Evils and Remedies in the Administration of the Criminal Law

Excerpt from Evils and Remedies in the Administration of the Criminal Law: Address, Delivered Before the American Academy of Political and Social Science at Philadelphia on April 9th, 1910 Mr. Chairman, Ladies and Gentlemen: None of the many difficult problems that confront the present generation is more urgent or perplexing than the reform of the administration of the criminal law in our country. Our wealth and importance in the financial world have increased by such leaps and bounds that we have completely outgrown the laws which were enacted to meet the earlier conditions in our history. It will be no easy task to secure the changes that are necessary to meet and curb the cupidity of the criminal rich, nor to enforce those laws when enacted. Strange to say the chief obstruction to the administration of justice in criminal cases lies in the undue shelter afforded by our Constitution. The prescribed remedies against crimes of violence are, on the whole, fairly administered, though there are still many abuses capable of correction. It is in the attempts to punish the crimes born of greed and cunning in the financial world that the machinery of Justice has broken down and the law is administered in a spasmodic and hysterical way. "The Most Important Treatise on Criminal Law Produced by American Legal Scholarship" First published to great acclaim in 1947, Hall's General Principles of Criminal Law is one of the undisputed classics in its field. It provides more than a broad overview. Drawing on his expertise in jurisprudence and the work of the legal realists, it analyzes the principles that comprise criminal activity with an emphasis on its creation and definition by officials. This process is explored in the chapters on criminology, criminal theory and penal theory and, in more specific terms, the chapters on legality, mens rea, harm, causation, punishment, strict liability, ignorance and mistake, necessity and coercion, mental disease, intoxication and criminal attempt. "For many years, our standard work on criminal law has been Bishop's. First published in 1856, Bishop's is the only American book in the field that has conspicuously influenced our criminal law. (...) When Jerome Hall's, General Principles of Criminal Law (1947) appeared, it represented the first significant effort to articulate the principles of criminal law since Bishop's era. Hall's work may, in fact, represent the most important treatise on criminal law produced by American legal scholarship." --Fred Cohen, Journal of Legal Education 16 (1963-64) 260.

In this contribution to philosophical ethics, Claudia Card revisits the theory of evil developed in her earlier book *The Atrocity Paradigm* (2002), and expands it to consider collectively perpetrated and collectively suffered atrocities. Redefining evil as a secular concept and focusing on the inexcusability - rather than the culpability - of atrocities, Card examines the tension between responding to evils and preserving humanitarian values. This stimulating and often provocative book contends that understanding the evils in terrorism, torture and genocide enables us to recognise similar evils in everyday life: daily life under oppressive regimes and in racist environments; violence against women, including in the home; violence and executions in prisons; hate crimes; and violence against animals. Card analyses torture, terrorism and genocide in the light of recent atrocities, considering whether there can be moral justifications for terrorism and torture, and providing conceptual tools to distinguish genocide from non-genocidal mass slaughter.

Administration of Justice in the United States...

Reprint of the fourth edition, which contains an additional text attributed to Voltaire. Originally published anonymously in 1764, *Dei Delitti e Delle Pene* was the first systematic study of the principles of crime and punishment. Infused with the spirit of the Enlightenment, its advocacy of crime prevention and

the abolition of torture and capital punishment marked a significant advance in criminological thought, which had changed little since the Middle Ages. It had a profound influence on the development of criminal law in Europe and the United States.

Examining the various sources of law that form this area of growing academic and practical importance, International Law and Transnational Organised Crime provides readers with a thorough understanding of the key concepts and legal instruments in international law governing transnational organised crime.

