

Constructing The Black Masculine Identity And Ideality In African American Mens Literature And Cult

[#Black masculinity](#) [#African American literature](#) [#Male identity](#) [#Racial ideality](#) [#Cultural studies](#)

This insightful exploration delves into the intricate process of constructing Black masculine identity and ideality as depicted within African American men's literature and cultural narratives. It critically examines how literary works shape, challenge, and reflect perceptions of selfhood, societal expectations, and personal aspirations for Black men.

This collection represents the pinnacle of academic dedication and achievement.

Constructing the Black Masculine

Explores how African-American males have been portrayed in literature and society from 1775 to 1995.

Constructing the Black Masculine

Masculinity Under Construction: Literary Re-Presentations of Black Masculinity in the African Diaspora analyzes Black male identity as constructed by Black male authors. In each chapter, Dr. Jefferson-James discusses a different "construction" or definition of masculine identity produced by men of African descent on the continent of Africa, in the Caribbean, and in North America. Combing through the works of James Baldwin, Chinua Achebe, Ralph Ellison, George Lamming, and other pan-African authors, Masculinity Under Construction argues for the importance of analyzing the historical context that contributed to the formation of Black male identity. Additionally, Dr. Jefferson-James draws a relationship between Black feminists and writers, such as Anna Julia Cooper and her contemporaries, and these works of literature viewed as primarily about Black masculinity.

Constructing the Black Masculine

In seven representative episodes of black masculine literary and cultural history—from the founding of the first African American Masonic lodge in 1775 to the 1990s choreographies of modern dance genius Bill T. Jones—Constructing the Black Masculine maps black men's historical efforts to negotiate the frequently discordant relationship between blackness and maleness in the cultural logic of American identity. Maurice O. Wallace draws on an impressive variety of material to investigate the survivalist strategies employed by black men who have had to endure the disjunction between race and masculinity in American culture. Highlighting their chronic objectification under the gaze of white eyes, Wallace argues that black men suffer a social and representational crisis in being at once seen and

unseen, fetish and phantasm, spectacle and shadow in the American racial imagination. Invisible and disregarded on one hand, black men, perceived as potential threats to society, simultaneously face the reality of hypervisibility and perpetual surveillance. Paying significant attention to the sociotechnologies of vision and image production over two centuries, Wallace shows how African American men—as soldiers, Freemasons, and romantic heroes—have sought both to realize the ideal image of the American masculine subject and to deconstruct it in expressive mediums like modern dance, photography, and theatre. Throughout, he draws on the experiences and theories of such notable figures as Frederick Douglass, W. E. B. Du Bois, Booker T. Washington, and James Baldwin.

Masculinity Under Construction

Bachelor Thesis from the year 2013 in the subject English Language and Literature Studies - Literature, grade: 2,0, University of Wuppertal, language: English, abstract: Throughout many years, African Americans have been struggling in defining and constructing their identity, especially male African Americans had problems to build up self-esteem and to reassure their cultural masculinity, which was undermined by white men. Not only does history confirm this struggle but so does literature. In literature, many different aspects about male black identity and their struggle for identity can be found. However, one of the most important authors in this context is Langston Hughes. In his works, he focuses on the urban life of African Americans and the problems they had to face because of oppression and racism evoked by white Americans. Furthermore, Hughes wanted "to record and interpret the lives of the common black folk, their thoughts and habits and dreams, their struggle for political freedom and economic well-being" (Jemie: 1). By doing so in his writings, he took this struggle for and negotiation of racial identity to another level in developing a unique form of expression. In this thesis, I will concentrate on three major works by Langston Hughes: *Mulatto: A Tragedy of the Deep South*, "Simple speaks his mind" and *Not without laughter*. All three texts display emotional conflicts and the struggle for identity of African American men with "simplicity and depth" (Tidwell: 3). Furthermore, all three protagonists have a rather low status in society, which contributes, according to Langston Hughes, to their authenticity since they are the ones who represent the African American and thus their pursuit of identity (cf. Tidwell: 3). Moreover, I am going to begin with a general overview of the male black identity and the struggle for an African American male perspective in a culture which is dominated by white American men. Afterwards, I will transfer this concept of m

Constructing the Black Masculine

The English literary influence on classic American novelists' depictions of gender, sexuality, and race. With *All the Devils Are Here*, the literary scholar David Greven makes a signal contribution to the growing list of studies dedicated to tracing threads of literary influence. Herman Melville's, Nathaniel Hawthorne's, and James Fenimore Cooper's uses of Shakespeare and Milton, he finds, reflect not just an intertextual relationship between American Romanticism and the English tradition but also an ongoing engagement with gender and sexual politics. Greven limns the effect of Shakespeare's *Much Ado about Nothing* on Hawthorne's exploration of patriarchy, and he shows how misogyny in *King Lear* informed Melville's evocation of "the step-mother world" of orphaned men in *Moby-Dick*. Throughout, Greven focuses particularly on male authors' treatment of femininity, arguing that the figure of woman functions for them as a multivalent signifier for artistic expression. Ultimately, Greven demonstrates the ambitions of these writers to comment on the history of the Western tradition and the future of art from their unique positions as Americans.

Male Black Identity in Selected Works by Langston Hughes

Expanding our understanding of the possibilities and challenges inherent in the expression of same-sex desire before the Civil War, David Greven identifies a pattern of what he calls 'gender protest' and sexual possibility recurring in antebellum works. He suggests that major authors such as Margaret Fuller, Edgar Allan Poe, Herman Melville, and Nathaniel Hawthorne consciously sought to represent same-sex desire in their writings. Focusing especially on conceptions of the melancholia of gender identification and shame, Greven argues that same-sex desire was inextricably enmeshed in scenes of gender-role strain, as exemplified in the extent to which *The Narrative of Arthur Gordon Pym* depicts masculine identity adrift and in disarray. Greven finds similarly compelling representations of gender protest in Fuller's exploration of the crisis of gendered identity in *Summer on the Lakes*, in Melville's representation of Redburn's experience of gender nonconformity, and in Hawthorne's complicated delineation of desire in *The Scarlet Letter*. As Greven shows, antebellum authors not only took up the

taboo subjects of same-sex desire and female sexuality, but were adept in their use of a variety of rhetorical means for expressing the inexpressible.

All the Devils Are Here

While over the past decade a number of scholars have done significant work on questions of black lesbian, gay, bisexual, and transgendered identities, this volume is the first to collect this ground-breaking work and make black queer studies visible as a developing field of study in the United States. Bringing together essays by established and emergent scholars, this collection assesses the strengths and weaknesses of prior work on race and sexuality and highlights the theoretical and political issues at stake in the nascent field of black queer studies. Including work by scholars based in English, film studies, black studies, sociology, history, political science, legal studies, cultural studies, and performance studies, the volume showcases the broadly interdisciplinary nature of the black queer studies project. The contributors consider representations of the black queer body, black queer literature, the pedagogical implications of black queer studies, and the ways that gender and sexuality have been glossed over in black studies and race and class marginalized in queer studies. Whether exploring the closet as a racially loaded metaphor, arguing for the inclusion of diaspora studies in black queer studies, considering how the black lesbian voice that was so expressive in the 1970s and 1980s is all but inaudible today, or investigating how the social sciences have solidified racial and sexual exclusionary practices, these insightful essays signal an important and necessary expansion of queer studies. Contributors. Bryant K. Alexander, Devon Carbado, Faedra Chatard Carpenter, Keith Clark, Cathy Cohen, Roderick A. Ferguson, Jewelle Gomez, Phillip Brian Harper, Mae G. Henderson, Sharon P. Holland, E. Patrick Johnson, Kara Keeling, Dwight A. McBride, Charles I. Nero, Marlon B. Ross, Rinaldo Walcott, Maurice O. Wallace

Gender Protest and Same-Sex Desire in Antebellum American Literature

Representing Black Men focuses on gender, race and representation in the literary and cultural work of black men.

Black Queer Studies

The portrayal of black men in our national literature is controversial, complex, and often contradictory."In *Racial Myths and Masculinity in African American Literature*, Jeffrey B. Leak identifies some of the long-held myths and stereotypes that persist in the work of black writers from the nineteenth century to the present--intellectual inferiority, criminality, sexual prowess, homosexual emasculation, and cultural deprivation. Utilizing Robert B. Stepto's call-and-response theory, Leak studies four pairs of novels within the context of certain myths, identifying the literary tandems between them and seeking to discover the source of our culture's psychological preoccupation with black men. Calling upon interdisciplinary fields of study--literary theory, psychoanalysis, gender studies, legal theory, and queer theory--Leak offers ground breaking analysis of both canonical texts (representing the "call" of the call-and-response dyad) and texts by emerging writers (representing the "response"), including Frederick Douglass and Charles Johnson: Ralph Ellison and Brent Wade; Richard Wright and Ernest J. Gaines; and Toni Morrison and David Bradley. Though Leak does not claim that the "response" texts are superior to the "call" texts, he does argue that, in some cases, the newer work--such as Charles Johnson's *Oxherding Tale*--can address a theme or offer a narrative innovation not found in preceding texts, such as *Narrative of the Life of Frederick Douglass*. In these instances, argues Leak, the newer texts constitute not only a response to the call text, but a substantial revision. Leak offers the first in-depth criticism of black masculinity in a range of literary texts. In a final chapter, he expands his discussion to the emerging field of black masculinity studies, pointing to future directions for study, including memoir, film, drama, and others. Poised on the brink of exciting new trends in scholarship, *Racial Myths and Masculinity in African American Literature* is flagship work, enhancing the understanding of literary constructions of black masculinity and the larger cultural imperatives to which these writers are reacting.

Representing Black Men

Demonstrating the extraordinary versatility of African-American men's writing since the 1970s, this forceful collection illustrates how African-American male novelists and playwrights have absorbed, challenged, and expanded the conventions of black American writing and, with it, black male identity. From the "John Henry Syndrome"--a definition of black masculinity based on brute strength or

violence--to the submersion of black gay identity under equations of gay with white and black with straight, the African-American male in literature and drama has traditionally been characterized in ways that confine and silence him. Contemporary Black Men's Fiction and Drama identifies the forces that limit black male discourse, including traditions established by iconic African-American male authors such as James Baldwin, Richard Wright, and Ralph Ellison. This thoughtful volume also shows how contemporary black male authors use their narratives to put forward new ways of being and knowing that foster a more complete sense of self and more humane and open ways of communicating with and relating to others. In the work of Charles Johnson, Ernest Gaines, and August Wilson, contributors find paths toward broader, less rigid ideas of what black literature can be, what the connections among individual and communal resistance can be, and how black men can transcend the imprisoning models of hyper masculinity promoted by American culture. Seeking greater spiritual connection with the past, John Edgar Wideman returns to the folk rituals of his family, while Melvin Dixon and Brent Wade reclaim African roots and traditions. Ishmael Reed struggles with a contemporary cultural oppression that he sees as an insidious echo of slavery, while Clarence Major's experimental writing suggests how black men might reclaim their own voices in a culture that silences them. Taking in a wide range of critical, theoretical, cultural, gender, and sexual concerns, Contemporary Black Men's Fiction and Drama provides provocative new readings of a broad range of contemporary writers.

