The Aviators

From Winston Groom, the best-selling author of *Forrest Gump*; *Shiloh*, 1862; and *Vicksburg*, 1863, comes the fascinating story of three extraordinary heroes who defined aviation during the great age of flight. Targeted to fans of *Unbroken*, *The Greatest Generation*, and *Flyboys*, these cleverly interwoven tales of heart-stopping adventures take us from the feats of World War I through the heroism of World War II and beyond, including daring military raids and survival at sea. With the world in peril in World War II, each man set aside great success and comfort to return to the skies for his most daring mission yet. Doolittle, a brilliant aviation innovator, would lead the daring Tokyo Raid to retaliate for Pearl Harbor;

Lindbergh, hero of the first solo flight across the Atlantic, would fly combat missions in the South Pacific; and Rickenbacker, World War I flying ace, would bravely hold his crew together while facing near starvation and circling sharks after his plane went down in a remote part of the Pacific. Groom's rich narrative tells their intertwined stories--from broken homes to Medals of Honor, barnstorming to the greatest raid of World War II, front-page triumph to anguished tragedy, and near death to ultimate survival--as all took to the sky, time and again, to become exemplars of the spirit of the "greatest generation."

The Aviators

"The Aviators is the true story of Eddie Rickenbacker, Jimmy Doolittle, and Charles Lindbergh - - three extraordinary Americans who between World War I and World War II pushed the limits of flights and redefined heroism through their genius, daring, and uncommon courage. Winston Groom's rich narrative tells their intertwined stories - - from broken homes to Medals of Honor (all three would receive them) ; barnstorming to the greatest raid of World War II; front-page triumph to anguished tragedy ; and near death to ultimate survival - - as all took to the sky, time and again, to become exemplars of the spirit of the "greatest generation."--Back cover.

Aviators

Story of Charles Lindbergh, Eddie Rickenbacker and Jimmy Doolittle tales of their heart stopping adventures. World War II.

Cap Cornish, Indiana Pilot

Clarence "Cap" Cornish was an Indiana pilot whose life spanned all but five years of the Century of Flight. Born in Canada in 1898, Cornish grew up in Fort Wayne, Indiana. He began flying at the age of nineteen, piloting a "Jenny" aircraft during World War I, and continued to fly for the next seventy-eight years. In 1995, at the age of ninety-seven, he was recognized by Guinness World Records as the world's oldest actively flying pilot. The mid-1920s to the mid-1950s were Cornish's most active years in aviation. During that period, sod runways gave way to asphalt and concrete; navigation evolved from the iron rail compass to radar; runways that once had been outlined at night with cans of oil topped off with flaming gasoline now shimmered with multicolored electric lights; instead of being crammed next to mailbags in open-air cockpits, passengers sat comfortably in streamlined, pressurized cabins. In the early phase of that era, Cornish performed aerobatics and won air races. He went on to run a full-service flying business, served as chief pilot for the Fort Wayne News-Sentinel, managed the city's municipal airport, helped monitor and maintain safe skies above the continental United States during World War II, and directed Indiana's first Aeronautics Commission. Dedicating his life to flight and its many ramifications, Cornish helped guide the sensible development of aviation as it grew from infancy to maturity. Through his many personal experiences, the story of flight nationally is played out.

History's Greatest Pilots Close Up

From the Red Baron in World War I to a U.S. medevac pilot in Afghanistan in 2012, this volume honors the brave men and women who served as aviators in defense of their countries. Each pilot's dramatic biographical profile is accompanied by a fact box that provides the aviator's dates of birth and death, country of nationality/allegiance, and his or her branch or service, rank, unit, important military engagements, and service awards. Pilot narratives are enhanced with historical photos of the aviators and their aircraft.

