Chinese Law in Imperial Eyes

How did American schoolchildren, French philosophers, Russian Sinologists, Dutch merchants, and British lawyers imagine China and Chinese law? What happened when agents of presumably dominant Western empires had to endure the humiliations and anxieties of maintaining a profitable but precarious relationship with China? In *Chinese Law in Imperial Eyes*, Li Chen provides a richly textured analysis of these related issues and their intersection with law, culture, and politics in the eighteenth and nineteenth centuries. Using a wide array of sources, Chen's study focuses on the power dynamics of Sino-Western relations during the formative century before the First Opium War (1839-1842). He highlights the centrality of law to modern imperial ideology and politics and brings new insight to the origins of comparative Chinese law in the West, the First Opium War, and foreign extraterritoriality in China. The shifting balance of economic and political power formed and transformed knowledge of China and Chinese law in different contact zones. Chen argues that recovering the variegated and contradictory roles of Chinese law in Western "modernization" helps provincialize the subsequent Euro-Americentric discourse of global modernity. Chen draws attention to important yet underanalyzed sites in which imperial sovereignty, national identity, cultural tradition, or international law and order were defined and restructured. His valuable case studies show how constructed differences between societies were hardened into cultural or racial boundaries and then politicized to rationalize international conflicts and hierarchy.

The Chinese Typewriter

How Chinese characters triumphed over the QWERTY keyboard and laid the foundation for China's information technology successes today. Chinese writing is character based, the one major world script that is neither alphabetic nor syllabic. Through the years, the Chinese written language encountered presumed alphabetic universalism in the form of Morse Code, Braille, stenography, Linotype, punch cards, word processing, and other systems developed with the Latin alphabet in mind. This book is about those encounters—in particular thousands of Chinese characters versus the typewriter and its QWERTY keyboard. Thomas Mullaney describes a fascinating series of experiments, prototypes, failures, and successes in the century-long quest for a workable Chinese typewriter. The earliest Chinese typewriters, Mullaney tells us, were figments of popular imagination, sensational accounts of twelve-foot keyboards with 5,000 keys. One of the first Chinese typewriters actually constructed was invented by a Christian missionary, who organized characters by common usage (but promoted the less-common characters for “Jesus” to the common usage level). Later came typewriters manufactured for use in Chinese offices, and typewriting schools that turned out trained “typewriter girls” and “typewriter boys.” Still later was the “Double Pigeon” typewriter produced by the Shanghai Calculator and Typewriter Factory, the typewriter of choice under Mao. Clerks and secretaries in this era experimented with alternative ways of organizing characters on their tray beds, inventing an input method that was the first instance of “predictive text.” Today, after more than a century of resistance against the alphabetic, not only have Chinese characters prevailed, they form the linguistic substrate of the vibrant world of Chinese information technology. *The Chinese Typewriter*, not just an “object history” but grappling with broad questions of technological change and global communication, shows how this happened. Nation-Empire

By the end of World War II, hundreds of thousands of young men in the Japanese colonies, in particular Taiwan and Korea, had expressed their loyalty to the empire by volunteering to join the army. Why and how did so many colonial youth become passionate supporters of Japanese imperial nationalism? And what happened to these youth after the war? *Nation-Empire* investigates these questions by examining the long-term mobilization of youth in the rural peripheries of Japan, Taiwan, and Korea. Personal stories and village histories vividly show youth's ambitions, emotions, and identities generated in the shifting conditions in each locality. At the same time, Sayaka Chatani unveils an intense ideological mobilization built from diverse contexts—the global rise of youth and agrarian ideals, Japan's strong drive for assimilation and nationalization, and the complex emotions of younger generations in various remote villages. *Nation-Empire* engages with multiple historical debates. Chatani considers metropole-colony linkages, revealing the core characteristics of the Japanese Empire; discusses youth mobilization, analyzing the Japanese *seinendan* (village youth associations) as equivalent to the Boy Scouts or the Hitler Youth; and examines society and individual subjectivities under totalitarian rule. Her book highlights the shifting state-society transactions of the twentieth-century world through the lens of the Japanese Empire, inviting readers to contend with a new approach to, and a bold vision of, empire study.

