40,197 views 4 years ago 6 minutes, 41 seconds - We spend a lot of money on **healthcare**,. How

much if goes toward good studies of the **health policies**, we implement. Not much.

Intro

HEALTHCARE TRIAGE

It found that those responsible for more of the cost of care use far less of it - and with no short-term adverse health outcomes (except for the poorest families with relatively sicker members).

The findings that Medicaid increases access to care, diminishes financial hardship and reduces rates of depression have provided justification for program expansion.

The innovation center's pioneer accountable care organization program offered health care organizations the opportunity to earn bonuses in exchange for accepting some financial risk, provided they meet a set of quality targets.

Many low-quality studies suggest that wellness programs reduce employers' health care costs as they improve health outcomes.

Security Interests in Personal Property ... Sales and Secured Financing ... Commercial Law ...

This detailed text supplements the casebook Security Interests in Personal Property, examining the body of law in this field. This supplement also enables Honnold's Commercial Law, Security Interests in Personal Law, and Sales and Secured Financing to be used for teaching Revised Article 9. Section titles discuss: Rights of Creditors, Owners and Purchasers; Introduction to Secured Financing; Establishment and Perfection of Security Interests; The Scope of Article 9; Conflicting Claims to Collateral: Article 9's Basic Priority Rules; Security Interests (including the "Floating Lien") in Bankruptcy; Conflicting Claims to Collateral: Other Priority Rules; and Default: Enforcement of Security Interests.

Security Interests in Personal Property ... Sales and Secured Financing ... Commercial Law ...

This detailed text supplements the casebook Security Interests in Personal Property, examining the body of law in this field. This supplement also enables Honnold's Commercial Law, Security Interests in Personal Law, and Sales and Secured Financing to be used for teaching Revised Article 9. Section titles discuss: Rights of Creditors, Owners and Purchasers; Introduction to Secured Financing; Establishment and Perfection of Security Interests; The Scope of Article 9; Conflicting Claims to Collateral: Article 9's Basic Priority Rules; Security Interests (including the "Floating Lien") in Bankruptcy; Conflicting Claims to Collateral: Other Priority Rules; and Default: Enforcement of Security Interests.

Personal Property Security Law Reform in the UK

There has been much discussion in the last ten years about the need to reform the law governing company charge registration, with many bodies including the Department of Trade and Industry and Law Commissions considering the case for reform of this area in the context of a wider scheme of personal property security reform. This has culminated in the coming into force of Part 25 of the Companies Act 2006, which is concerned with company charge registration. This major book features the work of international experts on personal property security law. It focuses on the reform of UK company charge law and argues that the Companies Act 2006 did not go far enough in reforming the law. It addresses the question as to whether the UK should follow the lead of other jurisdictions that have adopted US Article 9 type personal property security schemes. As well as considering current UK law the book also addresses the changes proposed by the Law Commissions and, despite current government inaction, considers whether these reform proposals should be adopted. The book contains major international comparisons and, in particular, looks at law reform in the USA, Canada, Australia, New Zealand, Singapore and Europe. This comparative treatment gives the reader a full perspective on this difficult and constantly developing area of law.

The Emerged and Emerging New Uniform Commercial Code

This book provides a comprehensive survey of the legislative regimes regulating security interests over personal property in the United Kingdom and the major common law jurisdictions of Australia, Canada and New Zealand. The economically important common law jurisdictions of Hong Kong, Malaysia, and Singapore will also be considered.

The Law of Secured Finance

"This title was first published in 2002: This collection of essays marks the formal launch of the Centre for Instalment Credit Law at the University of Wales, Swansea. Divided into three sections, it examines the concept of security within domestic law; considers the choice of law rules; and ponders development of uniform law."--Provided by publisher.

