Please Save My Earth

"This book reads from right to left"--P. [4] of cover.

My Alien Self

This is a true story everyone should read. 100+ 4*/5* reviews! A roller coaster ride of mental health issues, travel, relationships, rape, adventures, eating disorder, abuse, drugs, alcohol. Adults only. If I told you I'd been to twenty-four Countries (twenty-one by the time I was twenty-two), that I'd worked in Japan for nine months, toured Australia for six months, enjoyed seven months in Thailand and met and campaigned for the Orangutan in Borneo, you might think that I was pretty lucky. If I told you I'd worked in the hotel industry, for a sexual health department in a hospital and with prisoners in a drug cell block of a male prison, that I'd worked as a recruitment consultant, in so many office jobs I've lost count, as well as having my own company and multiple websites, at age thirty-six, then you might think I've had an interesting life. But if I added to that a mix of child rape, mental health problems, promiscuity, drug taking, alcohol abuse, eating disorders, self-harm, violence, mood swings, obsession, jealousy, loss of self worth, being raised by a mentally ill mother, bankruptcy, thyroid and gastro problems and public masturbation in school at age nine, then I am not sure what you'd think. But this is me; Amanda Green. This is my life, my story; my journey back to me from depression, anxiety, panic attacks, OCD and Borderline Personality Disorder - mental illness which manifested during my life and came out 'to it's peak' in my thirties. I was able to use my collection of mementos, photos, diaries, journals, letters, emails and text messages of my past to finally see who I had become, and more importantly with a combination of therapy, medication and my writing, how I became that alien self and how I found the real me. One of many 5* reviews... "I would thoroughly recommend this book not just to those suffering with mental health issues, but to those who would also like a jolly good read!" The editor (Debz Hobbs-Wyatt) adds... This is the journey of a normal working class girl, trapped in a roller coaster world of disorder and excitement, love and joy, depression and anger - and her fight against stigma. While My Alien Self would be inspiring for any sufferer, their families or medical teams in its honest insights into living with a mental illness, it also has universal appeal. For who, at times, has not felt their life spin into chaos and wondered what is normal? This story effectively and openly highlights just how fine the line is between what is normal, and what is 'mental illness'. And everyone who reads it will be able to relate to it. Contains explicit language and sexual scenes. Emergence had this to say "We very much enjoyed reading this honest

and powerful account of Amanda's journey from diagnosis to recovery. We applaud such authentic and candid accounts of the devastation that can be experienced by those living with personality disorder and of the message of hope and recovery that the book conveys. 'Bon Dobbs (Anything To Stop The Pain and Author of 'When hope is not enough') said 'While there are many borderline personality disorder memoirs out now (including 'The Buddha and the Borderline', 'Loud House of Myself', 'Get Me Out of Here', 'Girl in Need of a Tourniquet' and 'Poisoned Love'), My Alien Self goes a long way to providing hope to the sufferers of BPD. By publishing the steps taken to reframe certain ways thinking, through CBT worksheets and other exercises, the author has revealed that recovery from BPD is possible.' I self published this book and am very proud of that fact, because I was able to write it exactly as I wanted it to be written, with the help from my fabulous editor, Debz Hobbs-Wyatt. Whilst the massive help a publisher and agent gives, they do narrow down what is published, so I took on the journey to publish it and market it myself. There's a sequel out too, called '39'. It's quite different, but it leads on from this one :-)

A Can of Madness

Product Description "A Can of Madness does what it says in the... er can. A brilliant memoir of mania; all the pain, humour, fear and despair is chronicled here in prose of clarity and distinction. Unforgettable and important" - Stephen Fry "This book will help people to understand one of the greatest issues of our time, how to treat those who are mentally disturbed, as human beings" - Rt. Hon. Tony Benn MP "The author has done all of us a service by writing about how it feels, not just to be manic depressive, but to have a life of fraught and edgy encounters with just about everyone" - The Times Literary Supplement

Description A vivid, honest and sometimes disturbing memoir about the experience of having a diagnosis of manic-depression. It was in two stages (not using a diary that i collected as it says in the Mind Press Release 2002. After i read Prozac Nation in 1998 i wrote two pages. Knowing i had something amazing to say i was paralysed for two years with the thought of writing it. Then when i was given my own flat in Vauxhall after my last hospitalisation in St Thomas's Hospital in 2000 i wrote every day for about 12-16 weeks and got it all of my chest. From that moment i felt that i had written the book that had saved the Ecstasy generation although it turned into a mental health crusade to give other people a voice. Like other books in this genre, the author is often painfully honest about his experiences. He recounts a dizzying, dark and sometimes euphoric journey through a world of elation, despair, binge drinking, drugs, raves and psychiatric wards. As well as attempting to educate the reader, the book also provides optimism and hope, showing that it is finally possible to learn to live with, and accept, having a mental health problem. Writing A Can of Madness saved my life and alot of other people have told me that it has helped their lives. About the Author Jason Pegler is 33 and lives in London. Jason was diagnosed with manic depression in 1993 and wrote 'A Can of Madness' to stop other seventeen year olds going through what he went through. Graduating from Manchester University in 1998 he founded Chipmunk publishing the mental health publisher which aims to help mental health sufferers. Pegler is a mental health activist, journalist, rapper, public speaker and consultant on anything that promotes a positive image on mental health. In 2005 Pegler won the New Statesman's Young Social Entrepreneur of the Year Award. He is a key figure in the mental health movement.

