Our Solar System

At the heart of this volume is the recognition that children's engagement with play and story are intrinsically and intricately linked. The contributing authors share a passionate interest in the development and well-being of children, in particular through their use of imagination and adaptation of the everyday into play and stories. Following these principles, the volume explores the connections between play, story, and pretense with regard to many cultural and contextual factors that influence the way these elements vary in children's lives. In a departure from earlier collections on play and story, the authors take a particular focus on normative as compared with atypical development. This collection begins with an approach to understanding the developmental relationship between play and story, which recognizes their similarities while acknowledging their differences. Much of the collection addresses pretend play and story in children with autism spectrum disorder, an understudied but important group for consideration, as these dimensions of their lives and development have often been considered problematic. The volume also includes sections on play and story in classroom settings and play and story across cultures, including non-English-speaking environments such as Israel, Romania, China, and Mexico. It concludes with a discussion of how play differs across sociocultural and economic contexts, making a unifying claim for the importance of play in children's lives but also calling for an understanding of what play means to very different groups of children.

The Vanishing Half

THE SUNDAY TIMES TOP BESTSELLER #1 NEW YORK TIMES BESTSELLER SHORTLISTED FOR THE WOMEN'S PRIZE LONGLISTED FOR THE ORWELL PRIZE 'An utterly mesmerising novel..I absolutely loved this book' Bernardine Evaristo, winner of the Booker Prize 2019 'Epic' Kiley Reid, O, The Oprah Magazine 'Favourite book [of the] year' Issa Rae The Vignes twin sisters will always be identical. But after growing up together in a small, southern black community and running away at age sixteen, it's not just the shape of their daily lives that is different as adults, it's everything: their families, their communities, their racial identities. Ten years later, one sister lives with her black daughter in the same southern town she once tried to escape. The other secretly passes for white, and her white husband knows nothing of her past. Still, even separated by so many miles and just as many lies, the fates of the twins remain intertwined. What will happen to the next generation, when their own daughters' story lines intersect? Weaving together multiple strands and generations of this family, from the Deep South to California, from the 1950s to the 1990s, Brit Bennett produces a story that is at once a riveting, emotional family story and a brilliant exploration of the American history of passing. Looking well beyond issues of race, *The Vanishing Half* considers the lasting influence of the past as it shapes a person's decisions, desires, and expectations, and explores some of the multiple reasons and realms in which people sometimes feel pulled to live as something other than their origins.

Twists of Fate

What if Mr Collins shocked Elizabeth with his base conduct at the time of his proposal, thus sending her dashing out of her house, and into the arms of Mr Darcy? What if that accidental encounter was witnessed, and impropriety was assumed? What if Mr Darcy was glad of the excuse to marry his heart's desire - only to have his best hopes blasted within hours of his wedding? What if he found himself in the wrong place at the wrong time more than once? Evil rumours, an early marriage, a dreadful misunderstanding, an old secret and good intentions gone awry. What if 'I do' is not the end, but the beginning of the adventure? (The novel addresses mature themes. Given the 'early marriage' premise, the issue of growing affection and intimacy is central to the story. The relevant scenes are emotive and deeply sensual, but never explicit.)

Sight Lines

Winner of the 2019 National Book Award "The sight lines in Sze's 10th collection are just that imagistic lines strung together by jump-cuts, creating a filmic collage that itself seems to be a portrait of simultaneity." The New York Times From the current phenomenon of drawing calligraphy with water in public parks in China to Thomas Jefferson laying out dinosaur bones on the White House floor, from the last sighting of the axolotl to a man who stops building plutonium triggers, Sight Lines moves through space and time and brings the disparate and divergent into stunning and meaningful focus. In this new work, Arthur Sze employs a wide range of voices—from lichen on a ceiling to a man behind on his rent—and his mythic imagination continually evokes how humans are endangering the planet; yet, balancing rigor with passion, he seizes the significant and luminous and transforms these moments into riveting and enduring poetry. "These new poems are stronger yet and by confronting time head on, may best stand its tests." Lit Hub "The wonders and realities of the world as seen through travel, nature walks, and daily routine bring life to the poems in Sight Lines." Library Journal

The publication has been reviewed by the Intergovernmental Technical Panel on Soil (ITPS) and contributing authors. It addresses scientific evidences on soil pollution and highlights the need to assess the extent of soil pollution globally in order to achieve food safety and sustainable development. This is linked to FAO's strategic objectives, especially SO1, SO2, SO4 and SO5 because of the crucial role of soils to ensure effective nutrient cycling to produce nutritious and safe food, reduce atmospheric CO₂ and N₂O concentrations and thus mitigate climate change, develop sustainable soil management practices that enhance agricultural resilience to extreme climate events by reducing soil degradation processes. This document will be a reference material for those interested in learning more about sources and effects of soil pollution.