Criminology and Penology

'State sovereignty' is often referred to as an obstacle to criminal justice for core international crimes by members of the international criminal justice movement. The exercise of State sovereignty is seen as a shield against effective implementation of such crimes. But it is sovereign States that create and become parties to international criminal law treaties and jurisdictions. They are the principal enforcers of criminal responsibility for international crimes, as reaffirmed by the complementarity principle on which the International Criminal Court (ICC) is based. Criminal justice for atrocities depends entirely on the ability of States to act. This volume revisits the relationship between State sovereignty and international criminal law along three main lines of inquiry. First, it considers the immunity of State officials from the exercise of foreign or international criminal jurisdiction. Secondly, with the closing down of the ad hoc international criminal tribunals, attention shifts to the exercise of national jurisdiction over core international crimes, making the scope of universal jurisdiction more relevant to perceptions of State sovereignty. Thirdly, could the amendments to the ICC Statute on the crime of aggression exacerbate tensions between the interests of State sovereignty and accountability? The book contains contributions by prominent international lawyers including Professor Christian Tomuschat, Judge Erkki Kourula, Judge LIU Daqun, Ambassador WANG Houli, Dr. ZHOU Lulu, Professor Claus Kre, Professor MA Chengyuan, Professor JIA Bingbing, Professor ZHU Lijiang and Mr. GUO Yang.

The Assessment and Treatment of Women Offenders

There is a large body of research that provides guidance for those working with offenders on how they should be treated once they are in the correctional system. The problem is that most, if not all this research has been conducted on all male populations and it is assumed that women offenders are the same. However, women have different needs and support systems than men in some areas of their lives and it is unclear whether all research based on men can be generalized in this way. The book provides a review of the research literature to guide evidence-based practice in the assessment and treatment of adult female offenders. An historical overview of women's crime and imprisonment will be followed by a global review of various theories of female criminality. The remainder of the book reviews the psychology of criminal conduct, with a specific focus on three psychological principles of effective intervention: risk, need and responsivity. Respectively, these principles set the "who", "what" and "how" for correctional intervention.

State Punishment

Nicola Lacey presents a new approach to the question of the moral justification of punishment by the State. She focuses on the theory of punishments in context of other political questions, such as the nature of political obligation and the function and scope of criminal law. Arguing that no convincing set of justifying reasons has so far been produced, she puts forward a theory of punishments which places the values of the community at its centre.

American Penology

Overview: The purpose of American Penology is to provide a story of punishment's past, present, and likely future. The story begins in the 1600s, in the setting of colonial America, and ends in the present. As the story evolves through various historical and contemporary settings, America's efforts to understand and control crime unfold. The context, ideas, practices, and consequences of various reforms in the ways crime is punished are described and examined. Though the book's broader scope and purpose can be distinguished from prior efforts, it necessarily incorporates many contributions from this rich literature. While this enlarged second edition incorporates select descriptions and contingencies in relation to particular eras and punishment ideas and practices, it does not limit itself to individual "histories" of these eras. Instead, it uses history to frame and help explain particular punishment ideas and practices in relation to the period and context from which they evolved. The authors focus upon selected demographic, economic, political, religious, and intellectual contingencies that are associated with historical and contemporary eras to show how these contingencies shaped America's punishment ideals and practices. In offering a new understanding of received notions of crime control in this edition, Blomberg and Lucken not only provide insights into the future of punishment, but also show how the larger culture of control extends beyond the field of criminology to have an impact on declining levels of democracy, freedom, and privacy.

Punishment and Process in International Criminal Trials

International sentencing has become significant given the numerous events on the world stage which have focused attention on the justifications and adequacy of punishment for heinous crimes such as genocide and crimes against humanity. In addition to providing a detailed evaluation of the philosophical and theoretical difficulties raised by this rapidly developing area of international criminal justice, this book provides an integrated socio-legal analysis of the law and process of international sentencing. It considers the rationale and development of international sentencing structures and processes, the nature and scope of legal and procedural constraints on decision-making, as well as access to justice and rights issues. The book discusses sentencing within the context of international criminal law and examines internationalized trial processes and alternative mechanisms for resolution. In seeking to comprehend the punishment of international crimes through the comparative contextual analysis of trial processes, it challenges our present understanding of how and why particular sentencing outcomes are produced and the perceived legitimacy of international trial justice.

