Trust, Tourism Development and Planning

The dynamics of trust and distrust are central to understanding modern society, social relations, and development processes. However, numerous studies suggest that societal trust and citizen's trust in government and its institutions are on the decline, challenging the legitimacy of government and leading to an undemocratic and unsustainable form of development. Recognizing its importance, the authors for the first time situate trust within the context of tourism development and planning. This volume discusses trust in tourism from different yet intrinsically connected perspectives. Chapters review how diminishing societal trust may have adversely affected tourism planning systems, the role of trust in good tourism governance and sustainable tourism, how trust can be used as a facilitator of participatory tourism planning, political trust in tourism institutions, power and how tourism development can be a basis for trust creation among society members by using social capital theory. In addition, a final section on 'Researching Trust in Tourism Development' means that readers are not only provided a thorough theoretical framework on trust and an understanding of its importance for sustainable tourism and good governance of the sector, but also methodological aspects of research on trust in the context of tourism development and planning. This significant volume is valuable reading for students, academics and researchers interested in tourism development and planning.

Stories of Practice: Tourism Policy and Planning

Analyses of contemporary tourism planning and policymaking practice at local to global scales is lacking and there is an urgent need for research that informs theory and practice. Illustrated with a set of cohesive, theoretically-informed, international case studies constructed through storytelling, this volume expands readers' knowledge about how tourism planning and policymaking takes place.

Challenging traditional notions of tourism planning and policy processes, this book also provides critical insights into how theoretical concepts and frameworks are applied in tourism planning and policy making practice at different spatial scales. The book engages readers in the intellectual, political, moral and ethical issues that often surround tourism policymaking and planning, highlighting the great value of reflective learning grounded in the social sciences and revealing the complexity of tourism planning and policy.

Fundamentals of Planning and Developing Tourism

For all courses in tourism development planning for both the public and private sectors. Fundamentals of Planning and Developing Tourism brings into focus the growing importance of tourism in developing economies of the world, for social change, alleviating poverty, and achieving sustained growth. It offers a complete, organized, and quantifiable methodology for tourism development planning that reflects economics, marketing, and crucial issues such as conservation, capacity constraints, and social acceptability. It covers all steps used for analyzing and planning tourism development in free market, mixed, and centrally-planned economies. The text is replete with historical explorations and examples, including several real life case studies illuminating both successes and failures in tourism planning and development.

Tourism, Planning, and Community Development

The intersection of community development, tourism and planning is a fascinating one. Tourism has long been used as a development strategy, in both developed and developing countries, from the national to local levels. These approaches have typically focused on economic dimensions with decisions about tourism investments, policies and venues driven by these economic considerations. More recently, the conversation has shifted to include other aspects – social and environmental – to better reflect sustainable development concepts. Perhaps most importantly is the richer focus on the inclusion of stakeholders. An inclusionary, participatory approach is an essential ingredient of community development and this brings both fields even closer together. It reflects an approach aimed at building on strengths in communities, and fostering social capacity and capital. In this book, the dimensions of the role tourism plays in community development are explored. A panoply of perspectives are presented, tackling such questions as, can tourism heal? How can tourism development serve as a catalyst to overcome social injustices and cultural divides? This book was originally published as a special issue of Community Development.

Tourism Policy and Planning

The wellspring to the future global growth in tourism is a commitment toward good policy and strategic planning. Governments, the private sector, international organizations, academic institutions, and not-for-profit agencies must be the leaders in developing sustainable tourism policies that transcend the economic benefits and embrace environmental and cultural interests as well. Tourism Policy and Planning: Yesterday, Today, and Tomorrow (second edition) offers a comprehensive look into the policy process and how policies link to the strategic planning function as well as influence planning at the local, national and international levels. This second edition has been fully revised and updated with important new chapters and case studies that reflect the many important developments in the travel, tourism and hospitality industry and subsequent new policies and plans needed to better understand the nuances and issues in the travel, tourism and hospitality industry. The second edition features: Updates to reflect recent developments and issues ranging from global economic and cultural issues to concerns for increased national and local leadership in tourism policy and strategic planning Three new chapters: "Barriers and Obstacles to International Travel", "The International Tourism Policy Process", and "Transformative Leadership, Poverty Alleviation and Tourism Policies" New case studies throughout the book to illustrate practical applications of policy and planning at the international, regional, national and local levels to provide a solid foundation for a better understanding of new travel and tourism concepts and issues Examination of the past, present, and future of tourism policy development and strategic planning to equip professionals, academicians, and students to better understand the global tourism marketplace.

