Why I Am Not a Christian

'Why I am not a Christian' is considered one of the most blasphemous philosophical documents ever written, and at a time when we have faith schools and wars over religious beliefs, its message today couldn't be more relevant. If religion provides comfortable responses to the questions that have always beset humankind - why are we here, what is the point of being alive, how ought we to behave - then Russell snatches that comfort away, leaving us instead with other, more troublesome alternatives; responsibility, autonomy, self-awareness. If it were possible to sum up this book in a sentence, then it would be that the time to live is now, the place to live is here, and the way to be happy is to ensure others are happy. And what it all boils down to, is that disbelief is but a matter of believing.

Why I Am Not a Christian

The first volume of Gary Habermas's magnum opus, *On the Resurrection: Evidences* represents the culmination of fifty years of research on the probability of Jesus's resurrection. Using his "minimal facts argument," Habermas demonstrates why we ought to trust the biblical and historical testimony

of Scripture regarding the resurrection. This book is a must-read for pastors, students, and scholars interested in the historical evidence for the resurrection of Jesus Christ.

Why I Am Not a Christian

Along with *Why I Am Not a Christian*, this essay must rank as the most articulate example of Russell's famed atheism. It is also one of the most notorious. Used as evidence in a 1940 court case in which Russell was declared unfit to teach college-level philosophy, *What I Believe* was to become one of his most defining works. The ideas contained within were and are controversial, contentious and - to the religious - downright blasphemous. A remarkable work, it remains the best concise introduction to Russell's thought.

On the Resurrection, Volume 1

We all seek salvation, claims Blanco, because we all become prisoners of negativity. Humanity wants to be saved, we want to overcome the negativity that so often enslaves us. But, where is the saviour to be found, and where is the source of salvation? In *Philosophy and Salvation* Blanco argues that salvation may only come from the infinite springs of the word. 'The word saves us: the word of science, the word manifested in art, the word of a society which promises something for itself . . . Humanity understands itself through language: human beings use words in order to know each other and to cooperate in the edification of something that may transcend them. The word invites us, and in fact leads us to transcendence. This is salvation: to inaugurate a new world in which the former negativity may be overcome'. Blanco looks back over the history of philosophical and theological thought to bring his argument to life for all seeking salvation today.

What I Believe

Drama. Irony. Betrayal. Miracles. A holy war with the whole world at stake. And it's all packed into the shortest of the four Gospels. Written in an engaging, lively, oral style, *Loosing the Lion* tells us how, despite being misunderstood and neglected throughout most of history, the Gospel of Mark has recently been experiencing a scholarly revival. Theologians are beginning to see how it is actually an intense, wild, impossible story told at a breakneck pace with twists and turns that shock and surprise those with eyes to see and ears to hear. Readers will be captivated by the Gospel's literary brilliance, which brings us to the threshold of an encounter with the living Jesus, who reveals his mysteries, and ultimately himself, to those who approach him and dwell in his presence. And when we do encounter him, "The proper response is repentance, joining God's army to be liberated, and once liberated, advancing the liberation of the whole cosmos, which, ultimately, is the content of the Gospel Jesus calls us to believe in. Liberation is coming. Join the resistance."

Philosophy and Salvation

What can Mary Wollstonecraft teach Christians about sexual ethics? Can John Stuart Mill help the church understand toleration? Are there lessons for the Christian world from writers like Marx, Nehru, Shelley, Popper, and Hume? *Atheism for Christians* looks at the work of some of the most influential secular thinkers and asks what Christians can learn without giving up their faith or core values. Looking at important modern issues such as gender equality, same-sex marriage, creationism and evolution, abortion, universal health, biblical literalism, and religious tribalism, this work offers a fresh perspective on old questions. The Bible says the value of wisdom is far above rubies. It should not matter where that wisdom comes from. The Christian world should be able to celebrate and learn from the intellectual giants in the secular tradition just as atheists can still appreciate the great academic and artistic contribution of Christianity. The nexus between faith and reason is sometimes stretched but should never be abandoned. *Atheism for Christians* offers a unique insight into the work of some of the greatest secular thinkers and argues there is much to learn.

Loosing the Lion: Proclaiming the Gospel of Mark

The author develops the problem of God in a stimulating way, by exploring science, philosophy, history, and other disciplines. He concludes that God does not exist because the supernatural does not exist – and therefore God, an entity of the supernatural, also does not exist. He regards religion as the biggest hoax ever released on mankind. With his great erudition and critical reasoning, he will incite the reader to serious thought. The controversial topic will provoke a great deal of criticism and perhaps

consequently contribute to clarification of the God's problem. The main concern of the author remains the quest for truth from every possible angle. The book is a modern testament.