Racial Myths and Masculinity in African American Literature

By examining lesser-known forms of black captivity, *Bound to Respect* challenges the commonplace narrative that the African American experience of captivity in the United States is reducible to the legal institution of slavery, a status remedied through emancipation.

Contemporary Black Men's Fiction and Drama

Simone C. Drake spent the first several decades of her life learning how to love and protect herself, a black woman, from the systems designed to facilitate her harm and marginalization. But when she gave birth to the first of her three sons, she quickly learned that black boys would need protection from these very same systems—systems dead set on the static, homogenous representations of black masculinity perpetuated in the media and our cultural discourse. In *When We Imagine Grace*, Drake borrows from Toni Morrison's *Beloved* to bring imagination to the center of black masculinity studies—allowing individual black men to exempt themselves and their fates from a hateful, ignorant society and open themselves up as active agents at the center of their own stories. Against a backdrop of crisis, Drake brings forth the narratives of black men who have imagined grace for themselves. We meet African American cowboy, Nat Love, and Drake's own grandfather, who served in the first black military unit to fight in World War II. Synthesizing black feminist and black masculinity studies, Drake analyzes black fathers and daughters, the valorization of black criminals, the black entrepreneurial pursuits of Marcus Garvey, Berry Gordy, and Jay-Z, and the denigration and celebration of gay black men: Cornelius Eady, Antoine Dodson, and Kehinde Wiley. With a powerful command of its subjects and a passionate dedication to hope, *When We Imagine Grace* gives us a new way of seeing and knowing black masculinity—sophisticated in concept and bracingly vivid in telling.

Bound to Respect

Includes information on AIDS (Acquired Immune Deficiency Syndrome), Laurie Anderson, authenticity, back up singing, Imamu Amiri Baraka (Leroi Jones), Black Arts movement, Black Like Me (Griffin), black masculinity, black nationalism, Black Power movement, breakdancing, Diahann, Carroll, designatory terminology, femininity, Nikki Giovanni, Harlem Renaissance, HIV (human immunodeficiency virus), homosexuality, Jesse Jackson, Michael Jackson, *Jane Doe v. State of Louisiana*, Earvin (Magic) Johnson, Motown Record Corporation, MTV, pop music, racial classification, racial passing, rap (music), Alice Beatrice Jones Rhinelander case, Max Robinson, *Room 222* (television), Run DMC, RuPaul, O.J. Simpson, the Supremes, Stevie Wonder, etc.

When We Imagine Grace

The role of women's bodies in the productions of ideal and progressive black masculinities in African American literature

Are We Not Men?

This book provides critical insights into the many, often overlooked, challenges and societal issues that face contemporary black men, focusing in particular on the ways in which governing societal expectations result in internal and external constraints on black male identity formation, sexuality and black 'masculine' expression. Presenting new interview and auto-ethnographic data, and drawing on an array of theoretical approaches methodologies, *Hyper Sexual, Hyper Masculine?* explores the formation of gendered and sexual identity in the lives of black men, shedding light on the manner in which these are affected by class and social structure. It examines the intersecting oppressions of race, gender and class, while acknowledging and discussing the extent to which black men's social lives differ as a result of their varying degrees of cumulative disadvantage. A wide-ranging and empirically grounded exploration of the intersecting roles of race, masculinity, and sexuality on the lives of black men, this volume will appeal to scholars across the social sciences with interests in race and ethnicity, gender and sexuality, social stratification and intersectionality.

Searching for the New Black Man

Traces a lineage of pro-feminist black men to two early radical proponents of female equality.

Hyper Sexual, Hyper Masculine?

Inverting the traditional focus of ethnic studies on blackness as the object of scrutiny, this book explores dominant forms of white masculinity as seen by African American authors placed alongside certain white writers. Author analyzes texts by Herman Melville, Ernest Hemingway, Martha Gellhorn, Frederick Douglass, and James Baldwin.

Womanist Forefathers

Who are the "race men" standing for black America? It is a question Hazel Carby rejects, along with its long-standing assumption: that a particular type of black male can represent the race. A searing critique of definitions of black masculinity at work in American culture, *Race Men* shows how these defining images play out socially, culturally, and politically for black and white society--and how they exclude women altogether. Carby begins by looking at images of black masculinity in the work of W. E. B. Du Bois. Her analysis of *The Souls of Black Folk* reveals the narrow and rigid code of masculinity that Du Bois applied to racial achievement and advancement--a code that remains implicitly but firmly in place today in the work of celebrated African American male intellectuals. The career of Paul Robeson, the music of Huddie Ledbetter, and the writings of C. L. R. James on cricket and on the Haitian revolutionary, Toussaint L'Ouverture, offer further evidence of the social and political uses of representations of black masculinity. In the music of Miles Davis and the novels of Samuel R. Delany, Carby finds two separate but related challenges to conventions of black masculinity. Examining Hollywood films, she traces through the career of Danny Glover the development of a cultural narrative that promises to resolve racial contradictions by pairing black and white men--still leaving women out of the picture. A powerful statement by a major voice among black feminists, *Race Men* holds out the hope that by understanding how society has relied upon affirmations of masculinity to resolve social and political crises, we can learn to transcend them.

Masculinities in Black and White

Each of these essays illuminates an important dimension of the complex array of Black male experiences as workers, artists, warriors, and leaders. The essays describe the expectations and demands to struggle, to resist, and facilitate the survival of African American culture and community. Black manhood was shaped not only in relation to Black womanhood, but was variously nurtured and challenged, honed and transformed against a backdrop of white male power and domination, and the relentless expectations and demands on them to struggle, resist, and to facilitate the survival of African-American culture and community.

Race Men

American writings often express a hunger for a mythologized frontier at the edge of known civilization, where one's identity, choices, and decisions are not limited by convention. Since the nineteenth century, writers have used this frontier space both to probe and to define the meanings of masculinity. In *Black Masculinity and the Frontier Myth in American Literature*, Michael K. Johnson examines the writings of black authors whose works use the mythologized frontier to explore black masculinity and identity

formed in an environment free of racism and race-based restrictions. Black writers have reworked the mythology of the American West to address black male experiences more authentically, Johnson argues, grappling with such concerns as racial assimilation and the notion of "regenerative violence" as a method of masculine initiation. White-authored stories of frontier conquest often pit a white hunter against a hunted man of another race. In this ritual of the hunt, defeating the racial other renews white manhood. Black writers who invoke this ritual address the contradictions inherent in adapting a dominant culture form that routinely positions the black man as the hunted object rather than as the hunter. Following his discussion of the frontier in the American West, Johnson explores how writers invent new frontiers by mythologizing or reimagining various locations, such as Paris in the 1960s or the African continent. Johnson also addresses efforts by black authors to develop a frontier identity that transcends the gaps between the cultures of Africa and the mainstream culture of the United States.

A Question of Manhood, Volume 1

Boys, Boyz, Bois concerns questions of ethics, gender and race in popular American images, national discourse and cultural production by and about black men. The book proposes an ethics of masculinity, as ethnics refers to a system of morality and valuation and as ethics refers to a care of the self and ethical subject formation. The texts of analysis include recent films by black/African American filmmakers, gangsta rap and hip-hop and black star persona: texts ranging from Blaxploitation and New Black Cinema to contemporary music video to autobiography and the public image of Sidney Poitier. The book is a significant contribution to cultural studies and gender studies and critical race theory. What is distinctive about the book is the question of ethics as a question of race and gender.

Black Masculinity and the Frontier Myth in American Literature

Institutional racism and the search for African American masculinity and identity in selected works of Richard Wright is a multi layered analysis of how American racism shaped the lives of 3 men.

Boys, Boyz, Bois

The end of the Second World War saw a "crisis of white masculinity" brought on by social change. As a result, several prominent white male pop culture figures sought out and appropriated African American cultural trappings to benefit from what they believed were powerful black masculinities. In *He Thinks He's Down*, Katharine Bausch draws on case studies from three genres – the writings of Norman Mailer and Jack Kerouac, advertising and aesthetics in *Playboy* magazine, and action narratives of Blaxploitation films – to illustrate how each one engaged with black tropes while simultaneously doing little to change the racial and gendered stereotypes that perpetuated the power of white male privilege.

Institutional Racism and the Search for African American Masculinity and Identity in Selected Works of Richard Wright

In a pathbreaking new assessment of the shaping of black male identity in the early twentieth century, Martin Summers explores how middle-class African American and African Caribbean immigrant men constructed a gendered sense of self through organizational life, work, leisure, and cultural production. Examining both the public and private aspects of gender formation, Summers challenges the current trajectory of masculinity studies by treating black men as historical agents in their own identity formation, rather than as screens on which white men projected their own racial and gender anxieties and desires. *Manliness and Its Discontents* focuses on four distinct yet overlapping social milieus: the fraternal order of Prince Hall Freemasonry; the black nationalist Universal Negro Improvement Association, or the Garvey movement; the modernist circles of the Harlem Renaissance; and the campuses of historically black Howard and Fisk Universities. Between 1900 and 1930, Summers argues, dominant notions of what it meant to be a man within the black middle class changed from a Victorian ideal of manliness--characterized by the importance of producer values, respectability, and patriarchy--to a modern ethos of masculinity, which was shaped more by consumption, physicality, and sexuality. Summers evaluates the relationships between black men and black women as well as relationships among black men themselves, broadening our understanding of the way that gender works along with class, sexuality, and age to shape identities and produce relationships of power.

Black Male

In the struggle for pride and political agency, the imperative to 'be a man' has been central to the lives of black males. Yet, what it means to be a black man in terms of both racial and gender identity has been subject to continual debate in public and academic spheres alike. *Progressive Black Masculinities* brings together leading black cultural critics including Michael Eric Dyson, Mark Anthony Neal, and Patricia Hill Collins to examine an alternatively demonized and mythologized black masculinity. Collectively, they offer a roadmap for new, progressive models of black masculinity that may chart the course for the future of black men.

