents, teachers, researchers, and counsellors. It examines the processes involved in the development of gender, addressing such sensitive and complex questions as what causes males and females to be different and why they behave in different ways. The authors provide an up-to-date, integrative review of theory and research, tracing gender development from the moment of conception through adulthood and emphasising the complex interaction of biology, socialisation, and cognition. The topics covered include hormonal influences, moral development, play and friendships, experiences at school and work, and psychopathology.

Gender Development

Children are born into a world infused with gendered information. An understanding of what it is to be a boy or girl can be critical in forming social relationships, social identities, and learning how to think and behave. Gender and Development is an important new volume that charts how children practice these gendered identities at different ages and in different social contexts. Taking a socio-cognitive approach, and integrating both theoretical and applied perspectives, the book looks at a range of contexts in which gender affects development and socialisation, from the child's place in the family unit and their interaction with parents and siblings, to the influence of communication with peers over the internet. Throughout the chapters an age-old issue is addressed through a contemporary, empirically focused perspective – namely the nature and extent of equality between the genders, and how difficult it is for attitudes, perceptions and stereotypes to change. Key social issues are covered, including pro-social behaviour, career choice and academic competencies. Gender and Development brings together some of the latest research in this important and enduring field of study. It is a timely and invaluable collection, and will be essential reading for all students and research in developmental psychology, social psychology and gender studies.

Gender and Development

Gender is a highly salient and important social group that shapes how children interact with others and how they are treated by others. In this Element, we offer an overview and review of the research on gender development in childhood from a developmental science perspective. We first define gender and the related concepts of sex and gender identity. Second, we discuss how variations in cultural context shape gender development around the world and how variations within gender groups add to the complexity of gender identity development. Third, we discuss major theoretical perspectives in developmental science for studying child gender. Fourth, we examine differences and similarities between girls and boys using the latest meta-analytic evidence. Fifth, we discuss the development of gender, gender identity, and gender socialization throughout infancy, early childhood, and middle childhood. We conclude with a discussion of future directions for the study of gender development in childhood.

Gender in Childhood

Seminar paper from the year 2004 in the subject English Language and Literature Studies - Linguistics, grade: 1,3, Ernst Moritz Arndt University of Greifswald (Institut für Anglistik/Amerikanistik), course: Gender Linguistics, 9 entries in the bibliography, language: English, abstract: Same-sex peer groups are of vital importance for children's development. There they learn gender appropriate behaviour and language. In my term paper I want to explain the nature and function of peer groups and examine the language that develops in same-sex and mixed-sex peer groups. The paper will focus mainly on same-sex peer groups, because they are the basis for the differences in the development of girls and boys. Therefore I organized my term paper the following way: Before I introduce the general concept of a peer group, I want to point out the importance of children for the reproduction of the social order in a particular society. I will also focus the attention on the linguistic significance of peer groups. After that I will sum up the different patterns of behaviour and communication of girls and boys in same-sex and mixed-sex peer groups, which I found in several papers on this topic. Then I will introduce the "Separate World Hypothesis", which should, according to my thesis, explain the turned up differences. Furthermore I will try to demonstrate difficulties of the hypothesis and give other hypotheses opposing it. Finally I will point out problems which might come up during the study of peer groups.

The construction of gender roles in peer groups

What is it like being a boy or a girl? How do boys and girls learn to be men and women? How do families, schools and children's peer groups influence the ways in which children think of themselves as male and female? *Being Boys, Being Girls* explores how boys and girls learn what it is to be male and female. Drawing on a wide range of studies from around the world, the book examines how masculinities and femininities are developed and understood by children and young people in families, in schools, and through interaction with their peers. One of the key concepts underlying this book is that our identities are constructed and performed in particular ways which help us to understand who we are and how we fit in with the world. This means that these identities are constantly changing according to where we are, what we are doing, and whom we are with. Who we are, and what we think about ourselves, only makes sense in relation to what is going on around us. The author provides a clear explanation of the underpinning idea that children's understandings of gender are developed and constructed in local communities of masculinity and femininity practice. She brings together research on children and their construction and understanding of gender across the 0-18 age range and includes explicit suggestions for strategies and interventions. This book is essential reading for students and academics in childhood, education and gender studies and for those with an interest in gender development and the construction of masculinities and femininities.