Reason's Traces addresses some of the key questions in the study of Indian and Buddhist thought: the analysis of personal identity and of ultimate reality, the interpretation of Tantric texts and traditions, and Tibetan approaches to the interpretation of Indian sources. Drawing on a wide range of scholarship, Reason's Traces reflects current work in philosophical analysis and hermeneutics, inviting readers to explore in a Buddhist context the relationship between philosophy and traditions of spiritual exercise.

Growing up as a member of a ranching family in Branson, a small town in southeastern Colorado, provided author Larada Horner-Miller a treasure-trove of stories, characters, and emotional moments that make up her touching memoir, *This Tumbleweed Landed*. This collection of poems and prose transports readers back to rural America during the fifties and sixties, to one idyllic, tight-knit community in particular. Each of the book's eight sections weaves a nostalgic yarn that tells of playtimes with friends and neighbors, favorite hiding places, living without a telephone for the first eleven years of life, and the touching memories of growing up in a ranching community. Whether it is Saturday night dances or hot days working with 4-H at the county fair, the poems and pages roll along like a tumbleweed in search of a place to land. Readers will find themselves longing to go back to this very specific time and place, whether they actually experienced it in their own lives or not. Read about this daddy's little girl and her

adventures that mold and shape her formative years. Where will this tumbleweed land, and what kind of woman will she be when she finally arrives?

This Tumbleweed Landed

This unique book provides a practical framework for and coverage of a broad range of mental health concerns applicable to the care of athletes, including depression, suicide, mood disorders, substance abuse and risk-taking behaviors. To this end, it presents content relevant to the care of athletes, including doping and the use of performance-enhancing drugs, the mental health impact of concussion, bullying and hazing, the impact of social media and exercise addiction, among other pertinent topics. Current basic and translational research on behavioral health and the relationship of brain to behavior are reviewed, and current treatment approaches, both pharmacological and non-pharmacological (including mindfulness training), are considered. This practical resource targets the stigma of mental in athletes in order to overcome barriers to care by presenting a definitive perspective of current concepts in the mental health care of athletes, provided by experts in the field and targeting sports medicine providers, mental health providers and primary care physicians involved in the direct care of recreational and competitive athletes at all levels.

Their plans were just cancelled and they're home alone. Usually they go out and meet friends. Not this evening. They turn on their laptop, put some music on, and subconsciously they'll start searching for something easy that will make them feel better. They talk to a stranger in an online chat room as if they were meeting them at a bar. They feel safe because they're home. They prepare a drink. A snack. They talk. They share. For the subject it's so much easier to share with a stranger who will not judge you. They know that they're being shot. They feel good doing so. They feel that you are someone giving them the attention they need at this moment when they feel lonely. They expose themselves. They play. They laugh. They talk. They pose. Naturally. Being themselves, feeling safe, shot by a stranger. A stranger that they can trust. Gonzalo Bénard is the stranger that is shooting - a long distance voyeur - young volunteers who are lonely in their homes; the process becomes a kind of sociological game - Bénard becomes the witness of their solitary habits. Shooting the screen via a webcam, like a security camera, he records their private moments, never leaving them while they cook, shower, read, drink, play, sleep or dance alone in their own private places. From all over the world. This sociological/photographic series "B Shot by a Stranger" have been lectured in several colleges and universities worldwide, apart from featured in several publications online and in print, it has always been the subject of masters and final thesis of some students. This is a book of photography, a compilation of the first 2 years of the project. A final book is to be released in September 2015 with new photographs and texts.