Book Extract As I was being driven off in the back of a police van in a space suit, I thought I was Donovan Bad Boy Smith being driven to a rave. I could hear music in my head and flashed back to another night at The Brunel Rooms in Swindon. The Brunel Rooms, a hard-core Mecca for druggies from Gloucester and surrounding areas in the early to mid nineties. Donovan was so hardcore when I saw him there that he'd refused to turn off his set at 3. He'd carried on until 3.30 when someone finally turned off the electricity mid flow. Talking of flows (as opposed to stable mindsets), just how the fuck do you live with a mental illness? Don't ask me, I'm still trying to find out now. After all, it's not something you plan, let alone something you'd ever expect to have. As we all say: it won't happen to me. But it can. And in this case, it did. And if Hercules and Ajax couldn't hack it, how the hell could I? Unsurprisingly, I didn't - and that's why I wallowed in self-pity for so long. So, do you want to know what it's like to be crazy, mad, loopy? Well I'm about to tell you. I'm also going to tell you how it feels to be suicidal for months on end - the fate of the manic. One thing, however, is for sure: The sooner you kill mania the better. For you're a danger to yourself and other people when you don't know what you're doing.

The Rape That Saved Me

The Rape That Saved Me, Confessions of a Mad Mind, is the memoir of Christie Page, creator of The Adventures of Ghost Girl, the world's first mental health superhero. This book details the author's

journey of mental illness and wellness through intimate story telling that will leave you breathless and hopeful.

Beyond Madness

Reveals proven solutions for bettering the lives of people with serious mental illness, their families, and their communities. Leading scientist and gifted storyteller Rachel A. Pruchno, PhD, was shocked to encounter misinformation, ignorance, and intolerance when she sought to help her daughter, newly diagnosed with bipolar disorder. Turning to the scientific literature, Dr. Pruchno eventually found solutions, but she realized many others would need help to understand the highly technical writing and conflicting findings. In *Beyond Madness*—part memoir, part history, and part empathetic guide—Dr. Pruchno draws on her decades as a mental health professional, her own family's experiences with mental illness, and extensive interviews with people with serious mental illness to discuss how individuals live with these illnesses, including bipolar disorder, schizophrenia, and major depression. The book • presents real-world vignettes that vividly describe what it is like to experience some of the most troubling symptoms of a severe mental illness • offers practical advice for how individuals, family members, and communities can help people with a serious mental illness • explains how people with mental illness can find competent health care providers, identify treatment regimens, overcome obstacles to treatment, cope with stigma, and make decisions • provides insight into programs, such as Crisis Intervention Training, that can help people undergoing mental health crisis avoid jail and get the treatment they need • takes aim at the popular concept of "rock bottom" and reveals why this is such a harmful and simplistic approach • advocates for evidence-based care • documents examples of communities that have embraced successful strategies for promoting recovery • shows that people with serious mental illnesses can live productive lives Meticulously researched and engagingly written, *Beyond Madness* is a call to action and a promise of hope for everyone who cares about and interacts with the millions of people who have serious mental illness. Family members, friends, teachers, police, primary care doctors, and clergy—people who recognize that something is wrong but don't know how to help—will find the book's practical advice invaluable.

Hello I Want to Die Please Fix Me

The eye-opening and engrossing story of one woman's battle with suicidal depression—and her firsthand investigative journey to document the obstacles three hundred million people with depression face every day around the world

Escape from Myself

This is the memoir of a man who had everything: family, good job, house. He walked away from it. Why? Tom Roberts learned five years after he just walked away and lost everything he had bipolar disorder II and the reason he left all that he had was because he was in a manic episode. Tom's memoir takes the reader from what appeared to be a comfortable college professor's life to the dirty streets of Hollywood, CA. He was living in a fantasy that he could earn a living as a film actor just as he dreamed when he was in high school. His "escape" as he calls it, was triggered by medical treatment following a horrible depression that had lasted six months by the time he was hospitalized. He was prescribed the new antidepressant Prozac and it turned out to be the worst anti-depressant for a yet undiagnosed manic-depressive. Tom's story begins, however, 30 years earlier in a family dominated by his Father's undiagnosed mental illness and then the sudden death of his 34-year-old Mother. Tom lived through the suicides of his brother and later his step-sister. The end surprisingly, is back in Hollywood as a working voice-over actor with several on-camera film credits. How he got there is the rest of the story and the final destination of his journey that went from nowhere to "now here."

This Book Could Save Your Life: Breaking the silence around the mental health emergency

What's sort of funny when something horrific happens is that nothing happens to the rest of the world. The cars still drive, the planes still fly... everything just continues. And that's probably the best gift we have. Because, for the most part, there's no right or wrong way to do things – life becomes whatever you make it.

Let Me Not Be Mad

Let Me Not Be Mad is an immersive, virtuosic and provocative investigation of madness, love and self-destruction that defies categorisation. 'Exhilarating ... dazzling ... a miraculous feat' Guardian 'I have rarely read a more haunting and enthralling account of a descent into madness' Stephen Fry A consulting room with two people in it. One of them is talking, the other is listening. Both of them need help. Throughout his life, A. K. Benjamin has found himself drawn to extreme behaviour: as a contemplative monk, an advocate for homeless addicts, a support-worker for gang members and for many years as a Clinical Neuropsychologist. His book begins as a series of clinical encounters with anonymised patients. But with each encounter, it becomes increasingly and disturbingly apparent that what we are reading is not really about the patients – it is, instead, about the author's own fevered descent into mental illness as he confronts his traumatic past. 'Stunning: clever, troubling, restless, honest, dishonest' Olivia Laing 'Blackly comic, warmly compassionate, a unique take on the human mind' Stewart Lee

SURVIVING MENTAL ILLNESS

Written from the perspective of someone whose life has been challenged by mental illness, this book offers help, hope, and inspiration to others struggling with psychological disorders. It provides information about mental illness in general—and mood disorders in particular—valuable tips about treatment and medication, and resources and organizations dedicated to helping those suffering from these disorders. *Surviving Mental Illness* helps break through the fear and stigma of mental illness and focuses on how to find health and happiness. The author shares her personal journey: the heartbreak and challenges of bipolar disorder, and the joy of making her way back to mental health. Through her own story, she shows that help is out there, and with a little faith, recovery is possible. My faith in G-d has led me to recover in ways you cannot imagine. Life is having faith to overcome any obstacles, and that is what my recovery from mental illness is all about.

