1..{Andrew Tate vs. Scripture} Who is Andrew Tate, and do his views line up with the Bible?

2..{About Saul's Motives} Was Saul's hostility toward the Jewish Christians based on his biblical beliefs, or was he really on a mission to achieve status considering his age prior to conversion and extreme actions?

3..{Can a Christian become Reprobate?} Is it possible for a Christian to become a reprobate? If so, can it still be undone? I don't know why, but God seems out of reach.

4..{Blaspheming the Spirit vs. the Son/Father} Why is the unforgivable sin described as blaspheming the Holy Spirit, as opposed to blaspheming the Son or the Father?

5..{Fulfilled or Unfilled Prophecy?} Has Zechariah 9:1-8 already been fulfilled? If not, is it possible that it is in the process of being fulfilled today?

6..{Is Jesus Presently "King"?} Is it right to call Jesus "king" since He has not yet set up His Millennial Kingdom on Earth (Revelation 20:4-6)?

7..{Reaching a Pagan Friend} I've got a Pagan friend. He believes that all the different gods exist, including the Abrahamic God, and that the Norse Pantheon is most worthy of worship. Any advice on reaching him?

8..{Marital Relations during Menstruation?} Is it a sin to have marital relations during the menstrual cycle? In Leviticus 18: 19, 24-25, it indicates that this is an abomination. But Leviticus 15: 24 puts it in the category of ritual uncleanness.

9..{Human Sacrifice in the OT?} I'm curious about how to handle 2 Samuel 21. This sounds very close to a form of human sacrifice to honor God.

10..{Do All Incorrect Secondary Views Warrant Repentance?} You said egalitarians need to repent (I agree). But do we apply that same response to other secondary issues such as Calvinism? That's higher on the list of secondary issues compared to egalitarianism vs. complementarianism.

Today I'm here to help answer some questions participants have sent in about how to live in the world as an A Course in Miracles student and how to reconcile opposing thought-systems

Think of Planet Miracle as a place where we're actively practicing the principles of ACIM and are rooted in love (Whereas the ego-mind is rooted in fear and follows the ways of the world)

The ego-mind is all about questioning and the Spirit is all about knowing

Since we have to live in the world and the world was created by fear, we need to be able to transform fear into love in order for us to live on Planet Miracle (We do this through a process of forgiveness)

This life is about remembering who we are and where we came from

As we practice forgiveness, see through the eyes of love, and shift our perception from fear to love, we can live on Planet Miracle while having the experience of living here in the world

The Teachers of God Foundation offers many programs to support and guide you on this path

In August 1942, Hitler directed all German state institutions to assist Heinrich Himmler, the chief of the SS and the German police, in eradicating armed resistance in the newly occupied territories of Eastern Europe and Russia. The directive for "combating banditry" (Bandenbekämpfung), became the third component of the Nazi regime's three-part strategy for German national security, with genocide (Endlösung der Judenfrage, or "the Final Solution of the Jewish Question") and slave labor (Erfassung, or "Registration of Persons to Hard Labor") being the better-known others. An original and thought-provoking work grounded in extensive research in German archives, Hitler's Bandit Hunters focuses on this counterinsurgency campaign, the anvil of Hitler's crusade for empire. Bandenbekämpfung portrayed insurgents as political and racial bandits, criminalized to a greater degree than enemies of the state; moreover, violence against them was not constrained by the prevailing laws of warfare. Philip Blood explains how German forces embraced the Bandenbekämpfung doctrine, demonstrating the equal culpability of both the SS police forces and the "heroic" Waffen-SS combat arm and shattering the contrived postwar distinctions between them. He challenges the traditional view of Himmler as an armchair general and bureaucrat, exposing him as the driving force behind one of the most successful security campaigns in history, and delves into the contentious issue of the complicity of ordinary German police, soldiers, and citizens, as well as the citizens of occupied territories, in these state-sponsored manhunts. This book provokes new debates on the Nazi terrorization of Europe, the blind acquiescence of many, and the courageous resistance of the few.