Atheism for Christians

Bertrand Russell's religious convictions were controversial, and one of his best selling titles is 'Why I am not a Christian'. This is a comprehensive and coherent survey of Russell on religion, with notes for students.

God – Fact or Fiction

Discussing everything from God to Santa Claus, Prozac to the Taliban and beyond, the author asserts that ethics is balderdash.

Russell on Religion

This Handbook discusses representative philosophers in the history of the philosophy of law and social philosophy, giving clear concise expert definitions and explanations of key personalities and their ideas. It provides an essential reference for experts and newcomers alike.

Balderdash

How do we know what we "know"? How did we –as individuals and as a society – come to accept certain knowledge as fact? In Human Knowledge, Bertrand Russell questions the reliability of our assumptions on knowledge. This brilliant and controversial work investigates the relationship between 'individual' and 'scientific' knowledge. First published in 1948, this provocative work contributed significantly to an explosive intellectual discourse that continues to this day.

Handbook of the History of the Philosophy of Law and Social Philosophy

Karl Barth was, without doubt, one of the most significant religious thinkers of modern times. His radical affirmation of the revealed truth of Christianity changed the course of Christian theology in the twentieth century and is a source of inspiration for countless believers. Pope Pius XII declared that there had been nothing like Karl Barth's later thought since Thomas Aquinas. God Here and Now offers a succinct and accessible overview of that thought. In it, Barth outlines his position on the fundamental tenets of Christian belief, from the decision of faith to the authority of the Bible, and from the interpretation of grace to the significance of Jesus Christ. In this way Barth challenges each and every reader to discover what it means to encounter God, here and now.

Human Knowledge: Its Scope and Limits

What is the overarching meaning of the world's religions? Textbooks relay what the religions believe and leave it at that. But the more puzzling questions--Which of them is true? How do all viewpoints fit together or challenge one another?--are left unaddressed. Like an unfinished puzzle, the myriad religions present themselves to us as countless pieces, but their relationship to each other and ultimate importance escape us. Can the religions of the world really agree on anything or fit into a common narrative or singular image? This work argues that despite the disagreements and contradictions among world religions, a universal message can be found by studying them with care. It offers a comprehensive examination of religions and their meaning, uniquely bound by the hope and affirmation that in some way they are universally connected. It affirms a universalism by wisdom, which contends that a moral and spiritual wisdom can be found in many of the world's religions. Understood and interpreted properly, religions can help all people lead good and meaningful lives.

The Beast in Sheep's Clothing

We need a coherent picture of our world. Life's realities won't let us ignore its fundamental questions, but with so many opposing views, how will we choose answers that are reliable? In this series of books, David Gooding and John Lennox offer a fair analysis of religious and philosophical attempts to find the truth about the world and our place in it. By listening to the Bible alongside other leading voices, they show that it is not only answering life's biggest questions—it is asking better questions than we ever thought to ask. In Book 2 – Finding Ultimate Reality, they remind us that the authority behind ethics cannot be separated from the truth about ultimate reality. Is there a Creator who stands behind

his moral law? Are we the product of amoral forces, left to create moral consensus? Gooding and Lennox compare ultimate reality as understood in: Indian Pantheistic Monism, Greek Philosophy and Mysticism, Naturalism and Atheism, and Christian Theism.

God Here and Now

The quintessential guide to living a meaningful life without God. Why should we believe in God without any evidence? How can there be meaning in life when death is final? With historical adherents including such thinkers as Einstein, Freud, Philip Pullman, and Frank Zappa, "Humanism"'s central quest is to make sense of such questions, explaining the ethical and metaphysical by appealing to shared human values, rationality, and tolerance. Essential reading for atheists, agnostics, ignostics, freethinkers, rationalists, skeptics, and believers too, this Beginner's Guide will explain all aspects of the Humanist philosophy whilst providing an alternative and valuable conception of life without religion.

