Florentine Life During the Renaissance - Scholar's Choice Edition

This volume brings together some of the most exciting renaissance scholars to suggest new ways of thinking about the period and to set a new series of agendas for Renaissance scholarship. Overturns the idea that it was a period of European cultural triumph and highlights the negative as well as the positive. Looks at the Renaissance from a world, as opposed to just European, perspective. Views the Renaissance from perspectives other than just the cultural elite. Gender, sex, violence, and cultural history are integrated into the analysis.

History of the Jews Vol III - Scholar's Choice Edition

The history of scholarship has undergone a complete renewal in recent years, and is now a major branch of research with vast territories to explore; a substantial introduction to History of Scholarship surveys the past vicissitudes of the history of scholarship and its current expansion. The authors, all specialists of international standing, come from a variety of backgrounds: classical studies, history of religions, philosophy, early modern intellectual and religious history. Their papers illustrate a variety of themes and approaches, including Renaissance antiquarianism and philology; the rise of the notion of criticism; Biblical and patristic scholarship, and its implications for both confessional orthodoxy and eighteenth-century free thought; the history of philosophy; and German historiographical thought in both the eighteenth and the nineteenth centuries. This challenging volume constitutes a collection of remarkable quality, helping to establish the history of scholarship as a more broadly acknowledged, worthwhile field of study in its own right.

Some Beauties of the Seventeenth Century - Scholar's Choice Edition

Britain and European Integration

Inhaltsangabe: Abstract: The Awkward Partner (AP) Thesis is a widespread theoretical framework which explains why Britain has been called a semi-detached member of the European Union. This paper aims to take on the AP thesis by calling into question its basic tenets. To do this, the thesis claims and initially detectable flaws have to be set out explicitly. But the main challenge shall be launched by examining the Single European Act (SEA) in detail. Resulting contradictions and the implications of the findings require further answers: Should the AP thesis be abandoned? If not, how can it be revised? The argument advanced here is that the AP thesis presupposes a negative behaviour by UK governments vis-à-vis their European counterparts. This is explained by endogenous constraints that are imposed upon the core executive. These constraints are mainly caused by the divergence of domestic political forces. Slow and different rates of adaptation to the EU decision-making level are to be emphasised. While central government has already adjusted to the EU level, it attempts to retain its gatekeeper role between domestic and European political spheres. In contrast to the AP thesis, this paper shall show that in the run-up to the SEA Britain was not more negative than other member states. The UK representatives made proposals and concessions, as did everyone else. Despite the contradiction between theory and empirical study, it shall here not be concluded to abolish the AP thesis, but to amend it instead. First, the role of central government should be looked at in greater detail. Secondly, a link to Liberal Intergovernmentalism is proposed as a way forward. Some inconsistencies of the current framework could thereby be resolved. However, this would also mean to drop all negative connotations, if not the name, of the thesis. Zusammenfassung: Die These vom Unangenehmen Partner ist ein weit verbreitetes theoretisches Modell, das erklärt, warum Großbritannien oft als halbherziges Mitglied der Europäischen Union (EU) bezeichnet wird. Die folgende Studie will diese These dadurch angreifen, indem ihre grundlegenden Annahmen in Zweifel gezogen werden. Dazu müssen zuerst einmal die Kernaussagen sowie einige Unstimmigkeiten der These klar benannt werden. Die größte Herausforderung besteht allerdings darin, die Einheitliche Europäische Akte (EEA) genau zu untersuchen. Die gefundenen Widersprüche sowie deren Auswirkungen erfordern weitere Antworten: Sollte [...]

