Contingency in Madagascar

Madagascar is one example of today's global poverty. Rather than mourn what this country lacks from a safe critical distance, Muecke and Pam aim to strengthen its connections with their art, making words and images move as they travel this unique country.

Multimodality and Social Semiosis

Gunther Kress, one of the founders of social semiotics and multimodality, has made lasting contributions to these fields through his work in semiotics and meaning-making; power and identity; agency, design, production; and pedagogy and learning; in varied sites of transformation. This book brings together leading scholars in a variety of disciplines, including social semiotics, pedagogy, linguistics, media and communication studies, new literacy studies, ethnography, academic literacy, literary criticism and, more recently, medical/clinical education, to examine and build upon his work. This disciplinary diversity is evidence of the ways in which Kress' work has influenced and been influenced by a wide range of academic work and intellectual endeavors and how it has been used to lay foundations for theory-building and concept development in a varied yet connected range of areas. The individual contributions to the book pick up the threads of the often collaborative work of the authors with Kress; they show how these approaches were subsequently developed and discuss what future trajectories the authors see for them.

Mindful Aesthetics

In the last few decades, literary critics have increasingly drawn insights from cognitive neuroscience to deepen and clarify our understanding of literary representations of mind. This cognitive turn has

been equally generative and contentious. While cognitive literary studies has reinforced how central the concept of mind is to aesthetic practice from the classical period to the present, critics have questioned its literalism and selective borrowing of scientific authority. *Mindful Aesthetics* presents both these perspectives as part of a broader consideration of the ongoing and vital importance of shifting concepts of mind to both literary and critical practice. This collection contributes to the forging of a new interdisciplinarity,' to paraphrase Alan Richardson's recent preface to the *Neural Sublime*, that is more concerned with addressing how, rather than why, we should navigate the increasingly narrow gap between the humanities and the sciences.

The Philosophical Ethology of Vinciane Despret

Vinciane Despret is a Belgian philosopher whose work proposes new questions and approaches to human-animal relations. Of central importance to her thought is an intellectual and cultural proposal to allow animals to show their agency and allow them to be interesting. With genuine curiosity, Despret looks at how humans and animals transform one another through daily encounters, and she explores these metamorphoses through an engagement with the history of philosophy, literature, science, field research, and art. In a playful though serious tone, Despret claims that animals are always more interesting than we give them credit for, and that the achievements of animals are never far from our own. This book was originally published as a special issue of *Angelaki: Journal of the Theoretical Humanities*.

Photography as Critical Practice

The "other" is a topic of great interest within and across contemporary photographic practice and theory, yet it remains neglected outside the now well-established field of postcolonial studies. This volume brings together photography and written essays that relate to aspects of otherness and visual work. Presented together, the images and critical writings work in concert to construct a new social perspective on questions of otherness and alterity and to highlight photography as a form of critical practice. In a departure from existing conceptions of otherness in postcolonial discourse, 'Photography as Critical Practice' places emphasis on the human condition not as a liberal concept, but as something formed and framed by a broader dimension of social, sexual, and cultural otherness. In this way, the book provides a fascinating new vista on the otherness of photography.

History, Power, Text

History, Power, Text: Cultural Studies and Indigenous Studies is a collection of essays on Indigenous themes published between 1996 and 2013 in the journal known first as *UTS Review* and now as *Cultural Studies Review*. This journal opened up a space for new kinds of politics, new styles of writing and new modes of interdisciplinary engagement. *History, Power, Text* highlights the significance of just one of the exciting interdisciplinary spaces, or meeting points, the journal enabled. 'Indigenous cultural studies' is our name for the intersection of cultural studies and Indigenous studies showcased here. This volume republishes key works by academics and writers Katelyn Barney, Jennifer Biddle, Tony Birch, Wendy Brady, Gillian Cowlshaw, Robyn Ferrell, Bronwyn Fredericks, Heather Goodall, Tess Lea, Erin Manning, Richard Martin, Aileen Moreton-Robinson, Stephen Muecke, Alison Ravenscroft, Deborah Bird Rose, Lisa Slater, Sonia Smallacombe, Rebe Taylor, Penny van Toorn, Eve Vincent, Irene Watson and Virginia Watson—many of whom have taken this opportunity to write reflections on their work—as well as interviews between Christine Nicholls and painter Kathleen Petyarre, and Anne Brewster and author Kim Scott. The book also features new essays by Birch, Moreton-Robinson and Crystal McKinnon, and a roundtable discussion with former and current journal editors Chris Healy, Stephen Muecke and Katrina Schlunke.

