Colonial Plantations and Economy in Florida

"Life in Florida 200 years before the Epcot Center was a complex and painful story of speculation and exploitation, of high hopes and bitter realities. This very southern story has remained unknown to most Americans for too long. Now a diligent group of Florida historians is mining late 18th-century sources to uncover a forgotten world of English and Spanish, Minorcans and Greeks, Ibos and Fulani, Creeks and Seminoles. This timely volume brings together some of their best and most recent work, offering a varied, coherent, and detailed introduction to the work-in-progress that is early Florida history during the crucial period long after De León and De Soto and shortly before Jackson and Osceola."--Peter H. Wood, Duke University This illustrated collection documents the rich history of Florida's earliest indigo, rice, and cotton plantations, cattle ranches, timbering operations, and Atlantic commercial networks. Based on primary research in archives in England, Scotland, Spain, Cuba, Minorca, and Florida as well as upon archaeological investigations, the essays trace for the first time the relationship of Florida to both the Caribbean and the Atlantic economies and document Florida's national and international significance in the colonial period. Plantation Enterprise in Colonial South Carolina

This impressive scholarly debut deftly reinterprets one of America's oldest symbols--the southern slave plantation. S. Max Edelson examines the relationships between planters, slaves, and the natural world they colonized to create the Carolina Lowcountry. European settlers came to South Carolina in 1670 determined to possess an abundant wilderness. Over the course of a century, they settled highly adaptive rice and indigo plantations across a vast coastal plain. Forcing slaves to turn swampy wastelands into productive fields and to channel surging waters into elaborate irrigation systems, planters initiated a stunning economic transformation. The result, Edelson reveals, was two interdependent plantation worlds. A rough rice frontier became a place of unrelenting field labor. With the profits, planters made Charleston and its hinterland into a refined, diversified place to live. From urban townhouses and rural retreats, they ran multiple-plantation enterprises, looking to England for affirmation as agriculturists, gentlemen, and stakeholders in Britain's American empire. Offering a new vision of the Old South that was far from static, Edelson reveals the plantations of early South Carolina to have been dynamic instruments behind an expansive process of colonization. With a bold interdisciplinary approach, *Plantation Enterprise* reconstructs the environmental, economic, and cultural changes that made the Carolina Lowcountry one of the most prosperous and repressive regions in the Atlantic world.

Borderlines in Borderlands

In examining how the United States gained control over the northern borderlands of Spanish America, this text reassesses the diplomacy of President James Madison. The author also describes how a myriad cast of local leaders, officials and other small players affected the borderlands diplomacy between the United States and Spain.

Plantation Economy

What is Plantation Economy An economy that is focused on agricultural mass production, typically of a small number of commodity crops, is known as a plantation economy. This type of economy is founded on enormous farms that are cultivated by laborers or slaves. Plantations are the names given to these properties. As a means of generating revenue, plantation economies are typically dependent on the export of cash crops. Cotton, rubber, sugar cane, tobacco, figs, rice, kapok, sisal, and species in the family Indigofera, which are used to manufacture indigo dye, were among the most important crops. On the Rim of the Caribbean

DIVHow did colonial Georgia, an economic backwater in its early days, make its way into the burgeoning Caribbean and Atlantic economies where trade spilled over national boundaries, merchants operated in multiple markets, and the transport of enslaved Africans bound together four continents? In *On the Rim of the Caribbean*, Paul M. Pressly interprets Georgia's place in the Atlantic world in light of recent work in transnational and economic history. He considers how a tiny elite of newly arrived merchants, adapting to local culture but loyal to a larger vision of the British empire, led the colony into overseas trade. From this perspective, Pressly examines the ways in which Georgia came to share many of the characteristics of the sugar islands, how Savannah developed as a "Caribbean" town, the dynamics of an emerging slave market, and the role of merchant-planters as leaders in forging a highly adaptive economic culture open to innovation. The colony's rapid growth holds a larger story: how a frontier where Carolinians played so large a role earned its own distinctive character. Georgia's slowness in responding to the revolutionary movement, Pressly maintains, had a larger context. During the colonial era, the lowcountry remained oriented to the West Indies and Atlantic and failed to develop close ties

to the North American mainland as had South Carolina. He suggests that the American Revolution initiated the process of bringing the lowcountry into the orbit of the mainland, a process that would extend well beyond the Revolution./div

The Economy of Early America

In recent years, scholars in a number of disciplines have focused their attention on understanding the early American economy. The result has been an outpouring of scholarship, some of it dramatically revising older methodologies and findings, and some of it charting entirely new territory&—new subjects, new places, and new arenas of study that might not have been considered &“economic&” in the past. The Economy of Early America enters this resurgent discussion of the early American economy by showcasing the work of leading scholars who represent a spectrum of historiographical and methodological viewpoints. Contributors include David Hancock, Russell Menard, Lorena Walsh, Christopher Tomlins, David Waldstreicher, Terry Bouton, Brooke Hunter, Daniel Dupre, John Majewski, Donna Rilling, and Seth Rockman, as well as Cathy Matson.