Aluminum Alley

By the time Japan attacked Pearl Harbor on December 7, 1941, China was already under siege. The Imperial military invaded and choked off every land and sea route for the young country's resupply, and what remained of China was out of gas and withering away. So in April 1942 the United States decided to help out, by trying something entirely new and a little bit crazy. The world's first airlift. Over the Himalayas. Led by brilliant and stubborn American generals including Joseph Stilwell, Claire Chennault, and William Tunner, this improvised lifeline for Chiang Kai-shek's nationalists aimed to keep more than a million Japanese troops tied up in an unwinnable occupation, far away from the brutal combat then unfolding in the Pacific. For 42 months the American 'Hump pilots' flew aviation gas, ammunition, food and other life-or-death cargo from Assam, India over Burma and the eastern Himalayas and into

southern China. Frequent ice storms, unpredictable Japanese air attacks, impenetrable jungles, and the often-invisible presence of 15,000 feet of granite and ice were a formidable challenge for young American pilots in bare-bones cargo planes with primitive instruments and no margin for error. One out of every three airmen who flew the Hump would not make it home. *Aluminum Alley* is the true story of an unheralded group of pilots in a cursed and forgotten theater of combat, over the world's highest mountains and deepest jungles – all to help the Allies defeat Japan in World War II. Based on interviews with survivors of the Hump and the airmen's letters, journals, flight logs and other resources, this is narrative nonfiction with the immediacy and intimacy of memoir and the big-picture analysis of the best military history.

Robert A. Lovett and the Development of American Air Power

Robert Lovett grew up in Texas, went to Yale, and earned his wings as a naval air force hero in World War I. He played a key role in the development of the Army Air Force in World War II. His emphasis on strategic bombing was instrumental in defeating Hitler's Germany. During his postwar State Department service, he was influential in initiating the Marshall Plan, the formation of NATO and planning the Berlin Airlift. He served as Truman's Secretary of Defense during the Korean War, was a consultant for his friend Dwight Eisenhower and served John F. Kennedy during the Cuban Missile Crisis. Between tours of duty in Washington, he was an international banker on Wall Street. This first complete biography covers his life and career in detail.

Eagles Overhead

US Air Force Forward Air Controllers (FACs) bridge the gap between air and land power. They operate in the grey area of the battlefield, serving as an aircrew who flies above the battlefield, spots the enemy, and relays targeting information to control close air support attacks by other faster aircraft. When done well, Air Force FACs are the fulcrum for successful employment of air power in support of ground forces. Unfortunately, FACs in recent times have been shunned by both ground and air forces, their mission complicated by inherent difficulty and danger, as well as by the vicissitudes of defense budgets, technology, leadership, bureaucracy, and doctrine. *Eagles Overhead* is the first complete historical survey of the US Air Force FAC program from its origins in World War I to the modern battlefield. Matt Dietz examines their role, status, and performance in every US Air Force air campaign from the Marne in 1918, World War II, Korea, Vietnam, Desert Storm, and finally Mosul in 2017. With the remaking of the post-Vietnam US military, and the impact of those changes on FAC, the Air Force began a steady neglect of the FAC mission from Operation Desert Storm, through the force reductions after the Soviet Union's collapse, and into the post 9-11 wars in Iraq and Afghanistan. *Eagles Overhead* asks why FACs have not been heavily used on US battlefields since 2001, despite their warfighting importance. Dietz examines the Air Force FAC's theoretical, doctrinal, institutional, and historical frameworks to assess if the nature of air warfare has changed so significantly that the concept and utility of the FAC has been left behind. From these examinations, *Eagles Overhead* draws conclusions about the potential future of Air Force FACs.

Wings Over Florida

Florida's contribution to aviation history cannot be underestimated. *Wings over Florida* chronicles the story of flying in the "Sunshine State," from the early pioneers in gliders and balloons, to the recent developments in the space program. The story of Florida in flight is even older than its statehood, with Colonel John Sherburne planning to use balloons as early as 1840 in the Second Seminole War. Not only was the first scheduled passenger airline (the St. Petersburg-Tampa Airboat Line) begun in Florida, but it is also home to the world's oldest international airline. Many heroes and heroines of the air came from Florida. Even those who were not Floridians by birth spent time flying in the ideal conditions that Florida provided. Pioneers, such as Charles Lindbergh, Amelia Earhart, Peter Sones, and Jacqueline Cochran, all took to the air over Florida.