The Medium of Contingency

The notion of 'contingency' has become crucial both in contemporary philosophy, and, as the artists in this volume suggest, in art today. Transcriptions of lectures by Reza Negarestani, Elie Ayache and Matthew Poole discuss the need for artists to abandon notions of autonomy and knowledge the greater networks to which they belong. This publication also includes a group discussion with the exhibition organizer, gallerist Miguel Abreu, and artists Scott Lyall and Sam Lewitt, that explores how a contemporary reading of the notion of 'contingency' is relevant to contemporary artists.

Technologies of Magic

Technologies of Magic charts curious territory - a place occupied by both machines and magic. This collection of essays investigates the co-existence of very old forms of thought - belief in ghosts, magic, spirits - and contemporary culture. Refracted through highly technologised societies, magic manifests itself in surprising ways and through a diverse range of practices. Apprehension of the magical - in the world of machines - can give rise to a feeling of uncanny unease. These essays show that ultimately this produces another way of thinking about technology in contemporary culture.

Humanitarian Photography

This book investigates the historical evolution of 'humanitarian photography' - the mobilization of photography in the service of humanitarian initiatives across state boundaries.

The Culture of Photography in Public Space

From privacy concerns regarding Google Street View to surveillance photography's association with terrorism and sexual predators, photography as an art has become complex terrain upon which anxieties about public space have been played out. Yet the photographic threat is not limited to the image alone. A range of social, technological and political issues converge in these rising anxieties and affect the practice, circulation, and consumption of contemporary public photography today. The Culture of Photography in Public Space collects essays and photographs that offer a new response to these restrictions, the events and the anxieties that give rise to them.

Still Shakespeare and the Photography of Performance

Examines both theatrical and staged art photographs, demonstrating their role in fixing and unfixing Shakespearean authority.

Darwin and the Making of Sexual Selection

Sexual selection, or the struggle for mates, was of considerable strategic importance to Darwin's theory of evolution as he first outlined it in the "Origin of Species," and later, in the "Descent of Man," it took on a much wider role. There, Darwin's exhaustive elaboration of sexual selection throughout the animal kingdom was directed to substantiating his view that human racial and sexual differences, not just physical differences but certain mental and moral differences, had evolved primarily through the action of sexual selection. It was the culmination of a lifetime of intellectual effort and commitment. Yet even though he argued its validity with a great array of critics, sexual selection went into abeyance with Darwin's death, not to be revived until late in the twentieth century, and even today it remains a controversial theory. In unfurling the history of sexual selection, Evelleen Richards brings to vivid life Darwin the man, not the myth, and the social and intellectual roots of his theory building."

In Search of Common Ground

The Italian Enlightenment, no less than the Scottish, was central to the emergence of political economy and creation of market societies. Sophus Reinert turns to Milan in the late 1700s to recover early socialists' preoccupations with the often lethal tension among states, markets, and human welfare, and the policies these ideas informed.

The Academy of Fisticuffs

The intellectual Alexander Herzen was as famous in his day as Tolstoy and Dostoevsky. Aileen Kelly presents the first fully rounded study of the farsighted genius whom Isaiah Berlin called the forerunner of much twentieth-century thought. For Herzen, history, like Darwinian nature, was an improvisation both constrained and encouraged by chance.

The Discovery of Chance

Trust occupies a unique place in contemporary discourse. Seen as both necessary and good, it is variously depicted as enhancing the social fabric, lowering crime rates, increasing happiness, and generating prosperity. It allows for complex political systems, permits human communication, underpins financial instruments and economic institutions, and holds society itself together. There is scant space within this vision for a nuanced discussion of mistrust. With few exceptions, it is treated as little more than a corrosive absence. This monograph, instead, proposes an ethnographic and conceptual

exploration of mistrust as a legitimate epistemological stance in its own right. It examines the impact of mistrust on practices of conversation and communication, friendship and society, as well as politics and cooperation, and suggests that suspicion, doubt, and uncertainty can also ground ways of organizing human society and cooperating with others.