Why i Am Not a Christian

The power of modernity to secularise has been a foundational idea of the western world. Both social science and church history understood that the Christian religion from 1750 was deeply vulnerable to industrial urbanisation and the Enlightenment. But as evidence mounts that countries of the European world experienced secularising forces in different ways at different periods, the timing and causes of de-Christianisation are now widely seen as far from straightforward. Secularisation in the Christian World brings together leading scholars in the social history of religion and the sociology of religion to explore what we know about the decline of organised Christianity in Britain, Europe, the United States, Canada and Australia. The chapters tackle different strands, themes, comparisons and territories to demonstrate the diversity of approach, thinking and evidence that has emerged in the last 30 years of scholarship into the religious past and present. The volume includes both new research and essays of theoretical reflection by the most eminent academics. It highlights historians and sociologists in both agreement and dispute. With contributors from eight countries, the volume also brings together many nations for the first consolidated international consideration of recent themes in de-Christianisation. With church historians and cultural historians, and religious sociologists and sociologists of the godless society, this book provides a state-of-the-art guide to secularisation studies.

Making Sense of the Sacred

Justice in War-time, first published in 1916, is a collection of Bertrand Russell's essays on war. He claims that humans have an instinct toward war, but that this instinct needs to be sufficiently roused in order to spark conflict. He analyzes British foreign policy during the ten years before the First World War in an effort to discover how England may have contributed to the problem. The essays included in this volume are: . "An Appeal to the Intellectuals of Europe" . "The Ethics of War" . "War and Non-Resistance" . "Why Nations Love War" . "The Future of Anglo-German Rivalry" . "Is Permanent Peace Possible?" . "The Danger to Civilization" . "The Entente Policy, 1904-1915. A Reply to Professor Gilbert Murray" British philosopher and mathematician BERTRAND ARTHUR WILLIAM RUSSELL (1872-1970) won the Nobel Prize for Literature in 1950. Among his many works are Why I Am Not a Christian (1927), Power: A New Social Analysis (1938), and My Philosophical Development (1959).

Säkularismus und religiöser Wandel

'You cannot get far in these essays without sensing yourself in the presence of a writer of immense intellectual power and fierce independence of mind.' - Janet Soskice, from the Introduction to the Routledge Classics edition Simone Weil (1909–1943) is one of the most brilliant and unorthodox religious and philosophical thinkers of the twentieth century. She was also a political activist who worked in the Renault car factory in France in the 1930s and fought briefly as an anarchist in the Spanish Civil War. Hailed by Albert Camus as 'the only great spirit of our times,' her work spans an astonishing variety

of subjects, from ancient Greek philosophy and Christianity to oppression, political freedom and French national identity. *Waiting for God* is one of her most remarkable books, full of piercing spiritual and moral insight. The first part comprises letters she wrote in 1942 to Jean-Marie Perrin, a Dominican priest, and demonstrate the intense inner conflict Weil experienced as she wrestled with the demands of Christian belief and commitment. She then explores the 'just balance' of the world, arguing that we should regard God as providing two forms of guidance: our ability as human beings to think for ourselves; and our need for both physical and emotional 'matter.' She also argues for the concept of a 'sacred longing'; that humanity's search for beauty, both in the world and within each other, is driven by our underlying desire for a tangible god. Eloquent and inspiring, *Waiting for God* asks profound questions about the nature of faith, doubt and morality that continue to resonate today. This Routledge Classics edition includes a new Introduction by Janet Soskice and retains the Foreword to the 1979 edition by Malcolm Muggeridge.

Secularisation in the Christian World

Examining accounts in which scientific advances clashed with Christian doctrine or biblical interpretations of the day, from Galileo and the Copernican Revolution, to the medical breakthroughs of anesthesia and inoculation, Russell points to the constant upheaval and reevaluation of our systems of belief throughout history. In turn, he identifies where similar debates between modern science and the Church still exist today.

Gary Cox guides us through 42 of the most misunderstood, misquoted, provocative and significant quotes in the history of philosophy providing a witty and compelling commentary along the way. This entertaining and illuminating collection of quotes doesn't merely list who said what and when, it explores who each philosopher is and what he or she really meant when they said what they said. Viewing each quote as a philosophical thesis in itself, Cox probes the writings of everyone from Douglas Adams to A.J. Ayer and Thomas Aquinas to Karl Marx. This is a philosophical journey through history, culture and writing to bring us to a deeper understanding of why we think the way we do. As Douglas Adams points out, if there is no final answer to the question, 'What is the meaning of life?', '42' is as good or bad an answer as any other. Here Cox shows that 42 quotes might be even better!

