make a canoe out of three sheets of plywood

made marks 300 millimeters apart on both sides of the plywood

measured out a specified distance on each side of the long line

start right from the edge of the board at each 300 millimeter

define the front curve of the canoe

put a nail in each mark

mixed up some epoxy according to the directions

stack up four strips of wood

marked all the 300 millimeter marks in that top little section

lay the two sides together lining them up

used a bunch of strips of duct tape

screwed the spreaders in their proper places

attached the oat whales to the canoe

made a cool tool out of a plastic cutting board

put it in a ziploc bag

painted some epoxy on all the edges

added another coat of epoxy

drill a hole right through the tip of my canoe

the triangular decks at each end of the canoe

added a strip of wood under the open edge

squeegeed on a very thin layer of epoxy

glued the skegs to the keel strip lining up the marks

filled all the holes except for the ones in the skeg

covered that with a couple layers of marine varnish

glued the seats in place
