Aging Just Like Fine Wine. Best Birthday Gift

Can drinking red wine save your life? Scientific breakthroughs within the past several years suggest that it may not be an unreasonable question. Red wine's miracle molecule, resveratrol, has been proven to extend life dramatically in experimental animals. But resveratrol is only one of a family of compounds called polyphenols that may hold the key to preventing Alzheimer's disease, heart disease, and everything from cancer to the common cold. With new discoveries come new controversies though; *Age Gets Better with Wine* explores the question of whether the benefits of healthy drinking can be put into a pill, and delves into the science behind the secret to living longer and living better with wine.

Age Gets Better with Wine

- The ultimate history of wine by the master of the subject, an award-winning bestseller for decades now in a new edition; - New foreword by historian Andrew Roberts - Full of fascinating vignettes and side stories, a book to be read for hours or dipped into - Beautifully produced in a new flexibound volume that makes it easy to read "Who better to supply us with our first comprehensive historical survey than the wine writer with the magic pen, Hugh Johnson?" - Jancis Robinson MW Hugh Johnson has led the literature of wine in many new directions over a 60-year career. His classic *The Story of Wine* is his most enthralling and enduring work, winner of every wine award in the UK and USA. It tells with wit, scholarship and humor how wine became the global phenomenon it is today, varying from mass-produced plonk to rare bottles fetching many thousands. It ranges from Noah to Napa, Pompeii to Prohibition to Pomerol, gripping, anecdotal, personal, controversial and fun. This new edition includes Hugh's view on the changes wine has seen in the past 30 years. In his Foreword the celebrated historian Andrew Roberts writes: The genius of *The Story of Wine* derives from the fact that it is emphatically not a dry-as-dust academic history - there are dozens of those - but an adventure story, full of mysteries, art and culture.

The Story of Wine

A leading importer of limited-production wines of character and quality takes us on an intimate tour through family-owned vineyards in France and Italy and reflects upon the last three decades of controversy, hype, and change in the world of wine. In the late 1970s, Neal I. Rosenthal set out to learn everything he could about wine. Today, he is one of the most successful importers of traditionally made wines produced by small family-owned estates in France and Italy. Rosenthal has immersed himself in the culture of Old World wine production, working closely with his growers for two and sometimes three generations. He is one of the leading exponents of the concept of "terroir"—the notion that a particular vineyard site imparts distinct qualities of bouquet, flavor, and color to a wine. In *Reflections of a Wine Merchant*, Rosenthal brings us into the cellars, vineyards, and homes of these vigneron, and his delightful stories about his encounters, relationships, and explorations—and what he has learned along the way—give us an unequalled perspective on winemaking tradition and what threatens it today. Rosenthal was featured in the documentary film *Mondovino* and is one of the more outspoken figures against globalization, homogenization, and the "critic-ization" of the wine business. He was also a major subject in Lawrence Osborne's *The Accidental Connoisseur*. His is an important voice in defense of the individual and the artisanal, and their contribution to our quality of life.

Reflections of a Wine Merchant

Storage of wine is an important consideration for wine that is being kept for long-term aging. While most wine is consumed within 24 hours of purchase, fine wines are often set aside for long-term storage. Wine is one of the few commodities that can improve with age, but it can also rapidly deteriorate if kept in inadequate conditions.

Advanced Topics in Oenology

Making Fine Wines itemizes the simple equipment needed for wine-making, and clearly describes the procedures for making wine and sparkling wines, sherry and port. There is also an extensive section on liqueurs. *Making Fine Wines and Liqueurs at Home* is a companion volume to *Brew It Yourself* and a foolproof guide for people who derive pleasure and satisfaction from making delectable product at home, using a minimum amount of equipment and time.

Making Fine Wines and Liqueurs at Home

Explains the story of wine making--caring for the vineyard, harvesting the grapes, and bottling and aging the wine

Plain Talk about Fine Wine

The wines of Tuscany were famous long before Leonardo da Vinci described them as “bottled sunshine,” and they are at the forefront of the remarkable renaissance of Italian wine over the past 30 years. In this groundbreaking new book, Nicolas Belfrage shares his insider’s knowledge acquired as a specialist wine trader and writer. Mindful of the region’s fascinating past, Belfrage brings its story up to date, discussing such subjects as geology and geography, grape varieties, and the latest research into Sangiovese, the variety used in the top wines of Chianti Classico, Brunello di Montalcino, and Vino Nobile di Montepulciano. He also clarifies the regulatory framework and follows the recent controversial developments in viticulture and winemaking, including the rise of the Super-Tuscans and the ongoing “Brunellogate” scandal that broke in 2008. At the heart of the book are in-depth, illustrated profiles of more than 90 of the most interesting producers, large and small, with insightful notes on the essential character of their finest wines. The author also offers a comprehensive review of vintages and selects his top 100 wines in ten different categories, while wines of special quality or value are indicated throughout.

