One fun night on Halloween

we were making pumpkin bean

went to score a pumpkin catch

but someone picked the pumpkin patch!

bathroom, kitchen. 'Twas insane.

Pumpkin Bones had struck again.

We went right up to his door

heard the footsteps and the squeaks

laughter filled his plumpy cheeks.

Pumpkin, give the pumpkins back!

Pumpkin Bones, Pumpkin Bones?

Have you ever heard of Pumpkin Bones?

He put all the pumpkins back!

Camminando tra pastori e re magi. Trenta piccole meditazioni e un «quaderno» per la riflessione personale: un percorso di preparazione al Natale

"The 40th anniversary edition of an Orbis classic-Francis of Assisi's spirituality and life explained in the inimitable voice of Carlo Carretto"--

I, Francis

Written between the years 1944 and 1947 by the visionary Maria Valtorta, The Poem of the Man-God (recently retitled in its original Italian to "The Gospel As Revealed to Me") is considered one of the greatest works of private revelation to date. Penned in the same style as Ven. Anne Catherine Emmerich and Ven. Mary of Agreda, this work brings a level of detail and intimacy not found in the former's writings. Although it reads as a novel, it is regarded by many as one of the greatest "commentaries" on Scripture in history, expounding upon many areas of the New Testament that has, at present, remained unexplored or obscure. Most strikingly, it reveals the personalities of Jesus and His Apostles in awe-inspiring detail, and leaves the reader with a greater sense of love and closeness to the second Person of the Holy Trinity. In point of fact, this book moved Mother Teresa so much that she carried with her for spiritual reading, and recommended it, on numerous occasions, to those who asked about it. And when the children of Medjugorje asked Mary what She thought of the book, She said it was the "truth" and to "read it if a person wants to know Jesus." Despite its controversial history with certain Vatican officials, in the final analysis, the verbal approval by pope Pius XII is more than sufficient for Catholics to read it in good conscience. For those who desire to know Jesus Christ in a more intimate and personal way, there is little else that compares to this work. Poem of the Man-God Volume 1 (The Gospel As Revealed to Me)

With over a million copies sold, this classic work is essential reading for all who ask, "Where has my struggle led me?" A chance encounter with a reproduction of Rembrandt's *The Return of the Prodigal Son* catapulted Henri Nouwen on an unforgettable spiritual adventure. Here he shares the deeply personal and resonant meditation that led him to discover the place within where God has chosen to dwell. As Nouwen reflects on Rembrandt's painting in light of his own life journey, he evokes a powerful drama of the classic parable in a rich, captivating way that is sure to reverberate in the hearts of readers. Nouwen probes the several movements of the parable: the younger son's return, the father's restoration of sonship, the elder son's resentfulness, and the father's compassion. The themes of homecoming, affirmation, and reconciliation will be newly discovered by all who have known loneliness, dejection, jealousy, or anger. The challenge to love as God loves, and to be loved as God's beloved, will be seen as the ultimate revelation of the parable known to Christians throughout time, and is here represented with a vigor and power fresh for our times.

### Roadside Songs of Tuscany

The setting for his collection of eighteen stories by Gabriele D'Annunzio (1863-1938) was the Adriatic seaport of Pescara and its hinterland in the Italian region of Abruzzo, the author depicting events and personalities from the time of his youth, but also drawing from bygone incidents that were yet memorable in the area's folk history. Pescara may not have had the cachet of celebrated cities such as Venice or Florence, but sympathetically and wryly revealed here by the pen of one of Italy's great writers it lives and breathes with a vitality probably best compared to that of James Joyce's 'dear dirty Dublin'. Indeed Joyce, who admired D'Annunzio, may well have been inspired by the Italian's cameos of small-town life, his parade of saints, voluptuaries and reprobates, their repressions, obsessions, individual dissolutions, collective explosions of anarchy, and their aptness for bizarre behavior that extended from the catatonic to the manic. D'Annunzio came to recognize just how exotic his native region was after he had left it for Rome, where he worked for some years as a journalist and essay writer in the employ of various literary magazines. His Abruzzo articles, and especially those in which he records examples of extraordinary devotional behavior (akin to what Mark Twain was witnessing at that time on the banks of the Ganges), became the basis of the stories in this collection. D'Annunzio was a published poet at the age of sixteen, and his verse has never been absent from the Western Canon since. Something of his painterly style, the layered brushwork of his descriptions, the gorgeous romantic renderings of rural scenes and the moods of the sea, his celebrations of sensuality, his aesthete's fascination with all the possible bodily conditions, from the virginal-voluptuous to the decayed and moribund (he has been hailed as 'the body's poet'), will amaze and delight the reader even in the blandest and most dictionary-dependent translation. The present one is no such, however. Vladislav Zhukov is an experienced translator who has rendered works from four languages into English, including a substantial book of poetry, three volumes of short stories, and a novel (all available on Amazon.com). His knowledge of Italian is that of someone who acquired the language while living in Italy during his youth.

