Russell Simmons

Biography of early hip-hop mogul Russell Simmons.

Reach

A timely collection of personal essays by black men from all walks of life shares their inspiring stories and views about better community engagement, offering contributions by such figures as Al Sharpton, John Legend and Isiah Thomas. Original.

The Meaning of Success

The Meaning of Success: Insights from Women at Cambridge makes a compelling case for a more inclusive definition of success. It argues that in order to recognise, reward and realise the talents of both women and men, a more meaningful definition of success is needed. Practical ways of achieving this are explored through interviews with female role models at the University of Cambridge. First-person stories bring alive the achievements and challenges women experience in their working lives, and the effect gender has on careers. The book stimulates a debate about how to bring about a more inclusive working environment.

The Next Big Story

From top CNN anchor and special correspondent Soledad O'Brien comes a highly personal look at her biggest reporting moments from Hurricane Katrina, the tsunami in Southeast Asia, the devastating Haiti earthquake, and to the historic 2008 U.S. elections and high profile interviews with everyday Americans. Drawing on her own unique background as well as her experiences at the front lines of the most provocative issues in today's society, and from her work on the acclaimed documentaries Black

in America and Latino in America, O'Brien offers her candid, clear-eyed take on where we are as a country and where we're going. What emerges is both an inspiring message of hope and a glimpse into the heart and soul of one of America's most straight-talking reporters.

Behavioral Finance: The Second Generation

Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

Rewire Your Brain

How to rewire your brain to improve virtually every aspect of your life-based on the latest research in neuroscience and psychology on neuroplasticity and evidence-based practices Not long ago, it was thought that the brain you were born with was the brain you would die with, and that the brain cells you had at birth were the most you would ever possess. Your brain was thought to be "hardwired" to function in predetermined ways. It turns out that's not true. Your brain is not hardwired, it's "softwired" by experience. This book shows you how you can rewire parts of the brain to feel more positive about your life, remain calm during stressful times, and improve your social relationships. Written by a leader in the field of Brain-Based Therapy, it teaches you how to activate the parts of your brain that have been underactivated and calm down those areas that have been hyperactivated so that you feel positive about your life and remain calm during stressful times. You will also learn to improve your memory, boost your mood, have better relationships, and get a good night sleep. Reveals how cutting-edge developments in neuroscience, and evidence-based practices can be used to improve your everyday life Other titles by Dr. Arden include: Brain-Based Therapy-Adult, Brain-Based Therapy-Child, Improving Your Memory For Dummies and Heal Your Anxiety Workbook Dr. Arden is a leader in integrating the new developments in neuroscience with psychotherapy and Director of Training in Mental Health for Kaiser Permanente for the Northern California Region Explaining exciting new developments in neuroscience and their applications to daily living, Rewire Your Brain will guide you through the process of changing your brain so you can change your life and be free of self-imposed limitations.

Ebony

EBONY is the flagship magazine of Johnson Publishing. Founded in 1945 by John H. Johnson, it still maintains the highest global circulation of any African American-focused magazine.

The Time Is Now

TEAM-UP, the National Task Force to Elevate African American representation in Undergraduate Physics & Astronomy was chartered and funded by the American Institute of Physics (AIP) Board of Directors to examine the reasons for the persistent under-representation of African Americans in physics and astronomy in the US as measured by bachelor's degrees in these fields. This book is their detailed report which include recommendations.

Display of Power

Daymond John was inexperienced. He was uneducated. With no formal business training to speak of, he was just a hustler from Hollis with a pipedream of making it big. That was all before he turned the world of fashion on its head. And now, more than a decade after FUBU's wildly successful launch, founder and CEO Daymond John is out to tell the story of the FUBU fashion empire. More than just another amazing American success story, Display of Power tells how four ordinary guys from Queens, New York, rose from street corners to corner offices and became the greatest trendsetters of our

generation. Daymond John lays it all out on the line--his secrets to success, his triumphs, and his utter failures--to show what it takes to harness and display the power that resides in us all. Part autobiography and part blueprint for success, *Display of Power* is a purely compelling read for anyone who wants something bigger out of life.

The Second Machine Age: Work, Progress, and Prosperity in a Time of Brilliant Technologies

A pair of technology experts describe how humans will have to keep pace with machines in order to become prosperous in the future and identify strategies and policies for business and individuals to use to combine digital processing power with human ingenuity.

Mercedes Ladies

Based on a true story, this gripping account of hip hop's early years follows Sherri Sher, who, growing up in the South Bronx during the 1970s and caring for her eleven siblings, forms an all-girl rap group and discovers that it is hard to earn respect in a male-dominated world. Original.

That's the Joint!

Spanning 25 years of serious writing on hip-hop by noted scholars and mainstream journalists, this comprehensive anthology includes observations and critiques on groundbreaking hip-hop recordings.

An Abolitionist's Handbook

From the Co-Founder of the #BlackLivesMatter, a bold, innovative, and humanistic approach to being a modern-day abolitionist In *An Abolitionist's Handbook*, New York Times bestselling author, artist, and activist Patrisse Cullors charts a framework for how everyday artists, activists, and organizers can effectively fight for an abolitionist present and future. Filled with relatable pedagogy on the history of abolition, a reimagining of what reparations look like for Black lives, and real-life anecdotes from Cullors, *An Abolitionist's Handbook* asks us to lead with love, fierce compassion, and precision. Readers will learn the 12 steps to change yourself and the world. *An Abolitionist's Handbook* is for those who are looking to reimagine a world where communities are treated with dignity, care and respect. It gives us permission to move away from cancel culture and into visioning change and healing.

Super Rich

The visionary entrepreneur and author of the New York Times bestseller *Do You!* delivers a powerful guide to true abundance. Russell Simmons knows firsthand that wealth is rooted in much more than the stock market. True wealth has more to do with what's in your heart than what's in your wallet. Using this knowledge, Simmons became one of America's shrewdest entrepreneurs, achieving a level of success that most investors only dream about. No matter how much material gain he accumulated, he never stopped lending a hand to those less fortunate. In *Super Rich*, Simmons uses his rare blend of spiritual savvy and street-smart wisdom to offer a new definition of wealth-and share timeless principles for developing an unshakable sense of self that can weather any financial storm. As Simmons says, "Happy can make you money, but money can't make you happy." In straight-talking inspiring chapters, Simmons provides unforgettable true stories from his own road to riches, delving into the principles and practices that have kept him energized and focused. Whether we're in the boardroom or on a yoga mat, Simmons says, we have to be able to listen to our inner voices. Finding our unique potential, we can make the right moves, ruled not by money but by the joy of conscientious living and giving. With these philosophies and more, Simmons brings us a stimulus package of consciousness that will never run dry, backed by the power of the higher self. [Watch a Video](#)

Success Through Stillness

Master entrepreneur, original hip-hop mogul, and New York Times bestselling author Russell Simmons shares the most fundamental key to success—meditation—and guides readers to use stillness as a powerful tool to access their potential. In the New York Times bestseller *Super Rich*, Russell Simmons proved that to be rich is more than just having money in the bank—wealth is about balance, joy, and conscientious living. In *Success Through Stillness*, Simmons shows the connection between inner peace and outward success through interviews with other successful leaders in various industries, and how learning to be still has been instrumental in his own career. Simmons attributes his meditation practice with changing his life for the better and says that there is no “bad” way to meditate, only different

forms for different people. In this highly anticipated new book, Russell Simmons guides readers into finding greater clarity and focus, and explains how to be healthier in both mind and body. Simmons breaks down what he's learned from masters of meditation into a guide that is accessible to those unfamiliar with the practice.

