I-SPY Cool Cars

Spain is an immemorial land like no other, one that James A. Michener, the Pulitzer Prize-winning author and celebrated citizen of the world, came to love as his own. Iberia is Michener's enduring nonfiction tribute to his cherished second home. In the fresh and vivid prose that is his trademark, he not only reveals the celebrated history of bullfighters and warrior kings, painters and processions, cathedrals and olive orchards, he also shares the intimate, often hidden country he came to know, where the congeniality of living souls is thrust against the dark weight of history. Wild, contradictory, passionately beautiful, this is Spain as experienced by a master writer. BONUS: This edition includes an excerpt from James A. Michener's Hawaii. Praise for Iberia "From the glories of the Prado to the loneliest stone villages, here is Spain, castle of old dreams and new realities."—The New York Times "Massive, beautiful . . . unquestionably some of the best writing on Spain [and] the best that Mr. Michener has ever done on any subject."—The Wall Street Journal "A dazzling panorama . . . one of the richest and most satisfying books about Spain in living memory."—Saturday Review "Kaleidoscopic . . . This book will make you fall in love with Spain."—The Houston Post

I-SPY Creepy Crawlies

Plymouth University academic, Dr Charlie Mansfield approaches literary tourism in this book initially from an historical perspective in order to define the phenomenon through a review of the existing academic literature in the field. The forms of literary tourism are analysed to provide a typology and from this the value of literary tourism is explained both from the visitor's point of view and the destination manager's. Current theories underpinning the existing literature on literary tourism, including Bourdieu's concept of cultural capital are reviewed. To extend the current state of research and to answer the research questions a case study of successful urban literary tourism is identified, in Brittany, France. The uses of French literature in literary tourism are reviewed to provide a sound basis on which to examine French texts and tourist destinations. Novel methods of field research are developed to formalise and to make reproducible the methodology for this study and for future work drawing on, and seeking to combine both literary theory and ethnography. Following a pilot study on the French Riviera the full discovery instruments are designed and applied in fieldwork on the case destination, Concarneau, using the detective novel, *The Yellow Dog*, which is set in Concarneau. Analysis of the findings from this provide a new contribution to the field of literary theory, in the area of reader interpellation, and answer the research questions in the form of a new set of recommendations for DMOs and tourism stakeholders. From the empirical study that used Web 2.0 social media, only available since 2013, an analysis of which novels do stimulate literary tourism is presented for the first time. Out of the research process new methods have been evolved, and are presented in the conclusion, for the DMO to synthesise and leverage digital resources. This provides DMOs with interpretation processes for its managed heritage to use with its local stakeholders in hotels and in tourism businesses. Finally, an innovative conceptualisation of what constitutes tourism knowledge is proposed.

This volume gathers 19 papers first presented at the 5th International Symposium of the ICA Commission on the History of Cartography, which took place at the University of Ghent, Belgium on 2-5 December 2014. The overall conference theme was 'Cartography in Times of War and Peace', but preference was given to papers dealing with the military cartography of the First World War (1914-1918). The papers are classified by period and regional sub-theme, i.e. Military Cartography from the 18th to the 20th century; WW I Cartography in Belgium, Central Europe, etc.

A comprehensive monograph on the work of KAWS, one of the most sought-after artists and creative forces of our time. Drawing from Pop art traditions, KAWS's work straddles the line between fine art and popular culture, crossing the mediums of painting and sculpture, along with fashion, merchandise, vinyl toys, and, most recently, augmented reality. This book, made in close collaboration with the artist, features his most well-known works alongside sketches, preparatory drawings, and never-before-seen images of KAWS at work, revealing the meticulous process behind his iconic artworks. Accompanying a major retrospective exhibition at the Brooklyn Museum, it captures the artist's unique ability to reshape the ways we think about contemporary art and culture today.

Dinosaur Quest

Targeted at 7-11-year-olds, this book captures the extraordinary world of the dinosaurs. Tracing the rise and fall of the dinosaur dynasties, it tells their story through the tales of the modern dinosaur hunters, with illustrations by John Sibbick whose work has appeared in 'National Geographic' and David Attenborough's TV programmes.

Paul Sereno

Overview of life and work of paleontologist Paul Sereno.

The Great Dinosaur Hunters and Their Discoveries

A survey of the noted paleontologists who have uncovered and studied dinosaur fossils including information on their findings

The Dinosaur Hunters: A True Story of Scientific Rivalry and the Discovery of the Prehistoric World
(Text Only Edition)

The story of two nineteenth-century scientists who revealed one of the most significant and exciting events in the natural history of this planet: the existence of dinosaurs.