The Power of Hope

With a new Introduction by the author 'An elegant and sane little book. – *The New Statesman* Myths, as Mary Midgley argues in this powerful book, are everywhere. In political thought they sit at the heart of theories of human nature and the social contract; in economics in the pursuit of self interest; and in science the idea of human beings as machines, which originates in the seventeenth century, is today a potent force. Far from being the opposite of science, however, Midgley argues that myth is a central part of it. Myths are neither lies nor mere stories but a network of powerful symbols for interpreting the world. Tackling a dazzling array of subjects such as philosophy, evolutionary psychology, animals, consciousness and the environment in her customary razor-sharp prose, *The Myths We Live By* reminds us of the powerful role of symbolism and the need to take our imaginative life seriously. Mary Midgley is a moral philosopher and the author of many books including *Wickedness*, *Evolution as a Religion*, *Beast and Man* and *Science and Poetry*. All are published in Routledge Classics.

Waiting for God

Islam and Christianity in Medieval Anatolia offers a comparative approach to understanding the spread of Islam and Muslim culture in medieval Anatolia. It aims to reassess work in the field since the 1971 classic by Speros Vryonis, *The Decline of Hellenism in Asia Minor and the Process of Islamization* which treats the process of transformation from a Byzantinist perspective. Since then, research has offered insights into individual aspects of Christian-Muslim relations, but no overview has appeared. Moreover, very few scholars of Islamic studies have examined the problem, meaning evidence in Arabic, Persian and Turkish has been somewhat neglected at the expense of Christian sources, and too little attention has been given to material culture. The essays in this volume examine the interaction

between Christianity and Islam in medieval Anatolia through three distinct angles, opening with a substantial introduction by the editors to explain both the research background and the historical problem, making the work accessible to scholars from other fields. The first group of essays examines the Christian experience of living under Muslim rule, comparing their experiences in several of the major Islamic states of Anatolia between the eleventh and fifteenth centuries, especially the Seljuks and the Ottomans. The second set of essays examines encounters between Christianity and Islam in art and intellectual life. They highlight the ways in which some traditions were shared across confessional divides, suggesting the existence of a common artistic and hence cultural vocabulary. The final section focusses on the process of Islamisation, above all as seen from the Arabic, Persian and Turkish textual evidence with special attention to the role of Sufism.

Why I Am Not a Christian

"Should be read by every parent, teacher, minister, and Congressman in the land."—The Atlantic In *The Conquest of Happiness*, first published by Liveright in 1930, iconoclastic philosopher Bertrand Russell attempted to diagnose the myriad causes of unhappiness in modern life and chart a path out of the seemingly inescapable malaise so prevalent even in safe and prosperous Western societies. More than eighty years later, Russell's wisdom remains as true as it was on its initial release. Eschewing guilt-based morality, Russell lays out a rationalist prescription for living a happy life, including the importance of cultivating interests outside oneself and the dangers of passive pleasure. In this new edition, best-selling philosopher Daniel C. Dennett reintroduces Russell to a new generation, stating that *Conquest* is both "a fascinating time capsule" and "a prototype of the flood of self-help books that have more recently been published, few of them as well worth reading today as Russell's little book."

Religion and Science

The noted German sociologist and philosopher Georg Simmel wrote a number of essays that deal directly with religion as a fundamental process in human life. These essays set forth Simmel's mature reflections on religion and its relation to modernity, personality, art, sociology, psychology, philosophy, and science. They also include his views on methods in the study of religion and his thoughts on achieving a broader perspective on religion. Originally published between 1898 and 1918, the last twenty years of Simmel's life, the essays are collected here in English for the first time. The essays provide an excellent picture of the development of the characteristic doctrines of Simmel's thought as applied to religion, based on phenomenological analysis of human experience that emphasizes the subjective dimensions of life.

Deep Thought

Of the most common approaches to apologetics, which is most effective? The goal of apologetics is to persuasively defend Christianity against charges of falsehood, inconsistency, or credulity. It's an intellectual discipline that serves to bolster the faith of Christian believers and to aid the task of evangelism, but are some methods more effective than others? *Five Views on Apologetics* examines the "how-to" of apologetics, putting five prominent techniques under the microscope: Classical – represented by William Lane Craig Evidential – represented by Gary Habermas Cumulative Case – represented by Paul D. Feinberg Presuppositional – represented by John M. Frame Reformed Epistemology – represented by Kelly James Clark Offering a forum for presentation, critique, and defense, this book allows the contributors for the different viewpoints to respond to the others. Your own informed conclusions can then guide you as you meet the questions of a needy world with the claims of the gospel. The Counterpoints series presents a comparison and critique of scholarly views on topics

important to Christians that are both fair-minded and respectful of the biblical text. Each volume is a one-stop reference that allows readers to evaluate the different positions on a specific issue and form their own, educated opinion.