B Shot by a Stranger

This textbook introduces students to the ways in which techniques from corpus linguistics can be used to aid sociolinguistic research. Corpus linguistics shares with variationist sociolinguistics a quantitative approach to the study of variation or differences between populations. It may also complement qualitative traditions of enquiry such as interactional sociolinguistics. This text covers a range of different topics within sociolinguistics: *Analysing demographic variation* *Comparing language use across different cultures* *Examining language change over time* *Studying transcripts of spoken interactions* *Identifying attitudes or discourses. Written for undergraduate and postgraduate students of sociolinguistics, or corpus linguists who wish to use corpora to study social phenomena, this textbook examines how corpora can be drawn on to investigate synchronic variation, diachronic change and the construction of discourses. It refers to several classic corpus-based studies as well as the author's own research. Original analyses of a number of corpora including the British National Corpus, the Survey of English Dialects and the Brown family of corpora are complemented by a new corpus of written British English collected around 2006 for the purposes of writing the book. Techniques of analysis like concordancing, keywords and collocations are discussed, along with corpus annotation and statistical procedures such as chi-squared tests and clustering. Paul Baker takes a critical approach to using corpora in sociolinguistics, outlining the limitations of the approach as well as its advantages.

Sociolinguistics and Corpus Linguistics

It is 1989 and a seemingly invincible Prime Minister has sacked Geoffrey Howe, her Foreign Secretary. She apparently had nothing to fear from him: his speaking skills had, famously, been compared to

those of a dead sheep. But, a year later, inspired by his wife Elspeth - whose relationship with Thatcher was notoriously frosty - Howe overcame his limitations to destroy Mrs Thatcher with one of the great political speeches. Dead Sheep is a drama tinged with tragedy and comedy. Its themes - loyalty, love, political morality and Britishness - are still uncannily relevant today. .

'Building for Life' is the industry standard, endorsed by Government, for well-designed homes and neighbourhoods that local communities, local authorities and developers are invited to use to stimulate conversations about creating good places to live. The 12 questions reflect our vision of what new housing developments should be: attractive, functional and sustainable places. Redesigned in 2012, this text is based on the new National Planning Policy Framework and the Government's commitment to build more homes, better homes and involve local communities in planning.

This is a comprehensive linguistic description of Kunbarlang (Gunbalang), a highly endangered polysynthetic language of northern Australia. Kunbarlang belongs to the non-Pama-Nyungan Gunwinyguan language family and is currently spoken by nearly 40 people. This work draws on elicitations and analysis of narratives from the author's original field work (2015--2018), as well as those from previous recordings. The main areas covered are the sound system, morphology, syntax, and aspects of lexical and constructional semantics. Dictated by the polysynthetic structure of the language and the patterns of its use, the principal focus of the work is the analysis of the verbal complex and the interaction between the verb and other constituents of the clause. The analysis strike a balance between taking into consideration the areal and genetic context, being informed by linguistic typology and theory, yet at the same time remaining data-driven and theory-neutral in the way generalisations are stated. Against the Australian and a broader cross-linguistic background, Kunbarlang possesses remarkable features at all levels of its organisation.

What is the relation to the scientific methods of alpha, beta or gamma sciences, directed toward knowledge production and the development of a certain scientific domaine? What will be the influence of scientific research on the art forms?

"What Hilary Mantel did for Thomas Cromwell and Paula McLain for Hadley Hemingway . . . Moehring does for bank robber Willie Sutton" in this fascinating biographical novel of America's most successful bank robber (Newsday). Willie Sutton was born in the Irish slums of Brooklyn in 1901, and he came of age at a time when banks were out of control. Sutton saw only one way out and only one way to win the girl of his dreams. So began the career of America's most successful bank robber. During three decades Sutton became so good at breaking into banks, the FBI put him on its first-ever Most Wanted List. But the public rooted for the criminal who never fired a shot, and when Sutton was finally caught for good, crowds at the jail chanted his name. In J.R. Moehring's retelling, it was more than need or rage that drove Sutton. It was his first love. And when he finally walked free -- a surprise pardon on Christmas Eve, 1969 -- he immediately set out to find her. "Electrifying." --Booklist (starred) "Thoroughly absorbing . . . Filled with vibrant and colorful re-creations of not one but several times in the American past." --Kevin Baker, author of Strivers Row "[J.R. Moehring] has found an historical subject equal to his vivid imagination, gimlet journalistic eye, and pitch-perfect ear for dialogue. By turns suspenseful, funny, romantic, and sad--in short, a book you won't be able to put down." --John Burnham Schwartz, author of Reservation Road and The Commoner