Lost at Sea

The forgotten story of American war hero Eddie Rickenbacker's crash landing in the Pacific during World War II, and his incredible twenty-three-day crusade to keep his crew alive. In the darkest days of World War II, an unlikely civilian was sent to deliver a letter from Washington to General MacArthur in New Guinea. Eddie Rickenbacker was a genuine icon, a pioneer of aviation, the greatest fighter pilot of the First World War, recipient of the Medal of Honor, who'd retired to become a renowned race car

driver. Now in his fifties, one of the most admired men in America, Rickenbacker was again serving his nation, riding high above the Pacific as a passenger aboard a B-17. But soon the plane was forced to crash-land on the ocean surface, leaving its eight occupants adrift in tiny rubber life rafts, hundreds of miles from the nearest speck of land. Lacking fresh water and with precious little food, the men faced days of unrelenting sun, followed by nights shivering in the cold, fighting pangs of hunger, exhaustion, and thirst, all the while circled by sharks. Each prayed to see a friendly vessel on the horizon, and dreaded the arrival of a Japanese warship. Meanwhile, as the US Navy scoured the South Pacific, American radio and newspapers back home parsed every detail of Rickenbacker's disappearance, and an adoring public awaited news of his fate. Using survivors' accounts and contemporary records, award-winning author John Wukovits brings to life a gripping story of survival, leadership, and faith in a time of crisis.

The Generals

Celebrated historian Winston Groom tells the story of three remarkable men-at-arms who rose from the gruesome hell of the First World War to become the finest generals of their generation during World War II. George Marshall, George Patton, and Douglas MacArthur redefined America's ideas of military leadership and brought forth a new generation of American soldier. Their efforts revealed to the world the grit and determination that would become synonymous with America in the post-war years.

War at the End of the World

A harrowing account of an epic, yet nearly forgotten, battle of World War II—General Douglas MacArthur's four-year assault on the Pacific War's most hostile battleground: the mountainous, jungle-cloaked island of New Guinea. "A meaty, engrossing narrative history... This will likely stand as the definitive account of the New Guinea campaign."—The Christian Science Monitor One American soldier called it "a green hell on earth." Monsoon-soaked wilderness, debilitating heat, impassable mountains, torrential rivers, and disease-infested swamps—New Guinea was a battleground far more deadly than the most fanatical of enemy troops. Japanese forces numbering some 600,000 men began landing in January 1942, determined to seize the island as a cornerstone of the Empire's strategy to knock Australia out of the war. Allied Commander-in-Chief General Douglas MacArthur committed 340,000 Americans, as well as tens of thousands of Australian, Dutch, and New Guinea troops, to retake New Guinea at all costs. What followed was a four-year campaign that involved some of the most horrific warfare in history. At first emboldened by easy victories throughout the Pacific, the Japanese soon encountered in New Guinea a roadblock akin to the Germans' disastrous attempt to take Moscow, a catastrophic setback to their war machine. For the Americans, victory in New Guinea was the first essential step in the long march towards the Japanese home islands and the ultimate destruction of Hirohito's empire. Winning the war in New Guinea was of critical importance to MacArthur. His avowed "I shall return" to the Philippines could only be accomplished after taking the island. In this gripping narrative, historian James P. Duffy chronicles the most ruthless combat of the Pacific War, a fight complicated by rampant tropical disease, violent rainstorms, and unforgiving terrain that punished both Axis and Allied forces alike. Drawing on primary sources, *War at the End of the World* fills in a crucial gap in the history of World War II while offering readers a narrative of the first rank.