Evolution as a Religion

Featuring seminal work in the philosophies of mathematics and language, this comprehensive and assiduously edited collection also makes available his provocative and controversial views on religion and international relations.

Religion and Culture

This volume, offering an insight into the literary world of Rome in the fourth century AD, reflects an increased interest in the writers of the 150 years before the collapse of the Western Empire, who have long been over-shadowed by the pre-eminence accorded since the eighteenth century to the Golden and Silver ages. Among the writers examined are Ausonius, the poet, Imperial official and tutor to Gratian; Claudian, the last major 'classical' poet; Prudentius, and Paulinus of Nola, two of the founders of Christian Latin poetry; Symmachus, the letter writer and supporter of die-hard paganism; and St. Augustine, whose influence on Christian thought and the Middle Ages is incalculable. These essays consider how such writers responded to a world where vitality was ebbing from the old forms of political life, religion and literature, giving way to new institutions, modes of life and horizons of reflection.

Islam and Christianity in Medieval Anatolia

True Christianity

Never before translated into English, this book by the 16th-century Lutheran mystic (1555-1621) has been the foundation for countless spiritual works both Protestant and Catholic.

Of True Christianity

Johann Arndt's True Christianity was the most popular devotional work within the Lutheran tradition in the century following the Reformation. This book went through a number of editions in Germany, and has been translated into dozens of languages. Through a series of meditations, Arndt discusses the Christian life in practical terms, which were meant to be understood by the average layperson. Arndt's writing was influenced by the Theologia Germanica, John Tauler's sermons, and Thomas A Kempis' The Imitation of Christ, along with the writings of Martin Luther. Significantly, Arndt mentored Johann Gerhard, who continued Arndt's promotion of practical piety, while also providing a rigorous academic defense of Lutheran thought.

Germany's economic miracle is a widely-known phenomenon, and the world-leading, innovative products and services associated with German companies are something that others seek to imitate. In The 'Made in Germany' Champion Brands, Ugesh A. Joseph provides an extensively researched, insightful look at over 200 of Germany's best brands to see what they stand for, what has made them what they are today, and what might be transferable. The way Germany is branded as a nation carries across into the branding of its companies and services, particularly the global superstar brands - truly world-class in size, performance and reputation. Just as important are the medium-sized and small enterprises, known as the 'Mittelstand'. These innovative and successful enterprises from a wide range of industries and product / service categories are amongst the World market leaders in their own niche and play a huge part in making Germany what it is today. The book also focuses on German industrial entrepreneurship and a selection of innovative and emergent stars. All these companies are supported and encouraged by a sophisticated infrastructure of facilitators, influencers and enhancers - the research, industry, trade and standards organizations, the fairs and exhibitions and all the social and

cultural factors that influence, enhance and add positive value to the country's image. Professionals or academics interested in business; entrepreneurship; branding and marketing; product or service development; international trade and business development policy, will find fascinating insights in this book; while those with an interest in Germany from emerging industrial economies will learn something of the secrets of German success.

This is the first ever anthology of key articles by Johan Galtung, widely regarded as the founder of the academic discipline of peace studies. It covers such concepts as direct, structural and cultural violence; theories of conflict, development, civilization and peace; peaceful conflict transformation; peace education; mediation; reconciliation; a life-sustaining economy; macro-history; deep culture and deep structure; and social science methodology. Galtung has contributed original research, concepts and theories to more than 20 social science disciplines, including sociology, international relations and future studies, and has also applied his new insights in practice. The book is a valuable resource for researchers and practitioners, and can serve as a supplemental textbook for graduate and upper undergraduate courses in peace studies and related fields.

After years of working to change schools from within-testifying before Congress and addressing audiences around the world about how to make schools better places for children-John Holt founded Growing Without Schooling magazine in 1977 to support self-directed education and learning outside of school. Each issue is a lively exchange among readers and Holt, packed with useful advice, resource recommendations, and all sorts of legal, pedagogical, and parenting ideas from people who pioneered what we now call homeschooling. John Holt (1983-1985) is the author of How Children Learn and How Children Fail, which together have sold over a million and a half copies, and eight other books about children and learning. His work has been translated into more than 40 languages. Once a leading figure in school reform, John Holt became increasingly interested in how children learn outside of school. The magazine he founded, Growing Without Schooling (GWS), reflects his philosophy, which he called unschooling. GWS was published from 1977 to 2001 and is the first magazine devoted to homeschooling and self-directed education.