Black Newspapers Index

This report--a joint effort of the Federal Reserve's Community Affairs function and the Brookings Institution's Metropolitan Policy Program--examines the issue of concentrated poverty and profiles 16 high-poverty communities from across the country, including immigrant gateway, Native American, urban, and rural communities. Through these case studies, the report contributes to our understanding of the dynamics of poor people living in poor communities, and the policies that will be needed to bring both into the economic mainstream. It is not the intention of this publication to explain poverty causation. Instead, the goal is to add texture to our understanding of where and how concentrated poverty exists, by studying new areas and by interviewing local stakeholders, including residents, community leaders, and government representatives, to understand how concentrated poverty affects both individuals and communities. The report begins with "Concentrated Poverty in America: An Overview" (Alan Berube) and "Introduction to the Case Studies" (Carolina Reid). It then presents the following 16 case studies: (1) Fresno, California: the West Fresno neighborhood (Naomi Cytron); (2) Cleveland, Ohio: the Central neighborhood (Lisa Nelson); (3) Miami, Florida: the Little Haiti neighborhood (Ana Cruz-Taura and Jessica LeVeon Farr); (4) Martin County, Kentucky (Jeff Gatica); (5) Blackfeet Reservation, Montana (Sandy Gerber, Michael Grover, and Sue Woodrow); (6) Greenville, North Carolina: the West Greenville neighborhood (Carl Neel); (7) Atlantic City, New Jersey: the Bungalow Park/Marina District area (Harriet Newburger, John Wackes, Keith Rolland, and Anita Sands); (8) Austin, Texas: the East Austin neighborhood (Elizabeth Sobel); (9) McKinley County, New Mexico: Crownpoint (Steven Shepelwich and Roger Zalneraitis); (10) McDowell County, West Virginia (Courtney Anderson Mailey); (11) Albany, Georgia: the East Albany neighborhood (Jessica LeVeon Farr and Sibyl Slade); (12) El Paso, Texas: the Chamizal neighborhood (Roy Lopez); (13) Springfield, Massachusetts: Old Hill, Six Corners, and the South End neighborhoods (DeAnna Green); (14) Rochester, New York: the Northern Crescent neighborhoods (Alexandra Forter Sirota and Yazmin Osaki); (15) Holmes County, Mississippi (Ellen Eubank); and (16) Milwaukee, Wisconsin: the Northwest neighborhood (Jeremiah Boyle). Following these case studies is "Learning from Concentrated Poverty in America: A Synthesis of Themes from the Case Studies" (Alan Berube, David Erickson, and Carolina Reid). Appended to this report are: (A) References for Comparison Statistics Tables; (B) Literature Review: Federal Reserve System Poverty-Related Research; (C) References for Overview in Alphabetical Order (by First Author); and (D) Photo Credits. (Individual case studies contain tables, figures, and footnotes.).

The Enduring Challenge of Concentrated Poverty in America

This lively, practical text presents a fresh and comprehensive approach to doing qualitative research. The book offers a unique balance of theory and clear-cut choices for customizing every phase of a qualitative study. A scholarly mix of classic and contemporary studies from multiple disciplines provides compelling, field-based examples of the full range of qualitative approaches. Readers learn about adaptive ways of designing studies, collecting data, analyzing data, and reporting findings. Key aspects of the researcher's craft are addressed, such as fieldwork options, the five phases of data analysis (with and without using computer-based software), and how to incorporate the researcher's "declarative" and "reflective" selves into a final report. Ideal for graduate-level courses, the text includes: * Discussions of ethnography, grounded theory, phenomenology, feminist research, and other approaches. * Instructions for creating a study bank to get a new study started. * End-of-chapter exercises and a semester-long, field-based project. * Quick study boxes, research vignettes, sample studies, and a glossary. * Previews for sections within chapters, and chapter recaps. * Discussion of the place of qualitative research among other social science methods, including mixed methods research.

Qualitative Research from Start to Finish, First Edition

Globalization and neoliberalism : dominating disciplines -- Globalization's dimensions / Dennis Conway and Nik Heynen -- The ascendancy of neoliberalism and emergence of contemporary globalization / Dennis Conway and Nik Heynen -- Globalization's many dimensions -- Globalization's macroeconomic faces -- Global financial architecture transitions : mutations through roll-back neoliberalism to technocratic fixes / Adam Tickell -- Multi-local global corporations : new reach -- same core locations / Susan

M. Walcott -- Systems of production and international competitiveness : prospects for the developing nations / Daniel C. Knudsen and Molly Kotlen -- Globalization's unruly spaces -- Globalization of labor : increasing complexity, more unruly / Dennis Conway -- Unruly spaces : globalization and transnational criminal economies / Christian Allen -- Globalization's geopolitical faces -- Geo-political globalization : from world systems to global city-systems / Dennis Conway and Richard Wolfel -- Globalization has a home address : the geopolitics of globalization / John Agnew -- The globalization of culture : geography and the industrial production of culture / Don Mitchell and Clayton Rosati -- The globalization of fear : fear as a technology of governance / Byron Miller -- Alternative visions: constructive, democratic and hopeful -- The neoliberalization of the global environment / Nik Heynen and Jeremia Njeru -- Globalization's cultural challenges : homogenization, hybridization and heightened identity / Nanda R. Shrestha and Dennis Conway -- Globalization from below : coordinating global resistance, alternative social forums, civil society, and grassroots networks / Dennis Conway -- Towards fair globalization : opposing neoliberal destruction, relying on democratic institutions and local empowerment, and sustaining human development / Dennis Conway and Nik Heynen.

Globalization's Contradictions

Although leadership theories have evolved to reflect changing social contexts, many remain silent on issues of equity, diversity, and social justice. *Diversity and Leadership*, by Jean Lau Chin and Joseph E. Trimble, offers a new paradigm for examining leadership by bringing together two domains—research on leadership and research on diversity—to challenge existing notions of leadership and move toward a diverse and global view of society and its institutions. This compelling book delivers an approach to leadership that is inclusive, promotes access for diverse leaders, and addresses barriers that narrowly confine our perceptions and expectations of leaders. Redefining leadership as global and diverse, the authors impart new understanding of who our leaders are, the process of communication, exchange between leaders and their members, criteria for selecting, training, and evaluating leaders in the 21st century, and the organizational and societal contexts in which leadership is exercised.

Diversity and Leadership

Since the end of legal segregation in schools, most research on educational inequality has focused on economic and other structural obstacles to the academic achievement of disadvantaged groups. But in *Contesting Stereotypes and Creating Identities*, a distinguished group of psychologists and social scientists argue that stereotypes about the academic potential of some minority groups remain a significant barrier to their achievement. This groundbreaking volume examines how low institutional and cultural expectations of minorities hinder their academic success, how these stereotypes are perpetuated, and the ways that minority students attempt to empower themselves by redefining their identities. The contributors to *Contesting Stereotypes and Creating Identities* explore issues of ethnic identity and educational inequality from a broad range of disciplinary perspectives, drawing on historical analyses, social-psychological experiments, interviews, and observation. Meagan Patterson and Rebecca Bigler show that when teachers label or segregate students according to social categories (even in subtle ways), students are more likely to rank and stereotype one another, so educators must pay attention to the implicit or unintentional ways that they emphasize group differences. Many of the contributors contest John Ogbu's theory that African Americans have developed an "oppositional culture" that devalues academic effort as a form of "acting white." Daphna Oyserman and Daniel Brickman, in their study of black and Latino youth, find evidence that strong identification with their ethnic group is actually associated with higher academic motivation among minority youth. Yet, as Julie Garcia and Jennifer Crocker find in a study of African-American female college students, the desire to disprove negative stereotypes about race and gender can lead to anxiety, low self-esteem, and excessive, self-defeating levels of effort, which impede learning and academic success. The authors call for educational institutions to diffuse these threats to minority students' identities by emphasizing that intelligence is a malleable rather than a fixed trait. *Contesting Stereotypes and Creating Identities* reveals the many hidden ways that educational opportunities are denied to some social groups. At the same time, this probing and wide-ranging anthology provides a fresh perspective on the creative ways that these groups challenge stereotypes and attempt to participate fully in the educational system.

Contesting Stereotypes and Creating Identities

Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and

computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

Drawing Futures

"I wanted to write a very scholarly book where a high school student or average man or woman would find it to be a compelling read," Simmons said. "What I had found in my research was that most books written on validity of the Bible were very scholarly, but there was nothing out there for average people."
- Richard E. Simmons III

Reliable Truth

CMH Pub 50-1-1. Defense Studies Series. Discusses the evolution of the services' racial policies and practices between World War II and 1965 during the period when black servicemen and women were integrated into the Nation's military units.