The Plantation

The great majority of the South's plantation homes have been destroyed over time, and many have long been forgotten. In *Lost Plantations of the South*, Marc R. Matrana weaves together photographs, diaries and letters, architectural renderings, and other rare documents to tell the story of sixty of these vanquished estates and the people who once called them home. From plantations that were destroyed by natural disaster such as Alabama's Forks of Cypress, to those that were intentionally demolished such as Seven Oaks in Louisiana and Mount Brilliant in Kentucky, Matrana resurrects these lost mansions. Including plantations throughout the South as well as border states, Matrana carefully tracks the histories of each from the earliest days of construction to the often-contentious struggles to preserve these irreplaceable historic treasures. *Lost Plantations of the South* explores the root causes of demise and provides understanding and insight on how lessons learned in these sad losses can help prevent future preservation crises. Capturing the voices of masters and mistresses alongside those of slaves, and featuring more than one hundred elegant archival illustrations, this book explores the powerful and complex histories of these cardinal homes across the South.

Lost Plantations of the South

Sailing the tide of a tumultuous era of Atlantic revolutions, a remarkable group of African-born and African-descended individuals transformed themselves from slaves into active agents of their lives and times. Big Prince Whitten, the black Seminole Abraham, and General Georges Biassou were “Atlantic creoles,” Africans who found their way to freedom by actively engaging in the most important political events of their day. These men and women of diverse ethnic backgrounds, who were fluent in multiple languages and familiar with African, American, and European cultures, migrated across the new world’s imperial boundaries in search of freedom and a safe haven. Yet, until now, their extraordinary lives and exploits have been hidden from posterity. Through prodigious archival research, Jane Landers radically alters our vision of the breadth and extent of the Age of Revolution, and our understanding of its actors. Whereas Africans in the Atlantic world are traditionally seen as destined for the slave market and plantation labor, Landers reconstructs the lives of unique individuals who managed to move purposefully through French, Spanish, and English colonies, and through Indian territory, in the unstable century between 1750 and 1850. Mobile and adaptive, they shifted allegiances and identities depending on which political leader or program offered the greatest possibility for freedom. Whether fighting for the King of Kongo, England, France, or Spain, or for the Muskogee and Seminole chiefs, their thirst for freedom helped to shape the course of the Atlantic revolutions and to enrich the history of revolutionary lives in all times.

Money, Trade, and Power

Popularly known as “Black Seminoles,” descendants of the Seminole freedmen of Indian Territory are a unique American cultural group. Now Kevin Mulroy examines the long history of these people to show that this label denies them their rightful distinctiveness. To correct misconceptions of the historical relationship between Africans and Seminole Indians, he traces the emergence of Seminole-black identity and community from their eighteenth-century Florida origins to the present day. Arguing that the Seminole freedmen are neither Seminoles, Africans, nor “black Indians,” Mulroy proposes that they are maroon descendants who inhabit their own racial and cultural category, which he calls “Seminole maroon.” Mulroy plumbs the historical record to show clearly that, although allied with the Seminoles, these maroons formed independent and autonomous communities that dealt with European American society differently than either Indians or African Americans did. Mulroy describes the freedmen’s experiences as runaways from southern plantations, slaves of American Indians, participants in the Seminole Wars, and emigrants to the West. He then recounts their history during the Civil War, Reconstruction, enrollment and allotment under the Dawes Act, and early Oklahoma statehood. He also considers freedmen relations with Seminoles in Oklahoma during the twentieth and early twenty-first centuries. Although freedmen and Seminoles enjoy a partially shared past, this book shows that the freedmen’s history and culture are unique and entirely their own.

Atlantic Creoles in the Age of Revolutions

Uses the collective testimony from more than two hundred Patriot War claims, previously believed to have been destroyed, to offer insight into the lesser-known Patriot War of 1812 and to constitute an intellectual history of everyday people caught in the path of an expanding American empire. In the late seventeenth century a group of about a dozen escaped African slaves from the English colony of Carolina reached the Spanish settlement of St. Augustine. In a diplomatic bid for sanctuary, to avoid extradition and punishment, they requested the sacrament of Catholic baptism from the Spanish Catholic Church. Their negotiations brought about their baptism and with it their liberation. The Cana Sanctuary focuses on what author Frank Marotti terms “folk diplomacy”—political actions conducted by marginalized, non-state sectors of society—in this instance by formerly enslaved African Americans in antebellum East Florida. The book explores the unexpected transformations that occurred in seventeenth- and eighteenth-century St. Augustine as more and more ex-slaves arrived to find their previously disregarded civil rights upheld under sacred codes by an international, nongovernmental, authoritative organization. With the Catholic Church acting as an equalizing, empowering force for escaped African slaves, the Spanish religious sanctuary policy became part of popular historical consciousness in East Florida. As such, it allowed for continual confrontations between the law of the Church and the law of the South. Tensions like these survived, ultimately lending themselves to an “Afro-Catholicism” sentiment that offered support for antislavery arguments.