Mistrust

REDD+ must be transformational. REDD+ requires broad institutional and governance reforms, such as tenure, decentralisation, and corruption control. These reforms will enable departures from business as usual, and involve communities and forest users in making and implementing policies that affect them. Policies must go beyond forestry. REDD+ strategies must include policies outside the forestry sector narrowly defined, such as agriculture and energy, and better coordinate across sectors to deal with non-forest drivers of deforestation and degradation. Performance-based payments are key, yet limited. Payments based on performance directly incentivise and compensate forest owners and users. But schemes such as payments for environmental services (PES) depend on conditions, such as secure tenure, solid carbon data and transparent governance, that are often lacking and take time to change. This constraint reinforces the need for broad institutional and policy reforms. We must learn from the past. Many approaches to REDD+ now being considered are similar to previous efforts to conserve and better manage forests, often with limited success. Taking on board lessons learned from past experience will improve the prospects of REDD+ effectiveness. National circumstances and uncertainty must be factored in. Different country contexts will create a variety of REDD+ models with different institutional and policy mixes. Uncertainties about the shape of the future global REDD+ system, national readiness and political consensus require flexibility and a phased approach to REDD+ implementation.

Realising REDD+

This book situates the medieval manuscript within its cultural contexts, with chapters by experts in bibliographical and theoretical approaches to manuscript study.

The Medieval Manuscript Book

Focusing on the term empowerment this book examines the various meanings given to the concept of empowerment and the many ways power can be expressed - in personal relationships and in wider social interactions.

Questioning Empowerment

A law professor draws from social and cultural theory to defend her idea that that intellectual property law affects the ability of citizens to live a good life and prohibits people from making and sharing culture.

From Goods to a Good Life

The sixtieth anniversary edition of Frantz Fanon's landmark text, now with a new introduction by Cornel West. First published in 1961, and reissued in this sixtieth anniversary edition with a powerful new introduction by Cornel West, Frantz Fanon's *The Wretched of the Earth* is a masterful and timeless interrogation of race, colonialism, psychological trauma, and revolutionary struggle, and a continuing influence on movements from Black Lives Matter to decolonization. A landmark text for revolutionaries and activists, *The Wretched of the Earth* is an eternal touchstone for civil rights, anti-colonialism, psychiatric studies, and Black consciousness movements around the world. Alongside Cornel West's introduction, the book features critical essays by Jean-Paul Sartre and Homi K. Bhabha. This sixtieth anniversary edition of Fanon's most famous text stands proudly alongside such pillars of anti-colonialism and anti-racism as Edward Said's *Orientalism* and *The Autobiography of Malcolm X*.

The Wretched of the Earth

With their powerful blend of political and aesthetic concerns, Edward W. Said's writings have transformed the field of literary studies. This long-awaited collection of literary and cultural essays offers evidence of how much the fully engaged critical mind can contribute to the reservoir of value, thought, and action essential to our lives and culture.

Reflections on Exile and Other Essays

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Global Trends 2040

The Origins of the Modern World offers a refreshing alternative to Eurocentric histories by exploring the roles that Asia, Africa, and the New World played in creating the world we know today. Starting in 1400, it brings the saga of the modern world to the present, considering how and why the United States emerged as a world power in the 20th century and why Asia is experiencing resurgence now.

The Origins of the Modern World

Eric Lesdema's photographic series Fortunes of War was awarded the UN Nikon World Prize in 1997. Originally a series of fifteen images, this extended edit includes eighty-three color photos, accompanied by a series of essays by leading academics in the field. The essays explore ideas raised by the prescient nature of the work, offering a highly original and engaging debate about its alternative approach to documentary photography, which views photography as an alternate space with the potential to project events rather than record them. In exploring an approach that cuts against the traditional concept central to documentary photography since its inception, the book thus raises important questions about twenty-first century interpretations and applications of photography and media. With thought-provoking research and a diverse array of essay contributions, Fortunes of War proposes new lines of interdisciplinary investigation, reflection, and inquiry.