Integration of the Armed Forces, 1940-1965

When a career-ending injury left elite athlete and professional football player Lewis Howes out of work and living on his sister's couch, he decided he needed to make a change for the better. He started by reaching out to people he admired, searching for mentors, and applying his past coaches' advice from sports to life off the field. Lewis did more than bounce back: He built a multimillion-dollar online business and is now a sought-after business coach, speaker, and podcast host. In *The School of Greatness*, Howes shares the essential tips and habits he gathered in interviewing "the greats" on his wildly popular podcast of the same name. In discussion with people like Olympic gold medalist Shawn Johnson and Pencils of Promise CEO Adam Braun, Howes figured out that greatness is unearthed and cultivated from within. The masters of greatness are not successful because they got lucky or are innately more talented, but because they applied specific habits and tools to embrace and overcome adversity in their lives. A framework for personal development, *The School of Greatness* gives you the tools, knowledge, and actionable resources you need to reach your potential. Howes anchors each chapter with a specific lesson he culled from his greatness "professors" and his own experiences to teach you how to create a vision, develop hustle, and use dedication, mindfulness, joy, and love to reach goals. His lessons and practical exercises prove that anyone is capable of achieving success and that we can all strive for greatness in our everyday lives.

American Slavery as it is

The official record of America's first space station, this book from the NASA History Series chronicles the Skylab program from its planning during the 1960s through its 1973 launch and 1979 conclusion. Definitive accounts examine the project's achievements as well as its use of discoveries and technology developed during the Apollo program. 1983 edition.

Stigma and Social Welfare

Would you like to develop some strategies to manage knowledge deficits, near misses and mistakes in practice? Are you looking to improve your reflective writing for your portfolio, essays or assignments? Reflective practice enables us to make sense of, and learn from, the experiences we have each day and if nurtured properly can provide skills that will you come to rely on throughout your nursing career. Using clear language and insightful examples, scenarios and case studies the third edition of this popular and bestselling book shows you what reflection is, why it is so important and how you can use it to improve your nursing practice. Key features: · Clear and straightforward introduction to reflection

directly written for nursing students and new nurses · Full of activities designed to build confidence when using reflective practice · Each chapter is linked to relevant NMC Standards and Essential Skills Clusters

The School of Greatness

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Living and Working in Space

TO PRESUME to multiply books in this day of excellent writers and learned book-makers is a rash thing perhaps for a novice. It may even be a presumption that shall be met by the production itself being driven from the market by the keen, searching criticism of not only the reviewers, but less noted objectors. And yet there are books that meet a ready sale because they seem like "Ishmaelites"—against everybody and everybody against them. Whether this work shall ever accomplish the design of the author may not at all be determined by its sale. While I hope to secure some pecuniary gain that I may accompany it with a companion illustrating what our women have done, yet by no means do I send it forth with the sordid idea of gain. I would rather it would do some good than make a single dollar, and I echo the wish of "Abou Ben Adhem," in that sweet poem of that name, written by Leigh Hunt. The angel was writing at the table, in his vision. The names of those who love the Lord. Abou wanted to know if his was there—and the angel said "No." Said Abou, I pray thee, then, write me as one that loves his fellow-men. That is what I ask to be recorded of me. The angel wrote and vanished. The next night It came again, with a great awakening light. And showed the names whom love of God had blessed. And lo! Ben Adhem's name led all the rest. I desire that the book shall be a help to students, male and female, in the way of information concerning our great names. I have noticed in my long experience as a teacher, that many of my students were wofully ignorant of the work of our great colored men—even ignorant of their names. If they knew their names, it was some indefinable something they had done—just what, they could not tell. If in a slight degree I shall here furnish the data for that class of rising men and women, I shall feel much pleased. Herein will be found many who had severe trials in making their way through schools of different grades. It is a suitable book, it is hoped, to be put into the hands of intelligent, aspiring young people everywhere, that they might see the means and manners of men's elevation, and by this be led to undertake the task of going through high schools and colleges. If the persons herein mentioned could rise to the exalted stations which they have and do now hold, what is there to prevent any young man or woman from achieving greatness? Many, yea, nearly all these came from the loins of slave fathers, and were the babes of women in bondage, and themselves felt the leaden hand of slavery on their own bodies; but whether slaves or not, they suffered with their brethren because of color. That "sum of human villainies" did not crush out the life and manhood of the race. I wish the book to show to the world—to our oppressors and even our friends—that the Negro race is still

alive, and must possess more intellectual vigor than any other section of the human family, or else how could they be crushed as slaves in all these years since 1620, and yet to-day stand side by side with the best blood in America, in white institutions, grappling with abstruse problems in Euclid and difficult classics, and master them? Was ever such a thing seen in another people? Whence these lawyers, doctors, authors, editors, divines, lecturers, linguists, scientists, college presidents and such, in one quarter of a century?

Reflective Practice in Nursing

'Richly documented and convincingly presented' -- New Society Mods and Rockers, skinheads, video nasties, designer drugs, bogus asylum seekers and hoodies. Every era has its own moral panics. It was Stanley Cohen's classic account, first published in the early 1970s and regularly revised, that brought the term 'moral panic' into widespread discussion. It is an outstanding investigation of the way in which the media and often those in a position of political power define a condition, or group, as a threat to societal values and interests. Fanned by screaming media headlines, Cohen brilliantly demonstrates how this leads to such groups being marginalised and vilified in the popular imagination, inhibiting rational debate about solutions to the social problems such groups represent. Furthermore, he argues that moral panics go even further by identifying the very fault lines of power in society. Full of sharp insight and analysis, *Folk Devils and Moral Panics* is essential reading for anyone wanting to understand this powerful and enduring phenomenon. Professor Stanley Cohen is Emeritus Professor of Sociology at the London School of Economics. He received the Sellin-Glueck Award of the American Society of Criminology (1985) and is on the Board of the International Council on Human Rights. He is a member of the British Academy.

Parenting Matters

The Oxford Handbook of the Welfare State is the authoritative and definitive guide to the contemporary welfare state. In a volume consisting of nearly fifty newly-written chapters, a broad range of the world's leading scholars offer a comprehensive account of everything one needs to know about the modern welfare state. The book is divided into eight sections. It opens with three chapters that evaluate the philosophical case for (and against) the welfare state. Surveys of the welfare state's history and of the approaches taken to its study are followed by four extended sections, running to some thirty-five chapters in all, which offer a comprehensive and in-depth survey of our current state of knowledge across the whole range of issues that the welfare state embraces. The first of these sections looks at inputs and actors (including the roles of parties, unions, and employers), the impact of gender and religion, patterns of migration and a changing public opinion, the role of international organisations and the impact of globalisation. The next two sections cover policy inputs (in areas such as pensions, health care, disability, care of the elderly, unemployment, and labour market activation) and their outcomes (in terms of inequality and poverty, macroeconomic performance, and retrenchment). The seventh section consists of seven chapters which survey welfare state experience around the globe (and not just within the OECD). Two final chapters consider questions about the global future of the welfare state. The individual chapters of the Handbook are written in an informed but accessible way by leading researchers in their respective fields giving the reader an excellent and truly up-to-date knowledge of the area under discussion. Taken together, they constitute a comprehensive compendium of all that is best in contemporary welfare state research and a unique guide to what is happening now in this most crucial and contested area of social and political development.