An Awkward Partner

This is the third edition of an established textbook on Britain's role in the European Community. Britain joined the EC in 1973, over twenty years after the first of the European Communities was formed. Within a year, she had established a reputation for being at odds with major Community initiatives and for taking an independent point of view. This reputation was consolidated over the next twenty-four years. In *An Awkward Partner* Stephen George surveys the policies that earned Britain this reputation, recording the role successive British governments have played in the European Community. He stresses the influence both of external circumstances and domestic political considerations in shaping these policies and analyses some of the underlying political reasons for Britain's perceived awkwardness. The first edition was the first book-length survey to appear in English of British policy toward the European Community, and rapidly became established as the leading book in the field for students. In this third edition, Stephen George brings his analysis up to date, taking the story of the Major Government through to its end in the 1997 general election. This new edition will continue to be invaluable to students taking courses on the European Community, comparative European politics, and public policy.

An Awkward Partner

This text takes a look at Britain's policy towards the European Community. In two new chapters and a new conclusion, the author brings his account up to date and asks what direction the "awkward partnership" between Britain and the EC might take in the future.

The European Union and British Politics

This substantially revised and expanded book provides a thorough overview of all aspects of Britain's relations with the European Union and an examination of the extent of the Europeanisation of British politics.

Uniting of Europe

The University of Notre Dame Press is pleased to bring Ernst Haas's classic work on European integration, *The Uniting of Europe*, back into print. First published in 1958 and last printed in 1968, this seminal volume is the starting point for anyone interested in the pre-history of the European Union. Haas uses the European Coal and Steel Community (ECSC) as a case study of the community formation processes that occur across traditional national and state boundaries. Haas points to the ECSC as an example of an organization with the "power to redirect the loyalties and expectations of political actors." In this pathbreaking book Haas contends that, based on his observations of the actual integration process, the idea of a "united Europe" took root in the years immediately following World War II. His careful and rigorous analysis tracks the development of the ECSC, including, in his 1968 preface, a discussion of the eventual loss of the individual identity of the ECSC through its absorption into the new European Community. Featuring a new introduction by Haas analyzing the impact of his book over time, as well as an updated bibliography, *The Uniting of Europe* is a must-have for political scientists and historians of modern and contemporary Europe. This book is the inaugural volume of Notre Dame's new Contemporary European Politics and Society Series.

The Social Construction of Europe

'The Social Construction of Europe is a wonderful tool for scholars and advanced students concerned with European integration' - *Nationalism and Ethical Politics* This book is the first to systematically introduce and apply a social constructivist perspective to the study of European integration. Social constructivism is carefully located in terms of its philosophical and methodological origins. The wider debates and contribution of constructivist approaches to international relations are reviewed, and the insights that might then be afforded to European studies fully explored. Highlights include: new theoretical contributions to the debate by Ernst B. Haas, Andrew Moravcsik and Steve Smith; research on key aspects of European integration and EU governance applying a variety of constructivist approaches. *The Social Construction of Europe* provides new and important insights to a key area of contemporary study and research.

Britain, France and the Decolonization of Africa

Looking at decolonization in the conditional tense, this volume teases out the complex and uncertain ends of British and French empire in Africa during the period of 'late colonial shift' after 1945. Rather than view decolonization as an inevitable process, the contributors together explore the crucial historical moments in which change was negotiated, compromises were made, and debates were staged. Three core themes guide the analysis: development, contingency and entanglement. The chapters consider the ways in which decolonization was governed and moderated by concerns about development and profit. A complementary focus on contingency allows deeper consideration of how colonial powers planned for 'colonial futures', and how divergent voices greeted the end of empire. Thinking about entanglements likewise stresses both the connections that existed between the British and French empires in Africa, and those that endured beyond the formal transfer of power.

Turkey and the EU

Since the first edition, EU-Turkey relations have clearly taken different directions. This extended and revised edition addresses these major developments and assesses the implications of Turkish membership for the current EU structures.

Europe as Empire

This book offers a strikingly new perspective on EU enlargement. Basing his findings on substantial empirical evidence, Zielonka presents a carefully argued account of the kind of political entity the European Union is becoming, with particular reference to recent enlargement.

Describe the exchange rate problems Toyota, Nissan, and GM face while manufacturing in Britain and propose a long-term strategy for these companies.

