velopment of a Peacock butterfly through rhyming verse, written by Daniel Bryan, and vivid illustrations by Angela Bryan. Printed in color throughout on 100% recycled card using vegetable-based inks. Paperback. (Ages 4-7)

Create a Butterfly Garden

An indispensable and lavishly illustrated guide to creating a garden that attracts and sustains butterflies. Butterfly gardening creates habitats that support butterflies, connecting us with some of the most beautiful creatures in the natural world and bringing new levels of excitement and joy to gardening. In this engaging and accessible guide, lavishly illustrated with more than two hundred color photographs and maps, accomplished butterfly gardener Jane Hurwitz presents essential information on how to choose and cultivate plants that will attract a range of butterflies to your garden and help sustain all the stages of their life cycles. An indispensable resource for aspiring and experienced butterfly gardeners alike, *Butterfly Gardening* is the most gardener-friendly source on the subject, covering all the practical details needed to create a vibrant garden habitat that fosters butterflies. It tells you which plants support which butterflies, depending on where you live; it describes what different butterflies require in the garden over the course of their lives; and it shows you how to become a butterfly watcher as well as a butterfly gardener. While predominantly recommending regionally native plants, the book includes information on non-native plants. It also features informative interviews with experienced butterfly gardeners from across the United States. These gardeners share a wealth of information on plants and practices to draw butterflies to all kinds of gardens--from small suburban gardens to community plots and larger expanses. Whether you are a gardener who wants to see more butterflies in your garden, a butterfly enthusiast who wants to bring that passion to the garden, or someone who simply wants to make their garden or yard friendlier to Monarchs or other butterflies, this is a must-have guide. An essential guide for aspiring and experienced butterfly gardeners. Encourages readers to rethink gardening choices to support butterflies and other pollinators in their gardens and communities. Introduces gardeners to butterfly watching. Includes regional lists of plant species that are time-proven to help sustain butterflies and their caterpillars. Let yourself be inspired by the idea that your garden or balcony can also be an oasis of well-being that supports the environment and the climate with much joy and growing enthusiasm. Let yourself be inspired by the idea that with a little craftsmanship and the ideas shown in this book, you can contribute to the common multiple with your "swarm contributions": a sustainable living culture. A leafy arbor instead of a pavilion, imaginatively planted small areas, flowering islands for birds and insects, imaginative garden decorations with insect and bumblebee hotels, with feeding stations, with small or larger water areas in the garden with a pond bank instead of the usual "demolition crater". Each small contribution in the "swarm" is the comprehensive bracket for the sustainable living culture, for the exciting feel-good island at home, the reduction of the increasing heating up of the city and much more. The clearly structured articles in the book are supplemented with imaginative resource-saving tips for the operation of gardens. A pick-me-up for new starters. The book is written and illustrated in a way that is easy to understand, even for open-minded people who are new or relatively new to the opportunities and contribution possibilities of creating exciting and pleasant areas in their own outdoor living space with little effort, which are valuable swarm contributions for the environment and the climate. Ideas for professionals. The book is written and illustrated in a complementary and detailed way for open-minded people who have already dealt intensively with the opportunities and possibilities of making valuable contributions to the environment and climate in their own outdoor living areas. The course of the book is never trivial with words and pictures, rather the book offers valuable, supplementary impulses with imaginative implementation tips with the ideas implemented by the reader.

Gul Mohar Companion-4

With gorgeous photos, a renowned textile artist guides you through the details of her creative process—and twelve amazing projects. The embroidery of Jane E. Hall is breathtaking, and in this book she combines her love of butterflies with her outstanding talent as a textile artist to produce three-dimensional renditions of exquisitely worked butterflies almost indistinguishable from the real thing. Using the finest of silk threads and needles, Jane lovingly creates her butterflies' wings using the tiniest of stitches worked on to silk. They are then carefully cut away and the edges strengthened with hair-fine wire before being attached to the bodies, crafted from air-drying modelling medium and brushed with whisper-thin threads to resemble hairs. The butterflies are then placed within a setting of silk leaves and flowers, all made with the same painstaking attention to detail and expert skill as the butterflies themselves. This book provides a fascinating introduction to butterflies in nature, reflecting Jane's love and admiration for these exquisite creatures, and goes on to describe the materials and methods Jane uses to produce her incredible creations. Twelve projects, each based on a different butterfly including the Painted Lady, Small Tortoiseshell, and Brimstone, present the finished piece along with the materials Jane used, and the photographs, swatches, drawings, and paintings that inspired it.

"It's up to every single one of us to do our bit for wildlife, however small our gardens, and The Butterfly Brothers know just how that can be achieved." Alan Titchmarsh Join the rewilding movement and share your outdoor space with nature. We all have the potential to make the world a little greener. *Wild Your Garden*, written by Jim and Joel Ashton (aka "The Butterfly Brothers"), shows you how to create a garden that can help boost local biodiversity. Transform a paved-over yard into a lush oasis, create refuges to welcome and support native species, or turn a high-maintenance lawn into a nectar-rich mini-meadow to attract bees and butterflies. You don't need specialist knowledge or acres of land. If you have any outdoor space, you can make a difference to local wildlife, and reduce your carbon footprint, too. "Wildlife gardening is one of the most important things you can do as an individual for increasing biodiversity and mitigating the effects of climate change. From digging a pond to planting a native hedge, the Butterfly Brothers can help you every step of the way." Kate Bradbury

Included, too, are detailed distribution maps representing records garnered from almost 300 recorders/sources (particularly members of the Cyprus Butterfly Study Group), over a period of more than 20 years.