Planning an Applied Research Project in Hospitality, Tourism, and Sports

Planning an Applied Research Project in Hospitality, Tourism and Sports provides a comprehensive and carefully structured treatment of all the aspects involved in planning a research project. Instead of being

a statistically oriented book, this text provides a conceptual and process-oriented approach to planning and conducting research. Written for both students and professionals, it is easy to read, short, and to the point, i.e., practical. The book provides basic, yet comprehensive information about doing research, and can be used not only in a “research methods” course where students will have to plan and conduct a research project, but also in earlier course work to help students learn to write research papers. Planning an Applied Research Project in Hospitality, Tourism and Sports covers a range of subjects including: selecting a topic, conducting a literature review, developing a coherent design, and using various research techniques such as interviews, questionnaires, and observations. It also contains information on analyzing data once it has been collected and developing a proposal to obtain support before undertaking a research project. Unique coverage includes: 2 chapters on conducting and writing a literature review, 1 chapter on analyzing data (from both a qualitative and quantitative perspective), 1 chapter on writing a research proposal, and 3 detailed chapters on techniques.

Tourism Planning

The wellspring to the future global growth in tourism is a commitment toward good policy and strategic planning. Tourism Policy and Planning: Yesterday, Today, and Tomorrow offers an introduction to the tourism policy process and how policies link to the strategic tourism planning function as well as influence planning at the local, national, and international level. This third edition has been fully revised and updated to reflect the many important developments in the travel and tourism industry and subsequent new policies and present planning process issues. The third edition features: A new chapter on policies regarding terrorism and its impact on tourism. New and updated content on managing sustainable tourism, obstacles and barriers to international travel, and strategic tourism planning. New case studies based on established and emerging markets throughout to illustrate real-life applications of planning and policy at the international, regional, national, and local level. New end of chapter summary and review questions to consolidate student learning. Accessible and up to date, Tourism Policy and Planning is essential reading for all tourism students.

Tourism Policy and Planning

Planning Research in Hospitality and Tourism provides a concise and clear approach to planning research projects which are a necessity in most hospitality and tourism courses taught at degree level. The text considers the particular characteristics of the hospitality and tourism industry, whilst providing a balanced approach toward both quantitative and qualitative methods of research. The text also carefully considers the international aspect of the industry and the people it employs, which supports the book's aims of: * Providing an excellent understanding of the basic principles of conducting research, in a straight forward “no nonsense” guide * Carefully considering the particular characteristics of the hospitality and tourism sectors in relation to embarking on a research project in the area * Including in each chapter an “International Dimension” section, as well as case studies, questions and reflections on the research process

Planning Research in Hospitality & Tourism

Planning Research in Hospitality and Tourism provides an accessible, concise and practical guide to planning, conducting and analysing research in tourism and hospitality. The authors skilfully introduce the basic principles and techniques of research in the international hospitality and tourism sectors, and provide detailed guidance on both quantitative and qualitative methods of research. It includes a variety of features throughout to aid students' understanding and offers practical tips to help students overcome any potential research issues. Building on the success of the first edition, the volume has been fully revised and updated, and contains new chapters on mixed methods and how to make best use of recent technology in research practices. The second edition also benefits from: • increased coverage of research design strategies including sampling, ethnography and experimental design • inclusion of computer-mediated data collection techniques, such as online interviews, online focus groups and online observation (netnographic research) • new and updated international case studies and extracts, with a more even spread of tourism and hospitality examples of research • online student and lecturer resources, including PowerPoint slides and a test bank of multiple choice and true/false questions for each chapter. Written by three leading scholars with experience of both the industry and university courses globally, this insightful text is an essential resource for all tourism and hospitality research students and early career research professionals around the world.