The Last Asylum

In the late 1970s, Barbara Taylor, then an acclaimed young historian, began to suffer from severe anxiety. In the years that followed, Taylor's world contracted around her illness. Eventually, she was admitted to what had once been England's largest psychiatric institutions, the infamous Friern Mental Hospital in London

Get Me Out of Here

With astonishing honesty, this memoir reveals what mental illness looks and feels like from the inside, and how healing from borderline personality disorder is possible through intensive therapy and the support of loved ones. With astonishing honesty, this memoir, *Get Me Out of Here*, reveals what mental illness looks and feels like from the inside, and how healing from borderline personality disorder is possible through intensive therapy and the support of loved ones. A mother, wife, and working professional, Reiland was diagnosed with borderline personality disorder at the age of 29--a diagnosis that finally explained her explosive anger, manipulative behaviors, and self-destructive episodes including bouts of anorexia, substance abuse, and promiscuity. A truly riveting read with a hopeful message. Excerpt: "My hidden secrets were not well-concealed. The psychological profile had been right as had the books on BPD. I was manipulative, desperately clinging and prone to tantrums, explosiveness, and frantic acts of desperation when I did not feel the intimacy connection was strong enough. The tough chick loner act of self-reliance was a complete facade."

Transcending Bipolar Disorder

Author Robert Jameson was leading a very successful life as a husband, recent PhD graduate, and professional chemist when he first noticed feeling somewhat abnormal. As stresses mounted over time, Robert slowly approached one of the most significant moments in his life. After a stunning and unexpected admission from his sister, Robert's actions began to spiral out of control, culminating in his being diagnosed as bipolar. The struggle with mental illness can be a long and arduous one. Robert describes his journey to wellness, from his collapse to his eventual successful transcendence to health. He describes how his desire to be well and his drive to seek out nontraditional recovery methods eventually led to his success. Following the inspiring tale of his own journey, Robert has detailed a comprehensive self-help guide to recovery. This guide seeks to help those suffering from mental illness or their friends or family interested in helping someone recover.

Gorilla and the Bird

'One of the gems of the year' - Michele Magwood, Sunday Times (Books LIVE SA) The story of a young man fighting to recover from a devastating psychotic break and the mother who refuses to give up on him. Zack McDermott, a twenty-six-year-old Brooklyn public defender, woke up one morning convinced he was being filmed as part of an audition for a TV pilot. Every passerby was an actor; every car would magically stop for him; everything he saw was a cue from 'The Producer' to help inspire the performance of a lifetime. After a manic spree around Manhattan, Zack, who is bipolar, was arrested on a subway platform and admitted to hospital. So begins the story of Zack's free fall into psychosis and his desperate, poignant, often darkly funny struggle to claw his way back to sanity, regain his identity, and rebuild some semblance of a stable life. It's a journey that will take him from New York City back to his Kansas roots and to the one person who might be able to save him, his tough, bighearted Midwestern mother, nicknamed the Bird, whose fierce and steadfast love is the light in Zack's dark world. Before his odyssey is over, Zack will be tackled by guards in mental wards, run naked through cornfields, receive secret messages from the TV, befriend a former Navy SEAL and his talking stuffed monkey and see the Virgin Mary in the whorls of his own back hair. But with the Bird's help, he just might have a shot at pulling through, starting over, and maybe even meeting a woman who can love him back, bipolar and all. Written with raw emotional power, humor, and tenderness, *Gorilla and the Bird* is a bravely honest account of a young man's unraveling and the relationship that saves him.

The Dark Threads

Teenage life in the swinging sixties, hanging out in coffee bars talking fashion and pop music, who could wish for more? But in August 1968, growing pains started to kick hard for 18-year-old office worker Jean Davison and adolescent idealism quickly turns to angst and emptiness. With her home life in chaos, Jean turns to a psychiatrist hoping for a sensible adult to talk to. That's where her problems really begin: a week's voluntary psychiatric rest is the start of one long nightmare of drugs, electric shock treatment and abuse which turn her into a zombie. Losing five years of her young life to the mental health system, Jean finally finds the courage to say "no" to drugs and turns her life around, finds love and returns to the mental health service as a worker. Balancing quotes from case number 10826, her actual case notes which reveal a diagnosis of chronic schizophrenia, with her own account of interviews with doctors, this memoir raises disturbing questions on the treatment of psychiatric patients, which are still relevant today. Jean Davison, was born in 1950 into a working class family in Yorkshire. She left school at 15 to work in a factory. After leaving the psychiatric system she returned to education to study for GCEs. She has worked as a secretary for the NSPCC and within the health service. In 1979 she met Ian who she later married. She later graduated from university with a first-class degree in literature and psychology. Still living in Yorkshire with Ian, she now works in mental health. *The Dark Threads* is her first book.