Pirates, Prisoners, and Lepers

It has long been held that humans need government to impose social order on a chaotic, dangerous world. How, then, did early humans survive on the Serengeti Plain, surrounded by faster, stronger, and bigger predators in a harsh and forbidding environment? *Pirates, Prisoners, and Lepers* examines an array of natural experiments and accidents of human history to explore the fundamental nature of how human beings act when beyond the scope of the law. Pirates of the 1700s, the leper colony on Molokai Island, prisoners of the Nazis, hippie communes of the 1970s, shipwreck and plane crash survivors, and many more diverse groups—they all existed in the absence of formal rules, punishments, and hierarchies. Paul and Sarah Robinson draw on these real-life stories to suggest that humans are predisposed to be cooperative, within limits. What these “communities” did and how they managed have dramatic implications for shaping our modern institutions. Should today’s criminal justice system build on people’s shared intuitions about justice? Or are we better off acknowledging this aspect of human nature but using law to temper it? Knowing the true nature of our human character and our innate ideas about justice offers a roadmap to a better society.

The Penal System

'.. the most authoritative and sophisticated textbook on the penal system of England and Wales. It is essential reading for anyone who wishes to understand the causes, character and consequences of the current penal 'crisis'. David Downes, Mannheim Centre of Criminology, London School of Economics. 'What do you look for in a good textbook ? You would expect it to be as up-to-date as possible. To be presented in a clear and accessible style. To cover the issues comprehensively. The Penal System delivers in all of these ways. Mick Cavadino and Jim Dignan write with passion and authority, which makes for an immensely readable book. If there is such a thing as an ideal textbook, then this is it.' George Mair, Professor in Criminal Justice, Liverpool John Moores University. '...remains the most comprehensive, up-to-date, and readable text on the subject.' Yvonne Jewkes, Reader in Criminology,

The Open University 'The perfect mix of the theoretical and the practical, Cavadino and Dignan's updated book is the smartest, cutting-edge textbook available on the crucial subject of penology.' Shadd Maruna, Queen's University Belfast '.....the book remains an essential resource for students in criminology and criminal justice. The authors are hugely effective in delivering a comprehensive guide to criminal justice issues in the 21st century. Students will also find the self-study guide to electronic sources immensely helpful.' Loraine Gelsthorpe, University of Cambridge. The revised and updated edition of this bestselling textbook is the most integrated and authoritative overview of the penal system available. The Penal System provides a complete introduction to all aspects of punishment within the wider context of the criminal justice system. It covers all the key theories and topics that a student of criminology or criminal justice needs to know about in their course. The new edition features: " Coverage of the deepening penal crisis " New material on restorative justice " Discussion of recent theoretical developments " An overview of changes in the prison and probation services (NOMS) " Critical analysis of recent developments in criminal justice policy " A glossary of key terms and abbreviations " An extended self-study guide to internet resources " A companion website to keep students and teachers up-to-date with relevant legislation. www.sagepub.co.uk/thepenalsystem Building on the strengths of the third edition, The Penal System remains the most comprehensive analysis of theory, research and policy in the area. Praise for previous editions: "There are few 'must buy' books for students of criminology and criminal justice, but since its first edition in 1992 The Penal System: An Introduction has been one of them. For accuracy and scope, as well as its remarkable combination of scholarly rigour and readability, the book has no equal, and it has only got better through successive editions." David Smith, Professor of Criminology, Lancaster University. "For more than ten years Cavadino and Dignan have provided by far the best policy relevant and theoretically informed account of the British penal system. This new edition has only the high standards of its predecessors to beat. Cavadino and Dignan may not have managed to change the penal system for the better with their book, but no one has delivered a more accessible or intelligent account of why it is so hard to reform." Mike Nellis, Professor of Criminal and Community Justice, University of Strathclyde