### The Return of the Prodigal Son

The *Malice of Herodotus* can perhaps best be described as the world's earliest known book review. But it is much more than that, for in the course of 'correcting' with considerable vituperation what he saw as Herodotus' anti-Greek bias, Plutarch tells us much about his own attitude to writing history. So that together with Lucian's *How to Write History* (see *Lucian A Selection* in this series) it forms a basic text for the study of Greek historiography. It is also perhaps the most revealing example of Plutarch's prose style with its rhetorical variety and energy and odd mixture of good and bad argument. But in citing lost works, Plutarch has preserved valuable fragments which don't exist elsewhere and need to be assessed by all students of the Persian Wars. Greek text with translation, introduction and commentary.

### Pescara Tales (1902)

"This may be more than a novel of high achievement, in fact; it may be the best work so far of a truly daring writer."—America Displaying his characteristic penchant for the macabre, the tender and the comic, Michael Tournier presents the traditional Magi describing their personal odysseys to Bethlehem—and audaciously imagines a fourth, "the eternal latecomer" whose story of hardship and redemption is the most moving and instructive of all. Prince of Mangalore and son of an Indian maharajah, Taor has tasted an exquisite confection, *rachat loukoum*, and is so taken by the flavor that he sets out to recover the recipe. His quest takes him across Western Asia and finally lands him in

Sodom, where he is imprisoned in a salt mine. There, this fourth wise man learns the recipe from a fellow prisoner, and learns of the existence and meaning of Jesus.

In *The Skin*, Curzio Malaparte extends the great fresco of European society he began in *Kaputt*. There the scene was Eastern Europe, here it is Italy during the years from 1943 to 1945; instead of Germans, the invaders are the American armed forces. In all the literature that derives from the Second World War, there is no other book that so brilliantly or so woundingly presents triumphant American innocence against the background of the European experience of destruction and moral collapse.

#### The Four Wise Men

This book describes the travels of Pietro de la Valle who was born in Rome in 1586 and whose travels took him to Constantinople, Asia Minor, Egypt, Palestine, Baghdad - where he married an Assyrian Christian in 1616 - and Persia. In 1621 he went from Ispahan to Shiraz and then the Gulf of Ormuz. Thereafter he travelled extensively in India, Cyprus, Malta and Sicily. In 1626 he came from Naples to Rome where he lived, fathering 14 sons, till he killed one of the Pope's servants, and had to flee the city. He died peacefully in 1652.

The papers in this conference proceedings address the various conceptual, measurement and statistical policy issues that arise when applying accounting frameworks to the concept of sustainable development.

#### The Pilgrim

This is the first published summary of the entire complex of the great necropolises of Rome, which were situated on Vatican Hill. The work concerns one of the most extensive, richest, and least-known Roman archaeological phenomena and bears witness to the work of creating an underground museum that has been followed internationally as a model of conservation practice. From the submerged world of the necropolises emerges the funeral 'normality' of the Roman world, from poorer cremations in wooden urns, to sumptuous sarcophagi, to sepulchres adorned with frescoes and mosaics. One can also observe Egyptian cults influencing the practice of epicurean philosophy. In addition, we can catch a glimpse of the first traces of Christianity, which include the presence of St. Peter the Apostle's tomb.

#### Measuring Sustainable Development Integrated Economic, Environmental and Social Frameworks

A young Jewish doctor prays to a coma patient's Blessed Mother on Christmas Eve, only to have the woman suddenly awakened; there is the voice that tells a too-busy ER doctor to stop a patient walking out, discovering an embolus that would have killed him. The late-night passing of a beloved aunt summons a childhood bully who shows up minutes later, after twenty-five years, to be forgiven and to heal a broken doctor. This ER doctor finds God's opposite in: a battered child's bruises covered over by make-up, a dying patient whose son finally shows up at the end to reclaim the man's high-top sneakers, the rich or celebrity patients loaded with prescription drugs from doctor friends who end up addicted. But, his real outrage is directed at our cavalier treatment of the elderly. If you put a G-tube in your 80-year-old mother with Alzheimer's because she's no longer eating, you will probably have a fast track to hell.