Men of Mark

The last quarter century has seen a broad, but qualified, belief in the efficacy of market organization slide into an unyielding dogma that the market, as unconstrained as possible, is the best way to govern virtually all economic activity. However, unrestricted markets can often lead to gross inequalities in access to important resources, the creation of monopolies, and other negative effects that require regulation or public subsidies to remedy. In *The Limits of Market Organization*, editor Richard Nelson and a group of economic experts take a more sophisticated look at the public/private debate, noting where markets are useful, where they can be effective only if augmented by non-market mechanisms, and where they are simply inappropriate. *The Limits of Market Organization* examines the appropriateness of markets in four areas where support for privatization varies widely: human services, public utilities, science and technology, and activities where market involvement is altogether inappropriate. Richard Murnane makes the case that a social interest in providing equal access to high quality

education means that for school voucher plans to be effective, substantial government oversight is necessary. Federal involvement in a transcontinental railroad system was initially applauded, but recent financial troubles at Amtrak have prompted many to call for privatization of the rails. Yet contributor Elliot Sclar argues that public subsidies are the only way to maintain this vital part of the American transportation infrastructure. While market principles can promote competition and foster innovation, applying them in certain areas can actually stifle progress. Nelson argues that aggressive patenting has hindered scientific research by restricting access to tools and processes that could be used to generate new findings. He suggests that some kind of exception to patent law should be made for scientists who seek to build off of patented findings and then put their research results into the public domain. In other spheres, market organization is altogether unsuitable. Legal expert Richard Briffault looks at one such example—the democratic political process—and profiles the successes and failures of campaign finance reform in preventing parties from buying political influence. This important volume shows that market organization has its virtues, but also its drawbacks. Just as regulation can be over-applied, so too can market principles. *The Limits of Market Organization* encourages readers to think more discriminately about the march toward privatization, and to remember the importance of public institutions.

Speech & Language Processing

Professor Michael Edgeworth McIntyre is an eminent scientist who has also had a part-time career as a musician. In this book he offers an extraordinary synthesis, revealing the many deep connections between science, music, and mathematics. He avoids equations and technical jargon. The connections are deep in the sense of being embedded in our very nature, rooted in biological evolution over hundreds of millions of years. Michael guides us through biological evolution, perception psychology, and even unconscious science and mathematics, all the way to the scientific uncertainties about the climate crisis. He also has a message of hope for the future. Contrary to popular belief, he holds that biological evolution has given us not only the nastiest, but also the most compassionate and cooperative parts of human nature. This insight comes from recognizing that biological evolution is far more than a simple competition between selfish genes. Instead, he argues, in some ways it is more like the turbulent, eddying flow in a river or in an atmospheric jet stream, a complex process spanning a vast range of timescales. Professor McIntyre is a Fellow of the Royal Society of London (FRS) and has long been interested in how different branches of science can better communicate with each other, and with the public. His work harnesses aspects of neuroscience and psychology that point toward the deep 'lucidity principles' that underlie skilful communication, principles related to the way music works — music of any genre. This Second Edition sharpens the previous discussion of communication skills and their importance for today's great problems, ranging from the widely discussed climate crisis to the need to understand the strengths and weaknesses of artificial intelligence.

Folk Devils and Moral Panics

Master entrepreneur, original hip-hop mogul, and three-time New York Times bestselling author Russell Simmons offers an inspiring guide to the benefits of conscious eating and veganism. In the New York Times bestseller *Success Through Stillness*, Russell Simmons shared how meditation can be used as a powerful tool to access potential in all aspects of life, having seen himself how achieving inner peace led to outward success. In *The Happy Vegan*, Simmons shares how once he started practicing yoga and meditation, he became more conscious of his choices, particularly the choices he made regarding his diet. Simmons first adopted a vegetarian and then vegan diet, and almost immediately began to experience the physical, mental, and emotional benefits of eating green and clean. He delves into research about mindful eating, the links between stress and poor eating habits, the importance of listening to your body, the well-documented problems associated with eating animal products and processed foods, along with tips on how to transition to a vegan diet. Drawing on his own experience, the experiences of others, and science and research on the health benefits of conscious eating and veganism, *The Happy Vegan* is an accessible and inspiring guide to help others make the move toward a vegan diet and a more successful, focused, and purposeful life.

The Oxford Handbook of the Welfare State

From the contents: 00I. Participatory art now 01. The normalisation of participatory art 0II. What is participatory art? 02. Concepts 03. Definitions 04. The intentions of participatory art 05. Making history 08. Deep roots 09. Community art and the cultural revolution (1968 to 1988) 010. Participatory art and appropriation (1988 to 2008).

The Limits of Market Organization

"... an important intervention in the conversation around social and ecological sustainability that draws on both micromarketing and macromarketing scholarship to help the reader understand the challenges with illustrations from insightful cases both from emerging and developed economies. This compilation should be essential reading for the discerning student of sustainable consumption and production."

-- Professor Pierre McDonagh, Associate Editor, Journal of Macromarketing (USA); Professor of Critical Marketing & Society, University of Bath, UK Experts in the field of economics, management science, and particularly in the marketing domain have always been interested in and acknowledged the importance of sustaining profitable businesses while incorporating societal and environmental concerns; however, the level of existing literature and availability of teaching cases reflect a dearth of real case studies, especially those focused on marketing for social good. This book of actual case studies will address that need. In addition, this book is important and timely in providing a case book for instructors (those in both industry and academia) to help them in teaching and training the next generation of leaders through corporate training and universities. Currently, marketing for social good is increasingly becoming a part of most curriculums under the umbrella of different titles, such as social marketing, green marketing, and sustainability marketing. The relevance of these studies is increasing across the globe. This book is composed of long and short real cases with varying complexity in different sectors. This case book will also cover some review articles for an overview of the recent developments in the study area. With these case studies, collections of questions, teaching materials, and real-life marketing scenarios, this book offers a unique source of knowledge to marketing professionals, students, and educators across the world. The main objective of this case book is to understand the applicability of marketing science (marketing for social good context, such as social marketing and sustainability marketing) in internet marketing related to e-buying behavior and e-WOM. In addition, it illustrates the various types of existing marketing practices that are relevant from both theoretical and practical points of view in this electronic era, as well as discussing other non-electronic marketing practices and focusing on consumer buying behavior. As a result, marketing managers can treat their customers according to their desired value. This book particularly explores the possibilities and advantages created by social marketing and sustainability marketing through the presentation of thorough review articles and case studies. This case book helps corporate training centers and universities with compact teaching reference materials in their relevant courses.

Science, Music, And Mathematics: The Deepest Connections (Second Edition)

With a crackling wit and a deep humanity, (Ken Robinson) urges us to ignore the naysayers, bypass the crowd and find the place where our talents and desires intersect

The Happy Vegan

A Restless Art

Crossing the Chasm

Here is the bestselling guide that created a new game plan for marketing in high-tech industries. Crossing the Chasm has become the bible for bringing cutting-edge products to progressively larger markets. This edition provides new insights into the realities of high-tech marketing, with special emphasis on the Internet. It's essential reading for anyone with a stake in the world's most exciting marketplace.

Crossing the Chasm, 3rd Edition

The bible for bringing cutting-edge products to larger markets—now revised and updated with new insights into the realities of high-tech marketing In Crossing the Chasm, Geoffrey A. Moore shows that in the Technology Adoption Life Cycle—which begins with innovators and moves to early adopters, early majority, late majority, and laggards—there is a vast chasm between the early adopters and the early majority. While early adopters are willing to sacrifice for the advantage of being first, the early majority waits until they know that the technology actually offers improvements in productivity. The challenge for innovators and marketers is to narrow this chasm and ultimately accelerate adoption across every segment. This third edition brings Moore's classic work up to date with dozens of new examples of successes and failures, new strategies for marketing in the digital world, and Moore's most current insights and findings. He also includes two new appendices, the first connecting the ideas in Crossing the Chasm to work subsequently published in his Inside the Tornado, and the second presenting his recent groundbreaking work for technology adoption models for high-tech consumer markets.

Crossing the Quality Chasm

Second in a series of publications from the Institute of Medicine's Quality of Health Care in America project Today's health care providers have more research findings and more technology available to them than ever before. Yet recent reports have raised serious doubts about the quality of health care in America. Crossing the Quality Chasm makes an urgent call for fundamental change to close the quality gap. This book recommends a sweeping redesign of the American health care system and provides overarching principles for specific direction for policymakers, health care leaders, clinicians, regulators, purchasers, and others. In this comprehensive volume the committee offers: A set of performance expectations for the 21st century health care system. A set of 10 new rules to guide patient-clinician relationships. A suggested organizing framework to better align the incentives inherent in payment and accountability with improvements in quality. Key steps to promote evidence-based practice and

strengthen clinical information systems. Analyzing health care organizations as complex systems, *Crossing the Quality Chasm* also documents the causes of the quality gap, identifies current practices that impede quality care, and explores how systems approaches can be used to implement change.