A Fountain Sealed

Fanny Mendelssohn Hensel (1805-47), pianist and composer, maintained a prolific and witty correspondence with her younger brother Felix over the course of approximately 25 years, which is here presented in English translation, with the original German for reference. As the leader of a vibrant salon, Hensel deploys her critical prowess to describe Berlin musical life, including its conservative institutions and personalities, as well as to evaluate Felix's works-in-progress in detail. We also learn about Hensel's own compositions, her attitudes toward herself as a composer, and the significance of Felix's views on the formation of those attitudes. Hensel's letters provide a fascinating glimpse into the problems and challenges facing gifted women musicians in the nineteenth century. The 150 letters are drawn from the Green Books collection of letters addressed to Felix Mendelssohn, in the Bodleian Library, Oxford. Reviews-These letters reveal Fanny Mendelssohn to be a thoroughly fascinating individual, one whose special relationship to Felix would be enough to guarantee the interest of the documents. But we soon become engrossed with Fanny herself, as composer, as critic, as musical commentator and figure in the musical life of Berlin. To watch this world through her eyes is to watch it come alive through the wisdom, wit, and grace of a remarkable person. Citron has a gift for rendering the substance and spirit of these letters into charming and effective English prose that preserves something of the formality of nineteenth-century discourse together with the passion and spirit of Fanny Mendelssohn. Philip Gossett ...reading this volume is a pleasure, not just a musicological duty. Clifford Bartlett the volume contains penetrating and highly scholarly critical commentaries and is a valuable addition to mendelssohniana. J.R. Belanger, Choice, April 1988

The Letters of Fanny Hensel to Felix Mendelssohn

In *Mystics and Messiahs*--the first full account of cults and anti-cult scares in American history--Philip Jenkins shows that, contrary to popular belief, cults were by no means an invention of the 1960s. In fact, most of the frightening images and stereotypes surrounding fringe religious movements are traceable to the mid-nineteenth century when Mormons, Freemasons, and even Catholics were denounced for supposed ritualistic violence, fraud, and sexual depravity. But America has also been the home of an often hysterical anti-cult backlash. Jenkins offers an insightful new analysis of why cults arouse such fear and hatred both in the secular world and in mainstream churches, many of which were themselves originally regarded as cults. He argues that an accurate historical perspective is urgently needed if we are to avoid the kind of catastrophic confrontation that occurred in Waco or the ruinous prosecution of imagined Satanic cults that swept the country in the 1980s. Without ignoring genuine instances of aberrant behavior, *Mystics and Messiahs* goes beyond the vast edifice of myth, distortion, and hype to reveal the true characteristics of religious fringe movements and why they inspire such fierce antagonism.

The Dance of the Blessed Spirits

First published in 1986, *Independent Spirits* is about the intellectual world of the humbly-born in late nineteenth- and early twentieth-century Britain, focussing on plebeian, or working- and lower middle-class spiritualists. This book is an important study which throws light on the idealism and search for knowledge that were so central in plebeian circles and in certain, very important parts of the labour movement during the nineteenth and early twentieth centuries. This title will be of interest to students of history.

The Eastern Crisis

For imperialists, the concept of guardian is specifically to the armed forces that kept watch on the frontiers and in the heartlands of imperial territories. Large parts of Asia and Africa, and the islands of the Pacific and the Caribbean were imperial possessions. This book discusses how military requirements and North Indian military culture, shaped the cantonments and considers the problems posed by venereal diseases and alcohol, and the sanitary strategies pursued to combat them. The trans-border Pathan tribes remained an insistent problem in Indian defence between 1849 and 1947. The book examines the process by which the Dutch elite recruited military allies, and the contribution of Indonesian soldiers to the actual fighting. The idea of naval guardianship as expressed in the campaign against the South Pacific labour trade is examined. The book reveals the extent of military influence of the Schutztruppen on the political developments in the German protectorates in German South-West Africa and German East Africa. The U.S. Army, charged with defending the Pacific possessions of the Philippines and Hawaii, encountered a predicament similar to that of the mythological Cerberus. The regimentation of military families linked access to women with reliable service, and enabled the King's African Rifles to inspire a high level of discipline in its African soldiers, askaris. The book explains the political and military pressures which drove successive French governments to widen the scope of French military operations in Algeria between 1954 and 1958. It also explores gender issues and African colonial armies.