Meat-Eating Dinosaurs

What's scarier than a hungry dinosaur the size of a bus? This book brings readers face to face with the terrifying meat-eating dinosaurs that walked the earth millions of years ago. Readers will learn about dino hunters big and small, as they discover amazing renderings of each creature and exciting fast facts. This book discusses dinosaur behaviors, such as nest building, and hunting strategies, such as pack hunting. Readers will love this up-close guide to these deadly prehistoric predators.

Flying Dinosaurs

Dinosaurs didn't die out when an asteroid hit Earth 66 million years ago. Get ready to unthink what you thought you knew and journey into the deep, dark depths of the Jurassic. The discovery of the first feathered dinosaur in China in 1996 sent shockwaves through the palaeontological world. Were the feathers part of a complex mating ritual, or a stepping stone in the evolution of flight? And just how closely related T. rex to a chicken. Award-winning journalist John Pickrell reveals how dinosaurs developed flight and became the birds in our backyards. He delves into the latest discoveries in China, the US, Europe and uncovers a thriving black market in fossils and infighting between dinosaur hunters, plus the controversial plan to use a chicken to bring dinosaurs back from the dead.

Dinosaur Dig (ENHANCED eBook)

Charts, time lines, diagrams, models they make themselves, dramatized stories, maps and much more will help students discover what dinosaurs looked like, what they ate and when and where they lived. They'll also learn about dinosaur hunters (paleontologists) and what they do, including some impressive discoveries of famous dinosaur hunters who lived many years ago.

Dinosaur Hunters

Have you seen a telescope? What happens when you look through it? In this story, James and Molly used their telescope to help them hunt for dinosaurs. They had to be careful not to go too close to the dinosaurs!

Hunting Dinosaurs

An anecdotal journey into the world of dinosaur paleontology chronicles the international odyssey of a renowned photojournalist who traveled the world in search of the great fossil hunters and their discoveries

Danger in the Desert

Looks at the journeys of Roy Chapman Andrews who, in the early twentieth-century, led countless expeditions for the American Museum of Natural History in search of dinosaur fossils, facing dangers such as pythons, wild dogs, marauding bandits, sandstorms, and corrupt officials.

Dinosaur Hunters

Take a peek beneath the canopy of prehistoric forests to discover the world of dinosaurs. Spread-by-spread battles pit species against one another in scientifically accurate battles, while fact files give report writers the info they need at a glance.

Dinosaur Hunters in the Forest

Shelley is excited over the fossil rock she found at the beach, but when it goes missing she suspects her cousin's friend, Marcus, of stealing it, until Topper, her cousin's dog, helps solve the mystery.

Fossil Hunters

Every year millions of museum visitors marvel at the skeletons of dinosaurs and other prehistoric creatures discovered by John Bell Hatcher whose life is every bit as fascinating as the mighty bones and fossils he unearthed. Hatcher helped discover and mount much of the Carnegie Museum's world

famous, 150 million-year-old skeleton of Diplodocus, whose skeleton has captivated our collective imaginations for over a century. But that wasn't all Hatcher discovered. During a now legendary collecting campaign in Wyoming, Hatcher discovered a 66 million-year-old horned dinosaur, Torosaurus, as well as the first scientifically significant set of skeletons from its evolutionary cousin, Triceratops. Refusing to restrict his talents to enormous dinosaurs, he also discovered the first significant sample of mammal teeth from our relatives that lived 66 million years ago. The teeth might have been minute, but this extraordinary discovery filled a key gap in humanity's own evolutionary history. Nearly one hundred and twenty-five years after Hatcher's monumental "hunts" ended, acclaimed paleontologist Lowell Dingus invites us to revisit Hatcher's captivating expeditions and marvel at this real-life Indiana Jones and the vital role he played in our understanding of paleontology.

King of the Dinosaur Hunters

This handbook is the essential field guide for all new dinosaur hunters. Do you have what it takes to join the D-Team?

Dinosaur Hunter's Handbook

Anecdotal account of dinosaur discoveries and the exciting and controversial lives of men and women who made scientific history

Dinosaur Hunters

Hunt for dinosaurs just like a real paleontologist! Study the fully-illustrated book to learn how fossils are located and collected, how and why they are studied, and what we've been able to learn about dinosaurs. Read authentic-looking field notes from a dig, then write your own as you begin to excavate the kit's rock slab to uncover your own replica of an Apatosaurus fossil. Also in the Discovery Kit™ series

The Dinosaur Hunter's Kit

'The Dinosaur Hunters' tells the story of our discovery of dinosaurs through the individuals who dedicated their lives to furthering our knowledge.

The Dinosaur Hunters

The story of the courageous enthusiasts and paleontologists who discovered the secrets of prehistoric life, published in association with the American Museum of Natural History.

