IVP Readers' Choice Award Mission, missions, missional, and all its linguistic variations are part of the expanding vocabulary and rhetoric of the contemporary Christian missionary enterprise. Its language and assumptions are deeply ingrained in the thought and speech of the church today. Christianity is a missionary religion and faithful churches are mission-minded. What's more, in telling the story of apostles and bishops and monks as missionaries, we think we have grasped the true thread of Christian history. But what about those odd shapes, those unsettling gaps and creases in the historical record? Is the language of mission so clearly evident across the broad reaches of time? Is the trajectory of mission really so explicit from the early church to the present? Or has the modern missionary enterprise distorted our view of the past? As with every reigning paradigm, there comes a point when enough questions surface to beg for a close and critical look, even when it may seem transgressive to do so. In this study of the language of mission—its origin, development, and application—Michael Stroope investigates how the modern church has come to understand, speak of, and engage in the global expansion of Christianity. There is both surprise and hope in this tale. And perhaps the beginnings of a new conversation.

Merger mania is at an all-time peak. Yet up to 80 percent of mergers fail because of culture clashes, mismanagement, and the chaos that ensues. Taking this failure rate into account, merger experts Thomas M. Grubb and Robert B. Lamb have written the first book that arms managers with strategies to exploit the many growth and profit opportunities created when competitors are coping with merger chaos. Grubb and Lamb show why firms miss huge financial opportunities when they stay passive while their competitors struggle in merger chaos. They present a fast-paced primer for action when your corporate rivals merge, based on six strategies: Attack your competitors when they are distracted by their mergers' turmoil and confusion. Create a "magnet strategy" to attract and hire your merging competitors' best people while their companies are in a state of merger shock. Use the threat to your firm's survival caused by giant competitors' mergers in order to jump-start your own internal change. Use multiple alliances, networks, licensing, franchising, or joint ventures -- instead of mergers -- to fuel explosive growth. Plan and execute your firm's fast-track mergers and acquisitions. Create a composite strategy by using two or more of the above strategies simultaneously to maximize your growth and profitability. The authors analyze winning strategies at AOL, General Electric, Dell, Ford, Cisco Systems, and Vodaphone as well as failures at Coca Cola, Boeing, Union Pacific, Compaq, and Sunbeam. The result is "must" reading for operating managers at all levels, investment bankers, and mergers and acquisition specialists.

From Ideas to Assets

In *Ancient Wisdom for the Good Life*, Ralph K. Hawkins turns our attention to the Bible's Wisdom Literature (Job, Psalms, Proverbs, Ecclesiastes, and Song of Songs) and how it can correct us, train us in righteousness, and ultimately empower us for successful living. These are some of the most inspired writings on the Good Life the world has ever known, in which ancient Israel's sages wrote about how to live stable, harmonious, productive, and joyous lives. Together, they interlock to cover the entire field of wisdom, providing contemporary readers with the tools to develop a unified world view with God at the center. *Ancient Wisdom for the Good Life* culls out the guidance of ancient Israel's sages for a modern society that has been cut adrift from its moorings. Full of wisdom and practically written, this book could be used as a supplementary text in an undergraduate or seminary course in the Wisdom Literature, and it would certainly be useful for pastors in their sermon preparation or even just general reading. Table of Contents: Winning and the Wisdom Literature A Mindset of Integrity A Mindset of Community A Mindset of Communication A Mindset of Cause-and-Effect A Mindset of Goal-Setting A Mindset of Work A Mindset of Health A Mindset of Abundance A Mindset of Joy About the Author Ralph K. Hawkins (PhD, Andrews University) is professor of religion and director of the Program in Religion at Averett University. He is co-director of the Jordan Valley Excavation Project (JVEP) and the author of several books, including *The Iron Age I Structure on Mt. Ebal: Excavation and Interpretation* (Eisenbrauns), *How Israel became a People* (Abingdon Press), and *Discovering Exodus: Content, Interpretation, Reception* (SPCK/Eerdmans). An Anglican priest, Hawkins has also written pastoral books, including *While I Was Praying: Finding Insights about God in Old Testament Prayers* (Smyth & Helwys), and *Leadership Lessons: Avoiding the Pitfalls of King Saul* (Thomas Nelson).

Shared Leadership: Reframing the Hows and Whys of Leadership brings together the foremost thinkers on the subject and is the first book of its kind to address the conceptual, methodological, and practical issues for shared leadership. Its aim is to advance understanding along many dimensions of the shared leadership phenomenon: its dynamics, moderators, appropriate settings, facilitating factors, contingencies, measurement, practice implications, and directions for the future. The volume provides a realistic and practical discussion of the benefits, as well as the risks and problems, associated with shared leadership. It will serve as an indispensable guide for researchers and practicing managers in identifying where and when shared leadership may be appropriate for organizations and teams.

Shared Leadership

From the late 1850s to the 1940s, multiple colonial projects, often in tension with each other, influenced the formation of local, transimperial, and transnational political identities of Arab Ottoman subjects in the eastern Mediterranean and the Western Hemisphere. Arab Ottoman men, women, and their descendants were generally accepted as whites in a racially stratified Brazilian society. Local anxieties about color and race among white Brazilians and European immigrants, however, soon challenged the white racial status the Brazilian state afforded to Arab Ottoman immigrants. In *Transimperial Anxieties* José D. Najar analyzes how overlapping transimperial processes of migration and return, community conflicts, and social adaption shaped the gendered, racial, and ethnic identity politics surrounding Arab Ottoman subjects and their descendants in Brazil. Upon arrival to the Brazilian Empire, Arab Ottoman subjects were referred to as *turcos*, an all-encompassing ethnic identity encased in Islamophobia and antisemitism, which forced the immigrants to renegotiate their identities in order to secure the possibility of upward mobility and national belonging. By exploring the relationship between race and gender in negotiating international and interimperial politics and law, national identity, and religion, *Transimperial Anxieties* advances understanding of the local and global forces shaping the lives of Arab Ottoman immigrants and their descendants in Brazil, and their reciprocity to state structure.

Transimperial Anxieties

Technology Licensing

Arguing that the translation of scientific and technical learning materials, and the publication of these translations in a timely and affordable manner, is crucially important in promoting access to scientific and technical knowledge in the developing world, this book examines the relationship between copyright law, translation and access to knowledge. Taking Sri Lanka as a case study in comparison with India and Bangladesh, it identifies factors that have contributed to the unfavourable relationship between copyright law and the timely and affordable translation of scientific and technical learning materials, such as colonisation, international copyright law, the trade interests of the developing economies and a lack of expertise and general lack of awareness surrounding copyright law in the developing world. Highlighting the need to reform international copyright law to promote the needs and interests of developing countries such as Sri Lanka, the book points to a possible way forward for developing countries to achieve this and to address the problem of striking a proper and delicate balance in their copyright laws between the protection of translation rights and the ability of people to access translations of copyright protected scientific and technical learning materials.