Fortunes of War

This book develops the idea that since decolonisation, regional patterns of security have become more prominent in international politics. The authors combine an operational theory of regional security with an empirical application across the whole of the international system. Individual chapters cover Africa, the Balkans, CIS Europe, East Asia, EU Europe, the Middle East, North America, South America, and South Asia. The main focus is on the post-Cold War period, but the history of each regional security complex is traced back to its beginnings. By relating the regional dynamics of security to current debates about the global power structure, the authors unfold a distinctive interpretation of post-Cold War international security, avoiding both the extreme oversimplifications of the unipolar view, and the extreme deterritorialisations of many globalist visions of a new world disorder. Their framework brings out the radical diversity of security dynamics in different parts of the world.

Regions and Powers

Looking at decolonization in the conditional tense, this volume teases out the complex and uncertain ends of British and French empire in Africa during the period of 'late colonial shift' after 1945. Rather than view decolonization as an inevitable process, the contributors together explore the crucial historical moments in which change was negotiated, compromises were made, and debates were staged. Three core themes guide the analysis: development, contingency and entanglement. The chapters consider the ways in which decolonization was governed and moderated by concerns about development and profit. A complementary focus on contingency allows deeper consideration of how colonial powers planned for 'colonial futures', and how divergent voices greeted the end of empire. Thinking about entanglements likewise stresses both the connections that existed between the British and French empires in Africa, and those that endured beyond the formal transfer of power.

Britain, France and the Decolonization of Africa

The interwoven futures of humanity and our planet are under threat. Urgent action, taken together, is needed to change course and reimagine our futures.

Reimagining our futures together

In 1996 physicist Alan Sokal published an essay in *Social Text*--an influential academic journal of cultural studies--touting the deep similarities between quantum gravitational theory and postmodern philosophy. Soon thereafter, the essay was revealed as a brilliant parody, a catalog of nonsense written in the cutting-edge but impenetrable lingo of postmodern theorists. The event sparked a furious debate in academic circles and made the headlines of newspapers in the U.S. and abroad. Now in *Fashionable Nonsense: Postmodern Intellectuals' Abuse of Science*, Sokal and his fellow physicist Jean Bricmont expand from where the hoax left off. In a delightfully witty and clear voice, the two thoughtfully and thoroughly dismantle the pseudo-scientific writings of some of the most fashionable French and American intellectuals. More generally, they challenge the widespread notion that scientific theories are mere "narrations" or social constructions.

Imperialism

This book explores the interaction between notions of property in law and particular aspects of intellectual property law.

Fashionable Nonsense

The meat of wild species, referred to in this report as 'wild meat', is an essential source of protein and a generator of income for millions of forest-living communities in tropical and subtropical regions. However, unsustainable harvest rates currently

Concepts of Property in Intellectual Property Law

Neeti Nair's account of the partition in the Punjab rejects the idea that essential differences between the Hindu and Muslim communities made political settlement impossible. Far from being an inevitable solution, partition—though advocated by some powerful Hindus—was a stunning surprise to the majority of Hindus in the region.

Towards a sustainable, participatory and inclusive wild meat sector

Based on a 2012 symposium on *Perfection*, held at the Whitechapel Gallery in East London, this book explores the ways in which artists engage with ideas of perfection, drawing on screenings, performances and discussions. The symposium featured the work of an eclectic group of artists and writers, who use photographic lenses of many kinds to create works that engage with or disrupt ideas of perfection. Framed from an artist's perspective and spanning a diverse range of artworks that question how these ideas shape our personal identities and our social and political systems, *On Perfection* considers the multifaceted nature of lens-based practices.