Why Can't I

For almost 100 years photos, journals, newspaper clippings, Naval records and love letters waited quietly to tell the story of how a Depression-era Southern boy with nothing but talent and ambition rose to become a Navy fighter pilot and hero in WWII. John Barry, Jr, born in poverty in coastal Carolina, lived with his siblings and parents in fish shacks and often had to scrounge through garbage to find food. He and his brothers and sisters were sent to an orphanage after his mother died and father couldn't find work. His athletic talent and personality earned him a college education and officer's training as a Navy pilot. He found love and married a hometown girl shortly before he was deployed. His personal journal entries told the story of the heat and exhaustion of life aboard the carriers, the loss of good friends in dogfights and bad landings, and the real horrors of the war. In stark contrast, his letters home were filled with descriptions of the beauty of the Pacific Islands, the friendships made aboard ship, his desire for home, as well as advice for his pregnant wife. This stunning example of a war-time love story is filled with battle action, and is a personal look into the life and love of a man whose mantra was "Why Can't I." It is a journey of discovery into a different and more innocent time. Here are his times. This is his story.

On Killing Remotely

A “can’t-miss for anyone interested in current military affairs,” *On Killing Remotely* reveals and explores the costs—to individual soldiers and to society—of the way we wage war today (Kirkus Reviews, starred). Throughout history society has determined specific rules of engagement between adversaries in armed conflict. With advances in technology, from armor to in the Middle Ages to nerve gas in World War I to weapons of mass destruction in our own time, the rules have constantly evolved. Today, when killing the enemy can seem palpably risk-free and tantamount to playing a violent video game, what constitutes warfare? What is the effect of remote combat on individual soldiers? And what are the unforeseen repercussions that could affect us all? Lt Col Wayne Phelps, former commander of a Remotely Piloted Aircraft unit, addresses these questions and many others as he tells the story of the men and women of today’s “chair force.” Exploring the ethics of remote military engagement, the misconceptions about PTSD among RPA operators, and the specter of military weaponry controlled by robots, his book is an urgent and compelling reminder that it should always be difficult to kill another human being lest we risk losing what makes us human.

Congressional Record

"Fighting the Flying Circus" is fighter ace Eddie Rickenbacker WWI memoir. He fought in and eventually became commander of the 94th "Hat-in-the-Ring" Squadron, which ended the war with the highest number of air victories of any American squadron. The circus mentioned in the title refers to the German squadron commanded by the famous Red Baron, Manfred von Richthofen. Eddie Rickenbacker (1890-1973) was an American World War I pilot. He was the most successful fighter ace in that war and received the Medal of Honor. After the war, he was as a car designer, driver, and worked as a military consultant for the government. He was also an air transportation pioneer, as worked as a head of the Eastern Air Lines company for many years.

Aviation History is the most complete text on the history of aviation. It is an exciting full-color book that gives both new and experienced pilots a unique perspective on international aviation history. Each of the ten chapters is packed with information; containing over 950 photographs and color graphics. Aviation History explores the question *what was aviation* from its birth in Annonay, France, in 1783, to the exhilarating accomplishments in space. Through personal profiles, you are able to meet the people who made significant contributions to aviation. You will explore historical evidence and see how historians use the artifacts of aviation to confirm what happened.

World War II in Literature for Youth

America's first year in World War II, chronicled in this "page-turner" by the Pulitzer Prize-nominated author of *Forrest Gump* and *The Generals* (Publishers Weekly). On December 7, 1941, an unexpected attack on American territory pulled an unprepared country into a terrifying new brand of warfare. To the generation of Americans who lived through it, the Second World War was the defining event of the

twentieth century, and the defining moments of that war were played out in the year 1942. This account covers the Allies' relentless defeats as the Axis overran most of Europe, North Africa, and the Far East. But by midyear the tide began to turn. The United States finally went on the offensive in the Pacific. In the West, the British defeated Rommel's panzer divisions at El Alamein while the US Army began to push the Germans out of North Africa. By the year's end, the smell of victory was in the air. 1942, told with Winston Groom's accomplished storyteller's eye, allows us into the admirals' strategy rooms, onto the battlefronts, and into the heart of a nation at war. "When not drawing in readers with the narrative, Groom is impressing them with his masterful analyses." —The Atlanta Journal-Constitution "Groom has done an artful job of blending the many stories of 1942." —The Anniston Star