Feminist Periodicals

"A Question of Manhood" is the first anthology of historical studies focused on themes and issues central to the construction of Black masculinities. The editors identified these essays from among several hundred articles published in recent years in leading American history journals and academic periodicals. Each piece illuminates an important dimension of the complex array of Black male experiences as workers, artists, warriors, and leaders in both slave and free communities in the centuries and decades prior to the end of slavery in the United States. The introduction offers a gendered perspective on, and a race and class framework for the future study of, Black men's history. The introduction weaves the salient points made in each of the historical essays into a fresh narrative of Black male efforts to construct their individual life and community-sustaining identities. Black manhood was shaped not only in relation to Black womanhood, but was variously nurtured and challenged, honed and transformed against a backdrop of white male power and domination, and the relentless expectations and demands on them to struggle, resist, and to facilitate the survival of African-American culture and community.

He Thinks He's Down

The Making of the New Negro examines black masculinity in the period of the New Negro/Harlem Renaissance, which for many decades did not attract a lot of scholarly attention, until, in the 1990s, many scholars discovered how complex, significant, and fascinating it was. Using African American published texts, American archives and unpublished writings, and contemporaneous European discourses, this book focuses both on the canonical figures of the New Negro Movement and African American culture, such as W.E.B. Du Bois, Booker T. Washington, Alain Locke, and Richard Wright, and on writers who have not received as much scholarly attention despite their significance for the movement, such as Wallace Thurman. Its perspective combines gender, sexuality, and race studies with a thorough literary analysis and historicist investigation, an approach that has not been extensively applied to analyze the New Negro Renaissance.

Manliness and Its Discontents

Discusses what black males fear most, their longing for intimacy, the pitfalls of patriarchy, and the destruction of oppression through redemption and love.

Forthcoming Books

Black masculinity is the first comprehensive study by a sociologist (himself a black man) of the role of Afro-American men in the U.S.A.

Progressive Black Masculinities?

Challenging the standard portrayals of Black men in African American literature From Frederick Douglass to the present, the preoccupation of black writers with manhood and masculinity is a constant. *Black Manhood* in James Baldwin, Ernest J. Gaines, and August Wilson explores how in their own work three major African American writers contest classic portrayals of black men in earlier literature, from slave narratives through the great novels of Richard Wright and Ralph Ellison. Keith Clark examines short stories, novels, and plays by Baldwin, Gaines, and Wilson, arguing that since the 1950s the three have interrupted and radically dismantled the constricting literary depictions of black men who equate selfhood with victimization, isolation, and patriarchy. Instead, they have reimagined black men whose identity is grounded in community, camaraderie, and intimacy. Delivering original and startling insights, this book will appeal to scholars and students of African American literature, gender studies, and narratology.

A Question of Manhood

This book consists of a range of essays written by historians and literary critics which examine the historical construction of Southern masculinities, rich and poor, white and black, in a variety of contexts, from slavery in the antebellum period, through the struggle for Civil Rights, right up to the recent South. Building on the rich historiography of gender and culture in the South undertaken in recent years, this volume aims to highlight the important role Southern conceptions of masculinity have played in the lives of Southern men, and to reflect on how masculinity has intersected with class, race and power to structure the social relationships between blacks and whites throughout the history of the South. The volume highlights the multifaceted nature of Southern masculinities, demonstrating the changing ways black and white masculinities have been both imagined and practised over the years, while also emphasizing that conceptions of black and white masculinity in the American South rarely seem to be divorced from wider questions of class, race and power.

The Making of the New Negro

Argues that African American literature must take into account the rich diversity of African American life and culture.

We Real Cool

This book is a comparative study of African American and Asian American representations of masculinity and race, focusing primarily on the major works of two influential figures, Ralph Ellison and Frank Chin.

Black Masculinity

Through the voices of some of today's most prominent African-American writers, this collection of essays and stories on contemporary African-American men's experience explores the intimate territory beyond the myths about brutalizing and brutalized black men in a harsh white world. Includes works by Houston Baker, Amiri Baraka, Henry Louis Gates, Jr., Walter Mosley, and John E. Wideman.

Black Manhood in James Baldwin, Ernest J. Gaines, and August Wilson

Seminar paper from the year 2010 in the subject American Studies - Literature, grade: 1,3, Johannes Gutenberg University Mainz (American Studies), course: Seminar „Recent Developments in American Theater“, language: English, abstract: The 1950s and 1960s are one of the most exciting chapters of African American history, politically and artistically. They bore a profusion of new ideas. While leaders like Martin Luther King and Malcolm X proposed radically opposed solutions to the problems of black people's rights, writers and intellectuals handled the Harlem Renaissance's heritage and music saw the hard blues from the earliest part of the century gain in popularity. It is in this period, in 1957, that Amiri Baraka – still LeRoi Jones at the time – moved to New York's Greenwich Village and became part of the Beat Movement. He then founded the literary magazine Yugen with his wife and obtained his first critical acclaim as a poet for Preface to a Twenty Volume Suicide Note... published in 1961. In 1960, he went to Cuba. This visit changed his life. He became aware of the relationship between politics and arts and decided to incorporate his political, social and spiritual beliefs in his writing, using poetry and drama as means to educate. Baraka's transitional period would give birth namely to Dutchman, a controversial play which premiered in 1964. The audiences were especially shocked by the political allusion to the Genesis. Baraka also transposed his own evolution in Clay: the movement from docile, assimilated and insignificant black man to proud revolutionary and marginal poet telling out loud his truth to the white institution.

World Population Dynamics

Examines Demographic Trends from an Historical and Comparative Perspective. World Population Dynamics: An Introduction to Demography, 1/e by Barbara A. Anderson takes an historical and comparative approach that places demographic conditions and changes in context and illuminates their importance in the past, and present and in years to come. With sociological, economic, health, and political perspectives integrated throughout, readers will gain an understanding of the patterns and causes of population change historically and in the contemporary world. MySearchLab is a part of the Anderson program. Research and writing tools, including access to academic journals, help students explore demography and population studies in even greater depth. To provide students with flexibility, students can download the eText to a tablet using the free Pearson eText app. 0133828174 / 9780133828177 World Population Dynamics: An Introduction to Demography Plus MySearchLab with Pearson eText -- Access Card Package Package consists of: 0205239927 / 9780205239924 MySearchLab with Pearson eText -- Valuepack Access Card 0205742033 / 9780205742035 World Population Dynamics: An Introduction to Demography

A Primer of Population Dynamics

A Primer of Population Dynamics introduces to the basics of population studies. Author Krishnan Namboodiri utilizes a question-and-answer format that explores topics such as population theories and conceptual schemes, demographic data, mortality, fertility, migration, family and household, food production, and the environment and much more. Questions are accompanied by detailed explanations as well as references for additional information. An extensive index and glossary allow for easy retrieval of information. This introductory textbook is written for students studying demography, population, sociology, and public health.

Advanced Introduction to Demography

Highlighting the power of multi-dimensional demography, this Advanced Introduction addresses the most consequential changes in our societies and economies using quantitative approaches. It defines three demographic theories with predictive power – demographic metabolism, transition and dividend – and repositions the discipline at the heart of social science.

Age-Structured Population Dynamics in Demography and Epidemiology

This book is the first one in which basic demographic models are rigorously formulated by using modern age-structured population dynamics, extended to study real-world population problems. Age structure is a crucial factor in understanding population phenomena, and the essential ideas in demography and epidemiology cannot be understood without mathematical formulation; therefore, this book gives readers a robust mathematical introduction to human population studies. In the first part of the volume, classical demographic models such as the stable population model and its linear extensions, density-dependent nonlinear models, and pair-formation models are formulated by the McKendrick partial differential equation and are analyzed from a dynamical system point of view. In the second part, mathematical models for infectious diseases spreading at the population level are examined by using nonlinear differential equations and a renewal equation. Since an epidemic can be seen as a nonlinear renewal process of an infected population, this book will provide a natural unification point of view for demography and epidemiology. The well-known epidemic threshold principle is formulated by the basic reproduction number, which is also a most important key index in demography. The author develops a universal theory of the basic reproduction number in heterogeneous environments. By introducing the host age structure, epidemic models are developed into more realistic demographic formulations, which are essentially needed to attack urgent epidemiological control problems in the real world.

Population and Society

Population and Society: An Introduction to Demography is an ideal text for undergraduate, as well as graduate, students taking their first course in demography. It is sociologically oriented, although economics, political science, geography, history, and the other social sciences are also used to inform the materials. Although the emphasis is on demography, the book recognizes that, at the individual level, population change is related to private decisions, especially in relation to fertility, but also to mortality and migration. The text thus considers in some detail the role of individuals in population decision making. At the level of countries, and even the world, changes in population size have an important effect on the environmental and related challenges facing all of the world's inhabitants. Therefore, attention is paid to the broad implications of population growth and change.

Population: An Introduction to Concepts and Issues

Any class in Population/Demography is a lot more interesting when you are using this book. POPULATION does more than give you information; it also shows you how to put it into practice. From the debates over how to manage population growth in some countries, and aging populations in others, to the issues of how amazingly different the world is when people are living in urban areas with considerable control over their own mortality and fertility, POPULATION helps you understand how the world really works and how population dynamics relate to socio-economic transitions and sustainable development. You'll find compelling writing, intriguing essays and built-in study aids that help you review and prepare for tests -- while also equipping you for the rest of your life on this planet. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Applied Multiregional Demography Through Problems

Written by the 2018 Mindel C. Sheps Award winner, this textbook offers a unique method for teaching how to model spatial (multiregional) population dynamics through models of increasing complexity. Each chapter in this programmed workbook starts with a descriptive text, followed by a sequence of exercises focused on particular multiregional models, of increasing complexity, and then ends with the solutions. It extends the current developments in the spatial analysis of social data towards improving our understanding of dynamics and interacting change across multiple populations in space. Frameworks for analyzing such dynamics were first proposed in multiregional demography, over 40 years ago. This book revisits these methods and then illustrates how they may be used to analyze spatial data and study spatial population dynamics. Topics covered include spatial population dynamics, population projections and estimations, spatial and age structure of migration flows and much more. As such this innovative textbook is a great teaching and learning tool for teachers, students as well as individuals who want to study demographic processes across space.

Human Population Dynamics

Human Population Dynamics introduces theoretical frameworks and methodologies from different traditional disciplines to demonstrate how changes in human population structure can be addressed from several different academic perspectives. The book contains contributions from world-renowned researchers in demography, social and biological anthropology, genetics, biology, sociology, ecology, history and human geography. In particular, the contributors emphasize the lability of many population structures and boundaries, as viewed from their area of expertise.