EBOOK: *Being Boys; Being Girls: Learning Masculinities and Femininities*

Caryl Rivers and Rosalind C. Barnett are widely acclaimed for their analyses of women, men, and society. In *The Truth About Girls and Boys*, they tackle a new, troubling trend in the theorizing of gender: that the learning styles, brain development, motivation, cognitive and spatial abilities, and "natural" inclinations of girls and boys are so fundamentally different, they require unique styles of parenting and education. Ignoring the science that challenges these claims, those who promote such theories make millions while frightening parents and educators into enforcing old stereotypes and reviving unhealthy attitudes in the classroom. Rivers and Barnett unmake the pseudoscientific rationale for this argument, stressing the individuality of each child and the specialness of his or her talents and desires. They recognize that in our culture, girls and boys encounter different stimuli and experiences, yet encouraging children to venture outside their comfort zones helps them realize a multifaceted character. Educating parents, teachers, and general readers in the true nature of the gender game, Rivers and Barnett enable future generations to transform if not transcend the parameters of sexual difference.

The Truth About Girls and Boys

How can we support children to reach their full potential and not be constrained by gender expectations? Are gender roles fixed at birth or do they develop through experiences? *Gender Diversity and Inclusion in Early Years Education* introduces practitioners to key aspects of gender in the early years and explores how to ensure that children and staff teams are supported in settings that have outstanding practice. Considering the implications of gender in the context of supporting children, families and practitioners, this book examines the theoretical contexts that surround gender identity and explores current legislation and practice in order to provide practitioners with all the information they need to develop their own work and settings in an open and equal way. Offering a wealth of practical guidance, case studies and reflective questions which link to the EYFS, chapters cover: a theoretical approach to gender development; current legislation and the impact on early years practice; understanding gender fluidity and the way in which children express gender; creating gender equality when working with children and the role of manager in creating a supportive ethos. Including tasks, reflective points and links to useful websites and organisations, this book will be valuable reading for all early years practitioners and students that want to promote an inclusive environment for the children in their care, their families and colleagues.

Gender Roles Through the Life Span

Numerous publications have addressed gender issues from a social or a developmental psychological perspective. This volume breaks new ground in advancing a genuine synthesis of theory and research from these two disciplines. Building on the premise that a full understanding of the multifaceted nature of gender can be achieved only through a wider focus on processes of development and social influence, the contributors examine theoretical approaches to gender development and socialization, gender categorization and interpersonal behavior, and group-level and cultural forces that affect gender so-

cialization and behavior. The book will be of interest to students and professionals in social psychology, developmental psychology, gender studies, sociology, anthropology, and educational psychology.

Gender Diversity and Inclusion in Early Years Education

Girls are now out-performing boys at GCSE level, giving rise to a debate in the media on boys' underachievement. However, often such work has been a 'knee-jerk' response, led by media, not based on solid research. Boys, Girls and Achievement - Addressing the Classroom Issues fills that gap and: *provides a critical overview of the current debate on achievement; *Focuses on interviews with young people and classroom observations to examine how boys and girls see themselves as learners; *analyses the strategies teachers can use to improve the educational achievements of both boys and girls. Becky Francis provides teachers with a thorough analysis of the various ways in which secondary school pupils construct their gender identities in the classroom. The book also discusses methods teachers might use challenge these gender constructions in the classroom and thereby address the 'gender-gap' in achievement.

The Developmental Social Psychology of Gender

Using findings from the latest information in developmental psychology, neuroscience and education, this book debunks the assumed differences between male and female brain function and reveals the brain's remarkable plasticity and the influence of culture on identity. Reprint.

Boys, Girls and Achievement

What does gender equity mean for early years practitioners? What are early years settings already doing to promote gender equality, and why is this so important? How can we provide children with a solid basis from which they can grow into people who are not limited by society's expectations of their gender? This is a manual for every early years practitioner who wishes to expand their knowledge and improve their practice around gender stereotyping in the early years. Drawing from the authors' experience developing a public health programme tackling gender stereotypes, it explores the reasons why gender inequality is still an issue, identifies the ways it is perpetuated and provides a framework and practical tools to drive change. The framework includes an audit process to celebrate areas of success and to identify areas for development, alongside a host of suggestions on how to navigate tricky situations in creative, respectful and effective ways. With the voices and experiences of experts and practitioners woven throughout, alongside key reflections and scenarios to critically engage with, Challenging Gender Stereotypes in the Early Years challenges readers to consider their own practice, drive staff awareness and make a difference to their setting.