Crossing the Global Quality Chasm

In 2015, building on the advances of the Millennium Development Goals, the United Nations adopted Sustainable Development Goals that include an explicit commitment to achieve universal health coverage by 2030. However, enormous gaps remain between what is achievable in human health and where global health stands today, and progress has been both incomplete and unevenly distributed. In order to meet this goal, a deliberate and comprehensive effort is needed to improve the quality of health care services globally. *Crossing the Global Quality Chasm: Improving Health Care Worldwide* focuses on one particular shortfall in health care affecting global populations: defects in the quality of care. This study reviews the available evidence on the quality of care worldwide and makes recommendations to improve health care quality globally while expanding access to preventive and therapeutic services, with a focus in low-resource areas. *Crossing the Global Quality Chasm* emphasizes the organization and delivery of safe and effective care at the patient/provider interface. This study explores issues of access to services and commodities, effectiveness, safety, efficiency, and equity. Focusing on front line service delivery that can directly impact health outcomes for individuals and populations, this book will be an essential guide for key stakeholders, governments, donors, health systems, and others involved in health care.

The Infinite Staircase

NAUTILUS BOOK AWARD GOLD MEDALIST — BODY, MIND, SPIRIT PRACTICES “Combining an extraordinary range of scholarship with an accessible and entertaining writing style, *The Infinite Staircase* . . . provides a coherent and unified platform for a full human life.” —Midwest Book Review In this bold new book, high-tech’s best-known strategist makes a seminal contribution to the search for meaning in a secular era. Two questions fundamental to human existence have always been the metaphysical “where do I fit in the grand scheme of things?” and the ethical “how should I behave?” Religion is no longer a source of answers for many people, and nothing has replaced it. Moore uses his signature framework-based approach to answer these questions, taking us on an intellectual roller coaster ride through physics, chemistry, biology, the social sciences and the humanities. Along the way, he builds a metaphorical ladder that leads from the big bang to the need for ethical action in our daily lives. Combining an extraordinary range of scholarship with an accessible and entertaining writing style, *The Infinite Staircase: What the Universe Tells Us About Life, Ethics, and Mortality* provides a coherent and unified platform for a full human life.

Crossing the Chasm

Here is the bestselling guide that created a new game plan for marketing in high-tech industries. *Crossing the Chasm* has become the bible for brining cutting-edge products to progressively larger markets. This revised and updated edition provides new insights into the realities of high-tech marketing, with special emphasis on the Internet. It's essential reading for anyone with a stake in the world's most exciting marketplace.

Crossing the Chasm

Learn to design, build, and scale products consumers can't get enough of How do today's most successful tech companies Amazon, Google, Facebook, Netflix, Tesla design, develop, and deploy the products that have earned the love of literally billions of people around the world? Perhaps surprisingly, they do it very differently than most tech companies. In *INSPIRED*, technology product management thought leader Marty Cagan provides readers with a master class in how to structure and staff a vibrant and successful product organization, and how to discover and deliver technology products that your customers will love and that will work for your business. With sections on assembling the right people and skillsets, discovering the right product, embracing an effective yet lightweight process, and creating a strong product culture, readers can take the information they learn and immediately leverage it within their own organizations dramatically improving their own product efforts. Whether you're an early-stage startup working to get to product/market fit, or a growth-stage company working to scale your product organization, or a large, long-established company trying to regain your ability to consistently deliver new value for your customers, *INSPIRED* will take you and your product organiza-

tion to a new level of customer engagement, consistent innovation, and business success. Filled with the author's own personal stories and profiles of some of today's most-successful product managers and technology-powered product companies, including Adobe, Apple, BBC, Google, Microsoft, and Netflix INSPIRED will show you how to turn up the dial of your own product efforts, creating technology products your customers love. The first edition of INSPIRED, published ten years ago, established itself as the primary reference for technology product managers, and can be found on the shelves of nearly every successful technology product company worldwide. This thoroughly updated second edition shares the same objective of being the most valuable resource for technology product managers, yet it is completely new sharing the latest practices and techniques of today's most-successful tech product companies, and the men and women behind every great product.

INSPIRED

In January 2004, the Institute of Medicine (IOM) hosted the 1st Annual Crossing the Quality Chasm Summit, convening a group of national and community health care leaders to pool their knowledge and resources with regard to strategies for improving patient care for five common chronic illnesses. This summit was a direct outgrowth and continuation of the recommendations put forth in the 2001 IOM report Crossing the Quality Chasm: A New Health System for the 21st Century. The summit's purpose was to offer specific guidance at both the community and national levels for overcoming the challenges to the provision of high-quality care articulated in the Quality Chasm report and for moving closer to achievement of the patient-centered health care system envisioned therein.

The 1st Annual Crossing the Quality Chasm Summit

"What happened to the passion we started with? Why aren't we as close as we used to be?" PROBLEM: If you are a woman who is unfulfilled in your marriage...if you feel unheard or overburdened...if you quietly live in a state of slow-burn resentment... PROBLEM: If you are a man unhappy that your partner seems so unhappy with you...if you feel bewildered, unappreciated, or betrayed... This book offers a solution Bestselling author and nationally renowned therapist Terrence Real unearths the causes of communication blocks between men and women in this groundbreaking work. Relationships are in trouble; the demand for intimacy today must be met with new skills, and Real -- drawing on his pioneering work on male depression -- gives both men and women those skills, empowering women and connecting men, radically reversing the attitudes and emotional stumbling blocks of the patriarchal culture in which we were raised. Filled with powerful stories of the couples Real treats, no other relationship book is as straight talking or compelling in its innovative approach to healing wounds and reconnecting partners with a new strength and understanding.

How Can I Get Through to You?

In Closing the Writing Gap, Alex Quigley makes sense of the history and 'science' of writing, synthesising the debates and presenting a wealth of usable evidence about how children develop most efficiently as successful writers.

Closing the Writing Gap

In this, the second of Geoff Moore's classic three-part marketing series, Moore provides highly useful guidelines for moving products beyond early adopters and into the lucrative mainstream market. Updated for the HarperBusiness Essentials series with a new author's note. Once a product "crosses the chasm" it is faced with the "tornado," a make or break time period where mainstream customers determine whether the product takes off or falls flat. In Inside the Tornado, Moore details various marketing strategies that will teach marketers how reach these customers and how to take advantage of living inside the tornado in order to reap the benefits of mainstream adoption.

Inside the Tornado

An original and engaging account of the Obama years from a group of leading political historians Barack Obama's election as the first African American president seemed to usher in a new era, and he took office in 2009 with great expectations. But by his second term, Republicans controlled Congress, and, after the 2016 presidential election, Obama's legacy and the health of the Democratic Party itself appeared in doubt. In The Presidency of Barack Obama, Julian Zelizer gathers leading American historians to put President Obama and his administration into political and historical context. These

writers offer strikingly original assessments of the big issues that shaped the Obama years, including the conservative backlash, race, the financial crisis, health care, crime, drugs, counterterrorism, Iraq and Afghanistan, the environment, immigration, education, gay rights, and urban policy. Together, these essays suggest that Obama's central paradox is that, despite effective policymaking, he failed to receive credit for his many achievements and wasn't a party builder. Provocatively, they ask why Obama didn't unite Democrats and progressive activists to fight the conservative counter-tide as it grew stronger. Engaging and deeply informed, *The Presidency of Barack Obama* is a must-read for anyone who wants to better understand Obama and the uncertain aftermath of his presidency. Contributors include Sarah Coleman, Jacob Dlamini, Gary Gerstle, Risa Goluboff, Meg Jacobs, Peniel Joseph, Michael Kazin, Matthew Lassiter, Kathryn Olmsted, Eric Rauchway, Richard Schragger, Paul Starr, Timothy Stewart-Winter, Thomas Sugrue, Jeremi Suri, Julian Zelizer, and Jonathan Zimmerman.