Wasteland

Wasteland: The Thief Within provides an understanding of illness, especially mental illness. If there is no obvious physical pain, how can it hurt so much, and why does it rob us of who we are? Some advise, "Just don't think about it" or take a pill to make it all better. This is the author's story about surviving a major crippling depression, and her equally inexplicable climb back to normal life. "I hope to share what helped, what didn't, and what it was really like, so fellow sufferers and mental health professionals can learn a little more from one patient's view." Just as cancer does not define a patient, neither does depression. Author Mary Corran asks: "Where does the lust for suicide begin? For me, it was when I was very young. How can that lust be satisfied? And what comes once that passion has weakened, and you have to make yourself into a new person to live a new life?" There are many questions needing answers. Once you have your new life, do you forget the old? How, without religion, do you make yourself into a new person? What values do you wish to encompass? And do you ever forget that lust for death? About the Author: Mary Corran lives in Eastbourne, England. She was living the high life in London as a stockbroker, was married, had just completed three fantasy novels and was working on the fourth, when she became sick. She divorced the husband, adopted two cats, moved to the coast, and instead of writing fiction again, hopes to help others with this book. Publisher's website: <http://sbpra.com/MaryCorran>

What Have I Done?

'Such a raw, honest and important book' Giovanna Fletcher Like any new mum, Laura Dockrill felt rather overwhelmed after the birth of her son. But a slow recovery, sleep deprivation and anxiety quickly

escalated into postpartum psychosis, and she had to spend a fortnight in a psych ward, separated from her family. It was only when Laura began to put her ordeal into words that she began to find herself again, and recovery seemed within reach. This is Laura's raw, honest and life-affirming story of how she made it through one of the most frightening experiences a mother can face. Now, she wants to break down the silence around postnatal mental health, shatter the idealised expectations of perfect motherhood, and show all new struggling parents that they are not alone. 'A book to save a whole generation of women' Adele A pleasure to read...I didn't want to put it down. If anyone is going through a similar experience it will make them feel less alone' Philippa Perry 'A humbly honest and human war report from the front lines of mothering psychosis and recovery; there is no other book like it' Caitlin Moran 'An incredibly powerful book' Jessie Ware 'This book will give women and their families confidence that the brain and body will heal' Dr Jessica Heron, CEO of Action on Postpartum Psychosis 'An amazing read' Fiona Telford, postpartum psychosis survivor

My Beautiful Psychosis

A moving memoir following the author's own experience of psychosis What if psychosis is really a wake up call? Emma Goude is a twenty-something who works at the BBC. She likes to party and take drugs... until she decides to give them up... and that's when the insomnia starts. After five nights without sleep she ends up in A&E. Three questions determine whether she is sane or not. Three questions stand between her and the psychiatric ward. She gets them wrong. Emma is an atheist, a skeptical cynic who chose dope over God, so when she has some spiritual experiences she is not entirely sure if she is delusional. The psychiatric system has forgotten that 'psyche' means soul. All they know about is medication and they have ways of making her take it. It becomes a game she has to play in order to get out. It is also a perception of herself she must do battle with in order to stand strong in her belief that her psychosis is some kind of awakening.

Another Kind of Madness

WINNER: Best Autobiography/Memoir, 2018 Best Book Awards, sponsored by American Book Fest Glenn Close says: "Another Kind of Madness is one of the best books I've read about the cost of stigma and silence in a family touched by mental illness. I was profoundly moved by Stephen Hinshaw's story, written beautifully, from the inside-out. It's a masterpiece." A deeply personal memoir calling for an end to the dark shaming of mental illness Families are riddled with untold secrets. But Stephen Hinshaw never imagined that a profound secret was kept under lock and key for 18 years within his family—that his father's mysterious absences, for months at a time, resulted from serious mental illness and involuntary hospitalizations. From the moment his father revealed the truth, during Hinshaw's first spring break from college, he knew his life would change forever. Hinshaw calls this revelation his "psychological birth." After years of experiencing the ups and downs of his father's illness without knowing it existed, Hinshaw began to piece together the silent, often terrifying history of his father's life—in great contrast to his father's presence and love during periods of wellness. This exploration led to larger discoveries about the family saga, to Hinshaw's correctly diagnosing his father with bipolar disorder, and to his full-fledged career as a clinical and developmental psychologist and professor. In *Another Kind of Madness*, Hinshaw explores the burden of living in a family "loaded" with mental illness and debunks the stigma behind it. He explains that in today's society, mental health problems still receive utter castigation—too often resulting in the loss of fundamental rights, including the inability to vote or run for office or automatic relinquishment of child custody. Through a poignant and moving family narrative, interlaced with shocking facts about how America and the world still view mental health conditions well into the 21st century, *Another Kind of Madness* is a passionate call to arms regarding the importance of destigmatizing mental illness.

All of Me

Imagine a life spent trying to discern where you are, how you got there, who you're with, and what has happened. You lose large chunks of time; abruptly, you find yourself wearing another person's clothes, sitting in the driver's seat of a car you don't remember driving, or cleaning up a meal you can't recall eating. For Kim Noble, renowned artist and mother whose body plays host to over 20 distinct personalities, this is normal life. After many years in and out of mental institutions and various diagnoses that she knew instinctively to be wrong, in 1995 Noble was finally diagnosed with dissociative identity disorder (DID). A condition typically prompted by severe abuse during childhood, DID is thought to be a creative way some minds splinter in order to cope with unbearable pain. Alternately taking possession

of Noble's body are, among others, a scared little boy who speaks only Latin, an elective mute, a gay man, and an anorexic teenager. Then there is Patricia, the stable and loving now-dominant alter who was able to win back custody of Noble's daughter, Aimee. All of Me traces Noble's tumultuous and fragmented life from childhood onward, providing insight into the intersections between memory, mental illness, and creativity. It is by turns shocking, inspiring, sometimes funny, and deeply moving. Book jacket.