Children's Perceptions of Gender and Work Roles

Volume 47 of Advances in Child Development and Behavior includes chapters that highlight some the most recent research in the area of gender in educational, contexts and outcomes. A wide array of topics are discussed in detail, including sexism, race and gender issues, sexual orientation, single-sex education, and physical education. Each chapter provides in-depth discussions, and this volume serves as an invaluable resource for developmental or educational psychology researchers, scholars, and students. Chapters that highlight some of the most recent research in the area. A wide array of topics are discussed in detail

Delusions of Gender: How Our Minds, Society, and Neurosexism Create Difference

A guide that helps parents focus on their children's unique strengths and inclinations rather than on gendered stereotypes to more effectively bring out the best in their individual children, for parents of infants to middle schoolers. Reliance on Gendered Stereotypes Negatively Impacts Kids Studies on gender and child development show that, on average, parents talk less to baby boys and are less likely to use numbers when speaking to little girls. Without meaning to, we constantly color-code children, segregating them by gender based on their presumed interests. Our social dependence on these norms has far-reaching effects, such as leading girls to dislike math or increasing aggression in boys. In this practical guide, developmental psychologist (and mother of two) Christia Spears Brown uses science-based research to show how over-dependence on gender can limit kids, making it harder for them to develop into unique individuals. With a humorous, fresh, and accessible perspective, Parenting Beyond Pink & Blue addresses all the issues that contemporary parents should consider—from gen-

der-segregated birthday parties and schools to sports, sexualization, and emotional intelligence. This guide empowers parents to help kids break out of pink and blue boxes to become their authentic selves.

Challenging Gender Stereotypes in the Early Years

In this volume, scholars in developmental psychology, education, and neuroscience examine the ways in which children's toys often reflect and promote gender stereotypes, as well as the long-term consequences of gender-typed play.

The Role of Gender in Educational Contexts and Outcomes

How does being male or female shape us? And what, aside from obvious anatomical differences, does being male or female mean? In this book, the distinguished psychologist Eleanor Maccoby explores how individuals express their sexual identity at successive periods of their lives. A book about sex in the broadest sense, *The Two Sexes* seeks to tell us how our development from infancy through adolescence and into adulthood is affected by gender. Chief among Maccoby's contentions is that gender differences appear primarily in group, or social, contexts. In childhood, boys and girls tend to gravitate toward others of their own sex. *The Two Sexes* examines why this segregation occurs and how boys' groups and girls' groups develop distinct cultures with different agendas. Deploying evidence from her own research and studies by many other scholars, Maccoby identifies a complex combination of biological, cognitive, and social factors that contribute to gender segregation and group differentiation. A major finding of *The Two Sexes* is that these childhood experiences in same-sex groups profoundly influence how members of the two sexes relate to one another in adulthood--as lovers, coworkers, and parents. Maccoby shows how, in constructing these adult relationships, men and women utilize old elements from their childhood experiences as well as new ones arising from different adult agendas. Finally, she considers social changes in gender roles in light of her discoveries about the constraints and opportunities implicit in the same-sex and cross-sex relationships of childhood.

Parenting Beyond Pink & Blue

"When Judy Y. Chu first encountered the four-year-old boys we meet in this book, they were experiencing a social initiation into boyhood. They were initially astute in picking up on other people's emotions, emotionally present in their relationships, and competent in their navigation of the human social world. However, the boys gradually appeared less perceptive, articulate, and responsive, and became more guarded and subdued in their relationships as they learned to prove that they are boys primarily by showing that they are not girls. Based on a two-year study of boys aged four to six, *When Boys Become Boys* offers a new way of thinking about boys' development. Chu finds that behaviors typically viewed as "natural" for boys reflect an adaptation to cultures that require boys to be emotionally stoic, competitive, and aggressive if they are to be accepted as "real boys." Yet even as boys begin to reap the social benefits of aligning with norms of masculine behavior, they pay a psychological and relational price for hiding parts of their authentic selves. Through documenting boys' perceptions of the obstacles they face and the pressures they feel to conform, and showing that their compliance with norms of masculine behavior is neither automatic nor inevitable, this accessible and engaging book provides insight into ways in which adults can foster boys' healthy resistance and help them to access a broader range of options for expressing themselves"--

Girls & Boys

Grade level: 1, 2, 3, k, e, p, t.