Taking Security Interests in Personal Property

Economic development increasingly depends to a large extent on innovation. Innovation is generally covered by intellectual property (IP) rights and usually requires extensive funding. This book focuses on IP and debt financing as a tool to meet this demand. This book clarifies the situation of the use of IP as collateral in practice through a survey conducted in Japan on IP and debt financing. Various obstacles in the proper use IP and debt financing are identified, and some projects to facilitate its use are illustrated. IP and debt on a global scale, either by attracting foreign lenders or by collateralizing foreign IP rights, needs appropriate private international laws. This book analyzes such regulations in which the United Nations Commission on International Trade Law (UNCITRAL) has worked, paying due attention to the law of finance and insolvency law, as well as IP laws. However, further analysis is needed to identify under what conditions such solutions would show optimal effects. This book offers comprehensive analysis from an economic point of view.

Security Interests in Personal Property

In this feminist exploration of the erotics of the marketplace, Hegel's notion of property and Lacan's idea of the phallus serve parallel functions in creating the subjectivity necessary for self-actualization. Subjectivity requires intersubjective relationships mediated through a regime of possessing, enjoying, and exchanging an object of desire. For Hegel, this regime is property; for Lacan, it is sexuality, symbolized by the Phallus, which we conflate with the male organ and the female body. Property law, in Jeanne Schroeder's account, is implicitly figured by similar anatomical metaphors for that which men wish to possess and that which women try to be and enjoy. This is reflected in imagery taken from ancient Rome—the axe and bundle of sticks known as the Fasces, and the virgin priestess called the Vestal. Schroeder traces the persistence of phallic metaphors in modern jurisprudence. Rejecting the dominant schools of legal feminism, she reconceptualizes property—the legal relationship as well as its not necessarily material object—as a necessary moment in the human struggle for love and recognition. The Feminine, for Schroeder, is the radical negativity at the heart of both Lacan's split subject and Hegel's concept of freedom. Feminine emancipation and private property are, therefore, equally necessary conditions for the actualization of the free individual and the just society. Feminist scholars, social theorists, political scientists, philosophers, and lawyers will find in Schroeder's analysis scintillating new perspectives on property theory and the feminine within the market and the law.

Security Interests in Mobile Equipment

With the aim of creating an autonomous regime for the interpretation and application of the contract, boilerplate clauses are often inserted into international commercial contracts without negotiations or regard for their legal effects. The assumption that a sufficiently detailed and clear language will ensure that the legal effects of the contract will only be based on the contract, as opposed to the applicable law, was originally encouraged by English courts, and today most international contracts have these clauses, irrespective of the governing law. This collection of essays demonstrates that this assumption is not fully applicable under systems of civil law, because these systems are based on principles, such as good faith and loyalty, which contradict this approach.

Security Interests in Intellectual Property

"... there is a lack of a clear and simple exposition of the CISG for students and practitioners. That is the role of the current book, which it fills admirably. All of the issues that have been raised in the cases and the literature are considered, but without excessive detail. This is a book that will do much to make the CISG an easily understandable text for all users, student and practitioner alike." Preface by Professor Eric E. Bergsten

Uniform Law for International Sales Under the 1980 United Nations Convention

"International Trade Law offers comprehensive analysis of international sale transactions through case law, policy documents, legislation, international conventions and rules adopted by international organisations such as the ICC."--

The Vestal and the Fasces

This text provides a comprehensive guide to the principles of European contract law. They have been drawn up by an independent body of experts from each Member State of the EU, under a project supported by the European Commission and many other organizations. The principles are stated in the form of articles, with a detailed commentary explaining the purpose and operation of each article and its relation to the remainder. Each article also has extensive comparative notes surveying the national laws and other international provisions on the topic.

Boilerplate Clauses, International Commercial Contracts and the Applicable Law

The Handbook of Risk and Crisis Communication explores the scope and purpose of risk, and its counterpart, crisis, to facilitate the understanding of these issues from conceptual and strategic perspectives. Recognizing that risk is a central feature of our daily lives, found in relationships, organizations, governments, the environment, and a wide variety of interactions, contributors to this volume explore such questions as "What is likely to happen, to whom, and with what consequences?" "To what extent can science and vigilance prevent or mitigate negative outcomes?" and "What obligation do some segments of local, national, and global populations have to help other segments manage risks?"