Planning Research in Hospitality and Tourism

Tourism: How effective management makes the difference builds tourism's components and impacts into a total framework showing how it should be made subject to an overall planning and management process. This is an essential guide which also explains effective management in relation to current trends in tourism. It incorporates extensive coverage of the characteristics of tourism, making it ideally suited for those studying tourism, travel and business studies. Individual managers and policy decision makers will also find that this book addresses vital management issues and provides practical help. It covers both public and private sectors and shows how they can be brought together as a cohesive whole. It examines the functions of management, from planning to the monitoring of performance and results. Coverage of the crucial aspects of tourism management also includes economics, politics and government action, the environment, cultural influences, marketing, physical planning, human resources development and public awareness. Roger Doswell, formerly a lecturer and Kobler research fellow of University of Surrey, is a leading expert on tourism and has written or co-written ten books on the subject. During a long career he has travelled the world for many international organisations as a tourism development consultant.

Tourism: How Effective Management Makes the Difference

Tourism Impacts, Planning and Management is a unique text, which links these three key areas of tourism: impacts, planning and management. Tourism impacts are multi-faceted and therefore are difficult to plan for and manage. This book looks at all the key players involved - be they tourists, host communities or industry members - and considers a number of approaches and techniques for managing tourism successfully. Divided into four parts, this text discusses: * The growth, development and impacts of tourism * Tourism planning and management: concepts, issues and key players * Tools and techniques in tourism planning and management: education, regulation and information technology * The future of tourism planning and management: issues of sustainability and the future Up-to-date, international case studies are used, for example the impacts of 9/11 and terrorism in Bali, to illustrate and provide a real-life context for the theories discussed. Exercises are also included to consolidate learning.

Tourism Impacts, Planning and Management

The Routledge Handbook of Tourism Research is a compendium of some of the most relevant issues affecting tourism development today. The topics addressed in this book provide some new thinking for those involved in tourism research. This book takes the reader from the beginnings of tourism research to a discussion of emerging forms of tourism and selected examples of tourism development. The underlying theoretical dimensions are reviewed, analysed and discussed from a number of perspectives. This book brings together leading researchers, many of whom are members of the International Academy for the Study of Tourism, to discuss tourism today and its future. The works included in this volume are diverse, in terms of geographical context, research methodology, root discipline, and perspective. This book represents studies based in Europe, North America, Oceania, and Asia. Research methodologies include both quantitative and qualitative. Both macro and micro issues are discussed from the economic, psychological, sociological, political science, marketing, and other perspectives, which reflect the interdisciplinary nature of tourism studies. This book is divided into 6 sections. Section 1 considers the foundations for tourism research. Section 2 discusses the implications for destination management and section 3 discusses planning for tourism development. Section 4 covers human capital for tourism development. And finally, section 5 evaluates emerging forms of tourism and then section 6 offers insights into tourism evolution. It offers the reader a comprehensive synthesis of this field, conveying the latest thinking and research. The text will provide an invaluable resource for all those with an interest in tourism research. This is essential reading for students, researchers & academics of Tourism as well as those of related studies in particular Leisure, Hospitality & Development Studies.

Trust, Tourism Development and Planning

Sustainable Tourism Policy and Planning in Africa offers an accessible and understandable overview of the challenges of integrating sustainability into tourism policy and planning in Sub-Saharan Africa and provides some interesting recommendations on how these could be overcome. Tourism is currently growing faster in Sub-Saharan Africa (SSA) and in many other developing regions compared to the rest of the world. Using case examples from different segments of the tourism sector in different country contexts, this volume therefore reassesses context specific tourism policies and planning mechanisms in SSA over the years. It considers how the increasing focus on sustainability is reflected in different areas of the tourism sector including food security, the human capacity management, service delivery, local communities and heritage management, climate change and the influence of colonial legacies on tourism policy planning. For many SSA countries, it has only been in the last two decades that the development of sustainable and achievable context specific policies and planning mechanisms has become the norm. The chapters provide examples of how different dimensions of sustainability are integrated into tourism policy and practice, and examine the extent to which these are shaping the present, and their implications for the future sustainability of the tourism sector. Sustainable Tourism Policy and Planning in Africa will be of great value to academics, private and third sector employees to better understand tourism in Sub-Saharan Africa. Eight of the chapters were originally published as a special issue of Tourism Planning and Development. These are now complimented with a new introductory chapter and a concluding chapter that sets out a future research agenda for sustainable tourism policy and planning.

