We've simplified the complexity of creating a ...

INTRO AND OVERVIEW

Step #1 - VISION: In this chapter, I'm teaching you about the importance of having a vision and how to actually use it in the development of your company, the onboarding of new employees, and the management of existing employees

Step #2 - ORG CHART: In this chapter, I'm teaching how to create your org chart and why you need one. HINT: It's a dynamic growth tool that you will use in the strategic development of your business

Step #3 - PROCESS IDENTIFICATION: In this chapter, I'm teaching you how to identify your processes, how to create a list of all of the processes in your business. Think of it as a table of contents of your operations manual.

Step #4 - PROCESS LINKING: In this chapter, I'm teaching you how to get exactly the right processes in front of exactly the right employees to simplify the training of new employees and to implement an effective management strategy for existing employees.

Step #5 - GETTING YOUR PROCESSES WRITTEN: In this chapter, I teach you how to prioritize the writing and training of your processes. How do you get past the overwhelm of getting hundreds of processes written? How do you make the systemization of your business organic and ongoing?

LINK TO ACCESS SystemsScaping LIVE 2021: The link you'll need for the most current course, SystemsScaping LIVE 2021 is

THE JELLY BEAN VIDEO: The average human being will spend more than 90,000 hours at work in their lifetime. And this doesn't account for all of the time you spend worrying about your business. Given that, your work should be enjoyable and fun. It should NOT be overwhelming and stressful.

Life is way too short.

Cecilia Grant's Database Performance Tuning Tips - Cecilia Grant's Database Performance Tuning Tips by Oracle Developers 957 views 3 years ago 35 minutes - Join Cris and Gavin for a chat about **database**, performance **tuning**, with Cecilia Grant (Architect, Oracle Development). Please ...

Welcome

Blog post

Discussion is about Database Performance everywhere, not just on Exadata

Gavin introduces Cecilia Grant

Safe Harbor slide

The 2-3 most important performance tips

Let the data guide you

Database tuning doesn't change much for Exadata

Keep good baselines

Recap & discussion

Should you tune performance on Exadata?

"Smart features" let you get away with a lot, but ...

You still need to write good SQL and design schemas properly

What is a Storage Index - the best I/O is the I/O you don't do

Storage Indexes/Indices are ephemeral - how are they rebuilt?

Conventional Indices/Indexes are still relevant - persistent and less CPU cost

How do I keep a baseline?

What is IORM? Should I use it?

IORM is on by default on Exadata

IORM useful to control I/O when hosting multiple databases

Backtrack: IORM defined

Plans and tiers with IORM

Examples of tiers

I/O outliers on Exadata?

Make sure it's an I/O problem

We expect workload to be distributed evenly

We saw recently a case like that, but...

Normally you reach max capacity on all disks

Apply top tips: use AWR, look at the data

Where do I find data showing Exadata performance benefits?

Reducing I/O, AWR shows SI savings and CC savings

The SQL monitor report - cell offload efficiency

Comparing to non-Exadata machines  
What about performance on Autonomous DB?  
You get an AWR report, but restricted to the PDB  
The data you get is ...  
Performance tuning?  
Concentrate on the upper level / application  
How to architect your data?  
Normal forms are good but denormalization may be useful  
Beyond the model, look at access patterns  
Access patterns, explained  
Example: model too complicated  
Persistent Memory (PMEM) in write-through instead of write-back mode?  
How it works with flash - write-through  
How it works with flash - write-back  
How it works with PMEM  
Why use write-through with PMEM  
DB writes are asynchronous, i.e., user doesn't wait for them  
How is it different from flash?  
Is the PMEM cache write-through by default?  
New features planned for PMEM?  
See also last month's AskTOM on Exadata X8M, with Jia Shi  
We used PMEM in the architecturally best manner  
How Cecilia got into performance tuning?  
What it takes to work in performance  
How do the customer experiences connect with our technology design and tuning?  
A number of teams bring different facets of experience with the product to dev  
Similarly with the Support escalations  
If PMEM is not available, can I still benefit from, e.g., RAM cache features?  
Flash speeds v. PMEM speeds  
Websites, whitepapers and other resources?  
Your ideas and questions for topics and experts are welcome  
Do old DB performance methods / tools still apply?  
Example recent escalation  
Can Storage Index be stored in Flash cache?  
What can cause increasing logfile parallel writes?  
When is the Storage Index built?  
Storage Index across Storage Servers / Cells  
End remarks
