views 2 years ago 1 hour, 1 minute - Topic 1 – **Quantitative**, Methods Reading 3 – **Probability**,

Concepts 0:00 Introduction 2:21 LOS : Define a random variable, an ...

Introduction

LOS : Define a random variable, an outcome, and an event.

LOS : Identify the two defining properties of probability, including mutually exclusive and exhaustive events, and compare and contrast empirical, subjective, and a priori probabilities

LOS : Describe the probability of an event in terms of odds for and against the event

LOS : Demonstrate the application of the multiplication and addition rules for probability

LOS : Compare and contrast dependent and independent events

LOS : Calculate and interpret an unconditional probability using the total probability rule
LOS : Calculate and interpret the expected value, variance, and standard deviation of random variables
LOS : Explain the use of conditional expectation in investment applications
LOS : Interpret a probability tree and demonstrate its application to investment problems
LOS : Calculate and interpret the expected value, variance, standard deviation, covariances, and correlations of portfolio returns
LOS : Calculate and interpret the covariances of portfolio returns using the joint probability function
LOS : Calculate and interpret an updated probability using Bayes' formula
LOS : Identify the most appropriate method to solve a particular counting problem and analyze counting problems using factorial, combination, and permutation concepts
