The Medical and Pathological Journal. Vol. 1, No. 4, 5, 8, 9. Jan., Feb., May, June 1859

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Boston Medical and Surgical Journal

The Penn Dental Journal, Volumes 8-9

Daily Journal Floral and Foliage Series Volume 8 6 x 9 inches 150 pages (75 sheets) Lined Journal - Date line and 22 wide ruled lines for writing. Cover with print on front and back with Shades of Green Foliage. Write your thoughts and dreams in this simple beautiful journal. Pages have just the lines. No other embellishments to take away from the abundance of space for your words. No distractions. Just you and your thoughts. This journal book can be used for multiple uses. Perfect for gift giving for special occasions, holidays, birthdays or just because. A daily journal is great to use for keeping daily records of your day whether it is just simply keeping track of your To Do list, daily menus, a diet journal, spending record, appointment book, fitness record, counting your blessings, your deepest secrets or fun upcoming events you want to attend. Do you write song lyrics or poetry? This would be great for that too! Perfect size to tuck away in your pocketbook or backpack. Great to take with you out for your walks and while hiking. Just find a cozy spot and sit down with your thoughts. Great for gardening diary, creative writing and ideas. This journal will be great for students in elementary, high school and college for jotting notes and homework assignments. Wonderful addition to your school supplies. Great for children, women and men to use as a diary or just to doodle in. Once you have completed one journal move on to the next volume in the series.

The Independent Practitioner

This is a reproduction of a book published before 1923. This book may have occasional imperfections such as missing or blurred pages, poor pictures, errant marks, etc. that were either part of the original artifact, or were introduced by the scanning process. We believe this work is culturally important, and despite the imperfections, have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide. We appreciate your understanding of the imperfections in the preservation process, and hope you enjoy this valuable book.

Patent Cases Determined in the Supreme Court of the United States

In twelve remarkable volumes, Gary E. Moulton has edited the journals of the Lewis and Clark expedition of 1804-6, thus making clear and accessible to all readers the plethora of maps and words with which Meriwether Lewis and William Clark documented one of the greatest ventures of discovery

in American history. With the Comprehensive Index, the thirteenth volume, Moulton completes his work?and offers everyone who consults the Journals a complete and detailed means of locating specific passages, references, and particular people or places within the larger work. Throughout the edition, his guiding principles have been clarity and ease of use. Consequently, the notes are indexed more thoroughly here than in most works and include modern place-names, modern denominations for Indian nations, and current popular and scientific names for various cited species. This volume also contains a list of corrections for earlier volumes.

Documents Accompanying the Journal of the House

DigiCat Publishing presents to you this special edition of "Curious Epitaphs, Collected from the Graveyards of Great Britain and Ireland" by William Andrews. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

Chambers's Journal of Popular Literature, Science and Arts

Originally published in 1890 as part of the "Great Writers" series. Richard Garnett (1835-1906) was Keeper of Printed Books at the British Museum and also wrote biographies of Carlyle, Emerson, Gibbon and Coleridge.

Chambers' Edinburgh Journal

History, Humanity and Evolution brings together thirteen original essays by prominent scholars in the history of evolutionary thought. The volume is intended both to represent the best of today's research in the field and also to celebrate the work of the distinguished historian, John C. Greene, whose historical writings have had a unique influence on this volume's contributors as well as the field as a whole. Using contemporary sources as diverse as medicine, literature, and natural history tableaux, and drawing on the resources of publishing history, feminist scholarship, and the histories of politics, sociology, and philosophy, the contributors offer new perspectives not only on familiar figures such as Erasmus and Charles Darwin, Lamarck, Chambers, Huxley, and Haeckel, but also on many lesser known participants in the evolutionary debates. The volume contains a fascinating introductory conversation with John C. Greene and an afterword by him that responds to the contributors' essays.