Mystics and Messiahs

In *The Heroic Earth*, David T. Murphy argues that geopolitical ideas were most dynamic and significant in Germany not during the Nazi era (1933-45) but in the democratic culture of the Weimar republic (1919-33). By helping to condition the German population to geopolitical ideas, which emphasized revision of the Versailles settlement and enlarging Germany's living space, geopolitics helped contribute to Nazi imperialism. From the defeat of Germany in 1918 until the rise of National Socialism in 1933, theories of geographical determinism enjoyed a broad currency in many fields of German public life. The ancient notion that environmental factors--climate, topography, resource distribution--shape society in significant ways was now applied in a radically determinist fashion to help Germans understand why they had lost the war and what they had to do to regain their place among the Great Powers. Under the

rubric of Geopolitik, politicians, teachers, writers and others argued that the key to Germany's past, and the hope for its future, lay in understanding geography's determining impact upon races, cultures, states, and warfare. Theories of geographical determinism shaped German thinking about politics, race, science, education, aesthetics, and many other subjects on the eve of the Nazi era. Challenging traditional historiography, Murphy argues that geopolitics faded in importance after Adolf Hitler came to power.

Independent Spirits

"Published a year before Lieber's code, this pamphlet contains several ideas that were incorporated into that work. Halleck's commission resonates with our current debates concerning the definition of 'enemy combatants' and prisoners of war. In the letter to Lieber that is reproduced as a preface Halleck states: 'The rebel authorities claim the right to send men, in the garb of peaceful citizens, to waylay and attack our troops, to burn bridges and houses, and to destroy property and persons within our lines. They demand such persons be treated as ordinary belligerents, and that when captured they have extended to them the same rights as other prisoners of war; they also threaten that if such persons be punished as marauders and spies, they will retaliate by executing our prisoners of war in their possession. I particularly request your view on these questions.'"--Lawbook Exchange.

With a Little Help from My Friends

... Polidoro has written--and written well--a saga of two Titans that is also a remarkable exploration of both superstition and obsession, at the lush twilight of the Edwardian era.--Baltimore Sun This is the story of an unusual friendship between two of the most intriguing characters of the early 20th century--renowned escape artist Harry Houdini and celebrated mystery writer Sir Arthur Conan Doyle (creator of Sherlock Holmes). Both men were fascinated by the occult practice of spiritualism, Houdini as an ardent skeptic who often publicly exposed fraudulent mediums and Conan Doyle as a true believer who became convinced that the dead could and did communicate with the living. Despite their differing perspectives the two men not only respected each other but became friends. The correspondence between them on the subject provides a fascinating glimpse not only into the personalities of two talented and interesting celebrities but also into a psychic phenomenon that is the ancestor of today's channeling craze. Based on original correspondence, photographs, and his own extensive research, Massimo Polidoro reconstructs this unusual friendship between a believer and a skeptic, which weathered mediums, seances, an apparition of Houdini's departed mother, automatic writing by Conan Doyle's wife, public debunkings, and hurt feelings. He also discusses the final rift that ended the friendship of the two strong-willed men. Fans of Conan Doyle, Houdini, magic, and the historical roots of the New Age will be delighted by this amazing story. Massimo Polidoro is executive director of the Italian Committee for the Investigation of Claims of the Paranormal, editor of *Scienza & Paranormale* (Science and the Paranormal), and author of twelve books on the paranormal.

Guardians of Empire

Mystic London; Or, Phases of Occult Life in the Metropolis

Carl Peters (1856-1918) ranked among Germany's most prominent imperialists in the Bismarckian and Wilhelmine periods. In the 1880s he emerged as a leader of the colonial movement and became known as the founder of Deutsch-Ostafrika, a region many Germans regarded as the pearl of their overseas possessions. In Nazi Germany he was revered as a precursor of Hitler and ascended retrospectively to new glory as a pioneer in the struggle for Lebensraum. This scholarly biography examines Peters's nationalist agenda and sheds light on his colonial expeditions into East Africa. It seeks to explain how this young academic who had written about Schopenhauer and metaphysics eventually became a skilful agitator for a German world empire.

The Occult in America

This book, first published in 2000, is a systematic analysis of German public opinion at the outbreak of the Great War and the first treatment of the myth of the 'spirit of 1914', which stated that in August 1914 all Germans felt 'war enthusiasm' and that this enthusiasm constituted a critical moment in

which German society was transformed. Jeffrey Verhey's powerful study demonstrates that the myth was historically inaccurate. Although intellectuals and much of the upper class were enthusiastic, the emotions and opinions of most of the population were far more complex and contradictory. The book further examines the development of the myth in newspapers, politics and propaganda, and the propagation and appropriation of this myth after the war. His innovative analysis sheds light on German experience of the Great War and on the role of political myths in modern German political culture.