Gender Typing of Children's Toys

Thorne, a professor of sociology at the University of Southern California, offers her insightful observations of elementary school students in class and at play. Though, as she admits, her status as an adult and an observer may have affected what happened around her, Thorne presents a fascinating account of how children divide themselves--and how others divide them--along gender lines. Breaking students into teams for contests and the eternal game of "cooties" (a contamination attributed more often to girls than boys) reveal much about the microcosm that these students inhabit, and an extensive look at the tomboy, both in literature and in life, compares her ambiguity (sometimes an insult, sometimes a compliment) to the negative attitudes often elicited by gender-crossing in the other direction. Thorne argues convincingly against the theories of scholars like Deborah Tannen and Carol Gilligan that boys

and girls have different "cultures," and she attempts to discourage "gender antagonism." A final section offers concrete steps for teachers to take in forming the attitudes--about gender and other topics--of coming generations.

The Two Sexes

Donald R. McCreary and Joan C. Chrisler The Development of Gender Studies in Psychology Studies of sex differences are as old as the field of psychology, and they have been conducted in every subfield of the discipline. There are probably many reasons for the popularity of these studies, but three reasons seem to be most prominent. First, social psychological studies of person perception show that sex is especially salient in social groups. It is the first thing people notice about others, and it is one of the things we remember best (Fiske, Haslam, & Fiske, 1991; Stangor, Lynch, Duan, & Glass, 1992). For example, people may not remember who uttered a witty remark, but they are likely to remember whether the quip came from a woman or a man. Second, many people hold firm beliefs that aspects of physiology suit men and women for particular social roles. Men's greater upper body strength makes them better candidates for manual labor, and their greater height gives the impression that they would make good leaders (i. e. , people we look up to). Women's reproductive capacity and the caretaking tasks (e. g. , breastfeeding, baby minding) that accompany it make them seem suitable for other roles that require gentleness and nurturance. Third, the logic that underlies hypothesis testing in the sciences is focused on difference. Researchers design their studies with the hope that they can reject the null hypothesis that experimental groups do not differ.

When Boys Become Boys

Based on the author's viral New York Times op-ed, this heartfelt book is a celebration and exploration of the tomboy phenomenon and the future of girlhood. We are in the middle of a cultural revolution, where the spectrum of gender and sexual identities is seemingly unlimited. So when author and journalist Lisa Selin Davis's six-year-old daughter first called herself a "tomboy," Davis was hesitant. Her child favored sweatpants and T-shirts over anything pink or princess-themed, just like the sporty, skinned-kneed girls Davis had played with as a kid. But "tomboy" seemed like an outdated word—why use a word with "boy" in it for such girls at all? So was it outdated? In an era where some are throwing elaborate gender reveal parties and others are embracing they/them pronouns, Davis set out to answer that question, and to find out where tomboys fit into our changing understandings of gender. In *Tomboy*, Davis explores the evolution of tomboyism from a Victorian ideal to a twentyfirst century fashion statement, honoring the girls and women—and those who identify otherwise—who stomp all over archaic gender norms. She highlights the forces that have shifted what we think of as masculine and feminine, delving into everything from clothing to psychology, history to neuroscience, and the connection between tomboyism, gender identity, and sexuality. Above all else, Davis's comprehensive deep-dive inspires us to better appreciate those who defy traditional gender boundaries, and the incredible people they become. Whether you're a grown-up tomboy or raising a gender-rebel of your own, *Tomboy* is the perfect companion for navigating our cultural shift. It is a celebration of both diversity and those who dare to be different, ultimately revealing how gender nonconformity is a gift.

The Girls are the Ones with the Pointy Nails

Combines experimental and clinical data in this report on human development and the relation of sexual differentiation and social roles.

Gender Play

This hands-on guide supports primary teachers and other school staff in challenging gender stereotypes, and sets out advice on how to implement gender equality and respect in the curriculum, and in all areas of school life. An increase in the number of transgender children - and a recognition of gender reassignment as a protected characteristic under the 2010 Equality Act - means that all primary schools need to ensure they are safe environments respectful of all genders. This book draws on the 'Gender Respect Project', which identified the need to address gender stereotyping and gender-based violence with children and young people. The book is full of lesson plans, case studies, clear guidance and recommended actions as well as further reading and resources. Extending beyond awareness of other genders, this book provides a framework for a gender equality approach in the classroom, and empowers children to think critically about gender and to respect themselves and others.