“Sting’s gift for prose and reverence for language, nearly the equal of his musical gifts, shine on every page. Even when *Broken Music* addresses the quixotic life of an aspiring rock & roller, it reads like literature from a more rarified time when adults didn’t condescend to the vulgarities of pop culture.” —Rolling Stone Having been a songwriter most of my life, condensing my ideas and emotions into short rhyming couplets and setting them to music, I had never really considered writing a book. But upon arriving at the reflective age of fifty, I found myself drawn, for the first time, to write long passages that were as stimulating and intriguing to me as any songwriting I had ever done. And so *Broken Music* began to take shape. It is a book about the early part of my life, from childhood through adolescence, right up to the eve of my success with the Police. It is a story very few people know. I had no interest in writing a traditional autobiographical recitation of everything that’s ever happened to me. Instead I found myself drawn to exploring specific moments, certain people and relationships, and particular events which still resonate powerfully for me as I try to understand the child I was, and the man I became.

Every company is moving. But most are moving in a hundred different directions. In contrast, fast-lane companies apply intense management discipline to drive their organizations in One Direction. Dave Ramos, the CEO of SHIFTPOINTS, studied over 300 companies, interviewed over 100 Chief Executive Officers, and he came to One Conclusion: Alignment is the Ultimate Competitive Advantage™! Harvard Business School professors Robert S. Kaplan and David P. Norton confirm this idea, “Alignment, much like the synchronism achieved by a high-performance rowing crew, produces dramatic benefits.” This book contains over fifty case studies about fast-lane companies including Amazon, Tesla, Netflix, and more. It presents a comprehensive methodology that will help your company unleash the accelerating power of alignment. So, is everyone in your organization driving in One Direction?

For an eighth grader, Molly Williams has more than her fair share of problems. Her father has just died in a car accident, and her mother has become a withdrawn, quiet version of herself. Molly doesn’t want to be seen as “Miss Difficulty Overcome”; she wants to make herself known to the kids at school for something other than her father’s death. So she decides to join the baseball team. The boys’ baseball team. Her father taught her how to throw a knuckleball, and Molly hopes it’s enough to impress her coaches as well as her new teammates. Over the course of one baseball season, Molly must figure out how to redefine her relationships to things she loves, loved, and might love: her mother; her brilliant best friend, Celia; her father; her enigmatic and artistic teammate, Lonnie; and of course, baseball. This early record recaptures the history and heroism that has always characterized the firefighters we rely on. Well known among fire enthusiasts and researchers, until now the book has been rare and expensive for a well-preserved copy. Providing a detailed look back, beginning in 1609, it is a fascinating chronicle of a time gone by. 650 engravings illustrate the city when its skyline was much less vertical. This book is referred to as “the firefighter’s bible” by many curators and has been a favorite of fire buffs for the last 110 years.

This open access handbook, the first of its kind, provides a comprehensive and carefully curated multidisciplinary and genre-spanning view of the state of the field of Critical Menstruation Studies, opening up new directions in research and advocacy. It is animated by the central question: “what new lines of inquiry are possible when we center our attention on menstrual health and politics across the life course?” The chapters—diverse in content, form and perspective—establish Critical Menstruation Studies as a potent lens that reveals, complicates and unpacks inequalities across biological, social, cultural and historical dimensions. This handbook is an unmatched resource for researchers, policy makers, practitioners, and activists new to and already familiar with the field as it rapidly develops and expands.

The Palgrave Handbook of Critical Menstruation Studies

America's most provocative intellectual brings her blazing powers of analysis to the most famous poems of the Western tradition—and unearths some previously obscure verses worthy of a place in our canon. Combining close reading with a panoramic breadth of learning, Camille Paglia sharpens our understanding of poems we thought we knew, from Shakespeare to Dickinson to Plath, and makes a case for including in the canon works by Paul Blackburn, Wanda Coleman, Chuck Wachtel, Rochelle Kraut—and even Joni Mitchell. Daring, riveting, and beautifully written, *Break, Blow, Burn* is a modern classic that excites even seasoned poetry lovers—and continues to create generations of new ones.