The Age of Irreverence

The Age of Irreverence tells the story of why China's entry into the modern age was not just traumatic, but uproarious. As the Qing dynasty slumped toward extinction, prominent writers compiled jokes into collections they called “histories of laughter.” In the first years of the Republic, novelists, essayists and illustrators alike used humorous allegories to make veiled critiques of the new government. But, again and again, political and cultural discussion erupted into invective, as critics gleefully jeered and derided rivals in public. Farceurs drew followings in the popular press, promoting a culture of practical joking and buffoonery. Eventually, these various expressions of hilarity proved so offensive to high-brow writers that they launched a concerted campaign to transform the tone of public discourse, hoping to displace the old forms of mirth with a new one they called *yumo* (humor). Christopher Rea argues that this period—from the 1890s to the 1930s—transformed how Chinese people thought and talked about what is funny. Focusing on five cultural expressions of laughter—jokes, play, mockery, farce, and

humor—he reveals the textures of comedy that were a part of everyday life during modern China’s first Age of irreverence. This new history of laughter not only offers an unprecedented and up-close look at a neglected facet of Chinese cultural modernity, but also reveals its lasting legacy in the Chinese language of the comic today and its implications for our understanding of humor as a part of human culture.

Socialist Cosmopolitanism

Socialist Cosmopolitanism offers an innovative interpretation of literary works from the Mao era that reads Chinese socialist literature as world literature. As Nicolai Volland demonstrates, after 1949 China engaged with the world beyond its borders in a variety of ways and on many levels—politically, economically, and culturally. Far from rejecting the worldliness of earlier eras, the young People's Republic developed its own cosmopolitanism. Rather than a radical break with the past, Chinese socialist literature should be seen as an integral and important chapter in China's long search to find a place within world literature. Socialist Cosmopolitanism revisits a range of genres, from poetry and land reform novels to science fiction and children's literature, and shows how Chinese writers and readers alike saw their own literary production as part of a much larger literary universe. This literary space, reaching from Beijing to Berlin, from Prague to Pyongyang, from Warsaw to Moscow to Hanoi, allowed authors and texts to travel, reinventing the meaning of world literature. Chinese socialist literature was not driven solely by politics but by an ambitious—but ultimately doomed—attempt to redraw the literary world map.

The Battle for Fortune

Based on long-term fieldwork in a rural Tibetan region in China's northwest (2002-13), 'The Battle for Fortune' is an ethnography of state-local relations among Tibetans marginalized under China's Great Develop the West campaign and during the 2008 military crackdown on Tibetan unrest. The study brings anthropological approaches to states and development into dialogue with recent interdisciplinary debates about the very nature of human subjectivity and relations with nonhuman others (including deities).

Youth for Nation

This in-depth exploration of culture, media, and protest follows South Korea's transition from the Korean War to the start of the political struggles and socioeconomic transformations of the Park Chung Hee era. Although the post-Korean War years are commonly remembered as a time of crisis and disarray, Charles Kim contends that they also created a formative and productive juncture in which South Koreans reworked pre-1945 constructions of national identity to meet the political and cultural needs of postcolonial nation-building. He explores how state ideologues and mainstream intellectuals expanded their efforts by elevating the nation's youth as the core protagonist of a newly independent Korea. By designating students and young men and women as the hope and exemplars of the new nation-state, the discursive stage was set for the remarkable outburst of the April Revolution in 1960. Kim's interpretation of this seminal event underscores student participants' recasting of anticolonial resistance memories into South Korea's postcolonial politics. This pivotal innovation enabled protestors to circumvent the state's official anticommunism and, in doing so, brought about the formation of a culture of protest that lay at the heart of the country's democracy movement from the 1960s to the 1980s. The positioning of women as subordinates in the nation-building enterprise is also shown to be a direct translation of postwar and Cold War exigencies into the sphere of culture; this cultural conservatism went on to shape the terrain of gender relations in subsequent decades. A meticulously researched cultural history, *Youth for Nation* illuminates the historical significance of the postwar period through a rigorous analysis of magazines, films, textbooks, archival documents, and personal testimonies. In addition to scholars and students of twentieth-century Korea, the book will be welcomed by those interested in Cold War cultures, social movements, and democratization in East Asia.