## On the Heights

This book presents a picture of pre-Roman Italy as complete and as faithful as modern discovery could make it, when it was originally published in 1937. The evidence of archaeology is combined with the testimony of historical tradition and non-Latin dialects in a balanced account of elements no less diverse than those of modern Europe. This description of Italy in the middle of the last millennium B.C. illuminates the success of Rome in achieving a united Italy, where others had failed – an achievement which paved the way for the course over of events over centuries.

PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is dependent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream-fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies

he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we don't deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...

### Saracens, Demons, & Jews

This uncompleted suite of poems by French poet Arthur Rimbaud was first published serially in the Paris literary review magazine "La Vogue." The magazine published part of "Illuminations" from May to June 1886. Paul Verlaine, Rimbaud's lover, suggested the publication of these poems, written between 1873 and 1875, in book form. All forty-two of the poems generally considered as part of "Illuminations" are collected together here in this edition. Of these forty-two poems almost all are in a prose poem format, the two exceptions are "Seapiece" and "Motion," which are vers libre. There is no universally defined order to the poems in "Illuminations," while many scholars believe the order of the poems to be irrelevant, this edition begins traditionally with "Après Le Deluge" or "After the Flood." Albert Camus hailed Rimbaud as "the poet of revolt, and the greatest." The worth of this praise for Rimbaud can be seen in "Illuminations," one of the most exemplary works of his poetic talent.

### Open Mind, Faithful Heart

"This volume contains a generous selection from thirteen collections of his poetry, including *Gesta Romanorum* (1952-1954), *Ogni Terzo Pensiero / Every Third Thought* (1989 -1993) and *Barlumi di Storia / Glimmers of History* (2002), and thus presents his accomplishment in all its scope and depth. Here are developed his major themes: love and loss; the rewards and responsibilities of being a son, a husband, a father and a lover; and the sweep of Italian history from Mussolini to Berlusconi."--Provided by publisher

The epic second novel in an internationally acclaimed trilogy, set in the rugged mountains of the Veneto Winter 1868. On the rugged, breathtaking mountains of the Veneto, the De Boer family are holding on to their tobacco farm, scratching out a lonely existence. But when tragedy arrives, and their precious tobacco-smuggling gold is stolen by bandits, twenty-year-old Jole De Boer must face the disaster alone, armed with only her father's old rifle. During the chase, Jole traverses snow-covered forests and deserted villages on a journey that will force her to go further than she ever imagined. For she soon learns that the border between good and evil is often indistinguishable, and that her own survival depends on uncovering the truth. ## Silences & Images

"Tarkovsky for me is the greatest," wrote Ingmar Bergman. Andrey Tarkovsky only made seven films, but all are celebrated for its striking visual images, quietly patient dramatic structures, and visionary symbolism. *Time within Time* is both a diary and a notebook, maintained by Tarkovsky from 1970 until his death. Intense and intimate, it offers reflections on Dostoyevsky, Tolstoy, Hermann Hesse, Thomas Mann, and others. He writes movingly of his family, especially his father, Arseniy Tarkovsky, whose poems appear in his films. He records haunting dreams in detail and speaks of the state of society and the future of art, noting significant world events and purely personal dramas along with fascinating accounts of his own filmmaking. Rounding out this volume are Tarkovsky's plans and notes for his stage version of *Hamlet*; a detailed proposal for a film adaptation of Dostoyevsky's *The Idiot*; and a glimpse of the more public Tarkovsky answering questions put to him by interviewers.

## Biographical History of Tippecanoe, White, Jasper, Newton, Benton, Warren and Pulaski Counties, Indiana;

The subject of Dr. Lippiello's study is one of bewildering complexity and variety. 'Good luck' and its manifestation through ominous signs and miraculous events occupy a central position in traditional Chinese thought, and the author has wisely refrained from covering the subject in all its ramifications. She has chosen to place the belief in auspicious omens in three different perspectives, corresponding to the three main religious and ideological traditions of ancient and early medieval China: Confucianism, Buddhism, and Taoism. (...)By concentrating on these three main spheres of religious thought, each with its own conception of ominous signs, Dr. Lippiello gives us a clear presentation of a subject that in spite of its obvious importance so far has not attracted much scholarly attention. It is the result of years of exciting exploration to which I have been a witness when supervising her research. To me it is a great pleasure to see the book published in a form that does justice to its content, and to introduce it to the reader.