Handbook of Gender Research in Psychology

This valuable and unique reference surveys and synthesizes information on gender roles in more than thirty countries from around the world. Each chapter is devoted to a single country, and the chapters are arranged in alphabetical order for ease of use. All of the chapters are written from the perspective of experts who have lived and worked in the countries profiled. To foster cross-national comparisons, each chapter follows the same format, including an introduction and contextual overview; gender roles in infancy and childhood, school years, young adulthood, adulthood, and old age; and a summary and conclusions. The design of the chapters traces the development of gender roles across the life-cycle and affords an additional opportunity for comparing data. This reference will be of interest to anyone concerned with gender issues, psychology, sociology, and anthropology.

Tomboy

The period of adolescence involves growth, adaptation, and dramatic reorganization in almost every aspect of social and psychological development. The Encyclopedia of Adolescence, Three Volume Set offers an exhaustive and comprehensive review of current theory and research findings pertaining to this critical decade of life. Leading scientists offer accessible and easily readable reviews of biological, social, educational, occupational, and cultural factors that shape adolescent development. Issues in normative development, individual differences, and psychopathology/maladjustment are reviewed. Over 130 chapters are included, each covering a specific aspect or issue of adolescence. The chapters trace differences in the course of adolescence in different nations and among youth with different backgrounds. The encyclopedia brings together cross-disciplinary contributors, including academic researchers, biologists, psychiatrists, sociologists, anthropologists and public policy experts, and will include authors from around the world. Each article features an in-depth analysis of current information on the topic, along with a glossary, suggested readings for further information, and cross-references to related encyclopedia articles. The volumes offer an unprecedented resource for all audiences, providing a more comprehensive understanding of general topics compared to other reference works on the subject. Available both in print and online via SciVerse Science Direct. Winner of the 2011 PROSE Award for Multivolume Reference in Humanities & Social Science from the Association of American Publishers; and named a 2012 Outstanding Academic Title by the American Library Association's Choice publication. Brings together cross-disciplinary contributors, including developmental psychologists, educational psychologists, clinical psychologists, biologists, psychiatrists, sociologists, anthropologists and public policy experts. Published both in print and via Elsevier's ScienceDirect™ online platform.

Man & Woman, Boy & Girl: the Differentiation and Dimorphism of Gender Identity from Conception to Maturity

When we examine the field of gender psychology closely, we note that much of what the popular media tells us about women and men does not hold up to research scrutiny. This handbook helps to replace media stereotypes and myths with realities and shows us that there are more similarities between the sexes than differences. The contributors to this handbook have a highly practical and readable approach that will prompt readers to examine their self-awareness and social tolerance to biases against women and men in our social institutions such as schools and workplaces. They also reveal that the increased participation in courses and reading of literature on gender has improved gender role attitudes and behavior, causing both sexes to treat each other with more respect and dignity. The contributors to this volume focus on gender role development and multicultural issues throughout the lifecycle. They also emphasize the empowerment of both sexes. The gender-related topics in this handbook include: Teacher socialization of girls and boys; Women's and men's verbal and nonverbal communication skills; Women's and men's voting patterns; Sexual violence; The gender wage gap; Women's and men's friendships and sexual relationships; Parents' communication of masculinity and femininity to their children.

Gender Equality in Primary Schools

This report sets out the findings from the International Early Learning and Child Well-being Study in the United States. The study assesses children's skills across both cognitive and social-emotional development, and how these relate to children's early learning experiences at home and in early childhood education and care.

International Handbook on Gender Roles

Girls Can do This! Boys Can do That! is a fully illustrated children's book that explores gender roles in today's society. Boys and girls are limited in what toys they can play with, hobbies they can enjoy, or careers they choose to pursue. This book challenges those limitations and allows the reader the freedom to do the things they want to do based off of their choice, rather than societal pressures.

