The Christian Examiner

In the summer of 1855, when the nineteen-year-old Sam Clements traveled from Saint Louis to Hannibal, Paris, and Florida, Missouri, and then to Keokuk, Iowa, he carried with him a notebook in which he entered French lessons, phrenological information, miscellaneous observations, and reminders about errands to be performed. This first notebook thus took the random form which would characterize most of those to follow. About the text: In order to avoid editorial misrepresentation and to preserve the texture of autograph documents, the entries are presented in their original, often unfinished, form with most of Clemens' irregularities, inconsistencies, errors, and cancellations unchanged. Clemens' cancellations are included in the text enclosed in angle brackets, thus ; editorially-supplied conjectural readings are in square brackets, thus [word]; hyphens within square brackets stand for unreadable letters, thus [-]; and editorial remarks are italicized and enclosed in square brackets, thus [blank page]-. A slash separates alternative readings which Clemens left unresolved, thus word/word. The separation of entries is indicated on the printed page by extra space between lines; when the end of a manuscript entry coincides with the end of a page of the printed text, the symbol [#] follows the entry. A full discussion of textual procedures accompanies the tables of emendation and details of inscription in the Textual Apparatus at the end of each volume; specific textual problems are explained in headnotes or footnotes when unusual situations warrant.

North American Review

In this magisterial book, William St Clair unfolds the history of the Parthenon throughout the modern era to the present day, with special emphasis on the period before, during, and after the Greek War of Independence of 1821-32. Focusing particularly on the question of who saved the Parthenon from

destruction during this conflict, with the help of documents that shed a new light on this enduring question, he explores the contributions made by the Philhellenes, Ancient Athenians, Ottomans and the Great Powers. Marshalling a vast amount of primary evidence, much of it previously unexamined and published here for the first time, St Clair rigorously explores the multiple ways in which the Parthenon has served both as a cultural icon onto which meanings are projected and as a symbol of particular national, religious and racial identities, as well as how it illuminates larger questions about the uses of built heritage. This book has a companion volume with the classical Parthenon as its main focus, which offers new ways of recovering the monument and its meanings in ancient times. St Clair builds on the success of his classic text, *The Reading Nation in the Romantic Period*, to present this rich and authoritative account of the Parthenon's presentation and reception throughout history. With weighty implications for the present life of the Parthenon, it is itself a monumental contribution to accounts of the Greek Revolution, to classical studies, and to intellectual history.