Seminar paper from the year 2002 in the subject Economics - International Economic Relations, grade: 1,3 (A), University of Applied Sciences Mainz (Economics), course: European Integration, 22 entries in the bibliography, language: English, abstract: Theories on exchange rate risks and the closely related theory of Purchasing Power Parity (PPP) provide the basis for the analysis of the exchange rate problems the three car producers face while manufacturing in the UK. 1.1 Theories on exchange rate risks The exchange rate risk represents one of the most important risks for companies operating in international industries.¹ There are three kinds of exchange risks: transaction risk, translation risk and economic risk. Transaction exposure is the risk of changes in the value of currency occurring between the time of the settlement of the transaction and the maturity of it.² The second and most important type of exchange risk is economic risk. Economic exposure occurs when currencies, that are involved in the actual or potential competitive situation, become over- or undervalued.³ It can heavily affect current and future cash flows of domestic and foreign operations.⁴ The third type of risk is called translation exposure. It refers to the risk that exchange rate fluctuations may change the value of current assets and liabilities of the balance sheet of a foreign affiliate in case of consolidation.⁵ [...] 1 See: Punnett, Betty J. / Ricks, David A., 1994, p. 305 2 See: Grosse, Robert / Kujawa, Duane, 1992, p. 447 3 Over- and undervaluation are expressions that will be explained under the point 1.2 "Theory of Purchasing Power Parity". 4 See: Czinkota, Michael R. / Ronkainen, Ilkka A. / Moffett Michael H., 1992, p.542 5 See: Grosse, Robert / Kujawa, Duane, 1992, p. 447

Understanding E.U. Policy Making

How are decisions made in the EU?

Blaming Europe?

Examines how citizens attribute responsibility in the European Union, exploring how citizens assign blame to the EU, how politicians and the media attempt to shift blame, and how it matters for electoral democracy as voters are unable to hold their EU representatives to account.

Brexit and Literature

Brexit is a political, economic and administrative event: and it is a cultural one, too. In *Brexit and Literature*, Robert Eaglestone brings together a diverse range of literary scholars, writers and poets to respond to this aspect of Brexit. The discipline of 'English', as the very name suggests, is concerned with cultural and national identity: literary studies has always addressed ideas of nationalism and the wider political process. With the ramifications of Brexit expected to last for decades to come, *Brexit and Literature* offers the first academic study of its impact on and through the humanities. Including a preface from Baroness Young of Hornsey, *Brexit and Literature* is a bold and unapologetic volume, focusing on the immediate effects of the divisive referendum while meditating on its long-term impact.

Diaspora and Transnationalism

Diaspora & transnationalism are widely used concepts in academic & political discourses. Although originally referring to quite different phenomena, they increasingly overlap today. Such inflation of meanings goes hand in hand with a danger of essentialising collective identities. This book analyses this topic.

Gordon Brown

What does the future hold for Britain and the relationships between England, Scotland and Wales? Tom Nairn discusses these issues, with contributions from others from across the political spectrum.

The Death of Expertise

"In the early 1990s, a small group of "AIDS denialists," including a University of California professor named Peter Duesberg, argued against virtually the entire medical establishment's consensus that the human immunodeficiency virus (HIV) was the cause of Acquired Immune Deficiency Syndrome. Science thrives on such counterintuitive challenges, but there was no evidence for Duesberg's beliefs, which turned out to be baseless. Once researchers found HIV, doctors and public health officials were able to save countless lives through measures aimed at preventing its transmission"--

Strengthening Forensic Science in the United States

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The Making of Eurosceptic Britain

What has been the political impact of the Eurozone Debt Crisis in the UK? To what extent have the bank collapses and bailouts reinforced Britain's Eurosceptic trajectory? In this revised and updated second edition Chris Gifford addresses these key questions reflecting on the Labour government's approach to Europe while exploring the extensive mobilisation of Eurosceptic forces in opposition to the Conservative-led coalition government. The book examines the extent to which Euroscepticism has become dominant within both the Conservative leadership and the bulk of its parliamentary party and how this has affected the relationship of the coalition government with the European Union. By placing current attitudes to Europe in relation to the wider history of Britain's post war interaction with its continental neighbours the author shows how British Euroscepticism is structural in nature and a persistent and institutionalised feature of UK Politics.