Changing Homelands

Many countries around the world are engaged in decentralization processes, and most African countries face serious problems with forest governance, from benefits sharing to illegality and unsustainable forest management. This book summarizes experiences to date on the extent and nature of decentralization and its outcomes, most of which suggest an underperformance of governance reforms, and explores the viability of different governance instruments in the context of weak governance and expanding commercial pressures over forests. Findings are grouped into two thematic areas: decentralization, livelihoods and sustainable forest management; and international trade, finance and forest sector governance reforms. The authors examine diverse forces shaping the forest sector, including the theory and practice of decentralization, usurpation of authority, corruption and illegality, inequitable patterns of benefits capture and expansion of international trade in timber and carbon credits, and discuss related outcomes on livelihoods, forest condition and equity. The book builds on earlier volumes exploring different dimensions of decentralization and perspectives from other world regions, and distills dimensions of forest governance that are both unique to Africa and representative

of broader global patterns. Authors ground their analysis in relevant theory while attempting to distill implications of their findings for policy and practice.

On Perfection

Maya Deren (1917–1961) was a Russian-born American filmmaker, theorist, poet, and photographer working at the forefront of the American avant-garde in the 1940s and 1950s. Influenced by Jean Cocteau and Marcel Duchamp, she is best known for her seminal film *Meshes of the Afternoon* (1943), a dream-like experiment with time and symbol, looped narrative and provocative imagery, setting the stage for the twentieth-century's groundbreaking aesthetic movements and films. Maya Deren assesses both the filmmaker's completed work and her numerous unfinished projects, arguing Deren's overarching aesthetic is founded on principles of incompleteness, contingency, and openness. Combining the contrasting approaches of documentary, experimental, and creative film, Deren created a wholly original experience for film audiences that disrupted the subjectivity of cinema, its standards of continuity, and its dubious facility with promoting categories of realism. This critical retrospective reflects on the development of Deren's career and the productive tensions she initiated that continue to energize film.

Governing Africa's Forests in a Globalized World

In "Watching The English" anthropologist Kate Fox takes a revealing look at the quirks, habits and foibles of the English people. She puts the English national character under her anthropological microscope, and finds a strange and fascinating culture, governed by complex sets of unspoken rules and byzantine codes of behaviour. The rules of weather-speak. The ironic-gnome rule. The reflex apology rule. The paranoid-pantomime rule. Class indicators and class anxiety tests. The money-talk taboo and many more ... Through a mixture of anthropological analysis and her own unorthodox experiments (using herself as a reluctant guinea-pig), Kate Fox discovers what these unwritten behaviour codes tell us about Englishness.

The Visible and the Invisible contains the unfinished manuscript and working notes of the book Merleau-Ponty was writing when he died. The text is devoted to a critical examination of Kantian, Husserlian, Bergsonian, and Sartrean method, followed by the extraordinary "The Intertwining--The Chiasm," that reveals the central pattern of Merleau-Ponty's own thought. The working notes for the book provide the reader with a truly exciting insight into the mind of the philosopher at work as he refines and develops new pivotal concepts.

An Anthropology of Landscape tells the fascinating story of a heathland landscape in south-west England and the way different individuals and groups engage with it. Based on a long-term anthropological study, the book emphasises four individual themes: embodied identities, the landscape as a sensuous material form that is acted upon and in turn acts on people, the landscape as contested, and its relation to emotion. The landscape is discussed in relation to these themes as both 'taskscape' and 'leisurescape', and from the perspective of different user groups. First, those who manage the landscape and use it for work: conservationists, environmentalists, archaeologists, the Royal Marines, and quarrying interests. Second, those who use it in their leisure time: cyclists and horse riders, model aircraft flyers, walkers, people who fish there, and artists who are inspired by it. The book makes an innovative contribution to landscape studies and will appeal to all those interested in nature conservation, historic preservation, the politics of nature, the politics of identity, and an anthropology of Britain.

Focus on Photography Student Book

The teacher's edition includes: * both traditional and digital photography * instruction on how to take photographs of a variety of subjects from landscape to portrait to animal photography * outstanding student examples * a wealth of professional examples from important historical figures in photography, such as Ansel Adams and Margaret Bourke-White, to the works of dynamic contemporary photographers, such as Jerry Uelsmann and Maggie Taylor.