Demography

Official journal of the Population Association of America. It is an interdisciplinary peer-reviewed periodical that publishes articles of general interest to population scientists. Fields represented in its contents include geography, history, biology, statistics, business, epidemiology, and public health, in addition to social scientific disciplines such as sociology, economics, psychology, and political science. Published quarterly, it includes theoretical and methodological articles, commentaries, and specialized research papers covering both developed and developing nations.

Interpersonal Communication

Relationships and sensitivity to others through a chapter on diversity and integrated discussions of diversity issues. Communication specialists, and anyone interested in improving their interpersonal relationship skills.

The Princess Aline

Reproduction of the original.

Adobe Dreamweaver CS3

Each chapter in this full-color book contains a project that builds upon the reader's growing knowledge of Dreamweaver, while review questions at the end of each chapter reinforce the most important skills. Readers will learn how to customize a Dreamweaver workspace, apply cascading style sheets, enter headline and body text, insert graphics and rollovers, and add links to a page. They'll also learn how to add interactive elements to their site, such as behaviors, effects, and Flash video; add new code or code snippets; and publish their finished site to the Web. Dreamweaver CS3 offers new CSS layouts, a

unified CSS panel, and CSS visualization tools that let users create interactive Web sites without having to delve into code. Dreamweaver users can now create dynamic interfaces using the Spry framework for Ajax. (Spry is 99% HTML, so it's accessible to both designers and developers). Spry widgets (pre-built user interface components) let users quickly add common user interface components to Web pages.

Interpersonal Communication

Note: If you are purchasing an electronic version, MyCommunicationLab does not come automatically packaged with it. To purchase MyCommunicationLab, please visit www.mycommunicationlab.com or you can purchase a package of the physical text and MyCommunicationLab by searching for ISBN 10: 020596477X/ ISBN 13: 9780205964772. The importance of being other-oriented-being mindfully considerate of the thoughts, needs, and values of others- was the foundation of the first five Canadian editions of Interpersonal Communication: Relating to Others, and it continues as the central theme of the sixth Canadian edition. Updated to include new research, statistics and Canadian content, this edition offers exceptional coverage of diversity and an expanded discussion integrated throughout on technology's impact on communication and its relevance to communication in students' daily lives.

Becoming a Master Manager

The market-leading interdisciplinary exploration of food and its essential place in our society by Canadian and international scholars. Critical Perspectives in Food Studies is a compelling examination of the shifting interpretations, perspectives, challenges, governance issues, and future visions that shape the study of food and food issues in Canada and around the world. With new chapters on a diverse range of current food-related issues, this third edition continues to bring students original contributions by Canadian scholars that will inspire readers to consider the varied and complex means by which we bring food to the table.

Critical Perspectives in Food Studies

Edited by Colleen Flood, Lorne Sossin, and Kent Roach, the collection explores the role that courts may begin to play in health care and how this new role is of crucial importance to the Canadian public and their governments.

Access to Care, Access to Justice

A Brief History of Analytic Philosophy: From Russell to Rawls presents a comprehensive overview of the historical development of all major aspects of analytic philosophy, the dominant Anglo-American philosophical tradition in the twentieth century. Features coverage of all the major subject areas and figures in analytic philosophy - including Wittgenstein, Bertrand Russell, G.E. Moore, Gottlob Frege, Carnap, Quine, Davidson, Kripke, Putnam, and many others. Contains explanatory background material to help make clear technical philosophical concepts. Includes listings of suggested further readings. Written in a clear, direct style that presupposes little previous knowledge of philosophy.

A Brief History of Analytic Philosophy

This is the print lab manual adjacent to the 70-412 Configuring Advanced Windows Server 2012 R2 Services textbook. 70-412 Configuring Advanced Windows Server 2012 R2 Services covers the third of three exams required for Microsoft Certified Solutions Associate (MCSA): Windows Server 2012 certification. This course will help validate the skills and knowledge necessary to administer a Windows Server 2012 Infrastructure in an enterprise environment. The three MCSA exams collectively validate the skills and knowledge necessary for implementing, managing, maintaining and provisioning services and infrastructure in a Windows Server 2012 environment. This Microsoft Official Academic Course is mapped to the 70-412 Configuring Advanced Windows Server 2012 Services exam skills, including the recent R2 objectives. This textbook focuses on real skills for real jobs and prepares students to prove mastery of Advanced Windows Server 2012 Services such as advanced configuring tasks necessary to deploy, manage, and maintain a Windows Server 2012 infrastructure. It covers such skills as fault tolerance, certificate services, and identity federation. In addition, this book also covers such valuable skills as:

- Implementing Advanced Network Services
- Implementing Advanced File Services
- Implementing Dynamic Access Control
- Implementing Network Load Balancing
- Implementing Failover Clustering
- Implementing Disaster Recovery
- Implementing Active Directory Certificate Services (AD CS)
- Implementing Active Directory Federation Services (AD FS)

The MOAC

IT Professional series is the Official from Microsoft, turn-key Workforce training program that leads to professional certification and was authored for college instructors and college students. MOAC gets instructors ready to teach and students ready for work by delivering essential resources in 5 key areas: Instructor readiness, student software, student assessment, instruction resources, and learning validation. With the Microsoft Official Academic course program, you are getting instructional support from Microsoft; materials that are accurate and make course delivery easy. Request your sample materials today.

70-412 Configuring Advanced Windows Server 2012 Services R2 Lab Manual

This contributed collection of original essays by Canadian scholars examines the issues and trends affecting families in Canada today. The text introduces the sociology of family life by illustrating the changing and diverse definition of families and exploring various life stages and events such as relationship formation and marriage, child-raising, and the life experiences of the elderly. With a wealth of pedagogical features, this new second edition offers students an in-depth and up-to-date introduction to the sociological study of families.

Canadian Families Today

From Plato's *Ion* to works by contemporary philosophers, this anthology showcases classic texts to illuminate the development of philosophical thought about art and the aesthetic. This volume is the most comprehensive collection of readings on aesthetics and the philosophy of art currently available. Brings together the most significant writings in aesthetics and philosophy of art from the past 2500 years Each section includes a useful introductory essay which provides an overview of developments in the field Broken down into three sections: Historical Sources, Modern Theories, and Contemporary Aesthetics and Philosophy of Art Thorough, systematic, and flexible, including two alternative tables of contents (historical and topical); an ideal textbook and guide to the field

ALS Microsoft Windows 2000 Professional

Algorithms that have to process large data sets have to take into account that the cost of memory access depends on where the data is stored. Traditional algorithm design is based on the von Neumann model where accesses to memory have uniform cost. Actual machines increasingly deviate from this model: while waiting for memory access, nowadays, microprocessors can in principle execute 1000 additions of registers; for hard disk access this factor can reach six orders of magnitude. The 16 coherent chapters in this monograph-like tutorial book introduce and survey algorithmic techniques used to achieve high performance on memory hierarchies; emphasis is placed on methods interesting from a theoretical as well as important from a practical point of view.

Big Ideas In Collaborative Public Management

Edited and written by a Who's Who of internationally known advanced practice nursing experts, Hamric and Hanson's *Advanced Practice Nursing: An Integrative Approach*, 6th Edition helps you develop an understanding of the various advanced practice registered nursing (APRN) roles. This bestselling textbook provides a clear, comprehensive, and contemporary introduction to advanced practice nursing today, addressing all major APRN competencies, roles, and issues. It covers topics ranging from the evolution of advanced practice nursing to evidence-based practice, leadership, ethical decision-making, and health policy. New to this edition is expanded coverage of interprofessional collaborative practice, updated coverage of APRN roles related to implementation of healthcare reform in the U.S., updated and expanded coverage of IOM and QSEN, a global focus on international advanced practice nursing, and much more! Coverage of all APN core competencies defines and describes all competencies, including direct clinical practice, guidance and coaching, consultation, evidence-based practice, leadership, collaboration, and ethical decision-making. Operationalizes and applies the APN core competencies to the major APN specialties including the Clinical Nurse Specialist, the Primary Care Nurse Practitioner, the Acute Care Nurse Practitioner, the Certified Nurse-Midwife, and the Certified Registered Nurse Anesthetist. Content on managing APN environments addresses such factors as business planning and reimbursement; marketing, negotiating, and contracting; regulatory, legal, and credentialing requirements; health policy; and nursing outcomes and performance improvement research. UNIQUE! Exemplar boxes (case studies), including Day in the Life vignettes of each APN specialty, emphasize innovative practices and coverage of advanced practice roles. In-depth discussions of educational strategies for APN competency development show how nurses develop

competencies as they progress into advanced practice. NEW and UNIQUE! Expanded coverage of interprofessional collaborative practice includes the latest Interprofessional Education Collaborative (IPEC) Core Competencies for Interprofessional Collaborative Practice. NEW! Updated coverage of APRN roles related to implementation of healthcare in the U.S. reflects current and anticipated changes in APRN roles related to healthcare reform. NEW! Coverage of IOM and QSEN has been updated and expanded. NEW! Refocused International Development of Advanced Practice Nursing chapter has been rewritten to be more global and inclusive in focus, to reflect the state of advanced practice nursing practice throughout all major regions of the world. NEW! Expanded content on the role of advanced practice nurses in teaching/education/mentoring and health policy related to the APRN role is featured in the 6th edition.

Aesthetics

Introduction by Allen W. Wood With translations by F. Max Müller and Thomas K. Abbott The writings of Immanuel Kant became the cornerstone of all subsequent philosophical inquiry. They articulate the relationship between the human mind and all that it encounters and remain the most important influence on our concept of knowledge. As renowned Kant scholar Allen W. Wood writes in his Introduction, Kant “virtually laid the foundation for the way people in the last two centuries have confronted such widely differing subjects as the experience of beauty and the meaning of human history.” Edited and compiled by Dr. Wood, *Basic Writings of Kant* stands as a comprehensive summary of Kant’s contributions to modern thought, and gathers together the most respected translations of Kant’s key moral and political writings.