## New Directions in Interpersonal Communication Research

Immortalized in later centuries in works by Lord Byron, Giuseppe Verdi, Eugène Delacroix, and others, Francesco Foscari reigned as the powerful doge of Venice during tumultuous years from 1423 to 1457. The stuff of legends, his life was marked by political conflict, vengeful enemies, family heartbreak, and, at the end, the forced relinquishment of the ducal throne. Yet Foscari left behind no personal papers, and until now, no complete biography of him has been written. This book, a thorough and fascinating biography, fills that longstanding gap, illuminating not only the life of the man but also the history and culture of fifteenth-century Venice. Dennis Romano reconstructs Foscari's life through careful reading of extant governmental records and chronicle sources. He also uses architectural monuments built by Foscari and his heirs as critical interpretive keys for unlocking the personality and policies of the doge. Romano analyzes how art and power intersected in Renaissance Italy and how the doge came to represent and even embody the state. With this biography, Romano clears away longstanding myths, fills in previously unknown details about Foscari's triumphs and ordeals, and allows to emerge the first intimate portrait of this singular doge.

From a masterful storyteller comes an adventure filled with magic and mischief, courage and family. Perfect for fans of The Penderwicks and the Brothers Grimm fairy tales. In the city of Hodorf, the Tattercoats live by a strict code. Only steal what you need, don't leave a trace of yourself behind, and if another Tattercoat is in trouble, you must always help them out. These are the rules that guide Nim's life as she and her rat, Nibbles, live on the streets and the rooftops of the only place she's ever called home. So when a new boy named Otto comes to town and gets caught up in the devious plottings of a former Tattercoat who's fallen from grace, Nim takes it upon herself to come to Otto's rescue. But Otto isn't the only one who needs help: The days in Hodorf have been growing progressively shorter and darker since the legendary sundragons went extinct. The air is getting colder, hope is waning, and it won't be long until the freeze grows so bone-deep that the chimneys the Tattercoats use for warmth at night will no longer suffice. With things growing more dire, Nim sets off into the murky woods surrounding the city, searching for Otto--and for answers. With this story of magic, wonder, adventure, and smarts, Matilda firmly establishes herself as a powerful voice in the middle-grade space. Praise for Otto Tattercoat and the Forest of Lost Things: \* "An engrossing tale...Both charming and wise." --Kirkus Reviews, starred review "Woods fills her tale with vivid settings--a Dickensian atmosphere, a fairyland forest--and touching teamwork, and Otto's fortitude makes for a winning read." --Publishers Weekly "[A] frosty tale of magic and bravery." --Booklist

Excerpt from the from Matilda and other tales by Katharine Pyle "I feel ashamed Matilda, to see you such a shirk! I really think you'd run a mile. To get away from work. So spoke Matilda's mother Reprovingly one day, But Mattie only shrugged and sulked, and turned her face away. Soon mother left her then alone, the door was open wide. On tip-toes Mattie crossed the floor, and gaily ran outside She left her room undusted; she left her bed unmade, indeed she really was a shirk! I'm very much afraid."

The eighteenth century saw the first significant phase of cultural interchange between Britain and Germany. This study examines the part played in this process by women writers, who were entering the literary world in large numbers for the first time. It asks whether women - as readers, translators, and authors - were particularly receptive to the work of other women, and whether a cross-cultural female literary tradition emerged during the period. The study offers a detailed case-study of the German writer Benedikte Naubert, now known for her collection of fairy-tales but also a prolific novelist. It looks first at Naubert's engagement with English literature, that is to say at her numerous translations of English novels, and at the ways in which Anglophilia influenced the production of her own fiction. It establishes how Naubert's interest in England and English literature was related to her position as a woman writer. It then examines the reception of her novels and stories in Britain, questioning how far the response to her texts can be linked to issues of gender. Naubert's work is compared throughout to that of other women writers, and the study thus sheds new light on the extent to which cross-cultural interchange influenced the development of women's writing in both countries.