The World of Colonial America: An Atlantic Handbook offers a comprehensive and in-depth survey of cutting-edge research into the communities, cultures, and colonies that comprised colonial America, with a focus on the processes through which communities were created, destroyed, and recreated that were at the heart of the Atlantic experience. With contributions written by leading scholars from a variety of viewpoints, the book explores key topics such as -- The Spanish, French, and Dutch Atlantic empires -- The role of the indigenous people, as imperial allies, trade partners, and opponents of expansion -- Puritanism, Protestantism, Catholicism, and the role of religion in colonization -- The importance of slavery in the development of the colonial economies -- The evolution of core areas, and their relationship to frontier zones -- The emergence of the English imperial state as a hegemonic world power after 1688 -- Regional developments in colonial North America. Bringing together leading scholars in the field to explain the latest research on Colonial America and its place in the Atlantic World, this is an important reference for all advanced students, researchers, and professionals working in the field of early American history or the age of empires.

The Cana Sanctuary

This book deals with one of the most pervasive ways by which people have addressed authority throughout history: petitioning. The book explores traditional practices and institutions, as well as the transformation of petitions as vehicles of popular politics. The ability or the right to petition was also a crucial element for the development and operation of early modern empires, playing a major role on the negotiated patterns of the Atlantic World. This book shows how petitions were used in Europe, America and Africa, by the governors and the governed, by the rich and the poor, by the colonists and the colonised and by the liberal and the reactionary groups. Broken down into three thematic parts, encompassing both in chronological and geographical scope, the book deepens our understanding of petitioning and its relation with ideas of consent and subjecthood, nationality and citizenship, political participation and democracy. This book provides a rare comparative platform for the study of a subject that has been receiving growing interest.

The World of Colonial America

From the eighteenth century to the eve of the Civil War, Georgia's racial order shifted from the somewhat fluid conception of race prevalent in the colonial era to the harsher understanding of racial difference prevalent in the antebellum era. In *Cultivating Race: The Expansion of Slavery in Georgia, 1750--1860*, Watson W. Jennison explores the centrality of race in the development of Georgia, arguing that long-term structural and demographic changes account for this transformation. Jennison traces the rise of rice cultivation and the plantation complex in low country Georgia in the mid-eighteenth century and charts the spread of slavery into the up country in the decades that followed. *Cultivating Race* examines the "cultivation" of race on two levels: race as a concept and reality that was created, and race as a distinct social order that emerged because of the specifics of crop cultivation. Using a variety of primary documents including newspapers, diaries, correspondence, and plantation records, Jennison offers an in-depth examination of the evolution of racism and racial ideology in the lower South.

The Plantation Machine

In *Liquid Landscape*, Michele Currie Navakas analyzes the history of Florida's incorporation alongside the development of new ideas of personhood, possession, and political identity within American letters, from early American novels, travel accounts, and geography textbooks, to settlers' guides, maps, natural histories, and land surveys.

Look Away!

The years between 1450 and 1550 marked the end of one era in world history and the beginning of another. Most importantly, the focus of global commerce and power shifted from the Mediterranean Sea to the Atlantic Ocean, largely because of the discovery of the New World. The New World was more than a geographic novelty. It opened the way for new human possibilities, possibilities that were first fulfilled by the British colonies of North America, nearly 100 years after Columbus landed in the Bahamas. The *Historical Dictionary of Colonial America* covers America's history from the first settlements to the end and immediate aftermath of the French and Indian War. This is done through a chronology, an introductory essay, appendixes, an extensive bibliography, and over 400 cross-referenced dictionary entries on the various colonies, which were founded and how they became those which declared independence. Religious, political, economic, and family life; important people; warfare; and relations between British, French, Spanish, and Dutch colonies are also among the topics covered. This book is an excellent access point for students, researchers, and anyone wanting to know more about Colonial America.

Liquid Landscape

Northeast Florida, the people who settled here and the towns they built, played a significant role in the development of the "Sunshine State." During the eighteenth and nineteenth centuries many hundreds of plantations were established by settlers along the waterways of Northeast Florida. This book describes some of the early plantation history of this area. Through over 350 alphabetical entries, and 328 photographs and illustrations, *Historic Plantations Of Northeast Florida* portrays the important plantation sites and activities. It offers a glimpse at some of the events that played a role in colonial plantation life, from the government changes to Indian wars. In these pages you will read about interesting plantation owners like Joseph M. Hernandez and Zephaniah Kingsley, historic Sugar Mills at the Bulow and Dunlawton Plantations, the tragedy of the Seminole wars, and the horror of plantation slave life.