The Presidency of Barack Obama

A dystopian coming of age which will appeal to fans of *Hunger Games* and the *Divergent* novels. In the year 2090, America is walled off from the rest of the world. When her father is arrested by the totalitarian Board, a young woman sets out to escape the only country she's ever known.

The Seclusion

A tour de force, *Amulet* is a highly charged first-person, semi-hallucinatory novel that embodies in one woman's voice the melancholy and violent recent history of Latin America. *Amulet* is a monologue, like Bolano's acclaimed debut in English, *By Night in Chile*. The speaker is Auxilio Lacouture, a Uruguayan woman who moved to Mexico in the 1960s, becoming the "Mother of Mexican Poetry," hanging out with the young poets in the cafés and bars of the University. She's tall, thin, and blonde, and her favorite young poet in the 1970s is none other than Arturo Belano (Bolano's fictional stand-in throughout his books). As well as her young poets, Auxilio recalls three remarkable women: the melancholic young philosopher Elena, the exiled Catalan painter Remedios Varo, and Lilian Serpas, a poet who once slept with Che Guevara. And in the course of her imaginary visit to the house of Remedios Varo, Auxilio sees an uncanny landscape, a kind of chasm. This chasm reappears in a vision at the end of the book: an army of children is marching toward it, singing as they go. The children are the idealistic young Latin Americans who came to maturity in the '70s, and the last words of the novel are: "And that song is our amulet."

Amulet

Over the last 25 years, Geoffrey Moore has established himself as one of the most influential high-tech advisors in the world—once prompting Conan O'Brien to ask "Who is Geoffrey Moore and why is he more famous than me?" Following up on the ferociously innovative *ESCAPE VELOCITY*, which served as the basis for Moore's consulting work to such companies as Salesforce, Microsoft, and Intel, *ZONE TO WIN* serves as the companion playbook for his landmark guide, offering a practical manual to address the challenge large enterprises face when they seek to add a new line of business to their established portfolio. Focused on spurring next-generation growth, guiding mergers and acquisitions, and embracing disruption and innovation, *ZONE TO WIN* is a high-powered tool for driving your company above and beyond its limitations, its definitions of success, and ultimately, its competitors. Moore's classic bestseller, *CROSSING THE CHASM*, has sold more than one million copies by addressing the challenges faced by start-up companies. Now *ZONE TO WIN* is set to guide established enterprises through the same journey. "For any company, regardless of size or industry, *ZONE TO WIN* is the playbook for succeeding in today's disruptive, connected, fast-paced business world." —Marc Benioff, CEO, Salesforce "Once again Geoffrey Moore weighs in with a prescient examination of what it takes to win in today's competitive, disruptive business environment." —Satya Nadella, CEO, Microsoft "With this book, Geoffrey Moore continues to lead us all through ever-changing times...His work has changed the game of changing the game!" —Gary Kovacs, CEO, AVG "ZONE TO WIN uses crystal-clear language to describe the management plays necessary to win in an ever-disrupting marketplace. Regardless of your level of management experience, you will find this book an invaluable tool for building long-term success for your business." —Lip-Bu Tan, President and CEO, Cadence Design Systems

Zone to Win

The fault line -- that dangerous, unstable seam in the economy where powerful innovations and savage competition meet and create market-shattering tremors. Every company lives on it; no manager can control it. In the original edition of *Living on the Fault Line*, Geoffrey Moore presented a compelling argument for using shareholder value (or share price) as the key driver in management decisions. Moore now revisits his argument in the post-Internet bubble world, proving that the methods he espouses are more germane than ever and showing companies how to use them to survive and thrive in today's demanding economy. Extending the themes of *Crossing the Chasm* and *Inside the Tornado*, his first two books on the dynamics of the high-tech markets, Moore shows why sensitivity to stock price is the single most important lever for managing in the future, both as a leading indicator of shifts in competitive advantage and as an employee motivator for making necessary changes in organizations heretofore impervious to change. This revised and updated edition includes: A deeper emphasis on core versus context, which has emerged as the key distinction in allocating resources to improve shareholder value A new Competitive Advantage Grid that will aid managers in achieving and sustaining competitive advantage, the most important component in managing for shareholder value An expanded Value Discipline Model as it relates to the Competitive Advantage Grid Analysis of the powerful new trend toward core/context analysis and outsourcing production duties Updated models of organizational change for each stage of market development As disruptive forces continue to buffet the marketplace and rattle the staid practices of the past, Moore offers a brilliant set of navigational tools to help meet today's most compelling management challenges.

Living on the Fault Line, Revised Edition

Now the world's most famous marketer, Sergio Zyman, has teamed up with Scott Miller to present a brilliant and irascible take on e-marketing as it really is and how it's supposed to be. just as Zyman's best-selling *The End of Marketing as We Know It* signaled the end of traditional marketing-marketing as corporate ornamentation, somehow existing apart from the serious business practice of selling more people more stuff more often-*Building Brandwidth* takes on the myth that this cool, hip new technology needs cool, hip new marketing to make the sale. Marketing is marketing-building a brand online takes discipline and sweat, just as it does offline. Too many Internet start-ups are betting on irreverent advertising and in-jokes to do magic-to create instant brand awareness, build traffic, develop commerce, create buzz, and enable the brand to rise to the top. But "irreverent" too often means "irrelevant." Meanwhile, sales stagnate-or nosedive. Ever since the Internet bubble burst, Web companies live by the law-of-the-jungle rules of all companies. In this illuminating book you'll learn why:

- Building bandwidth isn't about being trendy. It's about closing the sale online and using some of the back-to-the principles of e-merchandising to do that.
- Everything you knew about mass marketing is over. Today, customization rules, and that means customer-ization rules.
- Customers don't care if your Web site has the coolest technology-they want to know how it can do something for them that they need or want and how it can do it differently than any other site.
- Creativity isn't about being obscure. Creativity means doing the hard work of communicating what your business can do that the competition can't.
- What applies to e-companies now applies to all companies. The new and old economies have fused into one hypercompetitive transformed economy. *Building Brandwidth* is the user's manual for anyone doing business on the Internet. This indispensable guide to making money and coming out on top will help you close the sale online in these fast-moving, make-or-break times when every e-commerce venture is desperately fighting to stay afloat.

Building Brandwidth

24 Steps to Success! Disciplined Entrepreneurship will change the way you think about starting a company. Many believe that entrepreneurship cannot be taught, but great entrepreneurs aren't born with something special – they simply make great products. This book will show you how to create a successful startup through developing an innovative product. It breaks down the necessary processes into an integrated, comprehensive, and proven 24-step framework that any industrious person can learn and apply. You will learn: Why the "F" word – focus – is crucial to a startup's success Common obstacles that entrepreneurs face – and how to overcome them How to use innovation to stand out in the crowd – it's not just about technology Whether you're a first-time or repeat entrepreneur, *Disciplined Entrepreneurship* gives you the tools you need to improve your odds of making a product people want. Author Bill Aulet is the managing director of the Martin Trust Center for MIT Entrepreneurship as well as a senior lecturer at the MIT Sloan School of Management. For more please visit <http://discipline-dentrepreneurship.com/>

Disciplined Entrepreneurship

What would it be like to be a physician with a major mental illness? You would have all the challenges of medical practice complicated by moods that swung from high to low and back again. What if you were also struggling to be a husband and a father? In this engaging and at times intimate look into life with bipolar disorder Dr. Diven offers insights into symptoms and problems living with this mental illness. There are discussions of family life and near suicide, medications and therapy, and complications and successes. Sometimes comical and often serious vignettes of common experiences with other bipolar patients are explored or explained. Written in the form of letters to his eldest child the story is warmly personal while adding a professional's insight. Excellent reading for anyone interested in a fascinating biography this book also serves as an open look into manic-depressive illness for persons with similar struggles or the loved ones of a mentally ill person.