Sustainable Tourism Policy and Planning in Africa

Providing a wide range of case studies in sustainable tourism planning, this authoritative work presents cases at both international and national levels as well as on a regional, sub-regional, urban, local and site scale. Drawing on the author's world-wide experience and with contributions from professionals in the field, this book takes a comparative approach relating to different economic, political and temporal dimensions, examining established initiatives both in the context of the standards of the time and from a modern perspective looking back. With an emphasis on sustainability, this unique collection is an essential resource for tourism planners, researchers and students.

Planning for Tourism, Leisure and Sustainability

The third edition of this classic volume integrates the idea of balancing tourism with protection of the resources upon which it depends. The text stresses the role of the community, identifies potential pitfalls, and raises issues of developmental ethics. It includes topics such as environmental impact, sustainability, and ecotourism. Special emphasis is given to the growing need for business to implement environmental protection and ecological integrity as an essential part of economic development. The book is filled with many sketches, functional diagrams, and photographs.

Tourism Management: managing for change is a complete synthesis of tourism, from its beginnings through to the major impacts it has on today's global community, the environment and economy. Provocative and stimulating, it challenges the conventional thinking and generates reflection, thought and debate. This bestselling book is now in its third edition and has been fully revised and updated to include complete set of brand new case studies, a new four colour page design to enhance learning and improved online companion resources packed with must have information to assist in learning and teaching. Tourism Management covers the fundamentals of tourism, introducing the following key

concepts: * The development of tourism * Tourism supply and demand * Sectors involved: transport, accommodation, government * The future of tourism: including forecasting and future issues affecting the global nature of tourism In a user-friendly, handbook style, each chapter covers the material required for at least one lecture within a degree level course. Written in a jargon-free and engaging style, this is the ultimate student-friendly text, and a vital introduction to this exciting, ever-changing area of study. The text is also accompanied by a companion website packed with extra resources for both students and lecturers, including learning outcomes for each chapter, multiple choice questions, links to sample chapters of related titles and journal articles for further reading, as well as downloadable PowerPoint materials and illustrations from the text. Accredited lecturers can request access to download additional material by going to <http://textbooks.elsevier.com> to request access.

Now in a second edition, this bestselling text has been fully revised with updated statistics and case studies, including the Bali bombings, Stonehenge and tour guiding, plus all-new material on the planning process in developed countries, community action planning in Canada, the role of zoos, pro-poor tourism in Southern Africa, government planning in Dubai, lodge development in Thailand and the use of IT in planning in Sri

Lanka. Tourism Impacts, Planning and Management is invaluable for tourism undergraduates and is suitable as introductory material for postgraduate tourism management courses, as well as being a useful tool for those studying related courses.

Tourism Impacts, Planning and Management

This book provides the reader with guidelines and approaches in the development of tourism that respond to community desires and needs. Planning techniques applicable to both developed and underdeveloped countries address tourist attractions, urban tourism, large resorts, and limited special interest tourism.

Tourism Planning

Tourism: The Key Concepts offers a comprehensive collection of the most frequently used and studied concepts in the subject of tourism. Within the text key terms, concepts, typologies and frameworks are examined in the context of the broader social sciences, blending together theory and practice to explore the scope of the subject. Terms covered include: Ethical Tourism LGBT Tourism Hospitality Mobility Authenticity Quality Management Destination Management Geographies of Tourism Planning Sociology in Tourism Society and Culture Tourism Strategy Each entry contextualises, defines and debates the concept discussed, providing an excellent starting point for those studying tourism for the first time, and a quick reference for those who are more experienced. With case studies, examples and further reading throughout, this text will be invaluable for all undergraduate and postgraduate tourism students.

