Laboratory Astrophysics: Studying the Stuff of Stars - Laboratory Astrophysics: Studying the Stuff of Stars by MIT Plasma Science and Fusion Center 516 views 2 years ago 41 minutes - Instabilities in the Crab Nebula jet; magnetic reconnection in the magnetopause; collisionless shocks in the universe, caused by ...

Intro

Overview

Traditionally, astrophysics was constrained to observations, theory, and simulation Observation The laboratory is a much more controlled environment, allowing for better physics explorations and model validation

Inertial confinement fusion facilities can be used to generate plasma for lab astro studies

The NIF experiments are relevant to astrophysical systems

Inertial confinement fusion (ICF) implosions use lasers to reach fusion relevant densities and temperatures

ICF implosions can reach similar conditions to the interior of stars

ICF implosions offer a better platform than accelerators to study Stellar nucleosynthesis

Experiments at OMEGA have measured the $3\text{e}3\text{He}$ proton spectrum

Theoretical modeling and numerical simulations suggest that the kink be a consequence of fields and current-driven MHD instabilities

To mimic the Crab jet, a laboratory experiment requires magnetic fields with the right properties

Physical parameters and similarity scaling between the laboratory Jet and the Crab nebula je
 To scale the laboratory results to the environment of the Crab nebula equations need to be invariant under the transformations for the two s
 different parameter regimes
 Classical Sweet-Parker reconnection model cannot explain the fast recor
 W.Fox et al investigated the onset of the tearing instability in a laser magnetic reconnection experi-
 ment at the OMEGA Laser Facility

Geometry Ch 4 Notes: Tri

Example 1: Given the diagram shown, are the triangles congruent? How do you know? If they are congruent, then write a congruence statement. Reflexive. Property.

Congruence of Triangles (Conditions - SSS, SAS, ASA, ...

Congruence of triangles represents the similarity of triangles. Two triangles are congruent if their corresponding sides and angles are congruent.

Ch 4, Congruent parts of Congruent Triangles

1) The document outlines Geometry Chapter 4 which covers different methods of proving triangles congruent, including SSS, SAS, ASA, AAS, isosceles triangles ...