Closing the Chasm

Traction. Startups Need It. Learn How To Get It. Vision, groundbreaking ideas, total commitment, and boundless enthusiasm characterize most startups, but they require capital to go from promising product to scalable business. More than 80 percent of all early-stage startups fail. Most of them can build a product, but the vast majority stumble when it comes time to take those products to market due to poor "market engineering" skills. Traversing the Traction Gap exposes the reasons behind that scary failure rate and provides a prescriptive how-to guide, focused specifically on market engineering techniques, so startups can succeed. The go-to-market hurdle is insurmountable to many startups. Just when they most need to establish a foothold in the market, they run short on time and money. This is the Traction Gap, that period of time introducing a new product into the marketplace and being able to scale it during a rapidly closing window of opportunity. Traversing the Traction Gap is a practical guidebook for navigating the tumultuous early life of a startup. Based on real-life examples, the advice from Cleveland and the members of the Wildcat Venture Partners team provides a roadmap and metrics for succeeding where others have failed.

Traversing the Traction Gap

Examines the gender communication gap in business and demonstrates why differing perceptions, objectives, and verbal and body language create a chasm between the sexes

They Don't Get It, Do They?

BLUE REMEMBERED EARTH is the first volume in a monumental trilogy tracing the Akinya family across more than ten thousand years of future history ... out beyond the solar system, into interstellar space and the dawn of galactic society. One hundred and fifty years from now, in a world where Africa is the dominant technological and economic power, and where crime, war, disease and poverty have been banished to history, Geoffrey Akinya wants only one thing: to be left in peace, so that he can continue his studies into the elephants of the Amboseli basin. But Geoffrey's family, the vast Akinya business empire, has other plans. After the death of Eunice, Geoffrey's grandmother, erstwhile space explorer and entrepreneur, something awkward has come to light on the Moon, and Geoffrey is tasked - well, blackmailed, really - to go up there and make sure the family's name stays suitably unblemished. But little does Geoffrey realise - or anyone else in the family, for that matter - what he's about to unravel. Eunice's ashes have already have been scattered in sight of Kilimanjaro. But the secrets she died with are about to come back out into the open, and they could change everything. Or shatter this near-utopia into shards ...

Blue Remembered Earth

In 1945 Istanbul, American undercover agent Leon Bauer's attempt to save a life leads to a desperate manhunt, a game of shifting loyalties, and an unexpected love affair.

Istanbul Passage

Marketing is civilized warfare. And as high-tech products become increasingly standardized—practically identical, from the customer's point of view—it is marketing that spells life or death for new devices or entire firms. In a book that is as fascinating as it is pragmatic, William H. Davidow, a legend in Silicon Valley, where he was described as "the driving force behind the micro processor explosion," tells how to fight the marketing battle in the intensely competitive world of high-tech

companies—and win. Blunt, pithy, and knowledgeable, Davidow draws on his successful marketing experience at Intel Corporation to create a complete program for marketing victory. He drives home the basics, such as how to go head-on against the competition; how to "plan products, not devices"; how to give products a "soul"; and how to engineer promotions, market internationally, motivate salespeople, and rally distributors. Above all, he demonstrates the critical importance of servicing and supporting customers. Total customer satisfaction, Davidow makes clear, must be every high-tech marketer's ultimate goal. The only comprehensive marketing strategy book by an insider, *Marketing High Technology* looks behind the scenes at industry-shaking clashes involving Apple and IBM, Visicorp and Lotus, Texas Instruments and National Semiconductor. He recounts his own involvement in Crush, Intel's innovative marketing offensive against Motorola, to demonstrate, step-by-step, how it became an industry prototype for a winning high-tech campaign. Davidow clearly spells out sixteen principles which increase the effectiveness of marketing programs. From examples as diverse as a Rolling Stones concert and a microprocessor chip, he defines a true "product." He analyzes and explains in new ways the strategic importance of distribution as it relates to market sector, pricing, and the pitfalls it entails. He challenges some traditional marketing theory and provides unique and important insights developed from over twenty years in the high-tech field. From an all-encompassing philosophy that great marketing is a crusade requiring total commitment, to a careful study of the cost of attacking a competitor, this book is an essential tool for survival in today's high-risk, fast-changing, and very lucrative high-tech arena.

Marketing High Technology

Endless terror. Refugee waves. An unfixable global economy. Surprising election results. New billion-dollar fortunes. Miracle medical advances. What if they were all connected? What if you could understand why? *The Seventh Sense* is the story of what all of today's successful figures see and feel: the forces that are invisible to most of us but explain everything from explosive technological change to uneasy political ripples. The secret to power now is understanding our new age of networks. Not merely the Internet, but also webs of trade, finance, and even DNA. Based on his years of advising generals, CEOs, and politicians, Ramo takes us into the opaque heart of our world's rapidly connected systems and teaches us what the losers are not yet seeing -- and what the victors of this age already know.

The Seventh Sense

Praise for *Mastering the Complex Sale* "Jeff Thull's process plays a key role in helping companies and their customers cross the chasm with disruptive innovations and succeed with game-changing initiatives." —Geoffrey A. Moore, author of *Crossing the Chasm* and *Dealing with Darwin* "This is the first book that lays out a solid method for selling cross-company, cross-border, even cross-culturally where you have multiple decision makers with multiple agendas. This is far more than a 'selling process'—it is a survival guide—a truly outstanding approach to bringing all the pieces of the puzzle together." —Ed Daniels, EVP, Shell Global Solutions Downstream, President, CRI/Criterion, Inc. "Mastering the Complex Sale brilliantly sets up value from the customer's perspective. A must-read for all those who are managing multinational business teams in a complex and highly competitive environment." —Samik Mukherjee, Vice President, Onshore Business, Technip "Customers need to know the value they will receive and how they will receive it. Thull's insights into the complex sale and how to clarify and quantify this value are remarkable—Mastering the Complex Sale will be required reading for years to come!" —Lee Tschanz, Vice President, North American Sales, Rockwell Automation "Jeff Thull is winning the war against commoditization. In his world, value trumps price and commoditization isn't a given, it's a choice. This is a proven alternative to the price-driven sale. We've spoken to his clients. This stuff really works, folks." —Dave Stein, CEO and Founder, ES Research Group, Inc. "Our business depends on delivering breakthrough thinking to our executive clients. Jeff Thull has significantly redefined sales and marketing strategies that clearly connect to our global audience. Read it, act on it, and take your results to exceptional levels." —Sven Kroneberg, President, Seminario Internacional "Jeff's main thesis—that professional customer guidance is the key to success—rings true in every global market today. Mastering the Complex Sale is the essential read for any organization looking to transform their business for long-term, value-driven growth." —Jon T. Lindekugel, President, 3M Health Information Systems, Inc. "Jeff Thull has re-engineered the conventional sales process to create predictable and profitable growth in today's competitive marketplace. It's no longer about selling; it's about guiding quality decisions and creating collaborative value. This is one of those rare books that will make a difference." —Carol Pudnos, Executive director, Healthcare Industry, Dow Corning Corporation