Tourism: The Key Concepts

For many communities and countries throughout the world tourism is the most valuable industry. Economic changes taking place in China, India, and the United States (with almost 3 billion people, half the world's population), for example, will have major impacts on the global tourism markets of tomorrow. Social-cultural changes in Europe, with borderless tourism crossings and a common currency, are increasing opportunities for tourism growth. East Asia and the Pacific Rim are experiencing unprecedented growth and change in tourism. From the perspective of economic policy, tourism for local communities is a vital economic development tool producing income, creating jobs, spawning new businesses, spurring economic development, promoting economic diversification, developing new products, and contributing to economic integration. If local and national governments are committed to broad based tourism policies, then tourism will provide its citizens with a higher quality of life while it generates sustained economic, environmental, and social benefits. The wellspring to future growth for tourism throughout the world is a commitment toward good policy. Governments, the private sector, and not-for-profit agencies must be the leaders in a sustainable tourism policy that transcends the economic benefits and embraces environmental and cultural interests as well. Tourism Policy and Planning: Yesterday, Today, and Tomorrow addresses key ingredients for positive tourism policies and planning that will lead this generation and the next toward a greater quality of life resulting from tourism growth. The aim of this book is to provide government policy-makers (at all levels), business leaders, not-for-profit executives, university professors, students, tourism industry managers, and the general public with an introduction and examination of important policy and planning issues in tourism.

Tourism Policy and Planning

This Handbook offers an up-to-date and comprehensive overview of core themes and concepts in community-based tourism management. Providing interdisciplinary insights from leading international scholars, this is the first book to critically examine the current status of community-based tourism. Organised into five parts, the Handbook provides cutting-edge perspectives on issues such as Indigenous communities, tourism and the environment, sustainability, and the impact of digital communities. Part 1 introduces core concepts and methodologies, and distinguishes community products from other tourism and hospitality goods. Part 2 explores communities' attitudes towards tourism development and their engagement with and ownership of the process. It also delves into the role of community-based tourism, under the influence of governmental policies, in the economic and social development of a region. In Part 3 various management, marketing, and branding initiatives are identified as a means of expanding the tourism business. Part 4 examines the negative impacts of mass tourism and its threats to culture, tradition, identity, the built environment, and natural heritage. In the final and fifth part, future challenges and opportunities for community-based tourism initiatives are considered,

and research-based sustainable solutions are proposed. Overall, the book considers engaging local populations in tourism development as a way of building stronger and more resilient communities. This Handbook fills a void in the current research and thus will appeal to scholars, students, and practitioners interested in tourism management, tourism geography, business studies, development policy and practice, regional development, conservation, and sustainability.

The Routledge Handbook of Community Based Tourism Management

The new edition of this text is positioned - through its broad coverage, accessible style and presentation, and practical application - as the core learning resource for students of tourism planning. With an increased applied focus, a wider range of international case studies and examples, and two new chapters highlighting sustainability as a core tourism concern in the world today, the new edition will appeal across the spectrum of tourism students and practitioners from business and management and the social sciences. Tourism and Planning is an essential text for students on travel and tourism degrees and will be of key interest to students and practitioners in related fields including management, marketing, geography, development studies and regional planning.

Tourism Planning

The tourism industry, as one of the main drivers of creative economy, gains more importance in growth policies both at national and regional levels. However traditional tourism destinations now face a more competitive environment, for an increased number of possible destinations have emerged. This environment is further deepened by an increase in the number of products and services available to the preferences of visitors. Therefore new tourism policies, unlike traditional strategies, should aim to increase the competitiveness of the local through supporting increased quality of experience and promoting innovation in tourism services. Based on the workshop organized by Regional Studies Association Research Network on "Tourism, Regional Development and Public Policy" in Izmir, Turkey, this book introduces, motivates and examines diversities in the tourism industry from a regional development perspective. The papers in this book cover various case studies from different country experiences. The views expressed in these articles promise to improve our understanding of tourism in a new aspect that goes beyond the mass tourism mentality. This book was originally published as a special issue of European Planning Studies.

