Pre-Christian Ireland

Tells the story of human settlement in Ireland from its beginnings 10,000 years ago to St Patrick's Christianizing mission in the 5th century AD. This is interwoven with accounts of major excavations at sites such as Carrowmore, Rathgall and Navan Fort.

Pre-Christian Ireland

Presents an alphabetical listing of information on the origins, prehistory, history, culture, languages, relationships to other cultures and more regarding European peoples.

Encyclopedia of European Peoples

This engaging book traces the history, archaeology, and legends of ancient Ireland from 9000 B.C., when nomadic hunter-gatherers appeared in Ireland at the end of the last Ice Age to 1167 A.D., when a Norman invasion brought the country under control of the English crown for the first time. So much of what people today accept as ancient Irish history—Celtic invaders from Euproe turning Ireland into a Celtic nation; St. Patrick driving the snakes from Ireland and converting its people to Christianity—is myth and legend with little basis in reality. The truth is more interesting. The Irish, as the authors show, are not even Celtic in an archaeological sense. And there were plenty of bishops in Ireland before a British missionary called Patrick arrived. But *In Search of Ancient Ireland* is not simply the story of events from long ago. Across Ireland today are festivals, places, and folk customs that provide a tangible link to events thousands of years past. The authors visit and describe many of these places and festivals, talking to a wide variety of historians, scholars, poets, and storytellers in the very settings where history happened. Thus the book is also a journey on the ground to uncover ten thousand years of Irish identity. *In Search of Ancient Ireland* is the official companion to the three-part PBS documentary series. With 14 black-and-white photos, 6 b&w illustrations, and 1 map.

In this book James Nafziger covers emerging topics of cultural heritage law, particularly at the international level, by focusing primarily on the numerous work products of the International Law Association's Committee on Cultural Heritage Law. Cultural heritage law has become a landmark in the field of international law. Its construction is a good example of transnationalism at work, combining legislation, judicial decisions, and other national initiatives, diplomacy, intergovernmental agreements, especially within the framework of UNESCO, and non-governmental activities and instruments. This volume focuses on the seminal contributions to this process of the Committee on Cultural Heritage Law of the International Law Association, while situating these projects against the broader background of the development of the modern international regime for protecting cultural heritage.

The Lost History of Ireland

In de jaren '20 en '30 van de vorige eeuw waren op de Veluwe, naast beroepsarcheologen uit Leiden en Groningen, ook meerdere amateurarcheologen actief, waaronder een aantal beroepsmilitairen. Twee daarvan, kapitein H.J. Bellen uit Ede en sergeant H. Westendorp uit Nieuw-Milligen, krijgen hier meer aandacht. Dat is deels vanwege hun vondsten, deels vanwege de documentatie bij die vondsten. Bellen maakte aantekeningen in zakboekjes, Westendorp corrigeerde fouten in de beschrijving van zijn collectie in de dissertatie van Bursch. Bellen en Westendorp groeven zes grafvondsten met koperen tongdolkjes op. Die zijn al eerder beschreven, maar worden hier opnieuw behandeld met gebruikmaking van alle beschikbare documentatie, en in twee gevallen met gegevens van aanvullend bodemonderzoek. Daarnaast worden twee toevalsvondsten uit zand/grintgroeven behandeld, de een met een gouden haarsieraad, de ander met een versierde aardewerken schaal op vier zuilvormige voetjes. Aangetoond wordt dat dergelijke oude amateuropgravingen en toevalsvondsten een nieuwe bestudering waard zijn. In het tweede deel van dit boek worden de acht vondsten in een bredere context geplaatst. Mede op basis van 14C-dateringen en een paar recentere vondsten van gouden haarsieraden in Beers-Gassel (N. Br.) en Eelde (Dr.) wordt aangetoond dat voorwerpen als tongdolken van koper, gouden / zilveren Lockenringe en voetjesschalen, die als kenmerkend voor de Klokkebekercultuur te boek staan, ontleend zijn aan de saalische Schnurkeramik, deels rechtstreeks, deels via de Enkelgrafcultuur.