This stunning publication is the first to examine in tandem the work and influence of two towering figures in contemporary art. Andy Warhol (1928-1987) and Ai Weiwei (b. 1957) are two of the most internationally renowned artists of the past 100 years, famous not only for their artwork but also for influencing the culture of their time. This exciting book is the first to consider the work of these artists alongside one another, in dialogue and in correspondence, to explore the artists' meticulous observations of modern and contemporary art, life, and politics. Andy Warhol's investigation of consumer society, fame, and celebrity offers thought-provoking points of connection with Ai Weiwei's interrogation of the relationship between tradition and modernity, the role of the individual to the state, questions of human rights, and the value of freedom of expression. Parallels also exist between the ways in which each artist transformed the understanding of artistic value and studio production, and redefined the role of the artist—as impresario, cultural producer, activist, and brand. Alongside beautifully reproduced images by both artists—including works by Ai Weiwei published here for the first time—are illuminating essays by an international team of art experts, curators, and scholars that survey the scope of the artists' careers and interpret the significant impact of Andy Warhol and Ai Weiwei on modern art and contemporary life. This deluxe, collectible catalogue is available in three different, limited-edition colors. Published in collaboration with the National Gallery of Victoria, Melbourne, and the Andy Warhol Museum, Pittsburgh. Exhibition Schedule: National Gallery of Victoria, Melbourne (12/11/15-04/24/16) The Andy Warhol Museum, Pittsburgh (06/01/16-09/01/16)

A New York Times bestseller and enduring classic, *All About Love* is the acclaimed first volume in feminist icon bell hooks' "Love Song to the Nation" trilogy. *All About Love* reveals what causes a polarized society, and how to heal the divisions that cause suffering. Here is the truth about love, and inspiration to help us instill caring, compassion, and strength in our homes, schools, and workplaces. "The word 'love' is most often defined as a noun, yet we would all love better if we used it as a verb," writes bell hooks as she comes out fighting and on fire in *All About Love*. Here, at her most provocative and intensely personal, renowned scholar, cultural critic and feminist bell hooks offers a proactive new ethic for a society bereft with lovelessness—not the lack of romance, but the lack of care, compassion, and unity. People are divided, she declares, by society's failure to provide a model for learning to love. As bell hooks uses her incisive mind to explore the question "What is love?" her answers strike at both the mind and heart. Razing the cultural paradigm that the ideal love is infused with sex and desire, she provides a new path to love that is sacred, redemptive, and healing for individuals and for a nation. The *Utne Reader* declared bell hooks one of the "100 Visionaries Who Can Change Your Life." *All About Love* is a powerful, timely affirmation of just how profoundly her revelations can change hearts and minds for the better.

New York Times bestselling author Beth Harbison whips together a witty and charming--and delicious--story about the secrets we keep, the friends we make, and the food we cook. *MUST LOVE BUTTER: The Cookbook Club* is now open to members. Foodies come join us! No diets! No skipping dessert! Margo Everson sees the call out for the cookbook club and knows she's found her people. Recently dumped by her self-absorbed husband, who frankly isn't much of a loss, she has little to show for her marriage but his 'parting gift'—a dilapidated old farm house—and a collection of well-loved cookbooks. Aja Alexander just hopes her new-found friends won't notice that every time she looks

at food, she gets queasy. It's hard hiding a pregnancy, especially one she can't bring herself to share with her wealthy boyfriend and his snooty mother. Trista Walker left the cutthroat world of the law behind and decided her fate was to open a restaurant...not the most secure choice ever. But there she could she indulge her passion for creating delectable meals and make money at the same time. The women bond immediately, but it's not all popovers with melted brie and blackberry jam. Margo's farm house is about to fall down around her ears; Trista's restaurant needs a makeover and rat-removal fast; and as for Aja, just how long can you hide a baby bump anyway? In this delightful novel, these women form bonds that go beyond a love grilled garlic and soy sauce shrimp. Because what is more important in life than friendship...and food?