Tourism Policy and Planning

Morphological research studies the physical form of landscapes, including how landscape structures function and operate, the adaptability of forms, and how functions and forms change over time. Applying the methods and models of morphology to tourism, this innovative book explores some of the complex relationships between tourism and morphological changes in urban and rural destinations across

the globe. Tourism-related impacts on the physical environment and sociocultural values surrounding a given destination reflect the need for both theoretical and empirical approaches to strengthen our understanding of the ways in which tourism functions. This study examines key sectors and locations such as coastal tourism, urban tourism, and waterfront redevelopment, which are increasingly important in terms of their influence on sociocultural and morphological transformation. It advocates that awareness of the critical link between temporospatial impacts and morphological progresses is necessary to accommodate changes within a pattern of evolutionary growth. International in scope, employing case studies from Asia, Australasia, the US, and Europe, this book makes a new contribution to the literature and will be of interest to students and researchers of tourism planning, urban design, geography, environmental studies and landscape architecture.

Tourism, Regional Development and Public Policy

Over the last decade, while many scholars have maintained their interest in the classical debate concerning the impacts of tourism, some have attempted new conceptualisations, while others have converged towards critical narratives promoted by a number of social movements, and have become involved in subsequent discussions on 'overtourism' and 'tourismphobia'. The terms 'overtourism' and 'tourismphobia' have their genesis in the rapid unfolding of unsustainable mass tourism practices and the responses that these have generated amongst academics, practitioners, social movements and grassroots organizations concerned with the detrimental use of urban, rural and coastal spaces, among others, for tourism purposes. The renewed interest in the study of the adverse impacts of tourism, as implied in the term 'overtourism', is related to a variety of well-established causes. *Travel and Tourism in the Age of Overtourism* builds on existing knowledge and makes a theoretical and practical contribution to the overtourism debate and the system dynamics underlining it. This collection suggests ways to address this from a tourism and planning perspective. It offers critical reflections on the contemporary evolution of tourism development and the implication of such processes on people, places and spaces. The chapters in this book were originally published as a Special Issue of the journal *Tourism Planning & Development*.

The Morphology of Tourism

The concept of margins and limits is often referred to within the tourism academic literature and includes subjects as diverse as carrying capacities, peripheral economies, technological advancement, adventure tourism, dark tourism and socially marginalized communities. After identifying a number of ways in which 'limits' might be defined *Taking Tourism to the Limits* explores concepts and challenges facing contemporary tourism in five main sections, namely in tourism planning and management, nature based tourism, dark tourism, adventure and sport tourism and the accommodation industry. Drawing upon case studies, current research and conceptualizations these different facets of the 'limits' are each introduced by the editors with commentaries that seek to identify themes and current practice and thinking in the respective domains. The picture that emerges is of an industry that reinvents itself in response to changing market parameters even while core issues of stakeholder equities and political processes remain problematic. International in scale, the book links with its companion piece *Indigenous Tourism – the commodification and management of culture* (also published by Elsevier) as an outcome of the very highly successful conference, *Taking Tourism to the Limits* hosted by the University of Waikato's Department of Tourism Management in 2003.

Travel and Tourism in the Age of Overtourism

Investments in sport, events and tourism in cities and wider regions are part of nascent regeneration strategies linked to transitioning economic bases and place images. While it is important to consider physical regeneration, there is a range of subsequent benefits and opportunities brought about through regeneration that considers social impacts, communities and how investments and developments influence how people interact in transformed spaces. This book brings together a collection focusing on the diverse range of approaches and perspectives of regeneration. Twelve chapters outline and bring together critical perspectives of regeneration from scholars in different parts of the world. This collection critically assesses some of the key factors impacting upon regeneration initiatives in relation to sport, events and tourism. By doing so, this book assesses if new opportunities have arisen from developments, increasing the demands and needs of locals and tourists, or if transformations result in exclusion - thus challenging who regeneration is for. This book will be valuable reading for students

and academics interested in tourism studies, events planning, sport and leisure studies or development studies, as well as the wider social sciences.

Taking Tourism to the Limits

Contains excellent coverage of topics, including chapters on trends, perspectives, and practice, indigenous tourism, local tourism, and protected areas. Two practical features in each chapter illustrate and reinforce chapter content.