Federalism and the European Union

A revisionist interpretation of the post-war evolution of European integration and the European Union (EU), this book reappraises and reassesses conventional explanations of European integration. It adopts a federalist approach which supplements state-based arguments with federal political ideas, influences and strategies. By exploring the philosophical and historical origins of federal ideas and tracing their influence throughout the whole of the EU's evolution, the book makes a significant contribution to the scholarly debate about the nature and development of the EU. The book looks at federal ideas stretching back to the sixteenth century and demonstrates their fundamental continuity to contemporary European integration. It situates these ideas in the broad context of post-war western Europe and underlines their practical relevance in the activities of Jean Monnet and Altiero Spinelli. Post-war empirical developments are explored from a federalist perspective, revealing an enduring persistence of federal ideas which have been either ignored or overlooked in conventional interpretations. The book challenges traditional conceptions of the post-war and contemporary evolution of the EU, to reassert and reinstate federalism in theory and practice at the very core of European integration.

The Neoliberal Age?

The late twentieth and early twenty-first centuries are commonly characterised as an age of 'neoliberalism' in which individualism, competition, free markets and privatisation came to dominate Britain's politics, economy and society. This historical framing has proven highly controversial, within both academia and contemporary political and public debate. Standard accounts of neoliberalism generally focus on the influence of political ideas in reshaping British politics; according to this narrative,

neoliberalism was a right-wing ideology, peddled by political economists, think-tanks and politicians from the 1930s onwards, which finally triumphed in the 1970s and 1980s. The Neoliberal Age? suggests this narrative is too simplistic. Where the standard story sees neoliberalism as right-wing, this book points to some left-wing origins, too; where the standard story emphasises the agency of think-tanks and politicians, this book shows that other actors from the business world were also highly significant. Where the standard story can suggest that neoliberalism transformed subjectivities and social lives, this book illuminates other forces which helped make Britain more individualistic in the late twentieth century. The analysis thus takes neoliberalism seriously but also shows that it cannot be the only explanatory framework for understanding contemporary Britain. The book showcases cutting-edge research, making it useful to researchers and students, as well as to those interested in understanding the forces that have shaped our recent past.

Online Dispute Resolution for Consumers in the European Union

Offers an account of ODR for consumers in the EU context, presenting a comprehensive investigation of the development of ODR for business to consumer disputes within the EU. This book examines the role of both the European legislator with the Mediation Directive and the English judiciary in encouraging the use of mediation.

Social Media in Southeast Turkey

This book presents an ethnographic study of social media in Mardin, a medium-sized town located in the Kurdish region of Turkey. The town is inhabited mainly by Sunni Muslim Arabs and Kurds, and has been transformed in recent years by urbanisation, Elisabetta Costa uses her 15 months of ethnographic research to explain why public-facing social media is more conservative than offline life. Yet, at the same time, social media has opened up unprecedented possibilities for private communications between genders and in relationships among young people – Costa reveals new worlds of intimacy, love and romance. She also discovers that, when viewed from the perspective of people's everyday lives, political participation on social media looks very different to how it is portrayed in studies of political postings separated from their original complex, and highly socialised, context. neoliberalism and political events.

Britain Since 1945

This book offers a comprehensive overview of Britain's development since the end of the Second World War. It comprises 23 contributions from leading authorities and newer scholars, set in context with a foreword by Raymond Seitz. A comprehensive and fascinating introduction to Britain from the end of the Second World War Draws together the themes that have dominated discussion amongst scholars and media commentators The chapters are set in context with a foreword by Raymond Seitz Covers topics such as foreign policy, political parties, the media, race relations, women and social change, science and IT, culture, industrial relations, the welfare state, and political and economic issues in Scotland, Wales and Northern Ireland

Twenty-First Century Populism

Twenty-First Century Populism analyses the phenomenon of sustained populist growth in Western Europe by looking at the conditions facilitating populism in specific national contexts and then examining populist fortunes in those countries. The chapters are written by country experts and political scientists from across the continent.