Penology

What Else Works? has developed out of a growing awareness amongst practitioners that centralized notions of what works and 'one size fits all' approaches to work with offenders and other groups is inevitably limited in its scope and effectiveness. The book seeks to dispel the view of probation service users as 'offenders', and socially excluded people as 'problems' to be managed and treated, and instead considers more creative alternatives to reduce both re-offending and social exclusion. These include working separately with women, black and minority ethnic groups, local community-focussed projects, in education and nature and conservation programmes. The reader is encouraged to think about past and current policy, practice, and the relationship between practitioners and offenders or other socially excluded people. Questions are raised as to whether, and how, practice could be different and contributors explore the theme of creative and change-focussed practice or focus on a particular approach to a practice. This book will appeal to students on criminal justice, criminology and social work courses, professionals operating in these fields as well as the wider audience of professionals and academics who may engage with these 'service users' from a range of policy and practice perspectives.

Criminology and Penology

At the outset of the twenty-first century, more than 9 million people are held in custody in over 200 countries around the world. --from the essay "Prisons and Jails" by Ron King The first comparative study of this increasingly integral social subject, International Handbook of Penology and Criminal Justice provides a comprehensive and balanced review of the philosophy and practicality of punishment. Drawn

from the expertise of scholars and researchers from around the world, this book covers the theory, practice, history, and empirical evidence surrounding crime prevention, identification, retribution, and incarceration. It analyzes the efficacy of both traditional methods and thinking as well as novel concepts and approaches. Beginning with a study of the changing attitude of penal practice in Florida from one of offender transformation to one of risk-management, imprisonment, surveillance, and control, this volume embarks on an objective and sober appraisal of every aspect of the field. Contributions consider the sociology of incarcerated prisoners including the increasing prevalence of prison suicides. The book evaluates arguments regarding the world-wide abolition of capital punishment from moral, utilitarian, and practical positions. It examines non-incarcerative and alternative punishments such as financial restoration and restrictions of liberty, as well as the positive effects of Victim Offender Mediation. It also considers several methods aimed at achieving measurable crime prevention including identifying at-risk juveniles and minimizing crimes of opportunity, as well as the pros and cons of employing the coercive power of police. Further essays consider subjects such as international policing, the roles of prosecution and defense attorneys, current discretionary sentencing practices, and the role and treatment of victims. The volume concludes with two chapters of case studies that provide a "hands-on" feel for the interplay of the concepts discussed. This volume is the first in a three-part trilogy. It offers a holistic and contemporary account of the penal system in England and Wales. Helping students to understanding the ever-changing environment of penal policy and practice, this book not only provides a strong foundation in penal theory but also has a strong focus on actual practice. Author Karen Harrison draws on a number of interviews with people who work within or for agencies associated with the penal system, as well as accounts of prison visits that build a picture of current prison life. Packed with helpful features, Penology includes Spotlight profiles of the penal system in countries across the globe. The text also covers a range of specific offenders, examining not just white adult men but women offenders, children and ethnic minorities. It's also offers important insights for students of criminology, criminal justice, law and social science.

The Birth of Criminology

‘The book is a unique combination of criminology, politics and philosophy which can be recommended2 - Network, Newsletter of the British Sociological Association ‘Hudson2s Justice in the Risk Society is stunning in the depth and breadth of its scholarship. In examining the challenges the risk society presents for established conceptions of justice she compels a profound rethinking of what justice does, and can, mean. Her analysis will frame and inspire future debate2 - Clifford Shearing, Professor, Law Program, Research School of Social Science, Australian National University ‘Remarkably comprehensive, ambitious in its scope and morally compelling. Barbara Hudson draws skilfully from a wide range of frameworks... She asks fundamental questions about the nature of justice and argues for a radical rethink of liberalism. She explores complex subject matter in a clear and accessible fashion. This excellent book will surely reinvigorate theoretical thinking on the nature of punishment for years to come2 - Kieran McEvoy, Professor of Law and Transitional Justice, School of Law, Queen2s University Belfast 2The book makes an important contribution to the development of new perspectives on justice and provides a rigorous analysis of political and ethical theories that will be highly relevant to criminology and penology students, academics, criminal justice practitioners and policy makers2 - SOCLAG Legal Journal How much of a threat does society2s preoccupation with ‘risk2 pose to the ideal of ‘justice2? Innovations in control and in penal policy are increasingly dominated by the theme of public protection, motivated by the aim of controlling risk rather than the aim of enhancing social justice. In Justice in the Risk Society, Barbara Hudson outlines traditional liberal perspectives on