Focus on Photography

This lively, informed defense of modern photography focuses on not focusing--and other unconventional methods that have been successfully employed by acclaimed photographers. From portraits to documentary images and from abstractions to landscapes, the author identifies 100 important images that are emblematic of innovation in modern photography, revealing the frequently complex processes involved in their composition. In so doing, she offers a provocative reminder of what makes a great photograph.

Focus on Photography Teacher Book

Focus is an important artistic tool, directing your viewers into and around your image, but a technical challenge too. In this book, the first serious treatise of the topic in the digital age, John Neel shows how a mastery of your lens will greatly enhance the quality and 'wow' factor of your photographs. Never losing sight of what real-life photographers need to know, Focus in Photography will let you master bokeh and other focus techniques, giving you a complete understanding of optics--and what actually happens to light within the camera in your hand. Richly illustrated with John's own amazing images, and drawing on his well-known authority in the field, it will be a valuable asset to students of photography, enthusiasts looking to refine their art, product photographers and commercial shooters alike.

Photography in Focus

Photography in Focus is a comprehensive photography textbook dealing with basic camera functions, lighting, film development, and printmaking for black and white and color photography.

Why it Does Not Have to be in Focus

As digital cameras and software packages become more advanced, seemingly by the minute, it has become easier than ever to overlook the basic elements which have always resulted in the best photographs, no matter how fancy (or primitive) the camera itself. Composition is the single most important aspect of creating great images, no matter what level of photographer you happen to be. No amount of digital wizardry can turn a badly composed image into a picture you would want to display. While many books on composition tend to overcomplicate the subject, this book breaks down everything you need to know into small, digestible chunks of information that you will actually remember once you're out and about taking pictures. Instead of plodding through long and complex pages of text, this book supplements the necessary information, such as the basics of the rule of thirds and how to

get good highlights and shadows, with tons of gorgeous, full color images that actually show you what to do and how to do it, rather than just telling you what to try. You'll be amazed at the gorgeous images you'll create, whether your passion is for photographing your family, pets, travel adventures, nature, or anything else.

Focus In Photography

Understanding Photobooks is a user-friendly guide to engaging with the photographic book— or, as it is widely known, the photobook. Despite its importance as a central medium in which many photographers showcase their work today, there is surprisingly little information on the mechanics of the photobook: what exactly it does and how it does it. Written for makers and artists, this book will help you develop a better understanding of the images, concept, sequence, design, and production of the photobook. With an awareness of the connections between these elements, you'll be able to evaluate photobooks more clearly and easily, ultimately allowing for a deeper and more rewarding experience of the work.

Photography in Focus

Providing a thorough overview of both digital and film photography, a helpful resource provides amateur photographers with everything they need to know in order to produce high-quality photographs using all kinds of cameras, covering such topics as lighting, exposure, lenses, filters, composition, and special film and digital techniques. Original.

Focus on Photography

Written in an accessible straightforward style, this book looks at the world of photography. The book is illustrated throughout with clear diagrams and photographs, and numerous step-by-step demonstration sequences. Photography covers all the reader needs to know about how to take better pictures, as well as increasingly ambitious projects to inspire all photographers. Most modern camera models are featured.

Photography in Focus

An introduction to photography that includes material on lighting, darkroom techniques, equipment, and related topics.

Photography in Focus, Hardcover Student Edition

The London, Upton, Stone series has helped over 1,000,000 photography students capture their potential. The new 8th edition of A Short Course in Photography introduces students to the fundamentals of photography and suggests ways in which they might create photographs that have meaning. With a special focus on black and white photography, the book also explores digital techniques and web photography resources, equipment, cameras and camera accessories, the exposure and development of film, and the making and finishing of prints. All aspects of the process are explained and illustrated clearly in two-page spreads, each of which addresses a self-contained topic.

Focus On Composing Photos

Discover art photography through the 100 greatest ever photos. In the two centuries that photography has been practical, it has created a means of communication , the understanding of which is essential to anyone navigating this very visual world. From Daguerre's early images to the real-life sharing of Instagram, photography has never really been "the truth," though nor is it necessarily dishonest. It is ambiguous, complicated and subjective, fleeting and lasting at the same time. This book will introduce the best examples and show you how you can 'read' every image.