Moses Elias Levy (1782–1854) was one of the antebellum South's most influential and interesting Jewish citizens. Only recently, however, have historians begun to appreciate his role as a social activist. C. S. Monaco discovered Levy's Plan for the Abolition of Slavery in the late 1990s, and now, in the first full-scale biography of Levy, Monaco completes the picture of his life and work. Long known only as the father of David L. Yulee, the first Jew elected to the U.S. Senate, Levy appears here in all his many, sometimes contradictory roles: abolitionist and slave owner, utopian colonizer and former arms-dealer, religious reformer and biblical conservative. Each aspect of Levy's life and character comes into sharp relief as Monaco follows him from his affluent upbringing in a Sephardic Jewish household in Morocco—where his father was a courtier to the sultan—through his career as a successful merchant shipper, to his radical reform activities in Florida. With his many residences abroad—in Morocco, Gibraltar, Danish Virgin Islands, Puerto Rico, Cuba, Curacao, England—Levy virtually epitomized the Atlantic world, and Monaco escorts readers from country to country, considering Levy's accomplishments in each. The sole Jewish voice during the British abolitionist crusade, Levy was so extraordinary in his activism in London that some Protestants believed he heralded the millennium. In his search for equilibrium between Enlightenment thinking and pre-modern religion, Levy founded the United

States' first Jewish communitarian settlement in the wilds of the East Florida frontier. As one of the region's largest landowners, he also reintroduced sugarcane as a viable crop, organized the first Florida development corporation, helped establish the earliest free public school, and served as the territory's first education commissioner. In *Moses Levy of Florida*, C. S. Monaco offers a radical reappraisal of this complex and formerly underestimated figure, bringing to light for the first time the full and fascinating extent of his remarkable contributions to nineteenth-century America.

Historic Plantations of Northeast Florida

In *The American South: A History*, Fourth Edition, William J. Cooper, Jr. and Thomas E. Terrill demonstrate their belief that it is impossible to divorce the history of the South from the history of the United States. The authors' analysis underscores the complex interaction between the South as a distinct region and the South as an inescapable part of America. Cooper and Terrill show how the resulting tension has often propelled section and nation toward collision. In supporting their thesis, the authors draw on the tremendous amount of profoundly new scholarship in Southern history. Each volume includes a substantial biographical essay—completely updated for this edition—which provides the reader with a guide to literature on the history of the South. Coverage now includes the devastation of Hurricane Katrina in 2005, up-to-date analysis of the persistent racial divisions in the region, and the South's unanticipated role in the 2008 presidential primaries.

Moses Levy of Florida

The Second Seminole War (1835–1842) was the last major conflict fought on American soil before the Civil War. The early battlefield success of the Seminoles unnerved US generals, who worried it would spark a rebellion among Indians newly displaced by President Andrew Jackson's removal policies. The presence of black warriors among the Seminoles also agitated southerners wary of slave revolt. A lack of decisive victories and a series of bad decisions—among them the capture of Seminole leader Osceola while under the white flag of truce—damaged the US Army's reputation at home and abroad. Desertion was rampant as troops contended with the subtropical Florida wilderness. And losses for the Seminoles were devastating; by the war's end, only a few hundred remained in Florida. In his ambitious study, C. S. Monaco explores the far-reaching repercussions of this bloody, expensive campaign. Taking an interdisciplinary approach, Monaco not only places this protracted conflict within a military context but also engages the various environmental, medical, and social aspects to uncover the war's true significance and complexity. By examining the Second Seminole War through the lenses of race, Jacksonian democracy, media and public opinion, American expansion, and military strategy, Monaco offers an original perspective on a misunderstood and often-neglected chapter in our history. "This highly recommended title replaces John K. Mahon's *History of the Second Seminole War, 1835–1842* as the definitive work on the conflict. Essential."—Choice "An important book on an often-neglected topic. Monaco is a skilled writer. He has distilled extensive archival research from across the United States—along with a robust list of newspapers and published memoirs—into eleven succinct chapters. Monaco's work will surely be a valuable resource for historians and students of American Indian Removal in the coming years."—Civil War Book Review "A strong contribution to American history, in the current paradigm of settler-colonial studies. Monaco writes with fascinating ecological insight, keenly critical revisions of standard ideas, access to newly discovered documentary sources, and a commendable sense that he is writing about perception and rhetoric as much as about (sometimes unascertainable) fact."—lection

The American South

A Companion to Colonial America consists of twenty-three original essays by expert historians on the key issues and topics in American colonial history. Each essay surveys the scholarship and prevailing interpretations in these key areas, discussing the differing arguments and assessing their merits. Coverage includes politics, religion, migration, gender, ecology, and many others.