Algorithms for Memory Hierarchies

This is the print lab manual adjacent to the 70-411 Administering Windows Server 2012 R2 textbook. 70-411 Administering Windows Server 2012 R2 covers the second of three exams required for Microsoft Certified Solutions Associate (MCSA): Windows Server 2012 certification. This course validates the skills and knowledge necessary to administer a Windows Server 2012 Infrastructure in an enterprise environment. The three MCSA exams collectively validate the skills and knowledge necessary for implementing, managing, maintaining, and provisioning services and infrastructure in a Windows Server 2012 environment. This Microsoft Official Academic Course is mapped to the 70-411 Administering Windows Server 2012 exam skills, including the recent R2 objectives. This textbook/lab manual focuses on real skills for real jobs and prepares students to prove mastery of core services such as user and group management, network access, and data security. In addition, this book also covers such valuable skills as: Implementing a Group Policy Infrastructure Managing User and Service Accounts Maintaining Active Directory Domain Services Configuring and Troubleshooting DNS Configuring and Troubleshooting Remote Access Installing, Configuring, and Troubleshooting the Network Policy Server Role Optimizing File Services Increasing File System Security Implementing Update Management The MOAC IT Professional series is the Official from Microsoft, turn-key Workforce training program that leads to professional certification and was authored for college instructors and college students. MOAC gets instructors ready to teach and students ready for work by delivering essential resources in 5 key areas: Instructor readiness, student software, student assessment, instruction resources, and learning validation. With the Microsoft Official Academic course program, you are getting instructional support from Microsoft; materials that are accurate and make course delivery easy.

Hamric & Hanson's Advanced Practice Nursing - E-Book

Drawing on the writings of Rachel Carson, Betty Ford, Rose Kushner, and Audre Lorde, this book explores the various ways in which patient-centered texts continue to leave their mark on the political realm of breast cancer and, ultimately, the disease itself. Ordered chronologically, the selections trace the progression of discussions about breast cancer from a time when the subject was kept private and silent to when it became part of public discourse. The texts included are personal accounts, written by women struggling to play an active role in their healing process and, at the same time, hoping to help others do the same.

Basic Writings of Kant

Concepts from Tensor Analysis and Differential Geometry discusses coordinate manifolds, scalars, vectors, and tensors. The book explains some interesting formal properties of a skew-symmetric tensor and the curl of a vector in a coordinate manifold of three dimensions. It also explains Riemann spaces,

affinely connected spaces, normal coordinates, and the general theory of extension. The book explores differential invariants, transformation groups, Euclidean metric space, and the Frenet formulae. The text describes curves in space, surfaces in space, mixed surfaces, space tensors, including the formulae of Gauss and Weingarten. It presents the equations of two scalars K and Q which can be defined over a regular surface S in a three dimensional Riemannian space R . In the equation, the scalar K , which is an intrinsic differential invariant of the surface S , is known as the total or Gaussian curvature and the scalar U is the mean curvature of the surface. The book also tackles families of parallel surfaces, developable surfaces, asymptotic lines, and orthogonal ennuples. The text is intended for a one-semester course for graduate students of pure mathematics, of applied mathematics covering subjects such as the theory of relativity, fluid mechanics, elasticity, and plasticity theory.

70-411 Administering Windows Server 2012 R2 Lab Manual

Bringing together current theories on intercultural communication, this volume introduces some new theoretical developments. These diverse approaches offer guidance for investigating the complex phenomenon of intercultural communication. Part One provides an overview of the role of theory in intercultural communication research, Part Two includes theories on intercultural communication competence and adaptation, and Part Three focuses on specific contexts for intercultural communication such as health and small groups.

Adobe Flash CS3 Professional Classroom in a Book

This book unites research in philosophy and cognitive science with cultural history to re-examine memory in early modern religious practices. Offering an ecological approach to memory and culture, it argues that models derived from Extended Mind and Distributed Cognition can bridge the gap between individual and social models of memory.

Beyond Slash, Burn, and Poison

"The most thought-provoking, contemporary, and engaging survey of the ancient world"--

PSYCHOLOGY, Seventh Edition (Paperback-B/W)

"[This book examines] key principles and cases by leveraging the distinct voices of leading scholars and instructors from across Canada. This ... analysis gives students a better sense of how administrative boards and tribunals work in practice. To offer a more comprehensive understanding of subject matter, resources like practice tips, checklists, and a companion website have also been included in the text. This combination of theory and applied learning has resulted in a highly effective teaching tool that students can take from the classroom into practice."--Publisher's description.

Concepts from Tensor Analysis and Differential Geometry

Edited and with an Introduction by Gordon Marino Basic Writings of Existentialism, unique to the Modern Library, presents the writings of key nineteenth- and twentieth-century thinkers broadly united by their belief that because life has no inherent meaning humans can discover, we must determine meaning for ourselves. This anthology brings together into one volume the most influential and commonly taught works of existentialism. Contributors include Simone de Beauvoir, Albert Camus, Fyodor Dostoevsky, Ralph Ellison, Martin Heidegger, Søren Kierkegaard, Friedrich Nietzsche, Jean-Paul Sartre, and Miguel de Unamuno y Jugo.

Intercultural Communication Theory

Business schools are arguably some of the most influential institutions in contemporary society. The research and education they provide set the standard for how future leaders manage local and global organizations - a responsibility requiring continual discussion, development and challenge. This exciting book explores the role of business schools through 3 key dimensions: - How business school legitimacy has been challenged by the recent economic crisis and corporate scandals; - How schools contribute to shaping and transforming business conduct; and - How institutions, past and present, develop their identities to face the challenges presented by the ongoing globalization process. Combining global perspectives from business school Deans, scholars and stakeholders, this book presents a unique discussion of the current and future challenges facing business schools and their contributions to society.

Imperatives, Behaviors, and Identities

This work brings together 16 essays in cultural history. Taken together, the essays aim to provide a reassessment of the complex process of cultural adjustment among the settler societies of colonial British and revolutionary America.

A Companion to American Cultural History

A Companion to American Cultural History offers a historiographic overview of the scholarship, with special attention to the major studies and debates that have shaped the field, and an assessment of where it is currently headed. 30 essays explore the history of American culture at all analytic levels. Written by scholarly experts well-versed in the questions and controversies that have activated interest in this burgeoning field. Part of the authoritative Blackwell Companions to American History series. Provides both a chronological and thematic approach: topics range from British America in the Eighteenth Century to the modern day globalization of American Culture; thematic approaches include gender and sexuality and popular culture.

John Laurens and the American Revolution

An "excellent biography" of General Washington's aide-de-camp, a daring soldier who advocated freeing slaves who served in the Continental Army (*Journal of Military History*). Winning a reputation for reckless bravery in a succession of major battles and sieges, John Laurens distinguished himself as one of the most zealous, self-sacrificing participants in the American Revolution. A native of South Carolina and son of Henry Laurens, president of the Continental Congress, John devoted his life to securing American independence. In this comprehensive biography, Gregory D. Massey recounts the young Laurens's wartime record—a riveting tale in its own right—and finds that even more remarkable than his military escapades were his revolutionary ideas concerning the rights of African Americans. Massey relates Laurens's desperation to fight for his country once revolution had begun. A law student in England, he joined the war effort in 1777, leaving behind his English wife and an unborn child he would never see. Massey tells of the young officer's devoted service as General George Washington's aide-de-camp, interaction with prominent military and political figures, and conspicuous military efforts at Brandywine, Germantown, Monmouth, Newport, Charleston, Savannah, and Yorktown. Massey also recounts Laurens's survival of four battle wounds and six months as a prisoner of war, his controversial diplomatic mission to France, and his close friendship with Alexander Hamilton. Laurens's death in a minor battle in August 1782 was a tragic loss for the new state and nation. Unlike other prominent southerners, Laurens believed blacks shared a similar nature with whites, and he formulated a plan to free slaves in return for their service in the Continental Army. Massey explores the personal, social, and cultural factors that prompted Laurens to diverge so radically from his peers and to raise vital questions about the role African Americans would play in the new republic. "Insightful and balanced . . . an intriguing account, not only of the Laurens family in particular but, equally important, of the extraordinarily complex relationships generated by the colonial breach with the Mother Country." —North Carolina Historical Review

Cultures and Identities in Colonial British America

Never truly a "new world" entirely detached from the home countries of its immigrants, colonial America, over the generations, became a model of transatlantic culture. Colonial society was shaped by the conflict between colonists' need to adapt to the American environment and their desire to perpetuate old world traditions or to imitate the charismatic model of the British establishment. In the course of colonial history, these contrasting impulses produced a host of distinctive cultures and identities. In this impressive new collection, prominent scholars of early American history explore this complex dynamic of accommodation and replication to demonstrate how early American societies developed from the intersection of American and Atlantic influences. The volume, edited by Robert Olwell and Alan Tully, offers fresh perspectives on colonial history and on early American attitudes toward slavery and ethnicity, native Americans, and the environment, as well as colonial social, economic, and political development. It reveals the myriad ways in which American colonists were the inhabitants and subjects of a wider Atlantic world. *Cultures and Identities in Colonial British America*, one of a three-volume series under the editorship of Jack P. Greene, aims to give students of Atlantic history a "state of the field" survey by pursuing interesting lines of research and raising new questions. The entire series, "Anglo-America in the Transatlantic World," engages the major organizing themes of the subject.

through a collection of high-level, debate-inspiring essays, inviting readers to think anew about the complex ways in which the Atlantic experience shaped both American societies and the Atlantic world itself.

The Imperial Nation

How the legacy of monarchical empires shaped Britain, France, Spain, and the United States as they became liberal entities. Historians view the late eighteenth and early nineteenth centuries as a turning point when imperial monarchies collapsed and modern nations emerged. Treating this pivotal moment as a bridge rather than a break, *The Imperial Nation* offers a sweeping examination of four of these modern powers—Great Britain, France, Spain, and the United States—and asks how, after the great revolutionary cycle in Europe and America, the history of monarchical empires shaped these new nations. Josep Fradera explores this transition, paying particular attention to the relations between imperial centers and their sovereign territories and the constant and changing distinctions placed between citizens and subjects. Fradera argues that the essential struggle that lasted from the Seven Years' War to the twentieth century was over the governance of dispersed and varied peoples: each empire tried to ensure domination through subordinate representation or by denying any representation at all. The most common approach echoed Napoleon's "special laws," which allowed France to reinstate slavery in its Caribbean possessions. The Spanish and Portuguese constitutions adopted "specialness" in the 1830s; the United States used comparable guidelines to distinguish between states, territories, and Indian reservations; and the British similarly ruled their dominions and colonies. In all these empires, the mix of indigenous peoples, European-origin populations, slaves and indentured workers, immigrants, and unassimilated social groups led to unequal and hierarchical political relations. Fradera considers not only political and constitutional transformations but also their social underpinnings. Presenting a fresh perspective on the ways in which nations descended and evolved from and throughout empires, *The Imperial Nation* highlights the ramifications of this entangled history for the subjects who lived in its shadows.