Darwin, Dharma, and the Divine

Darwin, Dharma, and the Divine is the first book in English on the history of evolutionary theory in Japan. Bringing to life more than a century of ideas, G. Clinton Godart examines how and why Japanese intellectuals, religious thinkers of different faiths, philosophers, biologists, journalists, activists, and ideologues engaged with evolutionary theory and religion. How did Japanese religiously think about evolution? What were their main concerns? Did they reject evolution on religious grounds, or—as was more often the case—how did they combine evolutionary theory with their religious beliefs? Evolutionary theory was controversial and never passively accepted in Japan: It took a hundred years of appropriating, translating, thinking, and debating to reconsider the natural world and the relation between nature, science, and the sacred in light of evolutionary theory. Since its introduction in the nineteenth century, Japanese intellectuals—including Buddhist, Shinto, Confucian, and Christian thinkers—in their own ways and often with opposing agendas, struggled to formulate a meaningful worldview after Darwin. In the decades that followed, as the Japanese redefined their relation to nature and built a modern nation-state, the debates on evolutionary theory intensified and state ideologues grew increasingly hostile toward its principles. Throughout the religious reception of evolution was dominated by a long-held fear of the idea of nature and society as cold and materialist, governed by the mindless “struggle for survival.” This aversion endeavored many religious thinkers, philosophers, and biologists to find goodness and the divine within nature and evolution. It was this drive, argues Godart, that shaped much of Japan’s modern intellectual history and changed Japanese understandings of nature, society, and the sacred. *Darwin, Dharma, and the Divine* will contribute significantly to two of the most debated topics in the history of evolutionary theory: religion and the political legacy of evolution. It will, therefore, appeal to the broad audience interested in Darwin studies as well as students and scholars of Japanese intellectual history, religion, and philosophy.

Resurrecting Nagasaki

In *Resurrecting Nagasaki*, Chad R. Diehl explores the genesis of narratives surrounding the atomic bombing of August 9, 1945, by following the individuals and groups who contributed to the shaping of Nagasaki City's postwar identity. Municipal officials, survivor-activist groups, the Catholic community, and American occupation officials all interpreted the destruction and reconstruction of the city from different, sometimes disparate perspectives. Diehl's analysis reveals how these atomic narratives shaped both the way Nagasaki rebuilt and the ways in which popular discourse on the atomic bombings framed the city's experience for decades.

Engineering Asia

Weaving together chapters on imperial Japan's wartime mobilization, Asia's first wave of postwar decolonization, and Cold War geopolitical conflict in the region, *Engineering Asia* seeks to demonstrate how Asia's present prosperity did not arise from a so-called 'economic miracle' but from the violent and dynamic events of the 20th century. The book argues that what continued to operate throughout these tumultuous eras were engineering networks of technology. Constructed at first for colonial development under Japan, these networks transformed into channels of overseas development aid that constituted the Cold War system in Asia. Through highlighting how these networks helped shape Asia's contemporary economic landscape, *Engineering Asia* challenges dominant narratives in Western scholarship of an 'economic miracle' in Japan and South Korea, and the 'Asian Tigers' of Southeast Asia. Students and scholars of East Asian studies, development studies, postcolonialism, Cold War studies and the history of technology and science will find this book immensely useful.

China, State Sovereignty and International Legal Order

In *China, State Sovereignty and International Legal Order*, Phil C.W. Chan explores the nexus between China's exercise of State sovereignty and international legal order, and the locus in which State sovereignty resides in international law and foreign policy-making.

Japan's Occupation of Java in the Second World War

Japan's Occupation of Java in the Second World War draws upon written and oral Japanese, Indonesian, Dutch and English-language sources to narrate the Japanese occupation of Java as a transnational intersection between two complex Asian societies, placing this narrative in a larger wartime context of domestic, regional, and global crisis. Japan's occupation of Java is here revealed in a radically new and nuanced light, as an ambiguous encounter revolutionary in the degree of mutual interests that drew the two sides together, fascinating and tragic in its evolution, and profound in the

legacies left behind. Mark structures his study around a diverse group of Japanese and Indonesians captivated by the wartime vision of a 'Greater Asia.' The book is not only the first transnational study of Japan's wartime occupation of Java, but the first to focus on the Second World War experience in transnational terms 'on the ground' anywhere in Asia. Breaking new ground interpretatively, thematically and narratively, Mark's monumental study is of vital significance for students and scholars of modern Asian and global history. This book is published in partnership with Columbia University's Weatherhead East Asian Institute (<http://weai.columbia.edu/japans-occupation-of-java/>).