Don't F*cking Kill Yourself: A Memoir of Suicide, Survival, and Stories That Keep Us Alive

In February 1996, Jeff Romig's father died by suicide. Until that moment, there was no sign that his father had been contemplating suicide. Steve Romig was always so driven. Hard-working. Successful. No sign of the inner turmoil of anxiety and depression Jeff was also feeling at 18 years old. In *Don't F*cking Kill Yourself*, Jeff Romig details his own battles against anxiety, depression, and suicidal ideation while sharing his stories about the people, passions, and experiences that have kept him alive through mental illness, divorce, alcoholism, cancer, and the legacy of his father's suicide. In Jeff's own words, this is not a self-help book. It is a memoir in service of two potentially life-saving ideas: that we can reduce the stigma around suicidal ideation by sharing our stories and that we can push through our darkest moments of suicidal thoughts by connecting our minds with the passions, people, and experiences that define the best parts of our lives.

The Stranger on the Bridge

The life-affirming memoir of mental health activist Jonny Benjamin and his inspirational journey from despair to hope. With a foreword by the Duke of Cambridge. In 2008, twenty-year-old Jonny Benjamin stood on Waterloo Bridge, about to jump. A stranger saw his distress and stopped to talk with him - a decision that saved Jonny's life. Fast forward to 2014 and Jonny, together with Rethink Mental Illness, launch a campaign with a short video clip so that Jonny could finally thank the stranger who put him on the path to recovery. More than 319 million people around the world followed the search. ITV's breakfast shows picked up the story until the stranger, whose name is Neil Laybourn, was found and - in an emotional and touching moment - the pair reunited and have remained firm friends ever since. *The Stranger on the Bridge* is a memoir of the journey Jonny made both personally, and publicly to not only find the person who saved his life, but also to explore how he got to the bridge in the first place and how he continues to manage his diagnosis of schizoaffective disorder. Using extracts from diaries Jonny has been writing from the age of thirteen, this book is a deeply personal memoir with a unique insight on mental health. Jonny was recognized for his work as an influential activist changing the culture around mental health, when he was awarded an MBE in 2017. He and Neil now work full-time together visiting schools, hospitals, prisons, and workplaces to help end the stigma by talking about mental health and suicide prevention. The pair ran the London Marathon together in 2017 in aid of HeadsTogether. Following the global campaign to find the stranger, in 2015 Channel 4 made a documentary of Jonny's search which has now been shown in 14 territories.

From Out of a Dark Corner

"From Out of a Dark Corner" is a true story of the work I did in a halfway house for young people with major mental illness. I organized a musical group there and met a man with severe Obsessive Compulsive Disorder, (O.C.D), who had a beautiful voice and was living in the facility. He had been in and out of state hospitals for over twenty years, taking medication for his disorder, which caused him to act very drugged. He was erroneously diagnosed with schizophrenia from several psychiatrists over the years and was destined to live a terrible life, never knowing what living on the "outside" would be like. I had just graduated Florida International University with a degree in psychology and applied whatever knowledge I had about mental illness in order to help this man. At the time I was married to another man but later divorced him because I fell in love with "Marty." Also, after reading Dr. Leonard Cammer's book, "Freedom from Compulsion" I diagnosed Marty's problem correctly and spent years helping him with his repetitive rituals and excessive hand washing. I was also able to help him relive his childhood with his mentally sick mother until he got much better. I chose the title "From Out of a Dark Corner" because "Marty" spent day after day sitting in his bedroom, in a corner, not doing much of anything except attending the halfway house which was no help to him. Today, "Marty" doesn't take any medication for O.C.D. and lives a normal life, singing professionally and socializing with my friends, who do not know of his past. He also helped me to leave "my dark corner" so to speak, because I always feared that I would become psychotic like my poor mother was, suffering in a state hospital, as

she did. This didn't happen and I am very grateful to "Marty" because his love also helped me to leave "my dark corner." This is an uplifting story, something we can all benefit from in today's world.

Bloodletting

Bloodletting/ - , letting/ n. 1. Phlebotomy, the act or process of letting blood or bleeding, as by opening a vein or artery. 2. Outmoded medical practice used as a cure for illnesses ranging from fevers to hysteria. Bloodletting is a frank, compelling and at times darkly humorous memoir boldly challenging the silence surrounding one of mental health's last taboos. A close relative of bulimia and anorexia, it is estimated that up to 1 per cent of the population has intentionally harmed itself - yet for the most part it is a behaviour that goes unspoken, dismissed as the attention-seeking actions of prison in-mates or delinquent teenagers. If you had run into Victoria on the street during her darkest days you would never have known the torment she endured. Confident, polite and articulate she could have been your sister, your workmate, your friend, your lover. Yet from her late teens and throughout her twenties Victoria Leatham struggled with the overwhelming desire to hurt herself, a desire that was all-consuming and shaped every aspect of her life. And while not everyone who feels stressed, insecure or depressed will physically turn upon themselves, anyone who has ever felt out of control will recognise the logic that drove her. Today Victoria is a happy, successful 30-something professional who only occasionally glances sideways at the bathroom cabinet.