Fighting the Flying Circus

After Pearl Harbor, he led America's flight to victory General Doolittle is a giant of the twentieth century. He did it all. As a stunt pilot, he thrilled the world with his aerial acrobatics. As a scientist, he pioneered the development of modern aviation technology. During World War II, he served his country as a fearless and innovative air warrior, organizing and leading the devastating raid against Japan immortalized in the film *Thirty Seconds Over Tokyo*. Now, for the first time, here is his life story — modest, revealing, and candid as only Doolittle himself can tell it.

Jimmy Doolittle: Daredevil Aviator and Scientist

They fondly remember the times when they buzzed over the homes of their Florida "families" to let them know to expect them for Sunday dinner. More than fifty years later, their stories still resonate with universal emotions: fear of failure, love of country, camaraderie, romantic love, and the pain of tragic deaths. Their stories also remind the American reader of a unique time in our history, when, poised on the brink of war, the United States reached out to help a country in distress."--BOOK JACKET.

Aviation History

Penetrating . . . beautifully rounds out and humanizes the character of the greatest statesman of the twentieth century. —San Francisco Chronicle "A multifaceted gem, sparkling with anecdotes and insights about the nature of biography, the challenges and rewards of historical research, and of course Winston Churchill." —Richmond Times-Dispatch "Everything about Winston Churchill is extraordinary. During his excavation of his subject, Martin Gilbert has discovered many gems. In this book he holds some of the most gorgeous jewels up to the light for us to admire." —The Spectator "Gilbert here gives us Churchill's vast humanity with the politics largely left out. Readers daunted by the 8,000-odd pages of the official life should start here. They will love it." —The Times (London) "The portrait of Winston Churchill is . . . vivid and painted with an affection and humour that rarely appear in the official biography." —London Daily Telegraph. "The work [Gilbert] has done puts all historians of the twentieth century, and all students of Churchill, incalculably in his debt." —London Sunday Telegraph

Best-selling author Winston Groom tells the complex story of how Franklin Roosevelt, Winston Churchill, and Joseph Stalin--the three iconic and vastly different Allied leaders--aligned to win World War II and created a new world order. By the end of World War II, 59 nations were arrayed against the axis powers, but three great Allied leaders--Franklin Roosevelt, Winston Churchill, and Joseph Stalin--had emerged to control the war in Europe and the Pacific. Vastly different in upbringing and political beliefs, they were not always in agreement--or even on good terms. But in the end, these three men presided over a new world order. Best-selling historian Winston Groom returns to tell one of the biggest stories of the 20th century: The interwoven and remarkable tale, and a fascinating study of leadership styles, of three world leaders who fought the largest war in history.

1942

Except in a few instances, since World War II no American soldier or sailor has been attacked by enemy air power. Conversely, no enemy soldier or sailor has acted in combat without being attacked or at least threatened by American air power. Aviators have brought the air weapon to bear against enemies while denying them the same prerogative. This is the legacy of the U.S. Air Force, purchased at great cost in both human and material resources. More often than not, aerial pioneers had to fight technological ignorance, bureaucratic opposition, public apathy, and disagreement over purpose.

Every step in the evolution of air power led into new and untrodden territory, driven by humanitarian impulses; by the search for higher, faster, and farther flight; or by the conviction that the air was the best way. Warriors have always coveted the high ground. If technology permitted them to reach it, men, women, and an air force held and exploited it – from Thomas Selfridge, first among so many who gave that “last full measure of devotion”; to “Women’s Airforce Service Pilot Ann Baumgartner, who broke social barriers to become the first American woman to pilot a jet; to Benjamin Davis, who broke racial barriers to become the first African American to command a flying group; to Chuck Yeager, a one-time non-commissioned flight officer who was the first to exceed the speed of sound; to John Levittow, who earned the Medal of Honor by throwing himself over a live flare to save his gunship crew; to John Warden, who began a revolution in air power thought and strategy that was put to spectacular use in the Gulf War. Industrialization has brought total war and air power has brought the means to overfly an enemy’s defenses and attack its sources of power directly. Americans have perceived air power from the start as a more efficient means of waging war and as a symbol of the nation’s commitment to technology to master challenges, minimize casualties, and defeat adversaries. This eight-two page book concludes that “future conflicts will bring new challenges for air power in the service of the nation.”