The CISG

Gilmore, Grant. Security Interests in Personal Property. Boston: Little, Brown & Company, 1965. Two volumes. xxxiv, 651; xiii, 653-1508 pp. Reprinted 1999 by The Lawbook Exchange, Ltd. LCCN 99-10258. ISBN 1-886363-81-1. Cloth. \$195. * Written by the late Grant Gilmore, Co-Reporter for Article 9 of the Uniform Commercial Code, this landmark work, often cited, is extremely well respected as an acknowledged authority in this area. Combines an engrossing account of the drafting of Article 9 as it emerged in its final form with important interpretive data relating to security interests. This title is the recipient of both the Order of the Coif and the James Barr Ames award. Now back in print and of continued relevance today.

International Trade Law

Based on the author's doctoral thesis submitted to Queen Mary University of London.

Principles of European Contract Law

The book verifies the impact of national law and transnational rules on international contracts, particularly those with an arbitration clause.

Handbook of Risk and Crisis Communication

G. Edward White's 'Tort Law in America' is regarded as a standard in the field. Concise, accessible and wide-ranging, White's work represents a major work of legal scholarship, providing an enduring intellectual history of American tort law.

Security Interests in Personal Property

This book discusses the problem of sea carriers' liability, with a particular focus on role of the technologies that have been employed to support maritime transport in recent decades. It examines the Hague Rules, providing an overview of the precedent standard of liability, its historical development up until its application, and its construction at the current time. To do so, it presents two exemplary studies from English and American case law, and analyzes the situations in which the courts have required the application of new technologies as part of the duties set in the current governing liability regime. Written in an easy-to-follow style, the book offers not only a unique overview of the applications of technologies in making ships both seaworthy and cargo-worthy, but also a practice-oriented guide to understanding and making decisions about sea carriers' liability. It is intended for law practitioners as well as advanced graduate students and researchers in the field of maritime shipping, transport and insurance law

Through Title to Contract and a Bit Beyond

A detailed discussion of the need to conserve medicinal plants and their environments.

Abuse of Rights in International Arbitration

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

International Commercial Contracts

This book examines the legal framework for secured credit set out in the Personal Property Security Act. This second edition updates the area of personal property security law in Canada with new caselaw, including some important SCC cases clarifying the law or providing the conceptual basis for its further amplification.

Tort Law in America

In 1980, the United Nations Convention for the International Sale of Goods (CISG) came into being as an attempt to create a uniform commercial sales law. This book, first published in 2007, compares two major restatements - the UNIDROIT Principles and the Principles of European Contract Law (PECL) - with CISG articles. This work has gathered scholars and legal practitioners from twenty countries who contribute analysis on the various issues covered in the articles of the CISG comparing them with how the issue is treated in the UNIDROIT and PECL restatements. The introductory section of the book addresses theoretical and practical issues of the appropriate interpretive methodology as mandated in CISG Article 7 and it is followed by individual analyses of the Convention's provisions.

Juridical Yearbook

This is a thorough examination of the principles governing the conflict between the sanctity of contract and the discharge of contractual obligations in response to supervening events. The author guides the reader through a list of supervening events which may be encountered in any commercial transaction, setting out the statutory principles involved, together with judicial interpretations from a number of Common Law jurisdictions.

A Possible Protocol to the Berne Convention

This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

The Uniform Sales Act

This book examines uniform contract law in all relevant areas of legal doctrine and practice, and considers the barriers which exist toward it in modern nation states, namely in the German and English legal systems. The author suggests ways to overcome these obstacles, and develops an autonomous methodology of interpretation of transnational contract principles. The book analyses existing uniform transnational law rules, such as the UNIDROIT Principles of International Commercial Contracts.

The Due Diligence in Maritime Transportation in the Technological Era

"The attempt to describe and analyze so vast a subject matter in one volume has obvious dangers. Over-simplifications are inevitable. Generalizations tend to be more dogmatic than the law in action. Nevertheless, the practitioner is aware and the student soon becomes aware of the uses and limitations of introductory texts. A text of this kind seeks to provide a guide to a deeper knowledge of the subject".