The End of Japanese Cinema

In *The End of Japanese Cinema* Alexander Zahlten moves film theory beyond the confines of film itself, attending to the emergence of new kinds of aesthetics, politics, temporalities, and understandings of film and media. He traces the evolution of a new media ecology through deep historical analyses of the Japanese film industry from the 1960s to the 2000s. Zahlten focuses on three popular industrial genres: Pink Film (independently distributed softcore pornographic films), Kadokawa (big-budget productions as part of a transmedia strategy), and V-Cinema (direct-to-video films). He examines the conditions of these films' production to demonstrate how the media industry itself becomes part of the politics of the media text and to highlight the complex negotiation between media and politics, culture, and identity in Japan. Zahlten points to a different history of film, one in which a once-powerful film industry transformed into becoming only one component within a complex media-mix ecology. In so doing, Zahlten opens new paths for uncovering similar broad processes in other large media societies. A Study of the Weatherhead East Asian Institute, Columbia University

Post-Fascist Japan

In late 1945 local Japanese turned their energies toward creating new behaviors and institutions that would give young people better skills to combat repression at home and coercion abroad. They rapidly transformed their political culture-policies, institutions, and public opinion-to create a more equitable, democratic and peaceful society. *Post-Fascist Japan* explores this phenomenon, focusing on a group of highly educated Japanese based in the city of Kamakura, where the new political culture was particularly visible. The book argues that these leftist elites, many of whom had been seen as 'the enemy' during the war, saw the problem as one of fascism, an ideology that had succeeded because it had addressed real problems. They turned their efforts to overtly political-legal systems but also to ostensibly non-political and community institutions such as universities, art museums, local tourism, and environmental policies, aiming not only for reconciliation over the past but also to reduce the anxieties that had drawn so many towards fascism. By focusing on people who had an outsized influence on Japan's political culture, Hein's study is local, national, and transnational. She grounds her discussion using specific personalities, showing their ideas about 'post-fascism', how they implemented them and how they interacted with the American occupiers.

China's Legal Reform

China's entry into the World Trade Organization (WTO) has had a tremendous impact on the development and reform of China's legal system. This book focuses on the developments of China's legal system as well as its reform in the context of globalization. It covers various topics, including constitutional changes, law-based administration, and more.

Chinese Perspectives on the International Rule of Law

This insightful book investigates the historical, political, and legal foundations of the Chinese perspectives on the rule of law and the international rule of law. Building upon an understanding of the rule of law as an 'essentially contested concept', this book analyses the interactions between the development of the rule of law within China and the Chinese contribution to the international rule of law, more particularly in the areas of global trade and security governance.

Modern Chinese Legal Reform

China's rapid socioeconomic transformation of the past twenty years has led to dramatic changes in its judicial system and legal practices. As China becomes more powerful on the world stage, the global community has dedicated more resources and attention to understanding the country's evolving democratization, and policymakers have identified the development of civil liberties and long-term legal

reforms as crucial for the nation's acceptance as a global partner. Modern Chinese Legal Reform is designed as a legal and political research tool to help English-speaking scholars interpret the many recent changes to China's legal system. Investigating subjects such as constitutional history, the intersection of politics and law, democratization, civil legal practices, and judicial mechanisms, the essays in this volume situate current constitutional debates in the context of both the country's ideology and traditions and the wider global community. Editors Xiaobing Li and Qiang Fang bring together scholars from multiple disciplines to provide a comprehensive and balanced look at a difficult subject. Featuring newly available official sources and interviews with Chinese administrators, judges, law-enforcement officers, and legal experts, this essential resource enables readers to view key events through the eyes of individuals who are intimately acquainted with the challenges and successes of the past twenty years.

Sovereign Power and the Law in China

This volume analyses under-researched institutions and practices in China's criminal justice system, arguing that derogations from the rule of law constitute an organic component of the legal order.

China's Human Rights Lawyers

This book offers a unique insight into the role of human rights lawyers in Chinese law and politics. In her extensive account, Eva Pils shows how these practitioners are important as legal advocates for victims of injustice and how bureaucratic systems of control operate to subdue and marginalise them. The book also discusses how human rights lawyers and the social forces they work for and with challenge the system. In conditions where organised political opposition is prohibited, rights lawyers have begun to articulate and coordinate demands for legal and political change. Drawing on hundreds of anonymised conversations, the book analyses in detail human rights lawyers' legal advocacy in the face of severe institutional limitations and their experiences of repression at the hands of the police and state security apparatus, along with the intellectual, political and moral resources lawyers draw upon to survive and resist. Key concerns include the interaction between the lawyers and their bureaucratic, professional and social environments and the forms and long term political impact of resistance. In addressing these issues, Pils offers a rare evaluative perspective on China's legal and political system, and proposes new ways to assess domestic advocacy's relationship with international human rights and rule of law promotion. This book will be of great interest and use to students and scholars of law, Chinese studies, socio-legal studies, political studies, international relations, and sociology. It is also of direct value to people working in the fields of human rights advocacy, law, politics, international relations, and journalism.