Astronomy and Astrophysics Abstracts is devoted to the recording, summarizing and indexing of astronomical publications throughout the world. Two volumes are scheduled to appear per year. Volume 67 records 10,903 papers covering besides the classical fields of astronomy and astrophysics such matters as space flights related to astronomy, lunar and planetary probes and satellites, meteorites and interplanetary matter, X rays and cosmic rays, quasars and pulsars. The abstracts are classified under more than one hundred subject categories thus permitting quick surveying of the bulk of material published on the same topic within six months. For instance, this volume records 119 papers on minor planets, 155 papers on supernovae, and 554 papers on cosmology.

## The Cambridge Photographic Atlas of Galaxies

This reference atlas showcases around 250 beautiful galaxies within an amateur astronomer's reach and uses them to explain current astrophysical research.

## An Introduction to Active Galactic Nuclei

How can we test if a supermassive black hole lies at the heart of every active galactic nucleus? What are LINERS, BL Lacs, N galaxies, broad-line radio galaxies and radio-quiet quasars and how do they compare? This timely textbook answers these questions in a clear, comprehensive and self-contained introduction to active galactic nuclei - for graduate students in astronomy and physics. The study of AGN is one of the most dynamic areas of contemporary astronomy, involving one fifth of all research astronomers. This textbook provides a systematic review of the observed properties of AGN across the entire electromagnetic spectrum, examines the underlying physics, and shows how the brightest AGN, quasars, can be used to probe the farthest reaches of the Universe. This book serves as both an entry point to the research literature and as a valuable reference for researchers in the field.

## The Astronomical Observer. A Hand-book to the Observatory and the Common Telescope

Stars and Galaxies examines how galaxies like the Milky Way and Andromeda work and the stars and planets within them. Detailed illustrations and clear charts help explain these complicated topics.

## The astronomical observer

The book describes the observational work of William and Caroline Herschel. It focuses on deep-sky objects, observed 1774-1817. Most were discovered by William in the monumental sweep campaign (1783-1802), assisted by his talented sister. 2500 objects were published in three catalogues. The study of the sky from southern England also concerned double stars and the Solar System, yielding the Uranus discovery in 1781. But William Herschel was much more than a mere observer. He built large reflectors, developed new methods and thought about the nature and evolution of cosmic objects and the structure of the Milky Way. He was an extremely influential astronomer and had a worthy successor, his son John.

Its unique mix of Solar System and deep-sky targets will have observers hunting for the Apollo lunar landing sites, searching for satellites orbiting the outermost planets, and exploring hundreds of star clusters, nebulae, distant galaxies, and quasars. Each target object is accompanied by a rating indicating how difficult the object is to find, an in-depth visual description, an illustration showing how the object realistically looks, and a detailed finder chart to help you find each challenge quickly and effectively. The guide introduces objects often overlooked in other observing guides and features targets visible in a variety of conditions, from the inner city to the dark countryside. Challenges are provided for the naked eye, through binoculars and the largest backyard telescopes.

From the reviews: "Astronomy and Astrophysics Abstracts has appeared in semi-annual volumes since 1969 and it has already become one of the fundamental publications in the fields of astronomy, astrophysics and neighbouring sciences. It is the most important English-language abstracting journal in the mentioned branches. ...The abstracts are classified under more than a hundred subject categories, thus permitting a quick survey of the whole extended material. The AAA is a valuable and important publication for all students and scientists working in the fields of astronomy and related sciences. As such it represents a necessary ingredient of any astronomical library all over the world." Space Science Reviews#1 "Dividing the whole field plus related subjects into 108 categories, each work is numbered and most are accompanied by brief abstracts. Fairly comprehensive cross-referencing links relevant papers to more than one category, and exhaustive author and subject indices are to be found at the back, making the catalogues easy to use. The series appears to be so complete in its coverage and always less than a year out of date that I shall certainly have to make a little more space on those shelves for future volumes." ### Cosmic Challenge

The date: September 30, 1880 The place: A private observatory in Hastings-on-Hudson Profession of the observer: A medical doctor The instrument: An 11-inch Clark refractor. The significance of that night marked one of the truly great turning points in the development of astronomical techniques: Dr Henry Draper, a wealthy New York medical doctor, had secured the first photograph of a nebula: a 51-minute exposure on a dry gelatinobromide plate showing the wispy nebulousity of the Orion Nebula. By March 1882, Draper had secured an exposure of 137 minutes, showing far richer detail of both bright and dark features. The rest is history. The photographic era heralded in a universe where hints of the presence of cosmic dust were strongly alluded to: from star-forming regions such as Messier 17, to the Horsehead Nebula in Orion, to the striking dark finger in the Cone Nebula, to the magnificent dark bands in the plane of our Milky Way. "Historically, astronomers from the very beginning have been afraid of dust.

