Travels in the Pyrenees

Excerpt from Travels in the Pyrenees: Including Andorra and the Coast From Barcelona to Carcassonne
It was a Mediterranean landscape, fraught with that historic significance that is inseparable from these lands that border the old-world sea. The Olive, the Cypress, and the Vine - what a magic of association is involved in this leafy trinity of the South! I for one never look upon a cypress, with its dark grave outline and perfect form, Without thinking of the Great King and of Salamis, and of all the successive hosts of Islam which have beaten themselves upon Christendom in vain. And here I remembered that I was upon the very threshold of some of their greatest triumphs and disasters. Travels in the Pyrenees

Pilgrim shrines were places of healing, holiness, and truth in early modern France. This book explains how this came about.

Travels in the Pyrenees, Including Andorra and the Coast From Barcelona to Carcassonne

Liberty Fund's new six-volume The Collected Works of Frederic Bastiat series, of which "The Man and the Statesman" is the first volume, may be considered the most complete edition of Bastiat's works published to date, in any country, and in any language. The main source for this translation is the seven-volume "Oeuvres completes de Frederic Bastiat," published in the 1850s and 1860s. The present volume, most of which has never before been translated into English, includes Bastiat's complete correspondence: 207 letters Bastiat wrote between 1819, when he was only 18 years old, until just a few days before his untimely death in 1850 at the age of 49. For contemporary classical liberals, Bastiat's correspondence will provide a unique window into a long-forgotten world where opposition to war and colonialism went hand-in-hand with support for free trade and deregulation. Bastiat's numerous letters to Richard Cobden, a Member of Parliament and best known today as the leader of the British Anti-Corn Law League, chronicle the profound effect the Anti-Corn League had on Bastiat. The League's success

in mobilizing a popular movement in England to pressure the British government into abolishing the very protectionist "corn laws," in 1846, inspired Bastiat to emulate the League's success in France by starting his own free-trade movement. "The Man and the Statesman" also includes articles and other writings on politics and current events that showcase Bastiat's talent as a theoretician, a pamphleteer, a journalist, and a deputy (Member of Parliament) of the nascent French Second Republic. Together with the correspondence, the writings in this volume fill an important gap in our understanding of the lesser-known Bastiat, who, in just a few short years, made a profound impact on French intellectual and political life in Paris. Forthcoming titles in The Collected Works of Frederic Bastiat series include: ""The Law," "The State," and Other Political Writings, 1843-1850 Economic Sophisms and "What is Seen and What is Not Seen" Miscellaneous Works on Economics: From "Jacques-Bonhomme" to Le Journal des ""economistes Economic Harmonies The Struggle Against Protectionism: The English and French Free-Trade Movements " Frederic Bastiat (1801-1850) was born in the French port city of Bayonne and became one of the leading advocates of free markets and free trade in the mid-nineteenth century. A theorist of classical liberal political economy and an elected member of various French political bodies, he opposed both protectionism and the rise of socialist ideas. Jacques de Guenin is president of the Cercle Frederic Bastiat. He is a graduate of the *ecole des Mines* in Paris and holds a Master of Sciences from the University of California, Berkeley. Jean-Claude Paul-Dejean is a historian from the University of Bordeaux and a Bastiat scholar. Dennis O'Keeffe is Professor of Social Science at the University of Buckingham, Buckingham, England, and is Senior Research Fellow in Education at the Institute of Economic Affairs, London. David M. Hart received a Ph.D. in history from King's College, Cambridge, and is the Director of Liberty Fund's Online Library of Liberty Project.

The Spanish Craze is the compelling story of the centuries-long U.S. fascination with the history, literature, art, culture, and architecture of Spain. Richard L. Kagan offers a stunningly revisionist understanding of the origins of hispanidad in America, tracing its origins from the early republic to the New Deal. As Spanish power and influence waned in the Atlantic World by the eighteenth century, her rivals created the "Black Legend," which promoted an image of Spain as a dead and lost civilization rife with innate cruelty and cultural and religious backwardness. The Black Legend and its ambivalences influenced Americans throughout the nineteenth century, reaching a high pitch in the Spanish-American War of 1898. However, the Black Legend retreated soon thereafter, and Spanish culture and heritage became attractive to Americans for its perceived authenticity and antimodernism. Although the Spanish craze infected regions where the Spanish New World presence was most felt—California, the American Southwest, Texas, and Florida—there were also early, quite serious flare-ups of the craze in Chicago, New York, and New England. Kagan revisits early interest in Hispanism among elites such as the Boston book dealer Obadiah Rich, a specialist in the early history of the Americas, and the writers Washington Irving and Henry Wadsworth Longfellow. He also considers later enthusiasts such as Angelino Charles Lummis and the many writers, artists, and architects of the modern Spanish Colonial Revival in the United States in the late nineteenth and early twentieth centuries. Spain's political and cultural elites understood that the promotion of Spanish culture in the United States and the Western Hemisphere in general would help overcome imperial defeats while uniting Spaniards and those of Spanish descent into a singular *raza* whose shared characteristics and interests transcended national boundaries. With elegant prose and verve, *The Spanish Craze* spans centuries and provides a captivating glimpse into distinct facets of Hispanism in monuments, buildings, and private homes; the visual, performing, and cinematic arts; and the literature, travel journals, and letters of its enthusiasts in the United States.

DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

The Man and the Statesman

This book focuses on the archaeological evidence, allowing fresh perspectives and new approaches to the fate of the Roman West.

The Spanish Craze

Although nineteenth-century legislation had tried to ensure a precise separation between genre and institution for Parisian music in the theatre, it had inadvertently laid out a field on which the politics of genre could be played out as agents and actors of all types deployed various forms of artistic power. During the Second Empire, from 1854 until 1870, the state took over day-to-day control of the Opéra in ways that were without precedent. Every element of the Opéra's activity was subjugated to the exigency of Empire; the selection of artists, works and more general questions of artistic policy were handed over to politicians. The Opéra effectively became a branch of government. The result was a stagnation of the Opéra's repertory, and beneficiaries were the composers of larger-scale works for competing organisations: the Opéra Comique and the Théâtre Lyrique.

Hills and the Sea

Rahn's personal diary from his travels as occult investigator for the Third Reich • First English translation of the author's journeys in search of a Nordic equivalent to Mt. Sinai • Explains why Lucifer the Light Bringer, god of the heretics, is a positive figure Otto Rahn's lifelong search for the Grail brought him to the attention of the SS leader Himmler, who shared his esoteric interests. Induced by Himmler to become the chief investigator of the occult for the Nazis, Rahn traveled throughout Europe--from Spain to Iceland--in the mid 1930s pursuing leads to the Grail and other mysteries. Lucifer's Court is the travel diary he kept while searching for "the ghosts of the pagans and heretics who were [his] ancestors." It was during this time that Rahn grasped the positive role Lucifer plays in these forbidden religions as the bearer of true illumination, similar to Apollo and other sun gods in pagan worship. This journey was also one of self-discovery for Rahn. He found such a faithful echo of his own innermost beliefs in the lives of the heretics of the past that he eventually called himself a Cathar and nurtured ambitions of restoring that faith, which had been cruelly destroyed in the fires of the Inquisition. His journeys on assignment for the Reich--including researching an alleged entrance to Hollow Earth in Iceland and searching for the true mission of Lucifer in the caves of southern France that served as refuge for the Cathars during the Inquisition--also led to his disenchantment with his employers and his mysterious death in the mountains after his break with the Nazis.

The Roman West, AD 200-500

Stretching across continents and centuries, *The Origins of War: Violence in Prehistory* provides a fascinating examination of executions, torture, ritual sacrifices, and other acts of violence committed in the prehistoric world. Written as an accessible guide to the nature of life in prehistory and to the underpinnings of human violence. Combines symbolic interpretations of archaeological remains with a medical understanding of violent acts. Written by an eminent prehistorian and a respected medical doctor.

The Empire at the Opéra

The guidebook describes walking Greece's month-long traverse of the Pìndos range, and provides routes around Athens and the east coast, and in the Peloponnese. Use the routes as day-walks or put them together as multi-day treks through the beautiful, undeveloped and remote mountains of Greece.

Lucifer's Court

The Cathars are one of the most famous heretical movements of the late twelfth and early thirteenth centuries. They infiltrated the highest ranks of society and posed a major threat not only to the Catholic Church but also to secular authorities as well. The movement was finally smashed by the crusade and the inquisitional proceedings that followed. This new study is the first comprehensive history of the Cathars. It addresses major topics in medieval history including heresy, orthodoxy and the Crusades as well as providing a history of the social and political history of Languedoc and the rise of the Capetian dynasty. A fascinating study of the development of radical religious belief and its violent suppression.

This edited volume presents an analysis of the evolution of French language policies and their impact on French regional languages and their communities. It gathers studies on language revitalisation from several territorial minority languages (Breton, Alsatian, Catalan, Occitan, Basque, Corsican, Francoprovençal, Picard, Reunionese) and evaluates the challenges and opportunities that they face in the 21st century. The chapters tackle different aspects of language endangerment and language planning and adopt varied theoretical and methodological approaches. The first section of the book reconsiders the difficulties in establishing linguistic boundaries and classification for some regional languages. The second section examines the important theme of the new generation of speakers with issues of transmission and identity formation and the changes they can bring to traditional communities. The third section highlights new developments in the context of new technologies and the heightened visibility of regional languages. Finally, the last section presents an overview of the contemporary situation of minority language revitalisation in France and synthesises the key trends identified in this volume: from the educational domain to the European Charter for Minority and Regional languages. This book will appeal to students and scholars of the sociology of language, sociolinguistics, language policy, minority languages and language endangerment.