Mind You the Realities of Mental Illness: A Compilation of Articles from the Blog Mind You

The blog has had about 75,000 views and has been read in 151 different countries since 2014. The posts reflect ideas about mental illness, health and life that can be debated and discussed so that we can come to a higher understanding of the issues. And, we have separated out mental illness from mental health because, despite their often interchangeability, they are distinct. Mental illness as a medical condition that disrupts a person's thinking, feeling, mood, ability to relate to others and daily functioning. Just as diabetes is a disorder of the pancreas, mental illnesses are medical conditions that often result in a diminished capacity for coping with the ordinary demands of life. Serious mental illnesses include major depression, schizophrenia, bipolar disorder, obsessive compulsive disorder (OCD), panic disorder, post traumatic stress disorder (PTSD) and borderline personality disorder. In contrast, mental health is a state of well-being in which every individual realizes his or her own potential, can cope with the normal stresses of life, can work productively and fruitfully, and is able to make a contribution to her or his community. That is quite different from mental illness. Unfortunately there is a tendency to confuse these. Unfortunately, there tendency to talk about mental health issues and problems which are not the same as mental illnesses.

Madness: a Memoir

Winner of the Adelaide Festival Awards for Literature 2014 nonfiction prize. Shortlisted for the Queensland Literary Awards 2013 nonfiction prize. It's not every day you get to admit you're mad. The thing with psychosis is that when I'm sick I believe the delusional stuff to the same degree that you might know the sky is above and the earth below. And if someone were to say to me that the delusional thinking is, in fact, delusional, well that's the same as if I assure you now that we walk on the sky. Of course you wouldn't believe me, and that's why it's sometimes so hard for people who are sick like this to know that they need treatment. Psychosis and severe depression have a huge effect on how you relate to other people and how you see the world. It's a bit like being in a vacuum, or behind a wall of really thick glass . . . you lose any sense of connectedness. You're cast adrift from everyone and everything that matters. I've lived with acute psychosis and depression for the best part of twenty years. This is the story of my journey from chaos to balance, and from limbo to meaning. Kate Richards is a trained doctor currently working in medical research. 'Demands to be read' Sunday Age 'Heart wrenching, mind bending' Daily Telegraph 'A mysteriously beautiful book' Michael McGirr, The Age 'A gifted writer and storyteller' Courier-Mail 'Astonishing' Herald Sun

Recovered, Not Cured

A compelling visual and verbal journey exploring the author's experience of schizophrenia: the first signs, reactions from friends and family, how he sought help, the challenges of recovery.

Possessing Me

Description Inside the Insane is a first hand account of life inside a psychiatric crisis ward in Los Angeles, California. From patients suffering from chronic paranoid schizophrenia to bipolar disorder disease, to major depressive disorder, Inside the Insane takes the reader inside the walls of the mentally insane and manifests the realities of the human condition. Erica provides detailed accounts of patients screaming in restraints, to being locked in seclusion, to suffering from over medication, in radical raw detail. She also takes a look at the mental health system in Los Angeles County and exposes the concealed world of how society treats the mentally ill. From locked institutions, to board and cares, to living on the streets in Skid Row, the horrific conditions surrounding the life of a person suffering from a mental illness is explicitly exposed. Told through the eyes of a person dealing with her own mental illness, Inside the Insane also takes the reader on a personal journey of Erica's manic self-destruction, deep depression, and the process of treatment, medication and recovery. Her authentic journal entries beginning in 1999 expose her mental illness before knowledge of its existence. Her accounts of flying through the streets of New York, to sitting solemn on a fire escape in lonely depression, call attention to her life before treatment. As a result, an in-depth analysis of her own writings, coupled with the writings of previous renowned writers who also suffered from manic depression, underscores the potential to discover a person suffering from a mental illness prior to a first mental break. Such a discovery offers the chance to anticipate a mental illness and can help an individual seek treatment before it results in a suicide attempt, or a hospitalization. In 2005, Erica was diagnosed with chronic hypomania, Bipolar II, which was a turning point in her life as she began the process of psychiatric treatment. True journal accounts of her ongoing attempt to find the right medication to balance her highs and lows reveal the struggles she endures and how she works to handle that condition on an ongoing basis. She also discloses how her condition affects family and friends, and how those relationships are defined and redefined before and after the discovery of her disease. This groundbreaking expose opens the door to a world that has traditionally been locked up and ignored, and exposes it with shocking detail as the hidden truths inside the minds of the insane are intensely uncovered. About the Author Erica Loberg was born in 1977 and raised in Los Angeles, California. She received her Bachelor's in English from Columbia University. Erica was diagnosed with chronic hypomania, Bipolar II, in 2005 and continues down the road of psychiatric treatment. Currently, she lives in downtown LA and works with the mentally ill, who inspired her to write this book. This is Erica's first book.

Inside the Insane

When I was 15, my house caught on fire. Ever since then I have experienced auditory hallucinations. This is my chance to rant, cry, laugh, and prove to the world that schizos can be successful. This is my chance to show that people with mental illnesses can do well. This story shows my ups, my downs, and random things that people will probably either laugh or cry out of embarrassment. But I know you should read it if you ever had someone struggle with a mental illness, or if you yourself ever have. This is my memoir. People ask me, "Hey, aren't you a bit young to write that?" And they aren't wrong. But if I can help even one person, well that will be worth it. -Your Favorite Schizo