Making Law Work

The Politics of Law and Stability in China examines the nexus between social stability and the law in contemporary China. It explores the impact of Chinese Communist Party's (CCP) rationales for social stability on legal reforms, criminal justice opera

The Politics of Law and Stability in China

This book provides a comprehensive history of the emergence and the formation of the concept of sovereignty in China from the year 1840 to the present. It contributes to broadening the history of modern China by looking at the way the notion of sovereignty was gradually articulated by key Chinese intellectuals, diplomats and political figures in the unfolding of the history of international law in China, rehabilitates Chinese agency, and shows how China challenged Western Eurocentric assumptions about the progress of international law. It puts the history of international law in a global perspective, interrogating the widely-held belief of international law as universal order and exploring the ways in which its history is closely anchored to a European experience that fails to take into account how the encounter with other non-European realities has influenced its formation.

Sovereignty in China

This book provides insights into the history, development, and practice of restorative justice methods in China. Traditionally in China, mediation has played an important role in criminal proceedings, which has many characteristics in common with the "Western" concept of restorative justice. Through case studies and theoretical examination, the author of this timely work aims to bridge the research on

restorative justice models mainly developed in the West with restorative justice as practiced in China. After a Brief overview and introduction, the author compares and contrasts case studies of restorative justice-like practices from different districts in China. The author examines cases studies from several regions within China, and explores the key question: can the restoration model developed in the West take root in China, and if so what legal, cultural and societal accommodations may need to be made? This work will be of interest to researchers in Criminology and Criminal Justice, particularly with an interest in alternative justice practices, restorative justice, and international comparative criminology; as well as researchers interested in Chinese affairs or Asian Studies.

The International Legal Status of the Republic of China

This volume analyzes whether China's thirty years of legal reform have taken root in Chinese society by examining how ordinary citizens are using the legal system in contemporary China. It is an interdisciplinary look at law in action and at legal institutions from the bottom up, that is, beginning with those at the ground level that are using and working in the legal system. It explores the emergent Chinese conception of justice - one that seeks to balance Chinese tradition, socialist legacies, and the needs of the global market. Given the political dimension of dispute resolution in creating, settling, and changing social norms, this volume contributes to a greater understanding of political and social change in China today and of the process of legal reform generally.

Restorative Justice in China

Presents new insights into recent changes in China's legal framework in areas crucial to the modernisation process. Topics include law reform to accommodate foreign interests and convert China to a market economy, the judicial system and its treatment of human rights issues, the introduction of non-tariff barriers for foreign companies, and the current privatisation process.

Human Rights in Contemporary China

In *The Limits of the Rule of Law in China*, fourteen authors from different academic disciplines reflect on questions that have troubled Chinese and Western scholars of jurisprudence since classical times. Using data from the early 19th century through the contemporary period, they analyze how tension between formal laws and discretionary judgment is discussed and manifested in the Chinese context. The contributions cover a wide range of topics, from interpreting the rationale for and legacy of Qing practices of collective punishment, confession at trial, and bureaucratic supervision to assessing the political and cultural forces that continue to limit the authority of formal legal institutions in the People's Republic of China.

Justice

This collection of essays focuses on law and the diaspora Chinese. They show us a variety of answers to such questions as: what are the laws of China outside China; what are the laws of the Chinese in Southeast Asia; what were/are the laws for the Chinese in Southeast Asia; and is there a "Confucian Chinese"? The answers in some cases are reasonably certain but in others they are tentative and debatable. The legal material raises these issues in a way which is fundamental to diaspora studies....

Chinese Law and Justice

The culmination of twenty years of research, this essential book completes distinguished historian Philip C. C. Huang's pathbreaking trilogy on Chinese law and society from late imperial times to the present. The author argues that, despite formal adherence to Western law and legal theory, traditional Chinese judicial practices continue to flourish. Huang draws on a rich array of court records and field interviews to illustrate the surprising strength of traditional Chinese civil justice, as can be seen in

societal and cadres mediation, and in court actions with respect to property rights, inheritance and old-age maintenance, and debts. Maoist justice too remains influential, especially its divorce and court mediation practices. Finally, despite the recent massive adoption of Western laws, legal reasoning employed in judicial practice has shown stunning continuity, with major implications for China's future.