British Archaeological Abstracts

This book will help you find out about the different types of evidence which historians study when doing their historical research. It also provides examples of this evidence, on which you will be able to carry out your own research. Some sources are very rare and are the only remaining evidence of a time in the past; other periods, especially the recent past, have lots of evidence which must be tested for bias and accuracy. This book will give you background information and advice about evidence in all its forms. This will enable you to develop the skills of a young historian.

Pre-Christian Ireland

This history of the Celts draws on archaeological, historical, literary and linguistic evidence. It covers the continental Celts in prehistory and antiquity, follows the Celts from the departure of the Romans to the Middle Ages and covers Celtic assimilation within the national cultures of Britain.

Journal of the Cork Historical and Archaeological Society

This new edition of Historical Dictionary of Ireland is an excellent resource for discovering the history of Ireland. This is done through a chronology, an introductory essay, and an extensive bibliography. The cross-referenced dictionary section has over 600 entries on significant persons, places and events, political parties and institutions (including the Catholic church) with period forays into literature, music and the arts. This book is an excellent resource for students, researchers, and anyone wanting to know more about Ireland.

The British Chronicles

The term 'Dark Ages' was coined to describe a period which was seen as a period of anarchy and violence, following the collapse of civilisation. Recent discoveries by archaeologists and historians have, however, radically altered this traditional view of the Dark Ages, and the period is now seen as one of innovation and dynamic social evolution. This book reconsiders a number of traditionally accepted views. It argues, for example, that the debt of the Dark Age Celts to Rome was enormous, even in areas such as Ireland that were never occupied by Roman invaders. It also discusses the traditional chronology suggesting that the date of 'AD 400' usually taken as the start of the 'early Christian period' in Britain and Ireland now has comparatively little meaning. Once this conventional framework is removed, it is possible to show how the Celtic world of the Dark Ages took shape under Roman influence in the centuries between about 200 to 800, and looked to Rome even for the immediate inspiration for its art. Such questions as the extent of British (that is, Celtic) survival in pagan Saxon England, and the Celtic and Roman contribution to early England are considered.

Early Christian Ireland

Attempts to explain why there was such a flowering of culture in the period up to AD 800 in Ireland. Mytum takes a theoretical position on his subject-matter, and applies it in detail using archaeological and also extensive historical information.

Bulletin of the Institute of Archaeology

Graydon Snyder tells the story of two different Christianities - the Roman and the Celtic. He traces the ancient path of the Celts, wandering from Galatia, in what is now Turkey, to Ireland. In Galatia, their practices and beliefs did not fit with Paul's teaching and interpretation of the Jesus tradition. The Celts, for example, did not believe human nature was corrupt, but instead affirmed essential human goodness and focused on the compassionate elements of the Jesus tradition.

The Review of Archaeology

Reproduction of the original: Phases of Irish History by Eoin MacNeill

Frontiers of Cultural Heritage Law

"Different beliefs, practices and rituals behind the notion of their magical powers and virtues are revealed. The situations in which people resorted to them are also examined: selecting chieftains, establishing the truth, curing sickness, and promoting fertility. In conclusion, the role of sacred stones in the religious and spiritual life of modern Ireland is described. This is a reminder of our spiritual past as some of these stones and monuments enter their fifth millennium."--Jacket.

The Publishers Weekly

The Celtic peoples of the British Isles hold a fundamental place in our national consciousness. In this book Simon James surveys ancient and modern ideas of the Celts and challenges them in the light of revolutionary new thinking on the Iron Age peoples of Britain. Examining how ethnic and national identities are constructed, he presents an alternative history of the British Isles, proposing that the idea of insular Celtic identity is really a product of the rise of nationalism in the eighteenth century. He considers whether the 'Celticness' of the British Isles is a romantic fantasy, even a politically dangerous falsification of history which has implications in the current debate on devolution and self-government for the Celtic regions.

Celtic Britain

Archaeological evidence here is used to help build up a picture of the lives led by the people of which it is a record. The contents include a description of primitive settlements, leading up to an account of the art, trade and civilization generally of early ages prior to the Celtic invasion and up to the end of Medieval times. Two chapters take narratives from the time and analyse them against physical evidence and consider what they tell us alongside that information. Many often overlooked facts are brought to the fore and special attention is paid to the overwhelming influence of climate in shaping human destiny. Originally published in 1935, this book is as enlightening today.