Diary of a Schizo Bitch

Shortlisted for the Wellcome Book Prize 2019 '[A] painfully intense, courageous and gripping account of [Fanning's] journey to the underworld of madness and back. This is a brave and instructive book.' Irish Times 'Extraordinary. An account of mental illness, grief, delusions, homelessness, a fractured family relationship ... and all while trying to recover and create. Superb writing on a frequently difficult subject.' Sinéad Gleeson Arnold Thomas Fanning had his first experience of depression during adolescence, following the death of his mother. Some ten years later, an up-and-coming playwright, he was overcome by mania and delusions. Thus began a terrible period in which he was often suicidal, increasingly disconnected from family and friends, sometimes in trouble with the law, and homeless in London. Drawing on his own memories, the recollections of people who knew him when he was at his worst, and medical and police records, Arnold Thomas Fanning has produced a beautifully written, devastatingly intense account of madness - and recovery, to the point where he has not had any serious illness for over a decade and has become an acclaimed playwright. Fanning conveys the consciousness of a person living with mania, psychosis and severe depression with a startling precision and intimacy. Mind on Fire is the gripping, sometimes harrowing, and ultimately uplifting testament of a person who has visited hellish regions of the mind. 'Arnold Thomas Fanning offers the most vivid and unflinching window into the mind of someone who is in the throes of madness ... It was like nothing I'd read before' Rick Edwards 'Mind on Fire is a truly powerful, arresting, haunting account. Arnold Thomas Fanning has reckoned with the darkest matter of his heart and mind, and I challenge anyone not to

be moved by that.' Sara Baume, author of *Spill Simmer Falter Wither* and *A Line Made by Walking* 'In this strange and singular book, Arnold Thomas Fanning mercilessly excavates the infernal underworld of his own years of madness. As reminiscent as it occasionally is of John Healy's *The Grass Arena*, and even of Orwell's *Down and Out in Paris and London*, the book is ultimately not quite like anything else I've read, and brought me as close to the lived reality of mental illness as I have ever been. It's a significant achievement: a painful, inexorable work of autobiography, whose existence is its own form of redemption.' Mark O'Connell, Baillie Gifford Prize-shortlisted author of *To Be a Machine* 'This is an extraordinary memoir about how it feels to be depressed, delusional, desperate' *The Observer* 'Incredibly important' Emilie Pine, author of *Notes to Self* 'A ratcheting pace, a tight first-person immediacy, and utterly staggering to be a passenger over its entire warped course ... An indelible, ground-shaking account' Hilary A White, *Irish Independent*, *Memoir of the Year*, *Best Reads of 2018* 'A spellbinding memoir that should prove both moving and hopefully cathartic for the reader.' *RTE Culture* 'Told in tight and immediate first-person, and imbued with a startling momentum that ratchets unnervingly, Fanning's publishing debut ... is a significant achievement and should be a talking point in publishing this year.' *Irish Independent* 'Fanning's debut book lays it on the line in a deeply personal and compelling chronicle of his descent into depression and his way back out.' *RTE Guide* 'Wonderful' Joseph O'Connor, *Irish Times Books of the Year* 'Unsparingly direct, searing and honest ... It is gripping to read and must have been exhausting to live' *Medical Independent* 'One of the most gripping and revealing memoirs I've read in a long time. A controlled and artful exploration of absolute loss of control, an unsettling and at times very moving reconstruction of a period of serious mental illness, *Mind on Fire* is a beautiful book about a terrifying thing.' Mark O'Connell, *Irish Times Books of the Year* 'Gripping' Sinéad Gleeson, *Irish Times Books of the Year* 'Shocking' Liz Nugent, *Irish Times Books of the Year* 'Poignant, beautifully detailed memoir' Sarah Gilmartin, *Irish Times*, *Best debuts of 2018* 'Brave and illuminating' *Sunday Business Post* 'This is the type of account that not only grips you wholesale as the pages flutter past, it also changes your very perception of psychology' Hilary A White, *Sunday Independent* *Memoir of the Year*

Mind on Fire

This is the story of a woman's struggle with mental illness through which she finds spiritual meaning and, ultimately, God. As a person who has experience severe psychiatric illness and landed on her feet, Marcia A. Murphy offers a unique first-person perspective. She is qualified to tell what such illness is like, its symptoms, stigmatization, hospitalizations, and daily life. Ms. Murphy takes you into her world and provides insights into the spiritual meaning of her illness. Her story gives desperately needed hope to others who are ill, their families, psychiatric professionals, as well as to those who know someone who is ill. Experts in the field from Harvard, Yale, Boston University, the University of Iowa and elsewhere have endorsed this memoir. **WHAT THE BOOK OFFERS:** General Readers will learn what it is like to experience mental illness and gain compassion for those with such illness. Those with mental illness may be encouraged and given hope. Those who treat persons with such illness will gain appreciation of what recovery means and how it may be achieved.

Voices in the Rain

Each one of us wants to protect and nurture our loved ones. But if a friend or family member is grappling with a mental illness, it's likely there will have been times when you have felt powerless to help. Having spent years in psychiatric hospitals, Gisel Josy has learned that ultimately, recovery is a decision - a choice that a patient must make. But the first steps are rarely made alone; loved ones can provide the incentive needed to help someone start on the road to full recovery. Through detailing her own struggles with borderline personality disorder and Anorexia Nervosa, Gisel is determined to answer the questions that people might have about such an experience, from her perspective as a survivor. What exactly makes recovery feel so tough? Why might someone appear to be choosing not to recover? There are still many misinterpretations surrounding issues with mental health, which Gisel is passionate about dispelling. This book is more than an informative memoir; it is a heartfelt personal story, which the author hopes will impact on many people's lives, for the better.