Chinese Civil Justice, Past and Present

Traditionally, social theorists in the West have structured models of state social control according to the tenet that socialization is accomplished by means of external controls on behavior: undesirable actions are punished and desirable actions result either in material reward or a simple respite from the oppressive attentions of an authoritarian state. In this volume, the author presents the tradition of law in China as an exception to the Western model of social control. The Confucian bureaucracy that has long structured Chinese social life melded almost seamlessly with the Maoist revolutionary agenda to produce a culture in which collectivism and an internalized adherence to social law are, in some respects, congenital features of Chinese social consciousness. Through her investigation of the Maoist concept of revolutionary justice and the tradition of conformist acculturation in China, the author constructs a fascinating counterpoint to traditional Western arguments about social control.

Chinese Law, Past and Present

"Citizen rights defence campaigns reflect the changing lives and priorities of Chinese citizens, both urban and rural. The term *weiquan*, or rights defence, was first coined by the Chinese party-state as part of a process of promotion of various laws, and was thus used by government-affiliated organisations to promote the rights of women, children, and consumers, and to develop citizens' legal awareness. Subsequently, first private citizens, then groups of citizens, then lawyers, appropriated the term as a means of dispute resolution in areas such as private property rights, rights for the handicapped, corruption claims and grievances with officials. Rights defence is important not just because of the political ramifications of its campaigns, but also because of the strategies its activists have used. Rights defence campaigns have taken novel forms unprecedented in China, including the use of the Internet by rights campaigners, the development of rights entrepreneur (or people who have set up businesses linked to rights defence), and the selection of representatives and leaders in rights defence campaigns. In recent years, the idea of rights defence has become used as a tool to attack the party-state, specifically by lawyers and legal campaigners. The growth of rights defence movements reflects the increasing capacity of Chinese citizens to shape their own civic discourse to achieve diverse goals. While rights defence may not pose an immediate threat to the authority of the party-state, it is nonetheless an important symbol of a developing social pluralism in China. This book offers essential insight into the development of rights in contemporary China and will be highly relevant for students, scholars and specialists in legal developments in Asia as well as anyone interested in social movements in China"--

Transformations of the Inner Self in Ancient Religions

Pharaoh Akhenaten, who reigned for seventeen years in the fourteenth century B.C.E, is one of the most intriguing rulers of ancient Egypt. His odd appearance and his preoccupation with worshipping the sun disc Aten have stimulated academic discussion and controversy for more than a century. Despite the numerous books and articles about this enigmatic figure, many questions about Akhenaten and the Atenism religion remain unanswered. In *Akhenaten and the Origins of Monotheism*, James K. Hoffmeier argues that Akhenaten was not, as is often said, a radical advocating a new religion, but rather a primitivist: that is, one who reaches back to a golden age and emulates it. Akhenaten's inspiration was the Old Kingdom (2650-2400 B.C.E.), when the sun-god Re/Atum ruled as the unrivaled head of the Egyptian pantheon. Hoffmeier finds that Akhenaten was a genuine convert to the worship of Aten, the sole creator God, based on the Pharaoh's own testimony of a theophany, a divine encounter that launched his monotheistic religious odyssey. The book also explores the Atenist religion's possible relationship to Israel's religion, offering a close comparison of the hymn to the Aten to Psalm 104, which has been identified by scholars as influenced by the Egyptian hymn. Through a careful reading of key texts, artworks, and archaeological studies, Hoffmeier provides compelling new insights into a religion that predated Moses and Hebrew monotheism, the impact of Atenism on Egyptian religion and politics, and the aftermath of Akhenaten's reign.

The move to a new capital, Akhenaten/Amarna, brought essential changes in the depictions of royal women. The second edition of the Historical Dictionary of Ancient Egypt expands upon the information presented in the first with a chronology, an introductory essay, appendixes, a bibliography, and hundreds of cross-referenced dictionary entries on Egyptian rulers, bureaucrats, and commoners whose records have survived, as well as ancient society, religion, and gods.