Encyclopedia of Adolescence

The successes of feminism have led to greater opportunities for girls, by challenging stifling stereotypes about femininity and broadening the understanding of what it means to be female. While boys have travelled alongside this transformation, narrow definitions of masculinity and manliness haven't faced the same degree of scrutiny. Whether they're being urged to "man up" or warned that "boys don't cry," young men are subjected to damaging messages about manliness: they must muzzle their emotions and never show weakness, dominate girls and compete with one another. **Boys: What It Means to Become a Man** examines how these toxic rules can hinder boys' emotional and social development. If girls can expand the borders of femaleness, could boys also be set free of limiting, damaging expectations about manhood and masculinity? Could what's been labelled "the boy crisis" be the beginning of a revolution in how we raise young men? Drawing on extensive research and interviews with educators, activists, parents, psychologists, sociologists, and young men, Giese--mother to a son herself--examines the myths of masculinity and the challenges facing boys today. She reports from boys-only sex education classes and recreational sports leagues; talks to parents of transgender children and plays video games with her son. She tells stories of boys navigating the transition into manhood and how the upheaval in cultural norms about sex, sexuality and the myths of masculinity have changed the coming of age process for today's boys. With lively reportage and clear-eyed analysis, Giese reveals that the movement for gender equality has the potential to liberate us all.

Praeger Guide to the Psychology of Gender

Designed for use in courses on gender and sex roles offered in sociology, psychology, and women's studies, this book gives an organizational perspective by devoting equal coverage to men's and women's concerns in a developmental or life-cycle framework. Thorough, updated treatment of gender roles in single-parent families and among the elderly is included, plus the latest information about men and women in occupations (percentages, salaries, types of discrimination) and in politics (the gender gap, women in political elites, policy questions).

Early Learning and Child Well-being in the United States

This book is an attempt to bring the gender and development debate full circle--from a much-needed focus on empowering women to a more comprehensive gender framework that considers gender as a system that affects both women and men. The chapters in this book explore definitions of masculinity and male identities in a variety of social contexts, drawing from experiences in Latin America, the Caribbean and sub-Saharan Africa. It draws on a slowly emerging realization that attaining the vision of gender equality will be difficult, if not impossible, without changing the ways in which masculinities are defined and acted upon. Although changing male gender norms will be a difficult and slow process, we must begin by understanding how versions of masculinities are defined and acted upon.

Girls Can Do This! Boys Can Do That!

* Winner of Honorable Mention Award for the Otto Klineberg Intercultural and International Relations Prize competition from SSPSI * This edited volume captures an exciting new trend in research on intergroup attitudes and relations, which concerns how individuals make judgments, and interact with individuals from different group categories, broadly defined in terms of gender, race, age, culture, religion, sexual orientation, and body type. This new approach is an integrative perspective, one which draws on theory and research in the areas of developmental and social psychology. Throughout human history, intergroup conflict has often served as the basis for societal conflict, strife, and tension. Over the past several decades, individual and group mobility has enabled individuals to interact with a wider range of people from different backgrounds than ever before. On the one hand, this level of societal heterogeneity contributes to intergroup conflict. On the other hand, the experience of such heterogeneity has also reduced stereotypes, and increased an understanding of others' perspectives and experiences. Where does it begin? When do children acquire stereotypes about the other? What

are the sources of influence, and how does change come about? To provide a deeper understanding of the origins, stability, and reduction of intergroup conflict, scholars in this volume report on current, cutting edge theory and new research findings. Progress in the area of intergroup attitudes relies on continued advances in both the understanding of the origins and the trajectory of intergroup conflict and harmony (as historically studied by developmental psychologists) and the understanding of contexts and conditions that contribute to positive and negative intergroup attitudes and relations (as historically studied by social psychologists). Recent social and developmental psychology research clarifies the multifaceted nature of prejudice and the need for an interdisciplinary approach to addressing prejudice. The recent blossoming of research on the integration of developmental and social psychology represented in this volume will appeal to scholars and students in the areas of developmental psychology, social psychology, cognitive psychology, education, social neuroscience, law, business, and political science.

Boys

More than anything, William wants a doll. "Don't be a creep," says his brother. "Sissy, sissy," chants the boy next door. Then one day someone really understands William's wish, and makes it easy for others to understand, too.

Masculine and Feminine

Looking at and listening to picture and story books is a ubiquitous activity, frequently enjoyed by many young children and their parents. Well before children can read for themselves they are able to learn from books. Looking at and listening to books increases children's general knowledge, understanding about the world and promotes language acquisition. This collection of papers demonstrates the breadth of information pre-reading children learn from books and increases our understanding of the social and cognitive mechanisms that support this learning. Our hope is that this Research Topic/eBook will be useful for researchers as well as educational practitioners and parents who are interested in optimizing children's learning.

The Other Half of Gender

Intergroup Attitudes and Relations in Childhood Through Adulthood