Sugar and Slavery in Puerto Rico

For a century and a half, late in the American slavery era, some of the men, women, and children who fled captivity found refuge in Florida. Some received sanctuary from the Spanish colonial government, while others joined the Seminoles in the peninsula's interior. Members of both groups built thriving communities and gained a reputation as formidable warriors. But they came increasingly under threat from pro-slavery interests in a newly independent United States eager to extend its reach in the

Americas. Of those who survived the ensuing wars, raids, and repeated forced displacements, most eventually left Florida, either for the Caribbean or for the US west and Mexico. Their experience was part of a broader history of maroons (long-term escapees from slavery) in the Americas. This book reviews some highlights of that history, and then focuses on the Florida leg of a long journey to freedom that has become an enduring part of the American legacy.

The Second Seminole War and the Limits of American Aggression

Like cotton, indigo has defied its humble origins. Left alone it might have been a regional plant with minimal reach, a localized way of dyeing textiles, paper, and other goods with a bit of blue. But when blue became the most popular color for the textiles that Britain turned out in large quantities in the eighteenth century, the South Carolina indigo that colored most of this cloth became a major component in transatlantic commodity chains. In *Red, White, and Black Make Blue*, Andrea Feeseer tells the stories of all the peoples who made indigo a key part of the colonial South Carolina experience as she explores indigo's relationships to land use, slave labor, textile production and use, sartorial expression, and fortune building. In the eighteenth century, indigo played a central role in the development of South Carolina. The popularity of the color blue among the upper and lower classes ensured a high demand for indigo, and the climate in the region proved sound for its cultivation. Cheap labor by slaves—both black and Native American—made commoditization of indigo possible. And due to land grabs by colonists from the enslaved or expelled indigenous peoples, the expansion into the backcountry made plenty of land available on which to cultivate the crop. Feeseer recounts specific histories—uncovered for the first time during her research—of how the Native Americans and African slaves made the success of indigo in South Carolina possible. She also emphasizes the material culture around particular objects, including maps, prints, paintings, and clothing. *Red, White, and Black Make Blue* is a fraught and compelling history of both exploitation and empowerment, revealing the legacy of a modest plant with an outsized impact.

A Companion to Colonial America

French colonial Louisiana has failed to occupy a place in the historic consciousness of the United States, perhaps owing to its short duration (1699--1762) and its standing outside the dominant narrative of the British colonies in North America. This anthology seeks to locate early Louisiana in its proper place, bringing together a broad range of scholarship that depicts a complex and vibrant sphere. Colonial Louisiana comprised the vast center of what would become the United States. It lay between Spanish, British, and French colonies in North America and the Caribbean, and between woodland and eastern plains Indians. As such, it provided a meeting place for Europeans, Africans, and native Americans, functioning as a crossroads between the New World and other worlds. While acknowledging colonial Louisiana's peripheral position in U.S. and Atlantic World history, this volume demonstrates that the colony stands at the thematic center of the shared narratives and historiographies of diverse places. Through its twelve essays, *French Colonial Louisiana and the Atlantic World* tells a whole story, the story of a place that belongs to the historic narrative of the Atlantic World.

French Colonial Louisiana and the Atlantic World

Zephaniah Kingsley is best known for his Fort George Island plantation in Duval County, Florida, now a National Park Service site, and for his 1828 pamphlet, *A Treatise on the Patriarchal System of Society*, that advocated just and human treatment of slaves, liberal emancipation policies, and granting rights to free persons of color. Paradoxically, his fortune came from the purchase, sale, and labor of enslaved Africans. In this penetrating biography, Daniel Schafer vividly chronicles Kingsley's evolving thoughts on race and slavery, exploring his business practices and his private life. Kingsley fathered children by several enslaved women, then freed and lived with them in a unique mixed-race family. One of the women--the only one he acknowledged as his "wife" though they were never formally married--was Anta Madgigine Ndiaye (Anna Kingsley), a member of the Senegalese royal family, who was captured in a slave raid and purchased by Kingsley in Havana, Cuba. A ship captain, Caribbean merchant, and Atlantic slave trader during the perilous years of international warfare following the French Revolution, Kingsley sought protection under neutral flags, changing allegiance from Britain to the United States, Denmark, and Spain. Later, when the American acquisition of Florida brought rigid race and slavery policies that endangered the freedom of Kingsley's mixed-race family, he responded by moving his "wives" and children to a settlement in Haiti he established for free persons of color. Kingsley's assertion that color should not be a "badge of degradation" made him unusual in the early Republic; his unique life is revealed in this fascinating reminder of the deep connections between Europe, the Caribbean, and the young United States.