Legends of the Egyptian Gods, written in 1912, is a book meant to help Egyptology students examine Egyptian literature and its history. However, since the backgrounds and names of Egyptian authors were not recorded, Budge instead presents the texts in the most complete forms possible, with the original hieroglyphs and their translations. Legends of the Egyptian Gods includes a preface and an introduction by Budge, as well as summaries of each myth at the beginning of the book. The summaries, presented in one large block, are followed by the text and translations of nine Egyptian myths and legends. The book contains illustrations and plates complementing the stories. This book is a wonderful addition to the collection of any student of Egyptology. SIR ERNEST ALFRED THOMPSON WALLIS BUDGE (1857-1934) was born in Bodmin, Cornwall in the UK and discovered an interest in languages at a very early age. Budge spent all his free time learning and discovering Semitic languages, including Assyrian, Syriac, and Hebrew. Eventually, through a close contact, he was able to acquire a job working with Egyptian and Iraqi artifacts at the British Museum. Budge excavated and deciphered numerous cuneiform and hieroglyphic documents, contributing vastly to the museum's collection. Eventually, he became the Keeper of his department, specializing in Egyptology. Budge wrote many books during his lifetime, most specializing in Egyptian life, religion, and language.

This volume tells the story of the Rosetta Stone, starting from its discovery during a French military excavation to its preservation in the British Museum as one of the great cornerstones of linguistic studies. The book contains a full and detailed explanation of the meticulous scholarship and inspired impulse that allowed a handful of scholars to decrypt the age-old code. With over 20 photographs, The Rosetta Stone is immensely academic but unstuffy; packed with linguistic details but clear and attainable to the layman; in short, it will fascinate any student of Egyptology, languages, or the history of the ancient Near East. Egyptologists' ground-breaking contributions and the work of linguists over the years eventually led to a true knowledge of the once enigmatic symbols. The book covers the history and meaning of the Rosetta Stone from an academic and also analytical point of view.

The Rosetta Stone

Reproduction of the original: Egyptian Ideas of the Future Life by E. A. Wallis Budge

The Nile

A generously illustrated collection of John Baines's influential writings on the role of writing and the importance of visual culture in ancient Egypt. Investigation of these key topics in a comparative study of early civilizations is pursued through a number of case studies, and characterized by a radically interdisciplinary approach.

The Sarcophagus of nchnesr nefer'b, Queen of &%mes II, King of Egypt

Sir E. A. Wallis Budge (1857-1934) was Keeper of the British Museum's department of oriental antiquities from 1894 until his retirement in 1924. Carrying out many missions to Egypt in search of ancient objects, Budge was hugely successful in collecting papyri, statues and other artefacts for the trustees of the British Museum: numbering into the thousands and of great cultural and historical significance. Budge published well over 100 monographs, which shaped the development of future scholarship and are still of great academic value today, dealing with subjects such as Egyptian religion, history and literature. This volume, first published in 1902, is the fifth of eight volumes by Budge dealing with different periods in the history of Egypt. The narrative begins with the reign of Rameses I, the first king of the XIXth Dynasty, and ends with the rule of Rameses XII. It covers the principal events which took place between the years 1400 and 1130 B.C., including the Hebrew exodus. Budge explores this rich and important period of Egyptian history in a classic work of great value to those interested in Egyptology and archaeology.

Egyptian Ideas of the Future Life

Development of Religion and Thought in Ancient Egypt traces Ancient Egyptian religion and thought from the beginning of the dynasties with Menes at about 3400 B.C. through the Roman conquest of Egypt in 30 B.C. Author James Breasted uses ancient texts, such as The Book of the Dead and the Pyramid texts, to trace the history of Egyptian religion, as well as the effects of other cultures on the Egyptians. The chapters, or lectures, are separated into both periods religious thought and by century. This literary and historical analysis is essential for any Egyptology student or enthusiast. JAMES HENRY BREASTED (1865-1935) was an American historian and archaeologist, as well as the first American to receive a Ph.D. in Egyptology. Breasted studied at North-Central College, Chicago Theological Seminary, Yale University, and the University of Berlin. Breasted is most well-known for his coinage of the term "fertile crescent" to describe the region in western Asia that is considered the cradle of civilization. He was also a teacher at the University of Chicago, served as the Director of the Haskell Oriental Museum, helped found the Oriental Institute, boosted the collections of several museums, and wrote several books on ancient Near East civilizations.

Visual and Written Culture in Ancient Egypt

This highly illustrated 1906 work presents a history of Egypt from earliest times to the Persian conquest in 525 BCE.