The Citizenship Revolution

Most Americans believe that the ratification of the Constitution in 1788 marked the settlement of post-Revolutionary disputes over the meanings of rights, democracy, and sovereignty in the new nation. In *The Citizenship Revolution*, Douglas Bradburn undercuts this view by showing that the Union, not the Nation, was the most important product of independence. In 1774, everyone in British North America was a subject of King George and Parliament. In 1776 a number of newly independent "states," composed of "American citizens" began cobbling together a Union to fight their former fellow countrymen. But who was an American? What did it mean to be a "citizen" and not a "subject"? And why did it matter? Bradburn's stunning reinterpretation requires us to rethink the traditional chronologies and stories of the American Revolutionary experience. He places battles over the meaning of "citizenship" in law and in politics at the center of the narrative. He shows that the new political community ultimately discovered that it was not really a "Nation," but a "Union of States"—and that it was the states that set the boundaries of belonging and the very character of rights, for citizens and everyone else. To those inclined to believe that the ratification of the Constitution assured the importance of national authority and law in the lives of American people, the emphasis on the significance and power of the states as the arbiter of American rights and the character of nationhood may seem strange. But, as Bradburn argues, state control of the ultimate meaning of American citizenship represented the first stable outcome of the crisis of authority, allegiance, and identity that had exploded in the American Revolution—a political settlement delicately reached in the first years of the nineteenth century. So ended the first great phase of the American citizenship revolution: a continuing struggle to reconcile the promise of revolutionary equality with the pressing and sometimes competing demands of law, order, and the pursuit of happiness.

Hubs of Empire

"The colonial Low Country (the Carolinas, Georgia) and British Caribbean made up an integrated region quite distinct from the Chesapeake, Mid-Atlantic, or New England. Like Maryland and Virginia, the greater Southeast—which formed, as Mulcahy argues, a dynamic center of the British imperial scheme in the New World—relied on staple crops and slave labor. Yet the economic and social ties that bound the Carolinas and the West Indies created quite distinct cultures, black and white alike, giving planters, e.g., a sense of taste and behavior far more tropical and Continental than the ideals that influenced

tobacco planters in the Chesapeake. The location and trade patterns of the Carolinas and West Indies encouraged the purchase of slaves from sources and in numbers that ensured far greater persistence of African traditions (and threats of violence) than elsewhere. Mulcahy offers us a short book that explores this early-American/Caribbean region in the manner of our other series titles--explaining the integrity if not unity of the region and what made it so and also comparing it to other economic/cultural regions in the colonial period"--

United States History

With this book, Allan Kulikoff offers a sweeping new interpretation of the origins and development of the small farm economy in Britain's mainland American colonies. Examining the lives of farmers and their families, he tells the story of immigration to the colonies, traces patterns of settlement, analyzes the growth of markets, and assesses the impact of the Revolution on small farm society. Beginning with the dispossession of the peasantry in early modern England, Kulikoff follows the immigrants across the Atlantic to explore how they reacted to a hostile new environment and its Indian inhabitants. He discusses how colonists secured land, built farms, and bequeathed those farms to their children. Emphasizing commodity markets in early America, Kulikoff shows that without British demand for the colonists' crops, settlement could not have begun at all. Most important, he explores the destruction caused during the American Revolution, showing how the war thrust farmers into subsistence production and how they only gradually regained their prewar prosperity.

From British Peasants to Colonial American Farmers

"A set of probing and fascinating essays by leading scholars, *Alta California* illuminates the lives of missionaries and Indians in colonial California. With unprecedented depth and precision, the essays explore the interplay of race and culture among the diverse peoples adapting to the radical transformations of a borderland uneasily shared by natives and colonizers."—Alan Taylor, author of *The Divided Ground: Indians, Settlers, and the Northern Borderland of the American Revolution* "In the eighteenth and nineteenth centuries the missions of California and the communities that sprang up around them constituted a unique laboratory where ethnic, imperial, and national identities were molded and transformed. A group of distinguished scholars examine these identities through a variety of sources ranging from mission records and mitochondrial DNA to the historical memory of California's early history."—Andrés Reséndez, author of *Changing National Identities at the Frontier: Texas and New Mexico, 1800-1850*

Alta California

Thomas Jefferson believed that the American revolution was a transformative moment in the history of political civilization. He hoped that his own efforts as a founding statesman and theorist would help construct a progressive and enlightened order for the new American nation that would be a model and inspiration for the world. Peter S. Onuf's new book traces Jefferson's vision of the American future to its roots in his idealized notions of nationhood and empire. Onuf's unsettling recognition that Jefferson's famed egalitarianism was elaborated in an imperial context yields strikingly original interpretations of our national identity and our ideas of race, of westward expansion and the Civil War, and of American global dominance in the twentieth century. Jefferson's vision of an American "empire for liberty" was modeled on a British prototype. But as a consensual union of self-governing republics without a metropolis, Jefferson's American empire would be free of exploitation by a corrupt imperial ruling class. It would avoid the cycle of war and destruction that had characterized the European balance of power. The Civil War cast in high relief the tragic limitations of Jefferson's political vision. After the Union victory, as the reconstructed nation-state developed into a world power, dreams of the United States as an ever-expanding empire of peacefully coexisting states quickly faded from memory. Yet even as the antebellum federal union disintegrated, a Jeffersonian nationalism, proudly conscious of America's historic revolution against imperial domination, grew up in its place. In Onuf's view, Jefferson's quest to define a new American identity also shaped his ambivalent conceptions of slavery and Native American rights. His revolutionary fervor led him to see Indians as "merciless savages" who ravaged the frontiers at the British king's direction, but when those frontiers were pacified, a more benevolent Jefferson encouraged these same Indians to embrace republican values. African American slaves, by contrast, constituted an unassimilable captive nation, unjustly wrenched from its African homeland. His great panacea: colonization. Jefferson's ideas about race reveal the limitations of his conception of American nationhood. Yet, as Onuf strikingly documents, Jefferson's vision of a republican empire--a regime

of peace, prosperity, and union without coercion--continues to define and expand the boundaries of American national identity.

Imagining Frontiers, Contesting Identities

Literary texts are artifacts of their time and ideologies. This book collection explores the working class in American literature from the colonial to the contemporary period through a critical lens which addresses the real problems of approaching class through economics. Significantly, this book moves the analysis of working-class literature away from the Marxist focus on the relationship between class and the means of production and applies an innovative concept of class based on the sociological studies of humans and society first championed by Max Weber. Of primary concern is the construction of class separation through the concept of in-grouping/out grouping. This book builds upon the theories established in John F. Lavelle's *Blue Collar, Theoretically: A Post-Marxist Approach to Working Class Literature* (McFarland, 2011) and puts them into practice by examining a diverse set of texts that reveal the complexity of class relations in American society.

Jefferson's Empire

Political science interpretations of international relations tend to focus on abstract terms of economic interest, domination, rights and justice. Trapped within this limited horizon, the discipline fails to explain why nations of similar economic structure would have variant ideas for their foreign policies, and why nations with different economic structures and ideologies could develop a similar global posture during certain periods of their histories. This innovative study examines imperialism from a cultural and linguistic perspective, portraying the rise and fall of ancient Greek, Roman, medieval Islamic, modern British, Russian and American empires as a part of the natural life of world civilizations. As these imperial cultures matured through centuries of literary accumulation and interaction with other cultures, they finally found their confidence on the world stage and transitioned from an aggressive policy towards others to a more tolerant one.

The Working Class in American Literature

A Companion to Colonial America consists of twenty-three original essays by expert historians on the key issues and topics in American colonial history. Each essay surveys the scholarship and prevailing interpretations in these key areas, discussing the differing arguments and assessing their merits. Coverage includes politics, religion, migration, gender, ecology, and many others.

Language and Culture in the Growth of Imperialism

Writing and Postcolonialism in the Early Republic is the first book-length analysis of early American literature through the lens of postcolonial theory. Although the United States represented a colonizing presence that displaced indigenous peoples and exported imperial culture, American colonists also found themselves exiled, often exploited and abused by the distant metropolitan center. In this innovative book, Edward Watts demonstrates how American post-Revolutionary literature exhibits characteristics of a post-colonial society.

A Companion to Colonial America

When eighteenth- and nineteenth-century Americans made their Grand Tour of Europe, what did they learn about themselves? While visiting Europe in 1844, Harry McCall of Philadelphia wrote to his cousin back home of his disappointment. He didn't mind Paris, but he preferred the company of Americans to Parisians. Furthermore, he vowed to be "an American, heart and soul" wherever he traveled, but "particularly in England." Why was he in Europe if he found it so distasteful? After all, travel in the eighteenth and early nineteenth centuries was expensive, time consuming, and frequently uncomfortable. *Being American in Europe, 1750–1860* tracks the adventures of American travelers while exploring large questions about how these experiences affected national identity. Daniel Kilbride searched the diaries, letters, published accounts, and guidebooks written between the late colonial period and the Civil War. His sources are written by people who, while prominent in their own time, are largely obscure today, making this account fresh and unusual. Exposure to the Old World generated varied and contradictory concepts of American nationality. Travelers often had diverse perspectives because of their region of origin, race, gender, and class. Americans in Europe struggled with the tension between defining the United States as a distinct civilization and situating it within a wider world.

Kilbride describes how these travelers defined themselves while they observed the politics, economy, morals, manners, and customs of Europeans. He locates an increasingly articulate and refined sense of simplicity and virtue among these visitors and a gradual disappearance of their feelings of awe and inferiority.

Writing and Postcolonialism in the Early Republic

As the meeting point between Europe, colonial America, and Africa, the history of the Atlantic world is a constantly shifting arena, but one which has been a focus of huge and vibrant debate for many years. In over thirty chapters, all written by experts in the field, *The Atlantic World* takes up these debates and gathers together key, original scholarship to provide an authoritative survey of this increasingly popular area of world history. The book takes a thematic approach to topics including exploration, migration and cultural encounters. In the first chapters, scholars examine the interactions between groups which converged in the Atlantic world, such as slaves, European migrants and Native Americans. The volume then considers questions such as finance, money and commerce in the Atlantic world, as well as warfare, government and religion. The collection closes with chapters examining how ideas circulated across and around the Atlantic and beyond. It presents the Atlantic as a shared space in which commodities and ideas were exchanged and traded, and examines the impact that these exchanges had on both people and places. Including an introductory essay from the editors which defines the field, and lavishly illustrated with paintings, drawings and maps this accessible volume is invaluable reading for all students and scholars of this broad sweep of world history.

Being American in Europe, 1750–1860

Reveals several central themes in the field of Atlantic history, from the concept of European empire to slavery and Diaspora.