Letters and Journals of Samuel Gridley Howe

Unlike some other reproductions of classic texts (1) We have not used OCR (Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

Letters and Journals of Samuel Gridley Howe; V.1

Excerpt from Letters Journals of Samuel Gridley Howe During the Greek Revolution, 1906 Rising gradually from one grade of power to another, Ali of Tepeleni had become, by the time of the French Revolution, the most powerful Pasha of his native Albania. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. Letters and Journals of Samuel Gridley Howe: The servant of humanity

Although many books focus on the fascinating story of Heinrich Schliemann, little has been written on Mycenae before his excavations. This book, therefore, fills this gap. It looks at the English-speaking pioneers who visited the citadel at Mycenae before Schliemann, providing additional biographic references in the footnotes (and bibliography and associated sources). The book's primary purpose is to bring back to life the thoughts of these pioneers on Mycenae. It is also a reflection on dating theories of the site during the nineteenth century. At that time, the general consensus concerning the beginning of the 'Greek world' was the classical civilisation of the fifth century BC. This was not the view of many of these travellers. The ancients too had a fascination with Mycenae. The Homeric tales of Agamemnon, King of Mycenae, led to popular sixth and fifth century BC plays from the likes of Aeschylus, Sophocles and Euripides. But what did these ancient writers and later travellers, such as Pausanias, actually see? Finally, there is a need to be reminded of some of the 'pioneer' travellers to Mycenae and their descriptions of the Lion Gate citadel and the 'Treasury of Atreus', as they are of particular historical interest. Not only that, but some of these observations are pure poetry and a delight to read.

Letters and Journals of Samuel Gridley Howe

In November 2006, the International Conference on Romanticism convened for its annual conference on the campus of Arizona State University and explored a wide range of work identified as "engaged romantic," as a mode and a practice, rather than simply as a literary historical period defined by a specific temporal spectrum (c. 1750-1850). As the introduction to the volume suggests, most writers during the period were actively engaged in the cultural articulation of the aesthetics, criticism, ethics, poetics, and politics of the age, and a large number of writers deployed their talents to help transform the public sphere, whether shaping responses to the practices of slavery or resisting the emergence of a crystallized form of Newtonianism at the foundation of Enlightenment epistemology. The intellectual and disciplinary range of the essays included in this volume pay tribute to this often neglected aspect of the revolutionary dictates of what has come to be called "Romanticism," and the following critical essays, offered by both thoroughly established and relatively new voices within Romantic Studies, examine virtually every aspect of this approach to Romantic thought and writing. Whether focused on the formal and intellectual practices at the foundation of the novel, the philosophical resonance of William Wordsworth within emergent forms of eco-criticism, the play of the transatlantic Romantic imagination, the aesthetic commitments of Romantic art and music, or the current process of pedagogical engagements, the essays sound the depths of what engaged practice can accomplish, both in the age of Romanticism itself as well as our own moment.

Letters and Journals of Samuel Gridley Howe During the Greek Revolution - Primary Source Edition

On the bicentennial of the Greek Revolution, an essential guide to the momentous war for independence of the Greeks from the Ottoman Empire. The Greek war for independence (1821–1830) often goes missing from discussion of the Age of Revolutions. Yet the rebellion against Ottoman rule

was enormously influential in its time, and its resonances are felt across modern history. The Greeks inspired others to throw off the oppression that developed in the backlash to the French Revolution. And Europeans in general were hardly blind to the sight of Christian subjects toppling Muslim rulers. In this collection of essays, Paschalis Kitromilides and Constantinos Tsoukalas bring together scholars writing on the many facets of the Greek Revolution and placing it squarely within the revolutionary age. An impressive roster of contributors traces the revolution as it unfolded and analyzes its regional and transnational repercussions, including the Romanian and Serbian revolts that spread the spirit of the Greek uprising through the Balkans. The essays also elucidate religious and cultural dimensions of Greek nationalism, including the power of the Orthodox church. One essay looks at the triumph of the idea of a Greek "homeland," which bound the Greek diaspora—and its financial contributions—to the revolutionary cause. Another essay examines the Ottoman response, involving a series of reforms to the imperial military and allegiance system. Noted scholars cover major figures of the revolution; events as they were interpreted in the press, art, literature, and music; and the impact of intellectual movements such as philhellenism and the Enlightenment. Authoritative and accessible, *The Greek Revolution* confirms the profound political significance and long-lasting cultural legacies of a pivotal event in world history.

