Introduction to Sociology 2e

Using engaging stories and a diverse cast of characters, Lisa Wade memorably delivers what C. Wright Mills described as both the terrible and the magnificent lessons of sociology. With chapters that build upon one another, *Terrible Magnificent Sociology* represents a new kind of introduction to sociology. Recognizing the many statuses students carry, Wade goes beyond race, class, and gender, considering inequalities of all kinds and their intersections. She also highlights the remarkable diversity of sociology, not only of its methods and approaches but also of the scholars themselves, emphasizing the contributions of women, immigrants, and people of color. The book ends with an inspiring call to action, urging students to use their sociological imaginations to improve the world in which they live.

Foucault - The Key Ideas

Social psychology is the part of psychology that studies human interaction: its manifestations, its causes, its consequences, and the psychological processes involved. It is an extraordinarily popular subject of informal and formal study and a major focus of scientific research. Social psychology is the scientific study of how people's thoughts, feelings, and behaviours are influenced by the actual, imagined, or implied presence of others. Like other sciences, social psychology has its own specialist language, arcane technical terms, subtle distinctions, sophisticated research methods and arid statistical analyses. It can at times seem dry. Introductory textbooks in this field are often weighty tomes designed to train students to be scientific social psychologists. They are usually pitched at those specialising in social psychology. During the years immediately following World War II, there was frequent collaboration between psychologists and sociologists. However, the two disciplines have become increasingly specialised and isolated from each other in recent years, with sociologists focusing on "macro variables" (eg: social structure) to a much greater extent. Nevertheless, sociological approaches to social psychology remain an important counterpart to psychological research in this area. *Test Yourself: Social Psychology* aims to provide a concise and accessible yet scholarly introduction to the essentials of social psychology. Social psychology has developed in such a way that it sits at the intersection of disciplines. It is influenced by and has influence on developments and perspectives outside social psychology -- this interdisciplinary potential is one of the strengths of social psychology. Studies in social cognition draw on experimental cognitive psychology. What is sometimes called individual psychology contributes personality tests and other diagnostic tests that can be used as correlates of social processes. Research dealing with social norms and groups brings social psychology into contact with sociology and social anthropology. Praxis II Sociology (5952) Exam Secrets Study Guide: Praxis II Test Review for the Praxis II: Subject Assessments

This Fourth Edition of George Ritzer's Introduction to Sociology shows students the relevance of sociology to their lives. While providing a rock-solid foundation, Ritzer illuminates traditional sociological concepts and theories, as well as some of the most compelling contemporary social phenomena: globalization, consumer culture, the digital world, and the "McDonaldization" of society. With examples on every page from current events and contemporary research, and stories about "public" sociologists who are engaging with the critical issues of today, the text demonstrates the power of sociology to explain the world, and the diversity of questions that sociologists seek to answer. New to this Edition New "Trending" boxes focus on influential books written by sociologists that have become part of the public conversation about important issues. Replacing "Public Sociology" boxes, these boxes demonstrate the diversity of sociology's practitioners, methods, and subject matter, and feature such authors as: Michelle Alexander (The New Jim Crow) Elizabeth Armstrong and Laura Hamilton (Paying for the Party) Randol Contreras (The Stick-Up Kids) Matthew Desmond (Evicted) Kimberly Hoang (Dealing in Desire) Arlie Hochschild (Strangers in Their Own Land) Eric Klinenberg (Going Solo) C.J. Pascoe (Dude, You're a Fag) Lori Peek and Alice Fothergill (Children of Katrina) Allison Pugh (The Tumbleweed Society) Updated examples in the text and "Digital Living" boxes keep pace with changes in digital technology and online practices, including Uber, bitcoin, net neutrality, digital privacy, WikiLeaks, and cyberactivism. New or updated subjects apply sociological thinking to the latest issues including: the 2016 U.S. election Brexit the global growth of ISIS climate change President Trump's proposed Mexican border wall further segmentation of wealthy Americans in the "super rich" transgender people in the U.S. armed forces charter schools the legalization of marijuana the Flint water crisis fourth-wave feminism