Indians, Settlers & Slaves in a Frontier Exchange Economy

Coastal Encounters opens a window onto the fascinating world of the eighteenth-century Gulf South. Stretching from Florida to Texas, the region witnessed the complex collision of European, African, and Native American peoples. The Gulf South offered an extraordinary stage for European rivalries to play out, allowed a Native-based frontier exchange system to develop alongside an emerging slave-based plantation economy, and enabled the construction of an urban network of unusual opportunity for free people of color. After being long-neglected in favor of the English colonies of the Atlantic coast, the colonial Gulf South has now become the focus of new and exciting scholarship. *Coastal Encounters* brings together leading experts and emerging scholars to provide a portrait of the Gulf South in the eighteenth century. The contributors depict the remarkable transformations that took place--demographic, cultural, social, political, and economic--and examine the changes from multiple perspectives, including those of Native Americans, Europeans, and Africans; colonizers and colonized; men and women. The outstanding essays in this book argue for the central place of this dynamic region in colonial history.

Entangled Empires

This volume considers the responses to the social and institutional norms of the Spanish colonial system along Spain's northern frontier provinces.

Zephaniah Kingsley Jr. and the Atlantic World

Focusing on the agency of enslaved Africans and their descendants in the South, this work argues for the systematic unveiling and recovery of subjugated knowledge, histories, and cultural practices of those traditionally silenced and overlooked by national heritage projects and national public memories. Jackson uses both ethnographic and ethnohistorical data to show the various ways African Americans actively created and maintained their own heritage and cultural formations. Viewed through the lens of four distinctive plantation sites—including the one on which the ancestors of First Lady Michelle Obama lived—everyday acts of living, learning, and surviving profoundly challenge the way American heritage has been constructed and represented. A fascinating, critical view of the ways culture, history, social policy, and identity influence heritage sites and the business of heritage research management in public spaces.

Coastal Encounters

"The Beaches" is an history and a tour of the 37 mile-long island in Florida which includes Mayport, Atlantic Beach, Neptune Beach, Jacksonville Beach, Ponte Vedra, the Guana Preserve and Vilano Beach. With fifty four tour stops and hundreds of photos and maps, the 400 plus year history of this as-yet-unnamed island is told in a thorough and easy-to-read format.

Choice, Persuasion, and Coercion

In this pioneering book Daniel Usner examines the economic and cultural interactions among the Indians, Europeans, and African slaves of colonial Louisiana, including the province of West Florida. Rather than focusing on a single cultural group or on a particular economic activity, this study traces the complex social linkages among Indian villages, colonial plantations, hunting camps, military outposts, and port towns across a large region of pre-cotton South. Usner begins by providing a chronological overview of events from French settlement of the area in 1699 to Spanish acquisition of West Florida after the Revolution. He then shows how early confrontations and transactions shaped the formation of Louisiana into a distinct colonial region with a social system based on mutual needs of subsistence. Usner's focus on commerce allows him to illuminate the motives in the contest for empire among the French, English, and Spanish, as well as to trace the personal networks of communication and exchange that existed among the territory's inhabitants. By revealing the economic and social world of early Louisianians, he lays the groundwork for a better understanding of later Southern society.

Explorations in South-West Africa

Excerpt from *Explorations in South-West Africa: Being an Account of a Journey in the Years 1861 and 1862 From Walvisch Bay, on the Western Coast, to Lake Ngami and the Victoria Falls* This work was written by my Son during a journey from Walvisch Bay, on the west coast of Africa, to the Victoria Falls of the Zambesi River, in company with Mr. J. Chapman, a former friend of the author's, who had spent many years in travelling and was well acquainted with the country and the language of the natives. In 1858 Mr. Baines was appointed artist to the Zambesi expedition under Dr. Livingstone, and accompanied his party to Tete, the principal town in the Portuguese territory, on the eastern coast of Africa; but leaving that expedition in 1861, he returned to Cape Town. On recovering from a severe illness, which was attended with fever and loss of sight for several weeks, he resolved to explore the interior himself, and if possible to cross the continent from the west coast to the Zambesi on the east. Explorations in South-West Africa

This collection of essays documents the growth of African history as a discipline at the University of Basel since 2001. It thus pays tribute to fourteen years of research and teaching by Patrick Harries at the Department of History and the Centre for African Studies Basel. The Festschrift covers a broad range of topics from mine labour to missionary endeavour and the production of knowledge, reflecting some of his core research interests. The contributions engage with Patrick Harries' oeuvre with reference to the authors' own scholarship or vice-versa. Some directly address his publications while others take his teaching, correspondence, remarks or intellectual life more broadly as a point of reference. They all pay tribute to a brilliant and inspiring scholar, a great teacher and a kind person.