The Finest Wines of Tuscany and Central Italy

Like Fine Wine

An “entertaining and passionate” connoisseur tours the vineyards of Europe and California, arguing for an old-fashioned appreciation of authenticity (The New York Times). The drastic effects that influential wine critic Robert M. Parker Jr. has had on the winemaking industry are best described as wine Parkerization. Many vintners are leaving old techniques behind and turning to chemistry and technology in order to please Parker’s palate. This led to the disappearance of James Beard Foundation Award–winning writer Alice Feiring’s favorite wines—and she was determined to learn why. In a one-woman crusade that will have you wondering what exactly is in your glass, Feiring argues against the tyranny of homogenization, Big Wine, consultants, and, of course, Parker’s infamous one hundred-point scoring system. Traveling through the vineyards of the Loire and Champagne, to Piedmont and Spain, she searches for authentic Barolo, the last old-style Rioja, and the tastiest terroir-driven Champagnes. Feiring reveals what goes into the average bottle—the reverse osmosis, the yeasts and enzymes, the sawdust and oak chips—and why she doesn’t find much to drink in California. She introduces rebel winemakers who are embracing old-fashioned techniques and making wines with individuality and soul. And finally Feiring explains what love’s really got to do with it all, in a delightful read for anyone who truly appreciates the good things in life.

Principles and Practices of Winemaking

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

New York Magazine

This new edition of *Age Gets Better with Wine* takes a fresh look at the science and reaffirms that daily moderate wine drinking remains a potent anti-aging strategy. Why do wine drinkers outlive nondrinkers and enjoy better health and mental function, especially later in life? *Age Gets Better with Wine* was the first book to comprehensively discuss the multiple ways that wine contributes to improved lifetime health. As a plastic surgeon, Dr. Baxter's interest in the subject grew from an in-depth review of anti-aging science. What he found was that all serious studies on anti-aging intersected in one way or another on wine. The discovery of wine's miracle molecule, resveratrol, appeared to provide a unifying answer to the question and reinforced wine's role in healthy living. But despite continued advances in wine and health science, new challenges to the notion of healthy drinking have emerged. Neo-prohibitionists openly question the validity of studies supporting any level of drinking, while others attribute the entire benefit to resveratrol and suggest supplements instead. An objective analysis shows the fallacy of both views.

Age Gets Better with Wine 2nd Edition

In *Extreme Wine*, wine economist and best-selling author Mike Veseth circles the globe searching for the best, worst, cheapest, most expensive, and most over-priced wines. Mike seeks out the most outrageous wine people and places and probes the biggest wine booms and busts. Along the way he applauds celebrity wines, tries to find wine at the movies, and discovers wines that are so scarce that they are almost invisible. Why go to such extremes? Because, Mike argues, the world of wine is growing and changing, and if you want to find out what's really happening you can't be afraid to step over the edge. Written with verve and appreciation for all things wine, *Extreme Wine* will surprise and delight readers.

Old Age Is Not for Sissies

The French word *terroir* is used to describe all the ecological factors that make a particular type of wine special to the region of its origin. James E. Wilson uses his training as a geologist and his years of research in the wine regions of France to fully examine the concept of *terroir*. The result combines natural history, social history, and scientific study, making this a unique book that all wine connoisseurs and professionals will want close at hand. In Part One Wilson introduces the full range of environmental factors that together form *terroir*. He explains France's geological foundation; its soil, considered the "soul" of a vineyard; the various climates and microclimates; the vines, their history and how each type has evolved; and the role that humans--from ancient monks to modern enologists--have played in viticulture. Part Two examines the history and habitat of each of France's major wine regions. Wilson explores the question of why one site yields great wines while an adjacent site yields wines of lesser quality. He also looks at cultural influences such as migration and trade and at the adaptations made by centuries of vignerons to produce distinctive wine styles. Wilson skillfully presents both technical information and personal anecdotes, and the book's photographs, maps, and geologic renderings are extremely helpful. The appendices contain a glossary and information on the labeling of French wines. With a wealth of information explained in clear English, Wilson's book enables wine readers to understand and appreciate the mystique of *terroir*. Wine is much more than a beverage to be enjoyed; it's an experience that has a culture all its own. The Art of Decanting explores these rituals, tracing the evolution of wine presentation and its rich lore. Author Sandra Jordan, of Sonoma's acclaimed Jordan wines, unearths unusual practices in wine history and sifts through centuries of rituals and accoutrements such as wine furniture, vessels, corks, corkscrews, glassware, and specifically decanters, to demystify their modern interpretations and explain how they are properly used today. With a handy entertaining guide that brings all the information into a practical light, The Art of Decanting and a bottle of wine will transform the most casual of gatherings into an evening to remember.

