Teaser

Are mind and the brain same ?

How could we test the yogic science that you just explained ?

Are you an organ donor ?

Brain, no matter how important, is not the whole thing.

I have a tough time to understand the concept of consciousness.

Why don't the scientists trust the experience of the meditators ?

Should there be a balance between science and spirituality ?

Should we make a differentiation between consciousness and wakefulness ?

Sadhguru's explanation on body, mind and consciousness.

1. Why can humans access consciousness and not animals ?

What determines how much life you have captured ?

Can meditation help us capture a bigger bubble of life ?

Can my patients who suffer from anxiety benefit from meditation ?