The dinosaur hunters

It has been nearly 200 years since the first dinosaur remains were found in southern England, and in that time these fascinating creatures from long ago have lost none of their hold on our imagination. This book explores the history of dinosaurs and their time on earth. A detailed timeline traces the archaeological discoveries that inform today's study of prehistoric life, and clear, informative illustrations and diagrams explore different kinds of dinosaurs, their appearance and scale, habitats and intellect, and the fossils they left behind.

The Dinosaur Hunters

Recounts how different professional and amateur fossil hunters discovered the remains of many different species of dinosaurs.

Dinosaur Hunters

"Complete reference of dinosaurs for young readers."--

Great Dinosaur Hunters

SLIP back to the wild west and uncover the secrets of the dinosaurs.

This series explores exciting, real-world careers in science. Each title looks at a range of scientists in the field, the dangers and difficulties they face, and the training and tools necessary to do the job.

DK Adventures: Dinosaur Hunters

Simple text and color photographs introduce dinosaurs and the scientists who study them.

Dinosaur Hunters

Over the past six years, Michael Novacek, Dean of Science at the American Museum of Natural History, has led a team of international scientists to Mongolia's Gobi Desert on the greatest dinosaur expedition of the late twentieth century. Closed to the West since the 1920s and opened only to Michael Novacek's team, the remote sands of the Gobi Desert constitute the richest fossil site in the world. In "Dinosaurs of the Flaming Cliffs, Novacek takes the reader along with his team as he re-creates the day-to-day drama of field exploration over the last six years and recounts the remarkable discoveries that he and his colleagues unearthed. Following early years of relative disappointment, in 1993 the expedition discovered the richest Cretaceous dinosaur site ever found, excavating fossils that have helped to reshape our understanding of the dinosaur and early mammal era. Interweaving the adventure of field research with chapters that offer in depth discussions on contemporary dinosaur research and science, "Dinosaurs of the Flaming Cliffs makes for the best kind of science--an engrossing narrative that brings compellingly to life the thrill and excitement of scientific discovery.

Dinosaur Hunting

"A tour de force...highlights the odd reptiles that roamed all corners of the earth millions of years ago."—Sydney Morning Herald From the outback of Australia to the Gobi Desert of Mongolia and the savanna of Madagascar, the award-winning science writer and dinosaur enthusiast John Pickrell embarks on a world tour of new finds, meeting the fossil hunters who work at the frontier of discovery. He reveals the dwarf dinosaurs unearthed by an eccentric Transylvanian baron; an aquatic, crocodile-snouted carnivore bigger than T. rex that once lurked in North African waterways; a Chinese dinosaur with wings like a bat; and a Patagonian sauropod so enormous it weighed more than two commercial jet airliners. Other surprising discoveries hail from Alaska, Siberia, Canada, Burma, and South Africa. Why did dinosaurs grow so huge? How did they spread across the world? Did they all have feathers? What do sauropods have in common with 1950s vacuum cleaners? The stuff of adventure movies and scientific revolutions, *Weird Dinosaurs* examines the latest breakthroughs and new technologies that are radically transforming our understanding of the distant past. "This history of the discovery of some of the most outlandish creatures that ever lived, and the excitement of paleontological research, will be sure to both entertain and instruct."—Spencer Lucas, author of *Dinosaurs: The Textbook*, Sixth Edition "Fascinating.... Readers learn of beautiful opalised dinosaur bones from Australia and a crested dinosaur found approximately 13,000 feet up Antarctica's Mt. Kirkpatrick, demonstrating that dinosaurs were widely distributed across the globe."—Publishers Weekly

Dinosaurs of the Flaming Cliffs

Slip back to the Wild West with out intrepid time travelers, who are caught up in the rivalry between the dinosaur bone hunters Othniel Marsh and Edward Cope. Should they interfere with scientific discovery or leave well alone? An adventure of Wild West cowboys and Indians, steam trains and dinosaurs.

Weird Dinosaurs

Sharks and dinosaurs--we find them both alien and awe-inspiring. This book is a plunge into the Cretaceous oceans of 80 million years ago, a merciless realm ruled by the most ferocious animals ever to stalk the seas of planet Earth. More terrifying than anything known to humankind, it scarcely seems possible that these swift, massive underwater predators actually existed--but they did. The book interweaves dramatic scenes of the far, far distant past; scientific profiles of nearly two dozen sea monsters; and a group portrait of the eccentric Sternberg family, Kansas-bred pioneers of marine paleontology. From giant sharks and fierce reptiles to the fossil-hunters who proved that today's land-locked Great Plains were once submerged, this book will forever change how we think about marine predators.--From publisher description.