justice, risk and security, as well as addressing some key concerns, including: · the challenges to justice: the politics of risk and safety · communitarian and feminist political and ethical theories · how to use current theories and perspectives such as Habermas's discourse ethics and postmodern perspectives on justice · how to develop new methods of re-affirming and reconstructing theories and institutions of justice The book concludes with analysis of two of the most important elements of justice for late-modernity: discursiveness and human rights. Justice in the Risk Society provides theoretical analysis with a discussion of policies, and arguments are illustrated by cases and examples. The book reviews political and ethical theories in a way that is highly relevant and accessible to criminology and penology students, practitioners and academics, as well as making an original contribution to the development of new perspectives on justice.

Penological and Preventive Principles

This book, first published in 1965, describes the British penal system as it existed in the 1960s. It describes how the system defined, accounted for, and disposed of offenders. As an early work in criminology, it focuses on differences between, and changes in, the views held by legislators, lawyers, philosophers, and the man in the street on the topic of crime and punishment. Walker is interested in the extent to which their views reflect the facts established and the theories propounded by psychologists, anthropologists, and sociologists. The confusion between criminologists and penal reformers was initially encouraged by criminologists themselves, many of whom were penal reformers. Strictly speaking, penal reform, according to Walker, was a spare-time occupation for criminologists, just as canvassing for votes is an ancillary task for political scientists. The difference is that the criminologist's spare-time occupation is more likely to take a "moral" form, and when it does so it is more likely to interfere with what should be purely criminological thoughts. The machinery of justice involves the interaction of human beings in their roles of victim, offender, policeman, judge, supervisor, or custodian, and there must be a place for human sympathy in the understanding, and still more in the treatment, of individual offenders. This book is concerned with the efficiency of the system as a means to these ends. One of the main reasons why penal institutions have continued to develop more slowly than other social services is that they are a constant battlefield between emotions and prejudices. This is a great empirical study; against which the policy-maker and criminologist can measure progress or regression in British criminals and punishments.

Penology

A critique of penal harm, the recursive pains of the imprisonment cycle, and the normalization of violence. The authors deconstruct the human agency/social structure duality that sustains the prison form, its parts and segments understood as correctional principles/practices, and the prison industrial complex that is informed by and stands above them all.

Penology

Covering criminal justice history on a cross-national basis, this book surveys criminal justice in Western civilization and American life chronologically from ancient times to the present. It is an introduction to the historical problems of crime, law enforcement and penology, set against the background of major historical events and movements. Integrating criminal justice history into the scope of European, British, French and American history, this text provides the opportunity for comparisons of crime and

Justice in the Risk Society

This book analyzes the sources and results of the fourfold increase in the U.S. correctional population since 1970. It considers the following themes: the value of punitiveness, defined as penal harm; research on crime and criminals; concerns about victims of crime; and concerns about community safety. It also analyzes the relationship between social problems and penal harm, such as poverty and crime during the twenty-year period of correctional expansion. The author argues that a careful review of proposals for expanded penal harm cannot be justified. The growth in corrections was not caused by crime nor has it reduced crime. Clear describes a new strategy for corrections based on his examination of the politics of social control and the growth in penal harm.

Crime and Punishment in Britain

Provides a thorough understanding of the nature and scope of incarceration.