Letters and Journals of Samuel Gridley Howe

From Tiny Tim to Helen Keller, disabled people in the nineteenth century were portrayed in sentimental terms, as afflicted beings whose sufferings afforded able-bodied people opportunities to practice empathy and compassion. In all kinds of representations of disability, from popular fiction to the reports of institutions established for the education and rehabilitation of disabled people, the equation of disability and sentimentality served a variety of social functions, from ensuring the continued existence of a sympathetic sensibility in a hard-hearted, market-driven world, to asserting the selfhood and equality of disabled adults. Unique in its focus on blindness and its examination of the interplay between institutional discourse and popular literature, *Woeful Afflictions* offers a detailed historical analysis of the types of cultural work performed by sentimental representations of disability in public reports and lectures, exhibitions, novels, stories, poems, autobiographical writings, and popular media portrayals from the 1830s through the 1890s in the United States. *Woeful Afflictions* combines contemporary scholarship on sentimentalism with the most recent works on the cultural meanings of disability to argue that sentimentalism, with its emphasis on creating emotional identifications between texts and readers, both reinforces existing associations between disability and otherness and works to rewrite those associations in portraying disabled people, in their emotional capacities, as no different from the able-bodied. This book will interest anyone concerned with disability studies and the social construction of the body, with the history of education and of public institutional care in the United States, and with autobiographical writings.

Letters Journals of Samuel Gridley Howe During the Greek Revolution, 1906 (Classic Reprint)

This book presents an exhaustive and in-depth exposition of the various numerical methods used in scientific and engineering computations. It emphasises the practical aspects of numerical computation and discusses various techniques in sufficient detail to enable their implementation in solving a wide range of problems.

LETTERS JOURNALS OF SAMUEL GRIDLEY HOWE DURING THE GREEK REVOLUTION, 1906

In their chronological portrait, the authors synthesize the many voices of exceptional children, providing a historical picture that includes not only the perspective of the professional, but also, to the extent possible, that of the "client." The book begins by placing the origins of special education in historical context from Aristotle through the Enlightenment and beyond. Subsequent chapters consider individual "conditions" traditionally associated with specialized approaches (e.g., blindness, deafness, and retardation), discuss conditions that have given rise to further differentiation of childhood exceptionality, and offer a synthesis of themes and a prospective for a "new history," now emerging, of children considered exceptional.

In Search of Agamemnon

One of the triggering events of the Civil War helped divide a nation but also launched a cannonade of persuasive essays and propaganda. Early press reaction to John Brown's raid on Harpers Ferry ranged from indignant horror in the South to stunned disbelief in the North. Brown's supporters wielded

great power with their pens: Ralph Waldo Emerson, Henry David Thoreau, Frederick Douglass, Thomas Wentworth Higginson, and Lydia Maria Child. This book explores the moment when literature and history collided and literature rewrote history. This volume features 30 photographs, maps, proclamations and broadsides and a detailed timeline of events surrounding the raid.

The servant of humanity

Professor Friedman studies the abolition movement through individuals and groups in the USA.