Explorations in South-West Africa

David Livingstone (1813-73) was a Scottish missionary and medical doctor who explored much of the interior of Africa. In a remarkable journey in 1853-56, he became the first European to cross the African continent. Starting on the Zambezi River, he traveled north and west across Angola to reach the Atlantic at Luanda. On his return journey he followed the Zambezi to its mouth on the Indian Ocean in present-day Mozambique. Livingstone's most famous expedition was in 1866-73, when he explored central Africa in an attempt to find the source of the Nile. Not heard from for years, he was believed lost. Both the Royal Geographical Society and the sensationalist New York Herald organized expeditions to find him. Henry M. Stanley (1841-1904), a British-born reporter who was to become a noted explorer in his own right, led the Herald's expedition. On November 10, 1871, Stanley found Livingstone in the town of Ujiji, on the shores of Lake Tanganyika, in present-day Tanzania. News of the discovery caused a worldwide sensation. This book, which appeared in Chicago in 1872, was part of the effort by publishers to capitalize on the demand from the public for information about Livingstone and Stanley and about Africa in general.

Explorations in South-West Africa. Being an Account of a Journey in ... 1861 and 1862 from Walvisch Bay, on the Western Coast, to Lake Ngami and the Victoria Falls. [With a Preface by M. A. Baines, and Maps and Plates.] - Scholar's Choice Edition

This book was originally published in 1966. This detailed study of the history of South West Africa up to the date of Maharero's death in 1890 was originally published in German and appeared in an English version for the first time in 1938 when it was recognised as the first standard work on the subject. The author's extensive ethnological and linguistic studies made him especially well equipped to give a detailed account of the country and its people, and of the customs and languages of the different tribes. A considerable part of the book deals with the gradual colonization of the country by European pioneers whose various adventures are recorded in a mass of 'old notes, letters, reports and diaries'; and the historical side is supplemented by an ethological account of the native tribes. This is a scholarly work which, with its regard for folklore and tribal tradition as well as for the facts of history, must recommend itself to all lovers of South West Africa.

This study examines and explains how British explorers visualized the African interior in the latter part of the nineteenth century, providing the first sustained analysis of the process by which this visual material was transformed into the illustrations in popular travel books. At that time, central Africa was, effectively, a blank canvas for Europeans, unknown and devoid of visual representations. While previous works have concentrated on exploring the stereotyped nature of printed imagery of Africa, this study examines the actual production process of images and the books in which they were published in order to demonstrate how, why, and by whom the images were manipulated. Thus, the main focus of the work

is not on the aesthetic value of pictures, but in the activities, interaction, and situations that gave birth to them in both Africa and Europe.

LAKE NGAMI OR EXPLORATIONS & D

The author of this epic of early exploration, Capt. James Alexander, was the soldier-explorer who led an 1836 expedition, sponsored by the Government and the Royal Geographical Society, into the interior of South West Africa (today's Namibia). Travelling by ox-wagons, his route lay north from Cape Town, across the Orange River into the interior and, running dangerously short of water, out at Walfisch Bay - a 4,000-mile trek through unexplored desert wilderness. His book is a compendium of early exploration, including observations of flora and fauna, and the native peoples in the area they travelled through. He also amassed a large collection of zoological and scientific specimens. This is a rare book of consuming interest to fans of African exploration.

Explorations and Discoveries During Four Years' Wanderings in the Wilds of South Western Africa

For a British Empire that stretched across much of the globe at the start of the nineteenth century, the interiors of Africa and Australia remained intriguing mysteries. The challenge of opening these continents to imperial influence fell to a proto-professional coterie of determined explorers. They sought knowledge, adventure, and fame, but often experienced confusion, fear, and failure. *The Last Blank Spaces* follows the arc of these explorations, from idea to practice, from intention to outcome, from myth to reality. Those who conducted the hundreds of expeditions that probed Africa and Australia in the nineteenth century adopted a mode of scientific investigation that had been developed by previous generations of seaborne explorers. They likened the two continents to oceans, empty spaces that could be made truly knowable only by mapping, measuring, observing, and preserving. They found, however, that their survival and success depended less on this system of universal knowledge than it did on the local knowledge possessed by native peoples. While explorers sought to advance the interests of Britain and its emigrant communities, Dane Kennedy discovers a more complex outcome: expeditions that failed ignominiously, explorers whose loyalties proved ambivalent or divided, and, above all, local states and peoples who diverted expeditions to serve their own purposes. The collisions, and occasional convergences, between British and indigenous values, interests, and modes of knowing the world are brought to the fore in this fresh and engaging study.

