What's the Difference between Complexity and Contradiction as a Way of Reading a Building But Really Its Effect Is Uh Is Spatial Isn't It It's the Way in Which It Sort Of Seems To Lean In and Recede and the Placement of the Columns and Everything Else Are all Calculated To Enhance this Real It's Not an Exciting Ambiguity but I Mean the Idea that You're Going To Be Ambiguous between a Greek with between a Church in the Round in the Lineage and an Oval Church That Ain't that It's Not Exciting Ambiguity I Mean like It's Not What's Moving You in There the Ambiguity about Weight and Form Is the Exciting One Yeah It Seems To Be Kind Of Moving In and Out Constantly So What What the Function of Buildings Is and How It Accommodates Complex Different Functions and in Essence He's Making I Think a Perfectly Valid Case in Favor of More Generic or Looser Fitting Buildings and against this Kind of Machine Age Um Very Tightly Fitting Built-In Furniture Sort of Approach It's Difficult To Understand What He Means by the Double Function so the Three Examples

Are the Rauschenberg Painting Which Is a Sort of Abstract Expressionist Painting Which Also as Part of the Artwork Has a Chair Um like a Wooden Chair

And There's in this Very Square Pavilion There's One Tree Thin Tree Trunk Coming Down Making a Column Which Has a Shelf Which Is Very Light and the Shelf Is Supported on the Other Corner by a Bamboo Rod Which Is like a Tension Cable so You Can Imagine You've Got this Thick Stick and this Thin Stick and this When the Thick Stick Is Uneven and the Thin Stick Is Even and You've Got Contradictions There Which Are Very Nice these Different Things They Tasteful a Bit Too Tasteful It's Camp They're Exquisite Yes It's Beaut It's like Alto It's So Beautiful Excuse That You Want To Punch And You Just Say It's Nice When that Happens It's a Really It's a Good Building It's a Great Reference Yeah I've Never Been There no Monte Porcha no Never Been so He Has this Quote a Valid Order Accommodates the Circumstantial Contradictions of a Complex Reality So in a Sense this Sounds like It Gestures towards What in the Contemporary Would Think of As Loose Fit the Idea that an Architecture Should Not Address Absolutely Directly the Program Which Is Given to It on You Know on the Day of the Briefing

And Um the Spans Are Not All the Same Length because if the Column Is Short It Just Moves Up and the Fan Doesn't Have To Fan As Far and if and if the Column Has To Be Very Tall It Can Fan Further Yes so that Would Be that's the Kind of Answer and Yeah It's a Kind of Adaptation I Think It's Difficult Isn't It because Later On that He Makes the Case That for Instance Grand Central Station Has a Certain Adaptability It's Been Able To Survive a Certain Amount of Entropy in Its Development because They You Know They're all of these Different Bits Which Have Sort Of Filled It Up Saint Basil's Cathedral in Moscow

Part 1, The Burial of the Dead

April is the cruellest month

Lilacs out of the dead land, mixing Memory and desire, stirring Dull roots with spring rain. Winter kept us warm, covering Earth in forgetful snow, feeding

What are the roots that clutch, what branches grow Out of this stony rubbish? Son of man

And the dead tree gives no shelter, the cricket no relief, And the dry stone no sound of water.

Unreal City, Under the brown fog of a winter dawn