"My Favorite Burgundies is a more personal follow-up to--but not a comprehensive revision of--Coates' The Wines of Burgundy (California, 2008). The book is based on the author's many subsequent tastings and travels through the region since the publication of his last book five years ago. Chapter 1 includes descriptions of Burgundy's most renowned vineyards, including their particular history, geography, and soil conditions, as well as tasting notes of various producer's single-bottle offerings from these sites. Chapter 2 describes the region's most distinguished domaines, with Coates' impressions of the proprietors, facilities, and wine-making philosophies, along with vertical tasting notes (in some cases, stretching back more than thirty years). Chapter 3 provides current vintage assessments of Chablis from 2008-2010, Coates' highly sought-after "Three Years On" and "Ten Years On" tastings, assessing wines from between 1990-2002. All tastings are accompanied by the author's personal notes, ratings, and suggested drinking dates. Interspersed throughout are a brief series of "observations" on a variety of hot-button issues in the wine world, from the utility of blind tasting and tasting notes to biodynamics and other philosophies of viticulture"--

Now, sour foods have never been more fashionable, with the spotlight falling on foodstuffs as disparate as Belgian sour beer and Korean kimchi. But what is it that makes sourness such an enticing, complex element of the eating experience? And what are the best ways to harness sour flavours in your own kitchen? Sour offers a series of invitations to the modern cook, to learn the life-enhancing skills behind the everyday transformations that hold the key to this most enduring taste. Award-winning food writer Mark Diacono sets out to demystify the sour world, and explore why everyone's extolling the virtues of kombucha and fermenting for their digestive health. By grappling with gooseberries and turning his hand to sourdough, experimenting with ultra-cool shrub cocktails, and making his own yoghurt, kefir and pickles, Mark tells the story of what makes things sour, and offers recipes that maximise the transformative power of this amazing taste. From sumac-roasted duck and kombucha mayonnaise to roasted plums with labneh and cherry sour cream clafoutis, it is time to let a little (or a lot) of sour into your life.

"Matthews brings a scientist's skepticism and scrutiny to widely held ideas and beliefs about viticulture--often promulgated by people who have not tried to grow grapes for a living--and subjects them to critical examination: Is terroir primarily a marketing ploy that obscures our understanding of which environments really produce the best wine? Can grapevines that yield a high berry crop generate wines of high quality? What does it mean to have vines that are balanced or grapes that are fully mature? Do biodynamic practices violate biological principles? These and other questions will be addressed in a book that could alternatively be titled (in homage to a PUP bestseller) On Wine Bullshit"--Provided by publisher.

Sour

Interest in and consumption of wine have grown exponentially in recent years and there has been a corresponding increase in consumers' knowledge of wine, which in turn has generated discussions about the meaning and value of wine in our lives and how renowned wine critics influence our subjective assessment of quality and shape public tastes. Wine first played a part in Western philosophy at the symposium of the early Greek philosophers where it enlivened and encouraged discussion. During the Enlightenment David Hume recommended drinking wine with friends as a cure for philosophical melancholy, while Immanuel Kant thought wine softened the harsher sides of men's characters and made their company more convivial. In Questions of Taste, the first book in any language on the subject, philosophers such as Roger Scruton and wine professionals like Andrew Jefford, author of the award-winning book The New France, turn their attention to wine as an object of perception,

assessment and appreciation. They and their fellow contributors examine the relationship between a wine's qualities and our knowledge of them; the links between the scientifically describable properties of wine and the conscious experience of the wine taster; what we base our judgements of quality on and whether they are subjective or objective; the distinction between the cognitive and sensory aspects of taste; whether wine appreciation is an aesthetic experience; the role language plays in describing and evaluating wines; the significance of their intoxicating effect on us; the meaning and value of drinking wine with others; whether disagreement leads to relativism about judgements of taste; and whether we can really share the pleasures of drinking. Questions of Taste will be of interest to all those fascinated by the production and consumption of wine and how it affects our minds in ways we might not hitherto have suspected.