Sport, Events, Tourism and Regeneration

Managing Tourism in a Changing World provides an overview of state-of-the-art research surrounding today's tourism management. Recognising the relevance of tourism activities as major economic drivers, this book offers a significant contribution to the advancement of managerial practice in the tourism field. It is the outcome of the collective intellectual efforts of a number of scholars, with dissimilar geographical roots and backgrounds, who cultivate original research on tourism management from a variety of perspectives (economic, managerial) and using multiple methods (theory building, experimental and inductive case-based inquiries). While drawing on multiple theoretical perspectives and adopting different epistemological paradigms and methodologies, this book answers a wide range of research questions related to a number of relevant themes in the following fields: destination management, marketing and branding, inter-organizational dynamics and corporate social responsibility in the tourism sector. This book was originally published as a special issue of *Anatolia*.

Tourism Planning and Policy

Ambitious projects to modernize European capital cities emerged in the second half of the nineteenth century. The need for urban planning and urban expansion in European cities resulted from industrialization, modernization and economic development that created huge waves of immigration from rural areas into cities. These social and economic changes also laid the infrastructure for the mass tourism that would follow later. This comprehensive collection investigates the interrelationship between urban planning and tourism consumption in European cities, and its evolution and transition over time. The authors focus on different cases of urban planning and tourism consumption in a range of European cities – Berlin, Paris, Vienna, Barcelona, Lisbon, Prague, Budapest and Skopje. In addition to being political and cultural capitals, these cities are also places where ordinary people live and work. This book addresses questions and concerns regarding the social and economic carrying capacity of these capital cities due to the growing intensity and volume of tourism. This book will be of interest to students, researchers and professionals in the fields of urban planning and tourism geography. It was originally published as a special issue of the journal *Tourism Geographies*.

Managing Tourism in a Changing World

Academically complex and challenging to apply, development and planning are increasingly relevant to the growing tourism industry. This collection contains critical studies on tourism development and planning, and calls for proactive, holistic and responsible thinking. It addresses conceptual and contemporary issues in development and planning research including political trust, innovation networks, sustainability, moral encounters, enclavisation and evolutionary economics. It argues that recognition of the contextual and historical dimensions around tourism development and planning is essential to help both researchers and practitioners better understand destination and place-based decision-making. In addition, it will lead to improvements in stakeholder relations, and explains how tourism best works with localities and localities with tourism. This book was originally published as a special issue of *Tourism Geographies*.

Tourism and Urban Planning in European Cities

Managing Sustainable Tourism tackles the tough issues of tourism such as negative environmental impact and cultural degradation, and provides answers that don't sacrifice positive economic growth. It offers practical plans for fostering harmonious relationships among local communities, the private sector, not-for-profit organizations, academic institutions, and governments at all levels as well as develops management practices and philosophies that protect natural, built, and cultural environments while reinforcing positive and orderly economic growth. Since the first edition, there have been many important developments in the field, and this second edition has been revised and updated in the

following ways: Updated content to reflect issues and trends, including: impact of the internet, slow tourism, responsible tourism, pro – poor tourism and motivations of the individual tourist New and updated international case studies of successes and failures to reflect current challenges and practices New lecturer and student online resources including PowerPoint slides and practical scenarios. This volume provides a wealth of information and guidance on managing sustainable tourism now and in the future and will be invaluable to educators, students, developers, entrepreneurs, investors, tourism strategists, planners and policymakers.

Tourism Planning and Development

This significant volume is the first to focus on both the changing nature of tourism and the capacity of tourism to effect change, especially in the Global South. Geographically, this changing nature of tourism is based on the transforming relationships between demand, supply and location. While this is nothing new in tourism, recent decades have intensified the changing characteristics of global tourism. From another perspective, tourism represents a change, and nowadays many localities and regions aim to use tourism as a tool for positive change, i.e. development. However, this has turned out to be a challenging task in practice, especially in the Global South context where the relationship between tourism growth and local development has often been controversial. This book looks at a host of critical concepts in one volume, such as growth and development, adaptation and resilience, sustainability and responsibility, governance and planning and heritage and destination management strategies. By understanding the drivers of change, this book sheds new insight into the promise and role of sustainability and responsibility in tourism development. This book will be of great interest to all upper-level students, academics and researchers in the fields of Tourism, Geography and Cultural and Heritage studies.