Understanding Photobooks

Explains not only the technical aspects of photographing people but also the artistic, providing amateur photographers with complete, illustrated instructions for shooting portrait, fashion, glamour, and nude shots.

Focus on Photography

Principles of photography; Camera technique; Picture building; Black and white processing and printing; Further equipment and techniques; Advanced darkroom techniques; Color photography; Color processing and printing; Evolving your own approach.

Amphotos Complete Book of Photography

This 144-page book offers guidelines for making photograms and other photographic pictures without a camera. Photograms are made by arranging a variety of objects on light-sensitive paper, exposing the arrangement briefly to light and developing the latent photographic image. Initially, the book presents a brief history of the development of photograms before presenting information on making photograms. Making sun prints, developed directly on light-sensitive paper by means of the sun's rays, is illustrated.

A Short Course in Photography

Author Haje Jan Kamps knows that you are travelling for two good reasons: to experience great things, and to get great photos of your travels. He also understands very well how people's eyes tend to glaze over when phrases like "Circles of Confusion" or the "Inverse Square Law" are brandished about, and focuses instead on great photographs, and how to take them. A realistic and easy-to-follow approach to travel photography puts the fun back into photography, and by following a series of simple exercises, you'll learn much more about photography than you would have thought possible! Focus on Travel Photography covers the basics of photography in brief before throwing itself into the real essence of travel photography: landscapes, people, and capturing the spirit of your destination. Finally, the author explores how you can download, edit, and distribute your photos while you're on the move-all without being over-burdened with equipment.

Photography Decoded

Annotation "Digital Abstract & Macro Photography" is as much a "coffee table" book as it is a technical instruction book. It teaches through visual inspiration (Wow! That's beautiful. What did it take to make it so special?). It is aimed primarily at the reader who has already read and digested one of the more than 800 existing books that thoroughly explain the inner workings of Photoshop (or other image manipulation software) but which have little time or space left for explaining how and where to apply that knowledge in practical and specific situations. It explains how to take and digitally process eye-catching, soul-grabbing photographs that take the photographer's vision further than it's used to going. It explains production techniques that are particularly suited to this type of subject matter, presenting them in a very friendly but concise manner. The focus is on learning visually and inspirationally, rather than strictly verbally.

The Complete Book of Photographing People

Aesthetic, technical and scientific uses of the medium of photography should be understood as socially and historically determined processes. Franz Roh's cautionary remark of 1929 that photography might give rise to a modern kind of illiteracy has often been quoted as a call for a more comprehensive educational effort in the field. However, there can be little doubt that artistic freedom alone guarantees a genuinely creative approach and deserves to be fully respected. Thus, photography remains a paradigm of very complicated cultural and communicative developments. Starting from the exemplary Graphische Lehr- und Versuchsanstalt founded by the Austrian photochemist and historian of photography Josef Maria Eder in Vienna in 1888, this reader presents further positions regarding photography as a schooling issue in Germany, the United States, Croatia, and France between 1900 and today. The contributions to the volume explore topics like the independency of photography, its being looked at as art or applied technology, as a science in its own right, as a hobby or profession, or even as a completely "deskilled" activity in an age engaged in the rampant exchange of photographic images through mobile devices and the Internet.