The Penal System

This work provides an up-to-date account of the key stages of the criminal justice system. It covers areas relating to the imposition of punitive measures upon criminals in modern English society, including an exploration of the prospects for crime prevention, evaluation of the role of the police, and examination of bail and prosecution decisions. What is the impact of the jury system and what is its importance? What are the factors that influence sentencing decisions in English courtrooms? What is the role of prisons and do they fulfil that purpose? This text encourages readers to think much more deeply about the philosophies that lie behind the criminal justice system. Reform proposals and legislative changes are integrated into the themes of the text. New areas include confessions, police accountability, restorative justice, and the introduction of public defenders.

History of Criminal Justice

Justice, Crime, and Ethics, a leading textbook in criminal justice programs, examines ethical dilemmas pertaining to the administration of criminal justice and professional activities in the field. This ninth edition continues to deliver a broad scope of topics, focusing on law enforcement, legal practice, sentencing, corrections, research, crime control policy, and philosophical issues. The book's robust coverage encompasses contentious issues such as capital punishment, prison corruption, and the use of deception in police interrogation. The ninth edition includes new material on juvenile justice, corporate crime, and prosecutorial misconduct. The "Policy and Ethics" feature and new "Ethical Dilemma" feature added to most chapters illuminate the ethics of institutions as well as individuals. Students of criminal justice, as well as instructors and professionals in the field, continue to rely on this thorough, dependable resource on ethical decision making in the criminal justice system.

Behavioral Science and Modern Penology

The criminal justice system has been in a state of flux in recent decades, accompanied by growing levels of insecurity and intolerance of crime and offenders among the general population. Along with government policy and practice, these developments are seen as contributing to an increasingly punitive system that imprisons more than ever before and seeks to punish and manage offenders in the community, rather than to attempt their rehabilitation. For these reasons, along with a loss of faith in rehabilitation, the probation service is now described by many as having become a law enforcement agency, charged by government with the assessment and management of risk, the protection of the public and the management and punishment of offenders, rather than their transformation into pro-social citizens. This book explores the extent to which practitioners within the National Probation Service for England and Wales and the National Offender Management Service ascribe to the values, attitudes and beliefs associated with these macro and mezzo level changes and how much their practice has changed accordingly. By viewing examples of 'real' practice through the lens of the modernisation of public services, managerialism and theories of organisation change, the book considers how 'real' practice is likely to emerge as something unpredictable and perhaps different from the intentions of both government/management and practitioners.

Harm in American Penology

An Introduction to Penology is a concise, informative, scholarly guide that will speak to a variety of audiences interested in how the notion of punishment plays out in community and custodial settings with people who have broken the law. With a particular focus on prisons and probation, the book provides an opportunity for readers to critically engage with the concept of punishment (in theory and practice) and consider different ways in which we, as a society, can respond to lawbreaking. The text will allow students to pursue a more in-depth study of two of the main criminal justice institutions through the lens of their organisational structures, cultures, service delivery and responses to the needs of minority and vulnerable groups. Throughout the text, students will be encouraged to critically engage with longstanding penological debates taking into consideration the theory, policy and practice of punishment, and will explore ways in which we can rethink penology on an individual and social level and begin to make a case for social justice rather than criminal justice. This innovative and contemporary text is a must read for students studying criminology, criminal justice, penology and those interested in pursuing a career in either the prison or probation services. in Criminal Justice and Dr Helena Gosling is a Senior Lecturer in Criminal Justice at Liverpool John Moores University.