The Atlantic World

Through the story of a portrait of a woman in a silk dress, historian Zara Anishanslin embarks on a fascinating journey, exploring and refining debates about the cultural history of the eighteenth-century British Atlantic world. While most scholarship on commodities focuses either on labor and production or on consumption and use, Anishanslin unifies both, examining the worlds of four identifiable people who produced, wore, and represented this object: a London weaver, one of early modern Britain's few women silk designers, a Philadelphia merchant's wife, and a New England painter. Blending macro and micro history with nuanced gender analysis, Anishanslin shows how making, buying, and using goods in the British Atlantic created an object-based community that tied its inhabitants together, while also allowing for different views of the Empire. Investigating a range of subjects including self-fashioning, identity, natural history, politics, and trade, Anishanslin makes major contributions both to the study of material culture and to our ongoing conversation about how to write history.

Revolutions in the Atlantic World

In its early years, William Penn's "Peaceable Kingdom" was anything but. Pennsylvania's governing institutions were faced with daunting challenges: Native Americans proved far less docile than Penn had hoped, the colony's non-English settlers were loath to accept Quaker authority, and Friends themselves were divided by grievous factional struggles. Yet out of this chaos emerged a colony hailed by contemporary and modern observers alike as the most liberal, tolerant, and harmonious in British America. In *Friends and Strangers*, John Smolenski argues that Pennsylvania's early history can best be understood through the lens of creolization—the process by which Old World habits, values, and practices were transformed in a New World setting. Unable simply to transplant English political and legal traditions across the Atlantic, Quaker leaders gradually forged a creole civic culture that secured Quaker authority in an increasingly diverse colony. By mythologizing the colony's early settlement and casting Friends as the ideal guardians of its uniquely free and peaceful society, they succeeded in establishing a shared civic culture in which Quaker dominance seemed natural and just. The first history of Pennsylvania's founding in more than forty years, *Friends and Strangers* offers a provocative new look at the transfer of English culture to North America. Setting Pennsylvania in the context of the broader Atlantic phenomenon of creolization, Smolenski's account of the Quaker colony's origins reveals the vital role this process played in creating early American society.

Portrait of a Woman in Silk

With the recent election of the nation's first African American president—an individual of blended Kenyan and American heritage who spent his formative years in Hawaii and Indonesia—the topic of transnational identity is reaching the forefront of the national consciousness in an unprecedented way. As our society becomes increasingly diverse and intermingled, it is increasingly imperative to understand how race and heritage impact our perceptions of and interactions with each other. *Assumed Identities* constitutes an important step in this direction. However, “identity is a slippery concept,” say the editors of this instructive volume. This is nowhere more true than in the melting pot of the early trans-Atlantic cultures formed in the colonial New World during the seventeenth, eighteenth, and nineteenth centuries. As the studies in this volume show, during this period in the trans-Atlantic world individuals and groups fashioned their identities but also had identities ascribed to them by surrounding societies. The historians who have contributed to this volume investigate these processes of multiple identity formation, as well as contemporary understandings of them. Originating in the 2007 Walter Prescott Webb Memorial Lectures presented at the University of Texas at Arlington, *Assumed Identities: The Meanings of Race in the Atlantic World* examines, among other topics, perceptions of racial identity in the Chesapeake community, in Brazil, and in Saint-Domingue (colonial-era Haiti). As the contributors demonstrate, the cultures in which these studies are sited helped define the subjects' self-perceptions and the ways others related to them.

Friends and Strangers

In this unique synthesis of political, cultural, and intellectual history, James C. Cobb spans more than two centuries in tracing the origins and development of the South as not just an exception to the national rule, but as an internal 'other' against which American nationhood was defined.

Assumed Identities

"In these essays Greene explores the efforts to impose Old World institutions, identities, and values upon the New World societies being created during the colonization process. He shows how transplanted Old World components -- political, legal, and social -- were adapted to meet the demands of new, economically viable, expansive cultural hearths. Green argues that these transplantations and adaptations were of fundamental importance to the formation and evolution of the new American republic and the society it represented." -- Back cover of paperback.

Away Down South

In 1776, thirteen colonies declared their independence from Britain. Although they came together to fight a war, the colonies were far from a unified nation. In *George Washington: Uniting a Nation*, Don Higginbotham argues that Washington's greatest contribution to American life was creating a sense of American unity. In clear and concise prose, Higginbotham shows that as Revolutionary War commander, proponent of the Constitution, and president, George Washington focused on building national identity and erecting institutions to cement the fledgling nation. The first book on Washington to examine exclusively his role in state formation, *George Washington* is essential reading for scholars, students, and everyone interested in America's first, and most formative, president.

Creating the British Atlantic

This epic history compares the empires built by Spain and Britain in the Americas, from Columbus's arrival in the New World to the end of Spanish colonial rule in the early nineteenth century. J. H. Elliott, one of the most distinguished and versatile historians working today, offers us history on a grand scale, contrasting the worlds built by Britain and by Spain on the ruins of the civilizations they encountered and destroyed in North and South America. Elliott identifies and explains both the similarities and differences in the two empires' processes of colonization, the character of their colonial societies, their distinctive styles of imperial government, and the independence movements mounted against them. Based on wide reading in the history of the two great Atlantic civilizations, the book sets the Spanish and British colonial empires in the context of their own times and offers us insights into aspects of this dual history that still influence the Americas.

George Washington

This study offers a new and challenging look at Christian institutions and practices in Britain's Caribbean and southern American colonies. Focusing on the plantation societies of Barbados, Jamaica, and South

Carolina, Nicholas M. Beasley finds that the tradition of liturgical worship in these places was more vibrant and more deeply rooted in European Christianity than previously thought. In addition, Beasley argues, white colonists' attachment to religious continuity was thoroughly racialized. Church customs, sacraments, and ceremonies were a means of regulating slavery and asserting whiteness. Drawing on a mix of historical and anthropological methods, Beasley covers such topics as church architecture, pew seating customs, marriage, baptism, communion, and funerals. Colonists created an environment in sacred time and space that framed their rituals for maximum social impact, and they asserted privilege and power by privatizing some rituals and by meting out access to rituals to people of color. Throughout, Beasley is sensitive to how this culture of worship changed as each colony reacted to its own political, environmental, and demographic circumstances across time. Local factors influencing who partook in Christian rituals and how, when, and where these rituals took place could include the structure of the Anglican Church, which tended to be less hierarchical and centralized than at home in England; the level of tensions between Anglicans and Protestants; the persistence of African religious beliefs; and colonists' attitudes toward free persons of color and elite slaves. This book enriches an existing historiography that neglects the cultural power of liturgical Christianity in the early South and the British Caribbean and offers a new account of the translation of early modern English Christianity to early America.

Empires of the Atlantic World

Colonial America: A History to 1763, 4th Edition provides updated and revised coverage of the background, founding, and development of the thirteen English North American colonies. Fully revised and expanded fourth edition, with updated bibliography Includes new coverage of the simultaneous development of French, Spanish, and Dutch colonies in North America, and extensively re-written and updated chapters on families and women Features enhanced coverage of the English colony of Barbados and trans-Atlantic influences on colonial development Provides a greater focus on the perspectives of Native Americans and their influences in shaping the development of the colonies

Christian Ritual and the Creation of British Slave Societies, 1650-1780

Citing evidence from museum collections, colonial wills, newspaper advertisements, and archaeological sites, argues that the increasing availability of British consumer goods into the colonies help set off the American Revolution.

Colonial America

This impressive scholarly debut deftly reinterprets one of America's oldest symbols--the southern slave plantation. S. Max Edelson examines the relationships between planters, slaves, and the natural world they colonized to create the Carolina Lowcountry. European settlers came to South Carolina in 1670 determined to possess an abundant wilderness. Over the course of a century, they settled highly adaptive rice and indigo plantations across a vast coastal plain. Forcing slaves to turn swampy wastelands into productive fields and to channel surging waters into elaborate irrigation systems, planters initiated a stunning economic transformation. The result, Edelson reveals, was two interdependent plantation worlds. A rough rice frontier became a place of unrelenting field labor. With the profits, planters made Charleston and its hinterland into a refined, diversified place to live. From urban townhouses and rural retreats, they ran multiple-plantation enterprises, looking to England for affirmation as agriculturists, gentlemen, and stakeholders in Britain's American empire. Offering a new vision of the Old South that was far from static, Edelson reveals the plantations of early South Carolina to have been dynamic instruments behind an expansive process of colonization. With a bold interdisciplinary approach, Plantation Enterprise reconstructs the environmental, economic, and cultural changes that made the Carolina Lowcountry one of the most prosperous and repressive regions in the Atlantic world.

The Marketplace of Revolution

Scholars and arm-chair historians of eighteenth-century America will take great pleasure in reading this exceptionally well-researched slice of colonial history. In *The Baylors of Newmarket*, author Thomas Katheder has meticulously researched one of the wealthiest and most socially prominent yet least known families in colonial Virginia. Drawing on mostly unpublished sources, including British and French archives and Virginia court documents, *The Baylors of Newmarket* is the fascinating and tragic story of Col. John Baylor III and his son John IV, including Col. Baylor's relentless pursuit of equine perfection and his son's delusional quest for the perfect Virginia mansion. *The Baylors of Newmarket* places the

family in the larger context of a pre-Revolutionary Anglo-Virginian elite that sought to emulate the British gentry in culture, education, books and reading, dress, furnishings, and behavior. After the Revolution, the Baylors struggled to maintain what was becoming an increasingly outmoded lifestyle. This extensively referenced history also describes in rich detail the library begun by Col. Baylor III and expanded by his son John IV within the context of a strong book culture among the pre-Revolutionary Virginia gentry that has been largely underappreciated by scholars.

Plantation Enterprise in Colonial South Carolina

Old World, New World: America and Europe in the Age of Jefferson grew out of workshops in Salzburg and Charlottesville sponsored by Monticello's International Center for Jefferson Studies, and revisits a question of long-standing interest to American historians: the nature of the relationship between America and Europe during the Age of Revolution. Study of the American-European relationship in recent years has been moved forward by the notion of Atlantic history and the study of the Atlantic world. The present volume makes a fresh contribution by refocusing attention on the question of the interdependence of Europe and America. *Old World, New World* addresses topics that are timely, given contemporary public events, but that are also of interest to early modern and modern historians. By turning attention from the Atlantic World in general to the relationship between America and Europe, as well as using Thomas Jefferson as a lens to examine this relationship, this book carves out its own niche in the history of the Atlantic world in the age of revolution.

The Baylors of Newmarket

Using both primary archival and printed sources, Mieko Nishida examines the perspectives of slaves, ex-slaves, and free-born people of color and the critical factors that affected their lives and self-perceptions. The book offers a new window on slave life in nineteenth-century Salvador, Brazil, and illustrates the difficulty of generalizing about New World slave societies."