The heterogeneity in the practice of diagnosis and treatment of head and neck squamous cell carcinoma (HNSCC) is known and expected to be inversely correlated with the level of evidence on a given topic. Literature on various aspects of management of HNSCC were previously published, but were usually restricted within narrow foci. Due to the lack of a similar comprehensive work published so far, the Head and Neck Cancer Working Group of Swiss Group for Clinical Cancer Research (SAKK) decided to perform a survey covering the whole spectrum of controversial topics concerning

the diagnosis and the treatment of HNSCC among its member institutions. This survey was designed to discuss current diagnostic and treatment strategies for HNSCC of all localizations, and to find out probable differences and level of consensus between the participating academic institutions by means of a questionnaire-based pattern of care study. The items in the survey was generated with a scored voting system by inclusion of all involved centers, and divided into four sections, each of them not exceeding twenty questions: head and neck surgery, radiation oncology, medical oncology and biomarkers. Surely, the topics and questions were intentionally chosen from controversial areas. Nonetheless, the lack of major consensus in most queried areas provide an insight to head and neck oncologist in terms of the scope of heterogeneity in their practice. Although none of the participated centers being plainly wrong, it is still disturbing to see, that a patient may be treated with quite discrepant diagnostic and treatment concepts even in a relatively small country adhering to up to date evidence based medicine. We believe that this work will serve the head and neck oncologists to be aware of their discrepancies and to stimulate discussion toward standardization of practice and prioritize topics of future clinical research.

Based on the results of two bioenergy research initiatives in Germany, this reference examines the sustainable management of wood biomass in rural areas. The large number of participating organizations and research institutes ensures a balanced and unbiased view on the potentials and risks is presented, taking into account economic, ecological, and social aspects. Most of the results reported are available here for the first time in English and have been collated in central Europe, but are equally applicable to other temperate regions. They highlight best practices for enhancing dendromass potential and productivity, while discussing the implications on rural economies and ecosystems.

The History of Claiborne Parish, Louisiana

The Myth of a Gentile Galilee is the most thorough synthesis to date of archaeological and literary evidence relating to the population of Galilee in the first-century CE. The book demonstrates that, contrary to the perceptions of many New Testament scholars, the overwhelming majority of first-century Galileans were Jews. Utilizing the gospels, the writings of Josephus, and published archaeological excavation reports, Mark A. Chancey traces the historical development of the region's population and

examines in detail specific cities and villages, finding ample indications of Jewish inhabitants and virtually none for gentiles. He argues that any New Testament scholarship that attempts to contextualize the Historical Jesus or the Jesus movement in Galilee must acknowledge and pay due attention to the region's predominantly Jewish milieu. This accessible book will be of interest to New Testament scholars as well as scholars of Judaica, Syro-Palestinian archaeology, and the Roman Near East.

The Evangelical Review

This volume in the Bible and Women series is devoted to rabbinic literature from late Jewish antiquity to the early Middle Ages. Fifteen contributions feature different approaches to the question of biblical women and gender and encompass a wide variety of rabbinic corpora, including the Mishnah-Tosefta, halakhic and aggadic midrashim, Talmud, and late midrash. Some essays analyze biblical law and gender relations as they are reflected in the rabbinic sages' argumentation, while others examine either the rabbinic portrayal of a certain woman or a group of women or the role of biblical women in a specific rabbinic context. Contributors include Judith R. Baskin, Yuval Blankovsky, Alexander A. Dubrau, Cecilia Haendler, Tal Ilan, Gail Labovitz, Moshe Lavee, Lorena Miralles-Maciá, Ronit Nikolsky, Susanne Plietzsch, Natalie C. Polzer, Olga I. This book investigates the ways in which young people engage with and contribute to civil society, community development, and local peacebuilding in the Middle East and North Africa (MENA). Youth engagement and contribution to civil society and local peacebuilding can play a crucial role in development; however, there is often a lack of effective engagement, policies, and opportunities for young people in policy and practice. This book analyses their experiences of civic engagement and community participation and the challenges they face, across diverse areas including youth empowerment, freedom of expression, mobilization, ideologies, conflict resolution, and peacebuilding. Drawing on cases from Yemen, Syria, Iran, Morocco and the Palestinian Territories, this book offers new insights on how youth not only are shaped by, but also react to policies, conflict, constraints, and challenges. The insights drawn from this interdisciplinary collection will be of interest to researchers of civil society, youth, peacebuilding, and development, as well as to policymakers, donors, and NGO staff.