People in Books

The astonishing untold story of the WWII airmen who risked it all in the deadly race to become the greatest American fighter pilot. In 1942, America's deadliest fighter pilot, or "ace of aces" -- the legendary Eddie Rickenbacker -- offered a bottle of bourbon to the first U.S. fighter pilot to break his record of twenty-six enemy planes shot down. Seizing on the challenge to motivate his men, General George Kenney promoted what they would come to call the "race of aces" as a way of boosting the spirits of his war-weary command. What developed was a wild three-year sprint for fame and glory, and the chance to be called America's greatest fighter pilot. The story has never been told until now. Based on new research and full of revelations, John Bruning's brilliant, original book tells the story of how five American pilots contended for personal glory in the Pacific while leading Kenney's resurgent air force against the most formidable enemy America ever faced. The pilots -- Richard Bong, Tommy McGuire, Neel Kearby, Charles MacDonald and Gerald Johnson -- riveted the nation as they contended for Rickenbacker's crown. As their scores mounted, they transformed themselves from farm boys and aspiring dentists into artists of the modern dogfight. But as the race reached its climax, some of the pilots began to see how the spotlight warped their sense of duty. They emerged as leaders, beloved by their men as they chose selfless devotion over national accolades. Teeming with action all across the vast Pacific theater, *Race of Aces* is a fascinating exploration of the boundary between honorable duty, personal glory, and the complex landscape of the human heart. "Brings you into the cockpit of the lethal, fast-paced world of fighter pilots . . . Fascinating." -- Sara Vladic "Extraordinary . . . a must-read." -- US Navy Captain Dan Pedersen "A heart-pounding narrative of the courage, sacrifice, and tragedy of America's elite fighter pilots." -- James M. Scott "Vivid and gripping . . . Confirms Bruning's status as the premier war historian of the air." -- Saul David

I Could Never Be So Lucky Again

In this masterful narrative, Winston Groom brings his signature storytelling panache to the intricately crafted tale of three of our nation's most fascinating founding fathers--Alexander Hamilton, Thomas Jefferson, and John Adams--and paints a vivid picture of the improbable events, bold ideas, and extraordinary characters who created the United States of America. When the Revolutionary War ended in victory, there remained the stupendous problem of how to establish a workable democratic government in the vast, newly independent country. Three key founding fathers played significant roles: John Adams, the brilliant, dour, thin-skinned New Englander; Thomas Jefferson, the aristocratic Southern renaissance man; and Alexander Hamilton, an immigrant from the Caribbean island of Nevis. In this complex and riveting narrative, best-selling author Winston Groom tells the story of these men--all of whom served in George Washington's first cabinet--as the patriots fundamentally responsible for the ideas that shaped the foundation of the United States. Their lives and policies could not have been more different; their relationships with each other were complex, and often rife with animosity. And yet these three men led the charge--two of them creating and signing the Declaration of Independence, and the third establishing a national treasury and the earliest delineation of a Republican party. The time in which they lived was fraught with danger; the smell of liberty was in the air, though their excitement was strained by vast antagonisms that recall the intense political polarization of today. But through it all, they managed to shoulder the heavy mantle of creating the United States of America, putting aside their differences to make a great country, once and always. Drawing on extensive

correspondence, epic tales of war, and rich histories of their day-to-day interactions, best-selling author Winston Groom shares the remarkable story of the beginnings of our great nation.