Old World, New World

In *Hybrid Constitutions*, Vicki Hsueh contests the idea that early-modern colonial constitutions were part of a uniform process of modernization, conquest, and assimilation. Through detailed analyses of the founding of several seventeenth-century English proprietary colonies in North America, she reveals how diverse constitutional thought and practice were at the time, and how colonial ambitions were advanced through cruelty toward indigenous peoples as well as accommodation of them. Proprietary colonies were governed by individuals (or small groups of individuals) granted colonial charters by the Crown. These proprietors had quasi-sovereign status over their colonies; they were able to draw on and transform English legal and political instruments as they developed constitutions. Hsueh demonstrates that the proprietors cobbled together constitutions based on the terms of their charters and the needs of their settlements. The "hybrid constitutions" they created were often altered based on interactions among the English settlers, other European settlers, and indigenous peoples. Hsueh traces the historical development and theoretical implications of proprietary constitutionalism by examining the founding of the colonies of Maryland, Carolina, and Pennsylvania. She provides close readings of colonial proclamations, executive orders, and assembly statutes, as well as the charter granting Cecilius Calvert the colony of Maryland in 1632; the Fundamental Constitutions of Carolina, adopted in 1669; and the treaties brokered by William Penn and various Leni Lenape and Susquehannock tribes during the 1680s and 1690s. These founding documents were shaped by ambition, contingency, and limited resources; they reflected an ambiguous and unwieldy colonialism rather than a purposeful, uniform march to modernity. Hsueh concludes by reflecting on hybridity as a rubric for analyzing the historical origins of colonialism and reconsidering contemporary indigenous claims in former settler colonies such as Australia, New Zealand, and the United States.

Slavery and Identity

There were 26—not 13—British colonies in America in 1776. Of these, the six colonies in the Caribbean—Jamaica, Barbados, the Leeward Islands, Grenada and Tobago, St. Vincent; and Dominica—were among the wealthiest. These island colonies were closely related to the mainland by social ties and tightly connected by trade. In a period when most British colonists in North America lived less than 200 miles inland and the major cities were all situated along the coast, the ocean often acted as a highway between islands and mainland rather than a barrier. The plantation system of the islands was so similar to that of the southern mainland colonies that these regions had more in common

with each other, some historians argue, than either had with New England. Political developments in all the colonies moved along parallel tracks, with elected assemblies in the Caribbean, like their mainland counterparts, seeking to increase their authority at the expense of colonial executives. Yet when revolution came, the majority of the white island colonists did not side with their compatriots on the mainland. A major contribution to the history of the American Revolution, *An Empire Divided* traces a split in the politics of the mainland and island colonies after the Stamp Act Crisis of 1765-66, when the colonists on the islands chose not to emulate the resistance of the patriots on the mainland. Once war came, it was increasingly unpopular in the British Caribbean; nonetheless, the white colonists cooperated with the British in defense of their islands. O'Shaughnessy decisively refutes the widespread belief that there was broad backing among the Caribbean colonists for the American Revolution and deftly reconstructs the history of how the island colonies followed an increasingly divergent course from the former colonies to the north.

Hybrid Constitutions

In his new book, Michal Jan Rozbicki undertakes to bridge the gap between the political and the cultural histories of the American Revolution. Through a careful examination of liberty as both the ideological axis and the central metaphor of the age, he is able to offer a fresh model for interpreting the Revolution. By establishing systemic linkages between the histories of the free and the unfree, and between the factual and the symbolic, this framework points to a fundamental reassessment of the ways we think about the American Founding. Rozbicki moves beyond the two dominant interpretations of Revolutionary liberty—one assuming the Founders invested it with a modern meaning that has in essence continued to the present day, the other highlighting its apparent betrayal by their commitment to inequality. Through a consistent focus on the interplay between culture and power, Rozbicki demonstrates that liberty existed as an intricate fusion of political practices and symbolic forms. His deeply historicized reconstruction of its contemporary meanings makes it clear that liberty was still understood as a set of privileges distributed according to social rank rather than a universal right. In fact, it was because the Founders considered this assumption self-evident that they felt confident in publicizing a highly liberal, symbolic narrative of equal liberty to represent the Revolutionary endeavor. The uncontrollable success of this narrative went far beyond the circumstances that gave birth to it because it put new cultural capital—a conceptual arsenal of rights and freedoms—at the disposal of ordinary people as well as political factions competing for their support, providing priceless legitimacy to all those who would insist that its nominal inclusiveness include them in fact.

An Empire Divided

"From Empire to Humanity tells the story of a generation of American and British activists who transformed humanitarianism as they adjusted to becoming foreigners to each other in the wake of the American Revolution. In the decades before the Revolution, Americans and Britons shared an imperial approach to charitable activity. They worked together in benevolent ventures designed to strengthen the British empire, and ordinary men and women donated to help faraway members of the British community. Raised and educated in this world of connections, future activists from the British Isles, North America, and the West Indies developed expansive outlooks and transatlantic ties. For budding doctors—including Philadelphia's Benjamin Rush, Caribbean-born Londoner John Coakley Lettsom, and John Crawford, whose life took him from Ireland to India, Barbados, South America, and, finally, Baltimore--this was especially true. American independence put an end to their common imperial humanitarianism, but not their friendships, their far-reaching visions, or their belief in philanthropy as a tool of statecraft. In the postwar years, with doctor-activists at the forefront, Americans and Britons collaborated in the anti-drowning cause and other medical philanthropy, antislavery movements, prison reform, and more. No longer members of the same polity, the erstwhile compatriots adopted a universal approach to their beneficence as they reimagined their bonds with people who were now foreigners. Universal benevolence could also be a source of tension. With the new wars at the end of the century, activists' optimistic cosmopolitanism waned, even as their practices endured. Making the care of suffering strangers routine, they laid the groundwork for later generations' global undertakings

--

Culture and Liberty in the Age of the American Revolution

The emphasis on practical experience over ideology is viewed by many historians as a profoundly American characteristic, one that provides a model for exploring the colonial challenge to European

belief systems and the creation of a unique culture. Here Jim Egan offers an unprecedented look at how early modern American writers helped make this notion of experience so powerful that we now take it as a given rather than as the product of hard-fought rhetorical battles waged over ways of imagining one's relationship to a larger social community. In order to show how our modern notion of experience emerges from a historical change that experience itself could not have brought about, he turns to works by seventeenth-century writers in New England and reveals the ways in which they authorized experience, ultimately producing a rhetoric distinctive to the colonies and supportive of colonialism. Writers such as John Smith, William Wood, John Winthrop, Anne Bradstreet, Benjamin Tompson, and William Hubbard were sensitive to the challenge experiential authority posed to established social hierarchies. Egan argues that they used experience to authorize a supplementary status system that would at once enhance England's economic, political, and spiritual status and provide a new basis for regulating English and native populations. These writers were assuaging fears over how exposure to alien environments threatened actual English bodies and also the imaginary body that authorized English monarchy and allowed English subjects to think of themselves as a nation. By reimagining the English nation, these supporters of English colonialism helped create a modern way of imagining national identity and individual subject formation.

From Empire to Humanity

In *The Enslaved and Their Enslavers*, Edward Pearson offers a sweeping history of slavery in South Carolina, from British settlement in 1670 to the dawn of the Civil War. For enslaved peoples, the shape of their daily lives depended primarily on the particular environment in which they lived and worked, and Pearson examines three distinctive settings in the province: the extensive rice and indigo plantations of the coastal plain; the streets, workshops, and wharves of Charleston; and the farms and estates of the upcountry. In doing so, he provides a fine-grained analysis of how enslaved laborers interacted with their enslavers in the workplace and other locations where they encountered one another as plantation agriculture came to dominate the colony. *The Enslaved and Their Enslavers* sets this portrait of early South Carolina against broader political events, economic developments, and social trends that also shaped the development of slavery in the region. For example, the outbreak of the American Revolution and the subsequent war against the British in the 1770s and early 1780s as well as the French and Haitian revolutions all had a profound impact on the institution's development, both in terms of what enslaved people drew from these events and how their enslavers responded to them. Throughout South Carolina's long history, enslaved people never accepted their enslavement passively and regularly demonstrated their fundamental opposition to the institution by engaging in acts of resistance, which ranged from vandalism to arson to escape, and, on rare occasions, organizing collectively against their oppression. Their attempts to subvert the institution in which they were held captive not only resulted in slaveowners tightening formal and informal mechanisms of control but also generated new forms of thinking about race and slavery among whites that eventually mutated into pro-slavery ideology and the myth of southern exceptionalism.

Authorizing Experience

This book brings a variety of fresh perspectives to bear on the diverse people and settlements of the eighteenth- and early-nineteenth-century southern backcountry. Reflecting the growth of interdisciplinary studies in addressing the backcountry, the volume specifically points to the use of history, archaeology, geography, and material culture studies in examining communities on the southern frontier. Through a series of case studies and overviews, the contributors use cross-disciplinary analysis to look at community formation and maintenance in the backcountry areas of Virginia, North Carolina, South Carolina, and Tennessee. These essays demonstrate how various combinations of research strategies, conceptual frameworks, and data can afford a new look at a geographical area and its settlement. The contributors offer views on the evolution of backcountry communities by addressing such topics as migration, kinship, public institutions, transportation and communications networks, land markets and real estate claims, and the role of agricultural development in the emergence of a regional economy. In their discussions of individuals in the backcountry, they also explore the multiracial and multiethnic character of southern frontier society. Yielding new insights unlikely to emerge under a single disciplinary analysis, *The Southern Colonial Backcountry* is a unique volume that highlights the need for interdisciplinary approaches to the backcountry while identifying common research problems in the field. The Editors: David Colin Crass is the archaeological services unit manager at the Historic Preservation Division, Georgia Department of Natural Resources. Steven D. Smith is the head of the Cultural Resources Consulting Division of the South Carolina Institute of Archaeology

and Anthropology. Martha A. Zierden is curator of historical archaeology at The Charleston Museum. Richard D. Brooks is the administrative manager of the Savannah River Archeological Research Program, South Carolina Institute of Archaeology and Anthropology. The Contributors: Monica L. Beck, Edward Cashin, Charles H. Faulkner, Elizabeth Arnett Fields, Warren R. Hofstra, David C. Hsiung, Kenneth E. Lewis, Donald W. Linebaugh, Turk McCleskey, Robert D. Mitchell, Michael J. Puglisi, Daniel B. Thorp.

The Enslaved and Their Enslavers

The Southern Colonial Backcountry