Dinosaur Hunters

Gideon Mantell uncovered giant bones in a Sussex quarry but Richard Owen, patronised by royalty and the government, scooped the credit for the discovery of the dinosaurs. Thus begin the bitter feud between these nineteenth century scientists. Their struggle was to create a new science that would change man's perception of his place in the universe.

Sea Monsters

T. rex, triceratops, pterosaurs, saber-toothed cats! This colorful reference book is jam-packed with 1,000 fascinating facts about what these prehistoric creatures looked like, how they lived, and the evidence they left behind. From dinosaurs like Stegosaurus and Giganotosaurus that ruled the land to the mammoths and giant sloths that followed them, discover all you have ever wanted to know about dinosaurs, fossils, and prehistoric life. Uncover amazing fossil facts about the first four-legged creatures; find out what it's like to be on a dinosaur dig; and marvel at some of the fiercest, most fascinating claws and teeth. Learn how dinosaurs and birds are connected, find out the biggest prehistoric mysteries that scientists are still trying to crack, and sink your teeth into some seriously supersize dino stats.

The Dinosaur Hunters

A collection of stories about dinosaur hunters and their incredible finds.

1,000 Facts about Dinosaurs, Fossils, and Prehistoric Life

More than 300 full-color photos and 90 carefully researched paintings highlight this fascinating, all-new look at dinosaurs. Includes the latest facts, field findings and theories as it reconstructs life in prehistoric times. Young Adult.

Dinosaur Hunters

Follow along as research scientist Adrienne Mayor searches for the origins of the mythical griffin - could such a creature be based in reality? While studying the classics in Greece, Adrienne came across accounts of an ancient creature, sometimes called bird-monster, griffin, or minotaur. Adrienne travels from Greece to the Gobi Desert in search of where an ancient race of fair-haired and pale nomadic horsemen called the Scythians hid their gold - gold that was rumored to be guarded by griffins.

Duel of the Dinosaur Hunters

This is the ultimate companion for every time-travelling dinosaur hunter. It contains all the key facts and spotter stats needed to locate more than 50 of the most awe-inspiring dinos to have walked the Earth - from Amargasaurus to Zhuchengosaurus. Colourful, punchy infographics are paired with in-your-face illustrations, helpful locator maps and a danger rating for every dinosaur. A comprehensive introduction explains the evolution of the dinosaurs, the different behaviour of plant-eaters and carnivores, as well as the catastrophic extinction event of 65 million years ago.

National Geographic Dinosaurs

Roland Thaxter Bird, universally and affectionately known to friends and associates as R. T., achieved a kind of Horatio Alger success in the scientific world of dinosaur studies. Forced to drop out of school at a young age by ill health, he was a cowboy who traveled from job to job by motorcycle until he met Barnum Brown, Curator of Vertebrae Paleontology at the American Museum of Natural History in New York and a leader in the study of dinosaurs. Beginning in 1934, Bird spent many years as an employee of the museum and as Brown's right-hand man in the field. His chart of the Howe Quarry in Wyoming, a massive sauropod boneyard, is one of the most complex paleontological charts ever produced and a work of art in its own right. His crowning achievement was the discovery, collection, and interpretation of gigantic Cretaceous dinosaur trackways along the Paluxy River near Glen Rose and at Bandera, Texas. A trackway from Glen Rose is on exhibit at the American Museum and at the Texas Memorial Museum in Austin. His interpretation of these trackways demonstrated that a large carnosaur had pursued and attacked a sauropod, that sauropods migrated in herds, and that, contrary to then-current belief, sauropods were able to support their own weight out of deep water. These behavioral interpretations anticipated later dinosaur studies by at least two decades. From his first meeting with Barnum Brown to his discoveries at Glen Rose and Bandera, this very human account tells the story of Bird's remarkable work on dinosaurs. In a vibrantly descriptive style, Bird recorded both the intensity and excitement of field work and the careful and painstaking detail of laboratory reconstruction. His memoir presents a

vivid picture of camp life with Brown and the inner workings of the famous American Museum of Natural History, and it offers a new and humanizing account of Brown himself, one of the giants of his field. Bird's memoir has been supplemented with a clear and concise introduction to the field of dinosaur study and with generous illustrations which delineate the various types of dinosaurs.

The Griffin and the Dinosaur

An introduction to the world of the dinosaur.

Dinosaur Hunter's Handbook

Presents the expedition journal of Samuel T King, a pioneer from the early days of dinosaur hunting. This title holds the clues to many dinosaur discoveries and possibly to an amazing, but forgotten find - the legendary dinosaurs' graveyard.