Monasticism, in all of its variations, was a feature of almost every landscape in the medieval West. So ubiquitous were religious women and men throughout the Middle Ages that all medievalists encounter monasticism in their intellectual worlds. While there is enormous interest in medieval monasticism among Anglophone scholars, language is often a barrier to accessing some of the most important and groundbreaking research emerging from Europe. The Cambridge History of Medieval Monasticism in the Latin West offers a comprehensive treatment of medieval monasticism, from Late Antiquity to the end of the Middle Ages. The essays, specially commissioned for this volume and written by an international team of scholars, with contributors from Australia, Belgium, Canada, England, France, Germany, Italy, the Netherlands, Spain, Switzerland, and the United States, cover a range of topics and themes and represent the most up-to-date discoveries on this topic.

The Cathedrals of Southern France (Classic Reprint)

Medievalists explore geographical regions and themes to expose the best current thinking about what was and what was not distinctive about the twelfth century.

Twelve Years a Slave

In recent years the travel industry has promoted trips to cultural landscapes that contain great historical and symbolic landmarks, and Latin American towns and cities are anything but isolated from this trend. Many historic city centers in Latin America have been preserved intact from the colonial era and today may serve institutional, commercial, or residential needs. Now economic forces from outside the region have created a demand for the preservation of historically "authentic" districts. This book explores how heritage tourism and globalization are reshaping the Latin American centro hist—rico, analyzing the transformation of the urban core from town plaza to historic center in nine cities: Bogotá, Colombia; Buenos Aires, Argentina; Cartagena, Colombia; Cuenca, Ecuador; Havana, Cuba; Montevideo, Uruguay; Puebla, Mexico; Quito, Ecuador; and Trinidad, Cuba. It tells how these pressures, combined with the advantage of a downtown location, have raised the potential of redeveloping these inner city areas but have also created the dilemma of how to restore and conserve them while responding to new economic imperatives. In an eclectic and interdisciplinary study, Joseph Scarpaci

documents changes in far-flung corners of the Latin American metropolis using a broad palette of tools: urban morphology profiles, an original land-use survey of 30,000 doorways in nine historic districts, numerous photographs, and a review of the political, economic, and globalizing forces at work in historic districts. He examines urban change as reflected in architectural styles, neighborhood growth and decline, real estate markets, and local politics in order to show the long reach of globalization and modernity. *Plazas and Barrios* spans all of Spanish-speaking America to address the socio-political dimensions of urban change. It offers a means for understanding the tensions between the modern and traditional aspects of the built environment in each city and provides a key resource for geographers, urban planners, architectural historians, and all concerned with the implications of the emerging global economy.

Staying Roman

Fascinated by the land of endless horizons, sunshine, and the open road, Richard Grant spent fifteen years wandering throughout the United States, never spending more than three weeks in one place, and getting to know America's nomads. In a richly comic travelogue, Grant uses these lives and his own to examine the myths and realities of the wandering life, and its contradiction with the sedentary American dream.

History of the Consulate and the Empire of France Under Napoleon...

This volume offers a comprehensive survey of Roman villas in Italy and the Mediterranean provinces of the Roman Empire, from their origins to the collapse of the Empire. The architecture of villas could be humble or grand, and sometimes luxurious. Villas were most often farms where wine, olive oil, cereals, and manufactured goods, among other products, were produced. They were also venues for hospitality, conversation, and thinking on pagan, and ultimately Christian, themes. Villas spread as the Empire grew. Like towns and cities, they became the means of power and assimilation, just as infrastructure, such as aqueducts and bridges, was transforming the Mediterranean into a Roman sea. The distinctive Roman/Italian villa type was transferred to the provinces, resulting in Mediterranean-wide culture of rural dwelling and work that further unified the Empire.

The Cambridge History of Medieval Monasticism in the Latin West

The Cambridge Prehistory of the Bronze and Iron Age Mediterranean offers new insights into the material and social practices of many different Mediterranean peoples during the Bronze and Iron Ages, presenting in particular those features that both connect and distinguish them. Contributors discuss in depth a range of topics that motivate and structure Mediterranean archaeology today, including insularity and connectivity; mobility, migration, and colonization; hybridization and cultural encounters; materiality, memory, and identity; community and household; life and death; and ritual and ideology. The volume's broad coverage of different approaches and contemporary archaeological practices will help practitioners of Mediterranean archaeology to move the subject forward in new and dynamic ways. Together, the essays in this volume shed new light on the people, ideas, and materials that make up the world of Mediterranean archaeology today, beyond the borders that separate Europe, Africa, and the Middle East.