The role of representation in religion is complex. While often perceived as essential, it is also associated in many traditions with the liability of idolatry and provokes iconoclasm. The essays in this volume examine the nuances of representation in religion and the debate concerning its place across a variety of traditions from the three Abrahamic faiths, to those of antiquity and the East. This volume consists of presentations made at an international conference held in honor of Moshe Barasch, art historian and cultural critic, who has done much to elucidate the light which representation and religion shed on each other. It pays tribute to Barasch by expanding the base of understanding and insight he has erected. It should be of interest to students of religion and of art history.

Amulets were first made in Egypt as early as 4000 BC and became essential adornments for both the living and the dead. They were believed to endow the wearer, by magical means, with the properties they represent. An amuletic foot, for example, could be worn to ensure fleetness of foot; while the

scarab beetle represented the new-born sun, and was the symbol of new life. Amulets in the image of powerful gods would be worn for protection; and malevolent creatures - like the male hippopotamus - would be worn to ward off the evil they represented.

Man and His Double in Egyptian Ideology of the Old Kingdom

This volume represents a collection of contributions presented during the Third Annual University of Chicago Oriental Institute Seminar Religion and Power: Divine Kingship in the Ancient World and Beyond, held at the Oriental Institute, February 23-24, 2007. The purpose of this conference was to examine more closely concepts of kingship in various regions of the world and in different time periods. The study of kingship goes back to the roots of fields such as anthropology and religious studies, as well as Assyriology and Near Eastern archaeology. More recently, several conferences have been held on kingship, drawing on cross-cultural comparisons. Yet the question of the divinity of the king as god has never before been examined within the framework of a cross-cultural and multi-disciplinary conference. Some of the recent anthropological literature on kingship relegates this question of kings who deified themselves to the background or voices serious misgivings about the usefulness of the distinction between divine and sacred kings. Several contributors to this volume have pointed out the Western, Judeo-Christian background of our categories of the human and the divine. However, rather than abandoning the term divine kingship because of its loaded history it is more productive to examine the concept of divine kingship more closely from a new perspective in order to modify our understanding of this term and the phenomena associated with it.

A History of Egypt

When we consider the Cretans and Hittites, the powers of Babylonia and Assyria, and the internal conditions in Syria and Palestine, it can hardly be doubted that the reign of Akhetaten marks a turning point, notably in Egyptian history, but also in the wider history of the ancient world. Here the author vigorously reproduces this age, to show the intensely human interest that lies in the story of religion and art of decadence and reform.

Amulets of Ancient Egypt

A selection of 24 papers by Kate Bosse-Griffiths (1910-1998), curator of the large Egyptian collection in Swansea University's Wellcome Museum. First published between 1955 and 1996, the papers are divided into two sections: material relating to Amarna and material from other eras. The varied contents include discussions of objects and artworks in the Wellcome Museum, including the Shrine of Tiye', beads, stelae, amulets, and a prehistoric stone figure, as well as reviews and more general discussions of Egyptian artwork.

The sixteenth Current Research in Egyptology (CRE) conference was held from the 15–18 April 2015 at the University of Oxford and once again provided a platform for postgraduates and early career Egyptologists, as well as independent researchers, to present their research. These proceedings for CREXVI represent the wide-range of themes that were offered by delegates during the conference. Papers focus on the theme of travel in ancient Egypt from a wide range of perspectives such as concrete or abstract travels, travel in space and time, travel inside, to, or from Egypt, travel in literature, travel of beliefs and ideas or travel of objects.

A Case for Pictures of Christ How We See Moses and Steven Uses Moses as an Example Moses Went to the People of Israel the First Time and They Rejected Him Then He Came to Them a Second Time and They Received Him and He Gives a List of Other People Who the First Time They Came They Were Rejected by the People and the Second Time They Were Received and He Says Don't You Know You've Rejected the Messiah Just like He Rejected All those Guys and He's Drawing Parallels between Their Lives and the Life of Messiah I Would Go So Far as To Say that Was the Point of Their Life Was the Life of Jesus that the Goal the Target the Rest of the Stuff Was Made To Happen so that It Might Reflect Christ in Acts Chapter 8

3 Look at the Description of How When They're Reading the Old Testament They Don't See Jesus There's a Veil but When They Read the Old Testament They Do See Jesus the Veil Is Removed that's the Context So 2nd Corinthians Chapter 3 Well Starting in Verse 12 since We Have Such a Hope We Are Very Bold Not like Moses Who Would Put a Veil over His Face so that the Israelites Might Not