Livingstone and the Exploration of Central Africa

Excerpt from *South-West Africa* "Of making many books there is no end," said the Preacher, but strange to say, there is not a single book in the English language that deals with South-West. Africa of modern days. Many references to the country are found in the older books of South African travel and exploration, and some good works have been written in later times by German authors; but, unfortunately, the German publications are not available for the average reader. Explorations in Africa

First Published in 1992. This book is about space of a colony and how it was produced. It began as a study of the literature of the German colony of South-West Africa between the years 1884 and 1915. The author's aim is to demonstrate the active role which literature had played in structuring the experience of the colony. If it could be shown that literature not only describes, but also helps to structure the forms of experience, then it would follow that it also plays an important role in structuring the experience of colonization, and hence the form of the colony itself. From the outset, therefore, the study was concerned with a number of issues centering around colonization, representation, experience, and social form, where spatiality is the concept which allows us to understand how these various aspects of colonialism interrelate.

Explorations and Discoveries During Four Years' Wanderings in the Wilds of South Western Africa

The 18th century witnessed a new interest in African animals. Research was undertaken at the Cape of Good Hope by explorers whose books, manuscripts and drawings concerning mammals and birds are listed and discussed within this text.; This text gives details on four collections of 300 mammal and bird drawings connected with Levaillant's research. Many examples are illustrated. The zoological contents of the material left by these seven explorers are analyzed for all mammals and birds emphasizing the history, taxonomy, nomenclature and zoogeography.

In the 1860s, as America waged civil war, several thousand African Americans sought greater freedom by emigrating to the fledgling nation of Liberia. While some argued that the new black republic represented disposal rather than emancipation, a few intrepid men set out to explore their African home. *African-American Exploration in West Africa* collects the travel diaries of James L. Sims, George L. Seymour, and Benjamin J. K. Anderson, who explored the territory that is now Liberia and Guinea between 1858 and 1874. These remarkable diaries reveal the wealth and beauty of Africa in striking descriptions of its geography, people, flora, and fauna. The dangers of the journeys surface, too -- Seymour was attacked and later died of his wounds, and his companion, Levin Ash, was captured and sold into slavery again. Challenging the notion that there were no black explorers in Africa, these diaries provide unique perspectives on 19th-century Liberian life and life in the interior of the continent before it was radically changed by European colonialism.

Livingstone and the Exploration of Central Africa

When a burning sun dips low enough on the horizon to touch the brown-black earth, that is when South Africa is at its very best – a blazing expanse of broad landscapes of sea and veld, dusty savannah and equally dusty pavements. It is a vast country, extending from pristine coastal plain to rugged mountain passes across wide stretches of semi desert and forest, hills and valleys. Even travelling South Africans are unprepared for the sheer scale and enormous diversity of this grand landscape. Every day, everywhere, there are new sights to behold and new experiences to share – a graceful old Cape Dutch homestead set against lush vineyards, blue-purple mountains, the demure smile of a Zulu bride, a bird on a wire. It is the sun, the sand, the textures, the colours and the sounds that conjure up the spirit of South Africa. This volume is a fine tribute to the country, its people and its land-, sea- and cityscapes. This is the face of the nation – the essence of South Africa. Sean Fraser graduated from Rhodes University with a degree in Journalism and Media Studies. He is the author of a number of coffee-table, reference, travel and guide books on the people and places of southern Africa, including the best-selling *Seven Days in Cape Town*, *Picturesque South Africa*, *Cape Town A-Z* and *Gauteng A-Z*, all published by Random House Struik. He lives in Cape Town with his wife and two sons.

Visualizing Africa in Nineteenth-Century British Travel Accounts

Prepared by the US Bureau of Mines with the purpose of providing the latest available data and information on mining and mineral resources in Namibia, this is a well-informed and useful reference work. The study covers regional geology, the history of exploitation, mining policies and legislation, production

(including detailed tables on production and reserves 1970-1981) as well as water resources, energy supply, labour and transport. It argues that uranium has the greatest potential for long-term growth, and that elsewhere a pattern of diminishing ore reserves in the metals and to a lesser extent diamonds suggests a declining resource base. Shortages of water supplies, lack of artisans and skilled labour and "the unresolved international dispute" are identified as constraints to future growth in Namibia's mining industry. There is a chapter outlining the main features of mining legislation, and a lengthy, mainly technical bibliography listing close to 200 items. As a technical and economic survey relying heavily on information provided by the mining companies themselves, the study has considerable value. As a guide to the political economy of Namibia, it is, however, quite misleading. The UN Decree No. 1 of 1974 is not mentioned at all, while two decades of worker organization, liberation struggle and harsh colonial repression are dismissed in the assertion that "differences among worker languages and interests have inhibited the formation of a uniform political party or union". The study is notably weak on labour and social conditions, wages and labour legislation. For up-to-date information along the same lines, see Bureau of Mines Minerals Yearbook, vol. III: Area Reports: International, which contains a chapter on the mineral industry of Namibia. (Eriksen/Moorsom 1989).