The Criminal Code of the Jews

Excerpt from The Criminal Jurisprudence of the Ancient Hebrews: Compiled From the Talmud and Other Rabbinical Writings, and Compared With Roman and English Penal Jurisprudence Of the many excellent German works on the particular branch of Rabbinic lore treated of in these pages, I have consulted none, because I wished to let the ancient Hebrew sages speak for themselves, and not through the mouths of modern commentators. English works on this subject I have not seen, except a few articles here and there, and Vargha's chapter on the Defense in Criminal Cases with the Ancient Hebrews. Wines's valuable work treats of the Mosaic system only. Only works of generally recognized authority have been referred to for data of historical matters as well as of Greek, Roman, or English Law. Those most frequently cited are the following: Arnold. Introductory Lectures on Modern History, by Thomas Arnold, D. D. Edited by Henry Reed, M. A. Philadelphia, 1857. Beccaria. Of Crimes and Punishments, by Caesar Bonesana, Mqs. di Beccaria. Quoted after the German of M. Waldeck. Berlin,

1870. Blackstone. Commentaries on the Laws of England, by Sir William Blackstone. Edited and annotated by Christian Chitty and others. Crimes and Criminal Procedure Title 18 - Scholar's Choice Edition

The death penalty in classical Judaism has been a highly politicized subject in modern scholarship. Enlightenment attacks on the Talmud's legitimacy led scholars to use the Talmud's criminal law as evidence for its elevated morals. But even more pressing was the need to prove Jews' innocence of the charge of killing Christ. The reconstruction of a just Jewish death penalty was a defense against the accusation that a corrupt Jewish court was responsible for the death of Christ. In Execution and

Invention, Beth A. Berkowitz tells the story of modern scholarship on the ancient rabbinic death penalty and offers a fresh perspective using the approaches of ritual studies, cultural criticism, and talmudic source criticism. Against the scholarly consensus, Berkowitz argues that the early Rabbis used the rabbinic laws of the death penalty to establish their power in the wake of the destruction of the Temple. Following recent currents in historiography, Berkowitz sees the Rabbis as an embattled, almost invisible sect within second-century Judaism. The function of their death penalty laws, Berkowitz contends, was to create a complex ritual of execution under rabbinic control, thus bolstering rabbinic claims to authority in the context of Roman political and cultural domination. Understanding rabbinic literature to be in dialogue with the Bible, with the variety of ancient Jews, and with Roman imperialism, Berkowitz shows how the Rabbis tried to create an appealing alternative to the Roman, paganized culture of Palestine's Jews. In their death penalty, the Rabbis substituted Rome's power with their own. Early Christians, on the other hand, used death penalty discourse to critique judicial power. But Berkowitz argues that the Christian critique of execution produced new claims to authority as much as the rabbinic embrace. By comparing rabbinic conversations about the death penalty with Christian ones, Berkowitz reveals death penalty discourse as a significant means of creating authority in second-century western religious cultures. Advancing the death penalty discourse as a discourse of power, Berkowitz sheds light on the central relationship between religious and political authority and the severest form of punishment.

Crime and Criminals - Scholar's Choice Edition

While religious diversity is often considered a recent phenomenon in America, the Cape Fear region of southeastern North Carolina has been a diverse community since the area was first settled. Early on, the region and the port city of Wilmington were more urban than the rest of the state and thus provided people with opportunities seldom found in other parts of North Carolina. This area drew residents from many ethnic backgrounds, and the men and women who settled there became an integral part of the region's culture. Set against the backdrop of national and southern religious experience, *A Coat of Many Colors* examines issues of religious diversity and regional identity in the Cape Fear area. Author Walter H. Conser Jr. draws on a broad range of sources, including congregational records, sermon texts, liturgy, newspaper accounts, family memoirs, and technological developments to explore the evolution of religious life in this area. Beginning with the story of prehistoric Native Americans and continuing through an examination of life at the end of twentieth century, Conser tracks the development of the various religions, denominations, and ethnic groups that call the Cape Fear region home. From early Native American traditions to the establishment of the first churches, cathedrals, synagogues, mosques, and temples, *A Coat of Many Colors* offers a comprehensive view of the religious and ethnic diversity that have characterized Cape Fear throughout its history. Through the lens of regional history, Conser explores how this area's rich religious and racial diversity can be seen as a microcosm for the South, and he examines the ways in which religion can affect such diverse aspects of life as architecture and race relations.