Engaged Romanticism

This book offers a major rereading of US foreign policy from Thomas Jefferson's purchase of Louisiana expanse to the Korean War. This period of one hundred and fifty years saw the expansion of the United States from fragile republic to transcontinental giant. David Mayers explores the dissenting voices which accompanied this dramatic ascent, focusing on dissenters within the political and military establishment and on the recurrent patterns of dissent that have transcended particular policies and crises. The most stubborn of these sprang from anxiety over the material and political costs of empire while other strands of dissent have been rooted in ideas of exigent justice, realpolitik, and moral duties existing beyond borders. Such dissent is evident again in the contemporary world when the US occupies the position of preeminent global power. Professor Mayers's study reminds us that America's path to power was not as straightforward as it might now seem.

The Greek Revolution

Early American painter Gilbert Stuart has long been mistakenly represented as a hard-drinking rogue, habitual liar, and inexplicable financial failure. To explain his stylistic unevenness as an artist, he is assumed to have had an inferior assistant, but the documentary evidence for an assistant who painted on his portraits is non-existent-in fact, there is evidence to the contrary. This ground-breaking study demonstrates that Stuart suffered from a hereditary form of manic depression, leading him to create pictures that contain peculiar lapses characteristic of a manic-depressive, or bipolar, artist. Using documentary and empirical evidence-from diaries and letters to x-radiographs of paintings-this book fills important gaps in our knowledge of Stuart, and connects the strange visual effects in some of Stuart's paintings with cognitive deficits attendant with the disorder. In addition to Stuart, other bipolar artists, including George Romney, Raphaelle Peale, Gilbert Stuart Newton, and William Rimmer, are discussed in relation to these deficits, revealing patterns which carry broader implications for all manic-depressive artists. This volume is a significant contribution not only to studies of Stuart and the four other painters but also to our understanding of the mind of a manic-depressive artist. It bridges the broad disciplines of art history and psychopathology.

Woeful Afflictions

Throughout its history, America has been defined through maps. Whether made for military strategy or urban reform, to encourage settlement or to investigate disease, maps invest information with meaning by translating it into visual form. They capture what people knew, what they thought they knew, what they hoped for, and what they feared. As such they offer unrivaled windows onto the past. In this book Susan Schulten uses maps to explore five centuries of American history, from the voyages of European discovery to the digital age. With stunning visual clarity, *A History of America in 100 Maps* showcases the power of cartography to illuminate and complicate our understanding of the past. Gathered primarily from the British Library's incomparable archives and compiled into nine chronological chapters, these one hundred full-color maps range from the iconic to the unfamiliar. Each is discussed in terms of its specific features as well as its larger historical significance in a way that conveys a fresh perspective on the past. Some of these maps were made by established cartographers, while others were made by unknown individuals such as Cherokee tribal leaders, soldiers on the front, and the first generation of girls to be formally educated. Some were tools of statecraft and diplomacy, and others were instruments of social reform or even advertising and entertainment. But when considered together, they demonstrate the many ways that maps both reflect and influence historical change. Audacious in scope and charming in execution, this collection of one hundred full-color maps offers an imaginative and visually engaging tour of American history that will show readers a new way of navigating their own worlds.

Numerical Methods for Scientists and Engineers

Despite the immense body of literature about the American Civil War and its causes, the nation's western involvement in the approaching conflict often gets short shrift. Slavery was the catalyst for fiery rhetoric on both sides of the Mason-Dixon line and fiery conflicts on the western edges of the nation. Driven by questions regarding the place of slavery in westward expansion and by the increasing influence of evangelical Protestant faiths that viewed the institution as inherently sinful, political debates about slavery took on a radicalized, uncompromising fervor in states and territories west of the Mississippi River. *Busy in the Cause* explores the role of the Midwest in shaping national politics concerning slavery in the years leading up to the Civil War. In 1856 Iowa aided parties of abolitionists desperate to reach Kansas Territory to vote against the expansion of slavery, and evangelical Iowans assisted runaway slaves through Underground Railroad routes in Missouri, Kansas, and Nebraska. Lowell J. Soike's detailed and entertaining narrative illuminates Iowa's role in the stirring western events that formed the prelude to the Civil War.