The Encyclopedia of Celtic Mythology and Folklore

This important collection seeks ways forward at the moment in history when the genome-wide sequencing of ancient DNA has suddenly changed everything in the study of later European prehistory.

Acht grafvondsten van de Veluwe klokbekergroep als uitgangspunt voor chronologische beschouwingen over de relaties saalisch-böhmische Schnurkeramik, Enkelgrafcultuur, Klokbeke-Oostgroep en Nederlands-Westduitse klokbekergroepen

This volume gathers together the first 10 years of The European Archaeologist (ISSN 1022-0135), from Winter 1993 through to the 10th Anniversary Conference Issue, published in 2004 for the Lyon Annual Meeting.

Making Sense of History

Ireland's First Settlers tells the story of the archaeology and history of the first continuous phase of Ireland's human settlement. It combines centuries of search and speculation about human antiquity in Ireland with a review of what is known today about the Irish Mesolithic. This is, in part, provided in the context of the author's 50 years of personal experience searching to make sense of what initially appeared to be little more than a collection of beach rolled and battered flint tools. The story is embedded in how the island of Ireland, its position, distinct landscape and ecology impacted on when and how Ireland was colonized. It also explores how these first settlers evolved their technologies and lifeways to suit the narrow range of abundant resources that were available. The volume concludes with discussions on how the landscape should be searched for the often ephemeral traces of these early settlers and how sites should be excavated. It asks what we really know about the thoughts and life of the people themselves and what happened to them as farming began to be introduced.

Sky High Dublin, Wicklow and Meath

Above the land and its horizon lies the celestial sphere, that great dome of the sky which governs light and darkness, critical to life itself, yet its influence is often neglected in the archaeological narrative. Visualising Skyscapes captures a growing interest in the emerging field of skyscape archaeology. This powerful and innovative book returns the sky to its rightful place as a central consideration in archaeological thought and can be regarded as a handbook for further research. Bookended by a foreword by archaeologist Gabriel Cooney and an afterword by astronomer Andrew Newsam, its contents have a wide-reaching relevance for the fields of archaeology, anthropology, ethnography, archaeoastronomy, astronomy, heritage and cultural studies. The volume balances six chapters on theory and methodology which elaborate on the history and practice of the field with six other chapters focused on case studies from around the world. Visualising Skyscapes captures the growing interest in the multidisciplinary study of skylscapes and will be of interest to academics, students and the general public, as well as having international appeal. It is topical, timely and relevant to current debates and will hopefully stimulate further interest in this exciting and relatively new area of investigation. The contributions showcase the work of distinguished academics in the field and the chapters are all enhanced by numerous photographs and images.

Visualising Skyscapes

"Time travel, UFOs, mysterious planets, stigmata, rock-throwing poltergeists, huge footprints, bizarre rains of fish and frogs-nearly a century after Charles Fort's Book of the Damned was originally published, the strange phenomenon presented in this book remains largely unexplained by modern science. Through painstaking research and a witty, sarcastic style, Fort captures the imagination while exposing the flaws of popular scientific explanations. Virtually all of his material was compiled and documented from reports published in reputable journals, newspapers and periodicals because he was an avid collector. Charles Fort was somewhat of a recluse who spent most of his spare time researching these strange events and collected these reports from publications sent to him from around the globe. This was the first of a series of books he created on unusual and unexplained events and to this day it remains the most popular. If you agree that truth is often stranger than fiction, then this book is for you"--Taken from Good Reads website.

In Ireland, Gustave de Beaumont chronicles the history of the Irish and offers up a national portrait on the eve of the Great Famine. This rediscovered masterpiece includes an introduction on Beaumont and his world. This volume also presents Beaumont's impassioned preface in which he portrays the appalling effects of the Great Famine. A classic of nineteenth-century political and social commentary, Beaumont's singular portrait offers the compelling immediacy of an eyewitness to history.