Mastering the Complex Sale

Uses the concept of “world-making” to provide an introduction to American Indian philosophy. Ever since first contact with Europeans, American Indian stories about how the world is have been regarded as interesting objects of study, but also as childish and savage, philosophically curious and ethically monstrous. Using the writings of early ethnographers and cultural anthropologists, early narratives told or written by Indians, and scholarly work by contemporary Native writers and philosophers, Shawnee philosopher Thomas M. Norton-Smith develops a rational reconstruction of American Indian philosophy as a dance of person and place. He views Native philosophy through the lens of a culturally sophisticated constructivism grounded in the work of contemporary American analytic philosopher Nelson Goodman, in which descriptions of the world (or “world versions”) satisfying certain criteria construct actual worlds—words make worlds. Ultimately, Norton-Smith argues that the Native ways of organizing experiences with spoken words and other performances construct real worlds as robustly as their Western counterparts, and, in so doing, he helps to bridge the chasm between Western and American Indian philosophical traditions. “a deft and self-aware exemplification of the task of cross-cultural comparison The writing is accessible and shows a deft and helpful interplay between abstract language and concrete illustrative material.” — The Pluralist “Norton-Smith does a good job illustrating how worlds are created through language and how language itself contains philosophy.” — H-Net Reviews (H-Environment) “Norton-Smith offers an insightful discussion of Native American epistemological concepts This book is an excellent exercise for all philosophy students as an expansion of worldviews and an examination of Western epistemological foundations and biases. It also offers an insightful discussion of indigenous philosophy for both philosophy and indigenous scholars Highly recommended.” ? CHOICE “The author opens a unique and exciting avenue for philosophical discourse by demonstrating a method of inquiry that provides a new way of interpreting Native thinking, a method that not only promotes Native philosophical systems but allows for greater communication between Western and Native philosophers.” — Lorraine Mayer, author of *Cries from a Métis Heart* “Challenging and provocative, this book is a great step forward in the conversation of academic Indigenous philosophy.” — Brian Yazzie Burkhart, Pitzer College

The Dance of Person and Place

This book gathers selected high-quality research papers presented at the Fifth International Congress on Information and Communication Technology, held at Brunel University, London, on February 20–21, 2020. It discusses emerging topics pertaining to information and communication technology (ICT) for managerial applications, e-governance, e-agriculture, e-education and computing technologies, the Internet of Things (IoT) and e-mining. Written by respected experts and researchers working on ICT, the book offers a valuable asset for young researchers involved in advanced studies.

Proceedings of Fifth International Congress on Information and Communication Technology

Schwarz, founder of the groundbreaking Citizen Schools program, shares his vision for reducing inequality by pairing successful adults with low-income students. Parental wealth now predicts adult success more than at any point in the last hundred years. And yet as debates about education rage on, and wealth-based achievement gaps grow, too many people fix the blame on one of two convenient scapegoats: poverty or our public schools. But in fact, low-income kids are learning more now than ever before. The real culprit for rising inequality, Eric Schwarz argues in *The Opportunity Equation*, is that wealthier kids are learning much, much more—mostly outside of school. In summer camps, robotics competitions, sessions with private tutors, and conversations around the dinner table, children from more affluent families build the skills and social networks that propel them to success. In *The Opportunity Equation*, Schwarz tells the story of how he founded the pioneering Citizen Schools program to combat rising inequality by bringing these same opportunities to children who don't have access to them. By increasing learning time in schools and harnessing the power of an army of volunteers with various skills and professional backgrounds—lawyers, engineers, carpenters, journalists, nonprofit leaders, and grandmothers who sew—Citizen Schools offers after-school apprenticeships that provide the building blocks for adult success. Recounting the triumphs and setbacks he's encountered in implementing the program, Schwarz shows that some of the nation's lowest-performing schools in its lowest-income cities can, with help, provide their students with many of the same experiences wealthy communities afford to their children. The results have been proven: in the dozen school districts, from New York to Oakland, that have partnered with Citizen Schools, rates of attendance, proficiency, graduation, and college acceptance have gone up—and the achievement gap closes. At a time when

many stakeholders in the education debates are looking for new, silver-bullet shortcuts to educational excellence, Schwarz shows that the best solution is human-centered, rooted in the American tradition of citizen voluntarism, and, most important, achievable. We can provide quality education for all students and close the opportunity gap in this country—and we can do it together.

The Opportunity Equation

Building the Bridge As You Walk On It tells the personal stories of people who have embraced deep change and inspired author Robert Quinn to take his concept one step further and develop a new model of leadership—"the fundamental state of leadership." The exploration of this transformative state is at the very heart of the book. Quinn shows how anyone can enter the fundamental state of leadership by engaging in the eight practices that center on the theme of ever-increasing integrity—reflective action, authentic engagement, appreciative inquiry, grounded vision, adaptive confidence, detached interdependence, responsible freedom, and tough love. After each chapter, Quinn challenges you to assess yourself with respect to each practice and to formulate a strategy for personal growth.

Building the Bridge As You Walk On It

The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. *The Future of the Public's Health in the 21st Century* reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

The Future of the Public's Health in the 21st Century

Spokane, 1909. The Dolan brothers are living by their wits, jumping freight trains and lining up for day work at crooked job agencies. While sixteen-year-old Rye yearns for a steady job and a home, his dashing older brother Gig dreams of a better world, fighting alongside other union men for fair pay and decent treatment. When Rye finds himself drawn to suffragette Elizabeth Gurley Flynn, her passion sweeps him into the world of protest and dirty business. But a storm is coming, threatening to overwhelm them all . . . *The Cold Millions* is an intimate story of brotherhood, love, sacrifice and betrayal set against the panoramic backdrop of an early 20th century America.

The Cold Millions

Come to Chasm City and embark on a mind-bending ride through the universe of Revelation Space. Tanner Mirabel was a security specialist who never made a mistake - until the day a woman in his care was blown away by Argent Reivich, a vengeful young postmortal. Tanner's pursuit of Reivich takes him across light-years of space to Chasm City, the domed human settlement on the otherwise inhospitable planet of Yellowstone. But Chasm City is not what it was. The one time high-tech utopia has become a Gothic nightmare: a nanotechnological virus has corrupted the city's inhabitants as thoroughly as it has the buildings and machines. Before the chase is done, Tanner will have to confront truths which reach back centuries, towards deep space and an atrocity history barely remembers.

Chasm City

A heart as lonely as the ocean... Hannah and Wycliff arrive at his ancestral estate in Dorset as tragedy strikes the coastal village. A young woman has lost her life to the tempestuous ocean, but only Hannah suspects the woman's death is anything but a horrible accident. As Hannah learns more about life in the closeknit community, she discovers two other women lost their lives to the sea. Or did they? A rift grows between the young couple, as Wycliff refuses to believe another hand was responsible for the

deaths. With her husband consumed by the needs of the long neglected estate, Hannah is left to her own devices and finds herself walking the same lonely path as the dead women. Can Hannah and Wycliff heal the chasm in their relationship, or will Hannah succumb to the call of the ocean...?

Sixpence and Selkies

Every day, individuals take action based on how they believe innovation will change industries. Yet these beliefs are largely based on guesswork and incomplete data and lead to costly errors in judgment. Now, internationally renowned innovation expert Clayton M. Christensen and his research partners Scott D. Anthony and Erik A. Roth present a groundbreaking framework for predicting outcomes in the evolution of any industry. Based on proven theories outlined in Christensen's landmark books *The Innovator's Dilemma* and *The Innovator's Solution*, *Seeing What's Next* offers a practical, three-part model that helps decision-makers spot the signals of industry change, determine the outcome of competitive battles, and assess whether a firm's actions will ensure or threaten future success. Through in-depth case studies of industries from aviation to health care, the authors illustrate the predictive power of innovation theory in action.

Closing the Quality Gap

An exploration of life at the margins of history from one of Russia's most exciting contemporary writers Shortlisted for the 2021 International Booker Prize Winner of the MLA Lois Roth Translation Award With the death of her aunt, the narrator is left to sift through an apartment full of faded photographs, old postcards, letters, diaries, and heaps of souvenirs: a withered repository of a century of life in Russia. Carefully reassembled with calm, steady hands, these shards tell the story of how a seemingly ordinary Jewish family somehow managed to survive the myriad persecutions and repressions of the last century. In dialogue with writers like Roland Barthes, W. G. Sebald, Susan Sontag, and Osip Mandelstam, *In Memory of Memory* is imbued with rare intellectual curiosity and a wonderfully soft-spoken, poetic voice. Dipping into various forms—essay, fiction, memoir, travelogue, and historical documents—Stepanova assembles a vast panorama of ideas and personalities and offers an entirely new and bold exploration of cultural and personal memory.

Seeing What's Next

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles-including limits on nurses' scope of practice-should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

In Memory of Memory

With this rich masterfully written extravaganza of myth and magic, the internationally acclaimed author of the Fionavar trilogy has created an epic that will change forever the boundaries of fantasy fiction.

The Future of Nursing