### Astronomy and Astrophysics Monthly Index

The Encyclopedia of Cosmology, in four volumes, is a major, long-lasting, seminal reference at the graduate student level, laid out by the most prominent, respected researchers in the general field of Cosmology. These volumes will be a comprehensive review of the most important concepts and current status in the field, covering both theory and observation. One of the attractive features of the encyclopedia is that it is accompanied by supplementary materials including videos and simulations of the numerical computation. This will help the readers to better understand and visualize the concepts discussed. This encyclopedia is edited by Dr. Giovanni Fazio from Harvard Smithsonian Center for Astrophysics, with an advisory board comprised of renowned scientists: Lars Hernquist and Abraham Loeb (Harvard Smithsonian Center for Astrophysics), and Christopher McKee (UC Berkeley). Each volume is authored/edited by a specialist in the area: Galaxy Formation and Evolution written by Renan Barkana (Tel Aviv University), Numerical Simulations in Cosmology edited by Kentaro Nagamine (Osaka University / University of Nevada), Dark Energy written by Shinji Tsujikawa (Tokyo University of Science), and Dark Matter written by Jihn E Kim (Seoul National University).

### Atlas of the Messier Objects

One of the most attractive features of the young discipline of Space Science is that many of the original pioneers and key players involved are still available to describe their field. Hence, at this point in history we are in a unique position to gain first-hand insight into the field and its development. To this end, The Century of Space Science, a scholarly, authoritative, reference book presents a chapter-by-chapter retrospective of space science as studied in the 20th century. The level is academic and focuses on key discoveries, how these were arrived at, their scientific consequences and how these discoveries advanced the thoughts of the key players involved. With over 90 world-class contributors, such as James Van Allen, Cornelis de Jager, Eugene Parker, Reimar Lüst, and Ernst Stuhlinger, and with a Foreword by Lodewijk Woltjer (past ESO Director General), this book will be immensely useful to readers in the fields of space science, astronomy, and the history of science. Both academic institutions and researchers will find that this major reference work makes an invaluable addition to their collection.

### THE ANDROMEDA GALAXY A GUIDE TO THE UNIVERSE

The perennial enigma the human mind has been encountering is the meaning of life and its place in the universe. On this subject, science and spirituality remained in discord with each other particularly for the last couple of centuries. The Theory of Relativity followed by quantum mechanics changed the worldview of traditional mindset altogether. The postulates of quantum physics paved the way for growing interest in philosophical spirituality. Theoretical physicist Fritjof Capra's book The Tao of Physics explored parallels between Eastern mysticism and modern science. Toshihiko Izutsu, in his book Sufism and Taoism, found similarities between Taoism and Muslim mysticism or Sufism. The book under review

attempts to discover compatibility between Sufism and modern cosmology. It is basically a research book with more than seven hundred (700) citations of authorities of various disciplines, drawing from a vast array of diverse fields, such as physics, philosophy, biology, psychology and spirituality. The book probes into the nature and value of existence which ultimately leads to the direction of interconnection of the universe and human psyche; unity and integration of all things, and ultimately the unity of the whole universe and the whole person. These views are not placed on the shaky foundations of faith but they are based on philosophical logic and scientific facts--regarding importance of man as an observer in the universe, despite appearing insignificant on a point-like planet in the stunning vastness of empty space, and magnificent integration and harmony of the human psyche with the cosmos. These aspects of the book are unique in the sense that they amazingly reveal commonalities between physical and spiritual concepts and explain the phenomenon of existence as a compact whole in a coherent and logical sequence, with a glimpse of futuristic existence. This book may be of particular interest to the academia, research scholars, and students who may find the contents of the book unique and even startling. The author of the book is a research scholar from Pakistan who has been dedicated to exploring the reality of the physical world and human life. He has accentuated quite subtle and intricate issues in his book. His contribution to the relevant subject appears to have originality and, at times, remarkable distinction. The author believes that the contents of this book may not be found in any other single book published so far.