Why Can't You Hear Me?: My Recovery from Borderline Personality Disorder & Anorexia Nervosa

This book is my way of sharing what has gone on in my life and how I have dealt with the horrors of hallucinations. It includes my faith, my love and my journey through a considerable amount of pain and confusion. I wanted to tell my story because I know there is so much mental illness out there and still

people are out there that don't get help. I didn't for a number of years until I was forced to get help by my grandparents. This did change my life and my sense of self-worth. I realize now that no one should have to go at it alone. I hope through the pages of this book you will not feel alone anymore. There are people like us fighting the stigma every day. Join the many of us who have been fighting for ourselves and our family members with mental illness. Thank you and I hope you enjoy Living with Hallucinations.

Living with Hallucinations

This book brings readers straight inside the tortuous nature of the disease of schizophrenia, chronicled in short, journal-like chapters that narrate the author's incredible story. Experience the inner world of a woman with schizophrenia in this brutally honest, lyrical memoir. Have you ever wondered what it is like in the mind of a person with schizophrenia? How can one survive day after day unable to distinguish between one's inner nightmares and the everyday realities that most of us take for granted? In her brutally honest, highly original memoir, Kristina Morgan takes us inside her head to experience the chaos, fragmented thinking, and the startling creativity of the schizophrenic mind. With the intimacy of private journal-like entries and the language of a poet, she carries us from her childhood to her teen years when hallucinations began to hijack her mind and into adulthood where she began abusing alcohol to temper the punishing voices that only she could hear. This is no formulaic tale of tragedy and triumph: We feel Kristina's hope as she pursues an education and career and begins to build strong family connections, friendships and intimacy-and her devastation as the insistent voices convince her to throw it all away, destroying herself and alienating everyone around her. Woven through the pages of her life are stories of recovery from alcoholism and the search for her sexual identity in relationships with both women and men. Eventually, her journey takes her to a place of relative peace and stability where she finds the inner resources and support system to manage her chronic illnesses and live a fulfilling life.

Mind Without a Home

After her journey through madness Mary O'Hagan realised the mental health system and society did more harm than good. 'Madness Made Me' is a myth-busting account of madness and our customary responses to it through the lens of lived experience. O'Hagan's journey took her from the psychiatric hospital to the United Nations and many places in between as a leader in the international mad movement. Her fundamental message is that madness is profoundly disruptive but full human experience. The trouble is most people don't see it that way, from the experts who make up clever theories about brain disease to the people down the road who have irrational fears about mad axe-murderers. 'Madness Made Me' is a compelling and beautifully written book that uncovers widespread injustice. It ends with vision for a world that holds hope for people with mental distress and treats them with respect and humanity.

Madness Made Me

Kim Noble is an accomplished artist whose work has been exhibited around the world. She is a mother with a 13-year-old daughter. She is a bubbly and vivacious woman. To meet her you wouldn't think anything was wrong. But when Kim was younger than five years old, her personality splintered and fractured. In 1995 she was finally diagnosed with Dissociative Identity Disorder (DID) which has been described as a creative way to cope with unbearable pain. Now her body plays host to more than 20 different personalities, or 'alters'. There are women and men, adults and children; there is a scared little boy who speaks only Latin, an elective mute, a gay man and an anorexic teenager. Some alters age with her body; others are stuck in time. ALL OF ME takes the reader through the extraordinary world of a woman for whom the very nature of reality is different. It will tell of her terrifying battles to understand her own mind; of her desperate struggle against all odds to win back the child she loved; and of her courage and commitment in trying to make sense of her life. It is by turns shocking, inspiring, sometimes funny, and deeply moving.

All Of Me

With an introduction by Andrew Solomon 'It stands alone in the literature of manic depression for its bravery, brilliance and beauty.' Oliver Sacks I was used to my mind being my best friend. Now, all of a sudden, my mind had turned on me: it mocked me for my vapid enthusiasms; it laughed at all of my foolish plans; it no longer found anything interesting or enjoyable or worthwhile. Dr Kay Redfield Jamison is one of the foremost authorities on manic depression (bipolar disorder) - and has experienced

its terrors and cruel allure first-hand. While pursuing her career in medicine, she was affected by the same exhilarating highs and catastrophic lows that afflicted many of her patients. From her jubilant childhood to the disquiet that has dominated her adult life, she charts a journey through her own mind, and those of others. *An Unquiet Mind* is a definitive examination of manic depression from both sides: doctor and patient, the healer and the healed. A classic memoir of enormous candour and courage, it teems with the wit and wisdom of its creator.

An Unquiet Mind

Me and Him: A Guide to Recovery reveals the shock discoveries that cast Karen Tyrrell's first memoir *Me and Her: A Memoir of Madness* in a new light. An Australian author and teacher, Karen highlights the crucial role her husband Steve played, as carer, in her recovery from parent harassment and subsequent mental illness. In this self-help memoir, Karen shares practical mental-wellness advice, demystifies meditation, addresses sleep problems, and explains how to beat depression and anxiety. Karen also discloses the dreaded secrets Steve finally revealed to her. On that fateful blue-sky day, my life as I knew it fell apart. 'You better rewrite that memoir of yours. What I'm going to tell you now will change everything.' What secrets did Steve finally divulge six years on? What impact did those revelations have on their marriage and Karen's recovery?

Me and Him

Kate Richards experienced episodes of depression and psychosis well into her adult life. As a trained doctor working in medical research, she is well positioned to ask the hard questions about how we care for our people with mental illness. Using case studies and her own observations, Kate challenges the common belief that patients are responsible - even somehow to blame - for the existence of their illness. To the best of their ability, they are responsible for its management, but they did not create it. She argues for empowering patients and their families to be active members of treatment teams. She suggests that along with the right medication, sustained healing requires psychiatrists and other mental health professionals to reach out across the patient-therapist divide and find an essential human connection.