A History of Childhood and Disability

The scene of John Wilkes Booth shooting Abraham Lincoln in Ford's Theatre is among the most vivid and indelible images in American history. The literal story of what happened on April 14, 1865, is familiar: Lincoln was killed by John Wilkes Booth, a lunatic enraged by the Union victory and the prospect of black citizenship. Yet who Booth really was—besides a killer—is less well known. The magnitude of his crime has obscured for generations a startling personal story that was integral to his motivation. *My Thoughts Be Bloody*, a sweeping family saga, revives an extraordinary figure whose name has been missing, until now, from the story of President Lincoln's death. Edwin Booth, John Wilkes's older brother by four years, was in his day the biggest star of the American stage. He won his celebrity at the precocious age of nineteen, before the Civil War began, when John Wilkes was a schoolboy. Without an account of Edwin Booth, author Nora Titone argues, the real story of Lincoln's assassin has never been told. Using an array of private letters, diaries, and reminiscences of the Booth family, Titone has uncovered a hidden history that reveals the reasons why John Wilkes Booth became this country's most notorious assassin. These ambitious brothers, born to theatrical parents, enacted a tale of mutual jealousy and resentment worthy of a Shakespearean tragedy. From childhood, the stage-struck brothers were rivals for the approval of their father, legendary British actor Junius Brutus Booth. After his death, Edwin and John Wilkes were locked in a fierce contest to claim his legacy of fame. This strange family history and powerful sibling rivalry were the crucibles of John Wilkes's character, exacerbating his political passions and driving him into a life of conspiracy. To re-create the lost world of Edwin and John Wilkes Booth, this book takes readers on a panoramic tour of nineteenth-century America, from the streets of 1840s Baltimore to the gold fields of California, from the jungles of the Isthmus of Panama to the glittering mansions of Gilded Age New York. Edwin, ruthlessly competitive and gifted, did everything he could to lock his younger brother out of the theatrical game. As he came of age, John Wilkes found his plans for stardom thwarted by his older sibling's meteoric rise. Their divergent paths—Edwin's an upward race to riches and social prominence, and John's a downward spiral into failure and obscurity—kept pace with the hardening of their opposite political views and their mutual dislike. The details of the conspiracy to kill Lincoln have been well documented elsewhere. *My Thoughts Be Bloody* tells a new story, one that explains for the first time why Lincoln's assassin decided to conspire against the president in the first place, and sets that decision in the context of a bitterly divided family—and nation. By the end of this riveting journey, readers will see Abraham Lincoln's death less as the result of the war between the North and South and more as the climax of a dark struggle between two brothers who never wore the uniform of soldiers, except on stage.

Creating the John Brown Legend

Thomas Crawford (1813–1857) was the first American sculptor to study in Italy for an extended period of time. There, along with other artists—Greenough, Story, and Powers—he was part of a group that made prolific contributions to American neoclassical art. He is best known as the sculptor of much of the statuary and bas-reliefs of our nation's Capitol: the pediment figures over the Senate and of the House of Representatives, and the bronze Freedom atop the Capitol's dome. In writing this biography, Robert Gale was given exclusive access to all of Crawford's personal papers by the sculptor's granddaughter. An appendix lists extant works of Crawford and where they are found, and several plates illustrate his sculpture.

Gregarious Saints

Bouboulina and the Greek Revolution: Interdisciplinary Perspectives on the Heroine of 1821 offers a critical look at the life and times of one of the most important figures in modern Greek history, expanding readers' understanding of Bouboulina's continued presence in popular culture and her impact on feminism and diasporic Greek identity.

Dissenting Voices in America's Rise to Power

Correspondence, journals, compositions and other papers of Samuel Gridley Howe and Julia Ward Howe, and materials relating to other Howe family members.