The Heroic Earth

This book is a lively and provoking introduction to film theory. It is suitable for students from any discipline but is particularly aimed at students studying film and literature as it examines issues common to both subjects such as realism, illusionism, narration, point of view, style, semiotics, psychoanalysis and multiculturalism. It also includes coverage of theorists common to both, Barthes, Lacan and Bakhtin among others. Robert Stam, renowned for his clarity of writing, will also include studies of cinema specialists providing readers with a depth of reference not generally available outside the field of film studies itself. Other material covered includes film adaptations of works of literature and analogies between literary and film criticism.

Guerrilla Parties

This biography examines whether two cousins, Elsie Wright and Frances Griffiths, really witnessed and photographed fairies in the suburb of Cottingley in Bradford over 70 years ago. It questions why people such as Sir Arthur Conan Doyle and Edward Gardner were convinced that the photographs were genuine. This text reveals what the author discovered about the case of the Cottingley fairies, as he worked with the two cousins for six years for the purpose of his research, and found that some of their prevarications become confessions.

Carl Peters and German Imperialism 1856-1918

Examines the role of spiritualism in American cultural history.

The Spirit of 1914

Just when it seemed that Science and Reason had scored their greatest triumphs, the mid-nineteenth century witnessed an astonishing rebirth of occultism and anti-rationalism: the beginnings of the movement we now call New Age. A secret tradition of knowledge rejected by the Christian or Scientific establishments suddenly became emboldened to seek publicity and converts.

Film Theory

This is the first comprehensive study of the German colonial conquest of Tanzania between 1888 and 1904. Moving beyond the focus on German policy at the national level, the author highlights the local perspective on German colonialism as it was experienced by rural Tanzanians. In each region, the pre-colonial politics are analyzed to explain how the nature of German conquest and subsequent administration often reflected local political patterns and conflicts as much as it did German aims and objectives. The work examines the history and sociology of the German military in East Africa, largely composed of Africans, and how its organization reflected both German and African needs. The German military, Schutztruppe, is viewed as a rapidly evolving African institution that created new ethnic identities and social classes in its wake.

Itsy Bitsy Teenie Weenie Yellow Polka-Dot Bikini

This study traces the evolution of imperialist ideology in Germany from Bismarck in the mid-19th century through Hitler and the Third Reich. Although much has been written about the virulently racist and anti-communist ideologies of the Nazi party, this is the first book to treat Nazi imperialism as a separate ideology and set it within a sturdy theoretical framework. Smith contends that Nazi imperialism represented the last, ambitious attempt to integrate two century-old ideologies--the elite, pro-industrial Weltpolitik and the popular-based, pro-agrarian Lebensraum--into a single system. In fact, Smith argues that it was largely the way in which the Nazis attempted to reconcile these contradictory ideologies that explains Germany's disastrous policies during World War II. This wide-ranging study also contributes to the debates over several other aspects of German history, including German military aims in World War II, the continuity--or discontinuity--of German policy from Bismarck to Hitler, and the relation between ideology and social-political life.

The Herero-German war led to the destruction of Herero society in all of its pre-war facets. Yet Herero society re-emerged, re-organizing itself around the structures and beliefs of the German colonial army and Rhenish missionary activity. Taking advantage of the South African invasion of Namibia in World War I the Herero established themselves in areas of their own choosing. The effective re-occupation of land by the Herero forced the new colonial state, anxious to maintain peace and cut costs, to come to terms with the existence of Herero society. The study ends in 1923 when the death and funeral of Samuel Maherero - first paramount of the Herero and then resistance leader - the catalyst that brought the disparate groups of Herero together to establish a single unitary Herero identity. Traum Und Telepathie

This volume draws on the records of the German Colonial Office to portray the motivations behind the German occupation of Namibia and the consequent popular uprisings of 1904-7. The result is a critique of the impact of colonialism on this part of Africa.

In Search of White Crows

This book, which was first published in 1988, deals with the neglected history of the lowest layers of German society, of marginal, outcast and deviant groups such as arsonists, witches, bandits, infanticides, poachers, murderers, prostitutes, vagrants and thieves, from the end of the thirteenth century to the middle of the twentieth. This book is ideal for students of history, particularly the German history.