This is the fifth book of the Finely Focused Photography Books Series by Al Judge. Finely Focused Photography Books is a new series of books from Al Judge for people who prefer to study photography one topic at a time. Each Book of the Series draws upon Al's longer and more comprehensive books for content. Like all of Al Judge's books these books contain numerous photos and illustrations to help facilitate clear and concise communication. Understanding Digital Cameras will painlessly provide help and insight into the world of Digital Cameras and provide a strong foundation for mastering digital photography. Digital Cameras don't have to be intimidating. The underlying principles are surprisingly simple but rarely presented in layman's terms. Like any other area of specialization, photography has its own language. Fortunately, you only need to understand a few of terms and concepts to get started. This guide to DIGITAL PHOTOGRAPHY builds a solid foundation of photographic knowledge with easy-to-follow discussions of everything that you need to know in order to get started with confidence. Every photographic term used in the book is clearly defined and thoroughly explained. All terms are also highlighted by using BOLD CAPS so that you can easily find them again to refresh your memory. This Photographic Guide will take the mystery out of digital cameras, camera choices, and Photographic Jargon. This book is filled with charts, illustrations and photos that take the discussion to new levels. You will not only understand the terminology and techniques discussed, but you will have a much better understanding of how your camera works and what is actually happening when you make adjustments. The charts and photos should help you to retain what you learn and put it to good use immediately. Although this book provides a fast-track approach to achieving photographic competence it does not rely on previous knowledge. This book will: Save you a great deal of time and effort. Help you take better pictures and know why they are better. Present the details and language of digital photography without

intimidation or confusing terminology - all terms are clearly defined and explained. You may also be interested in Al's other books. Digital Photography Like a Pro! It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

Vie d'Alphonse Daudet

Il règne une grosse ambiguïté autour de la figure d'Alphonse Daudet : le nom seul fait chanter les cigales, embaumer la lavande, miroiter la mer au fond des calanques... mais l'homme, lui, était nettement plus sombre. Méridional, il vécut à Paris. Romancier, il consacra surtout son talent à dénoncer les aspects les plus corrompus d'une société où il était mal à l'aise. Humaniste, celui qui écrivit "Rien de grand sans solidarité humaine" cultivait des opinions et des amitiés surprenantes... Un Homo duplex, comme il se qualifiait lui-même, que les fils nous raconte ici avec tendresse et délicatesse. (Édition annotée.)

Le Monde illustré (1857)

The analysis of UNESCO's audio-visual archives for their digitization has brought to light a forgotten album of thirty eight contact sheets and accompanying texts by Magnum photographer David "Chim" Seymour - a reportage commissioned by UNESCO in 1950 on the fight against illiteracy in southern Italy's Calabria region. A number of Seymour's photographs appeared in the March 1952 issue of the UNESCO Courier, accompanied by an article written by Carlo Levi, who gained worldwide fame with his 1945 memoir, *Christ Stopped at Eboli*.

Grand dictionnaire universel du XIXe siècle

Russe : un mot qui charrie son lot de fantômes, de mythes, de tourments. Qu'y a-t-il à sauver ? Dans ce récit d'émancipation, Diana Filippova dresse un portrait sans concession de la Russie contemporaine, et, comme en miroir, de la France et d'elle-même. Naître dans l'illusion de la grandeur et porter la chute dans son corps, se révolter contre ses origines et s'y cogner sans cesse, chercher refuge en politique

et le trouver dans l'écriture : Diana Filippova se met en quête d'une Russie qui n'a jamais existé, si ce n'est dans les romans et les terres d'exil. C'est l'histoire d'une femme russe qui, depuis sa plus tendre enfance, a décidé de ne plus l'être. C'est l'histoire d'une écrivaine française qui renoue avec les merveilles et les vices d'un héritage vivant dans les livres comme dans sa vie. Née en 1986 à Moscou, romancière et essayiste, Diana Filippova est notamment l'auteure de Technopouvoir (Les Liens qui Libèrent, 2019) et d'un premier roman, L'Amour et la Violence (Flammarion, 2021). Elle ranime ici le cadavre de la Russie des écrivains proscrits : une Russie métissée, humaniste et lucide.

Présentation commentée par l'artiste d'une partie des oeuvres et performances réalisées in situ entre 1999 et 2013 à la Demeure du chaos, grande demeure bourgeoise des collines lyonnaises transformée en "lieu de résonance de l'actualité où les images médiatisées et fulgurantes viennent trouver, en une curieuse alchimie, un sens peu commun" (H. Moving away from the explicitly political content of his previous novels, Victor Hugo turns to social commentary in *The Man Who Laughs*, an 1869 work that was made into a popular film in the 1920s. The plot deals with a band of miscreants who deliberately deform children to make them more effective beggars, as well as the long-lasting emotional and social damage that this abhorrent practice inflicts upon its victims.