Gilbert Stuart and the Impact of Manic Depression

Lincoln's Hundred Days tells the story of the period between September 22, 1862, when Lincoln issued his preliminary Proclamation, and January 1, 1863, when he signed the significantly altered decree. As battlefield deaths mounted and debate raged, Lincoln hesitated, calculated, prayed, and reckoned with the anxieties and expectations of millions.

A History of America in 100 Maps

Haptic perception – human beings' active sense of touch – is the most complex of human sensory systems, and has taken on growing importance within varied scientific disciplines as well as in practical industrial fields. This book's international team of authors presents the most comprehensive collection of writings on the subject published to date and cover the results of research as well as practical applications. After an introduction to the theory and history of the field, subsequent chapters are dedicated to the neuro-physiological basics as well as the psychological and clinical neuro-psychological aspects of haptic perception.

Busy in the Cause

A statue of Horace Mann, erected in front of the Boston State House in 1863, declares him the "Father of the American Public School System." For over a century and a half, most narratives about early American education have taken this epithet as the truth. As Mann looms over the Boston Common, so he has also loomed over discussions of early American schooling. Other scholarship has emphasized economic factors as the main reason for the emergence of public schools. The Common School Awakening offers a new narrative about the rise of public schools in America that counters these conceptions. In this book, David Komline explains how a broad and distinctly American religious consensus emerged in the first half of the nineteenth century, allowing people from across the religious spectrum to cooperate in systematizing and professionalizing America's schools in an effort to Christianize the country. At the height of this movement, several states introduced state-sponsored teacher training colleges and concentrated government oversight of schools in offices such as the one held by Mann. Shortly thereafter, the religious consensus that had served as the foundation for this common school system disintegrated. But the system itself remained, the legacy of not just one man, but of a whole network of reformers who put into motion a transatlantic and transdenominational religious movement - the "Common School Awakening."

My Thoughts Be Bloody

From the American Revolution to NAFTA to the Helms-Burton Act and beyond, this work offers an assessment of relations between the USA and Canada. It seeks to distil a mass of detail concerning cultural, economic and political developments of mutual importance during the past two centuries.

Thomas Crawford

Elizabeth, Mary, and Sophia Peabody were in many ways our American Brontes. The story of these remarkable sisters -- and their central role in shaping the thinking of their day -- has never before been fully told. Twenty years in the making, Megan Marshall's monumental biography brings the era of creative ferment known as American Romanticism to new life. Elizabeth, the oldest sister, was a mind-on-fire thinker. A powerful influence on the great writers of the era -- Emerson, Hawthorne, and Thoreau among them -- she also published some of their earliest works. It was Elizabeth who prodded these newly minted Transcendentalists away from Emerson's individualism and toward a greater connection to others. Mary was a determined and passionate reformer who finally found her soul mate in the great educator Horace Mann. The frail Sophia was a painter who won the admiration of the preeminent

society artists of the day. She married Nathaniel Hawthorne -- but not before Hawthorne threw the delicate dynamics among the sisters into disarray. Marshall focuses on the moment when the Peabody sisters made their indelible mark on history. Her unprecedented research into these lives uncovered thousands of letters never read before as well as other previously unmined original sources. The Peabody Sisters casts new light on a legendary American era. Its publication is destined to become an event in American biography. This book is highly recommended for students and reading groups interested in American history, American literature, and women's studies. It is a wonderful look into 19th-century life.

Bouboulina and the Greek Revolution

A classic study of fifteen crucial years in the formation of the modern world The Birth of the Modern has established itself as a new kind of historical work - an examination of the way the matrix of the modern world was formed. Paul Johnson, one of today's most popular historians, takes fifteen critical years and subjects them to a fascinatingly detailed analysis: their geopolitics and politics, their cultural and intellectual life, their technology and science. He investigates every area of life, in every corner of the world. And he makes of this huge variety of elements a coherent narrative, told through the lives and actual words of the age's people - outstanding and ordinary - so that the reader feels he was there.