Europeanization

This cutting-edge handbook, written by foremost authoritative scholars, presents the main theoretical and empirical issues involved in current Europeanization research. It evaluates the achievements and shortcomings of the growing literature. As an advanced reference book it also sets the parameters for Europeanization research in the coming years.

Inflation and Activity – Two Explorations and their Monetary Policy Implications

We explore two issues triggered by the crisis. First, in most advanced countries, output remains far below the pre-recession trend, suggesting hysteresis. Second, while inflation has decreased, it has decreased less than anticipated, suggesting a breakdown of the relation between inflation and activity. To examine the first, we look at 122 recessions over the past 50 years in 23 countries. We find that

a high proportion of them have been followed by lower output or even lower growth. To examine the second, we estimate a Phillips curve relation over the past 50 years for 20 countries. We find that the effect of unemployment on inflation, for given expected inflation, decreased until the early 1990s, but has remained roughly stable since then. We draw implications of our findings for monetary policy.

The Passage to Europe

Provides the untold story of the crises and compromises that lead to the formation of the European Union.

Theoretical Approaches to European Integration

This major new text provides a uniquely broad ranging introduction to, and assessment of the contribution of, the whole range of theoretical approaches that have been applied to the analysis of European integration. It provides tools for understanding the underlying logic behind the political and economic debates that take place in the EU today.

EU-Turkey Relations

This open access book explores the new complexities and ambiguities that epitomize EU-Turkey relations. With a strong focus on the developments in the last decade, the book provides full access to a comprehensive understanding of the multifaceted relationship through three entry points: (1) Theories and Concepts, (2) Institutions, and (3) Policies. Part I brings together complementary and competing analytical approaches to study the evolution of EU-Turkey relations, ranging from traditional integration theories to novel concepts. Part II investigates the institutional machinery of EU-Turkey relations by analyzing the roles and perspectives of the European Council, the European Commission, and the European Parliament. Part III offers analyses of the policies most relevant for the relationship: enlargement policy, trade and macroeconomic policies, foreign and security policy, migration and asylum policies, and energy policy. In Part IV, the volume closes with a systematic survey of the conditions under which cooperative trends in EU-Turkey relations could be (re)invigorated. The systematic setup and the balanced combination of distinguished experts from EU- and Turkey-based institutions make this book a fundamental reading for students, researchers, lecturers, and practitioners of EU-Turkey relations, European integration and Turkish foreign policy. Wulf Reiners is Senior Researcher and Head of the Managing Global Governance (MGG) Program of the German Development Institute / Deutsches Institut für Entwicklungspolitik (DIE). Ebru Turhan is Assistant Professor at the Department of Political Science and International Relations, Turkish-German University in Istanbul, Turkey.

Evocative Autoethnography

This comprehensive text is the first to introduce evocative autoethnography as a methodology and a way of life in the human sciences. Using numerous examples from their work and others, world-renowned scholars Arthur Bochner and Carolyn Ellis, originators of the method, emphasize how to connect intellectually and emotionally to the lives of readers throughout the challenging process of representing lived experiences. Written as the story of a fictional workshop, based on many similar sessions led by the authors, it incorporates group discussions, common questions, and workshop handouts. The book: describes the history, development, and purposes of evocative storytelling; provides detailed instruction on becoming a story-writer and living a writing life; examines fundamental ethical issues, dilemmas, and responsibilities; illustrates ways ethnography intersects with autoethnography; calls attention to how truth and memory figure into the works and lives of evocative autoethnographers.

Reluctant Europeans

During the past fifty years few issues in British politics have generated such heated controversy as Britain's approach to European integration. Why has Europe had such an explosive impact on British politics? What impelled British policymakers to embrace a European destiny and why did they take such a cautious approach? These are some of the key issues addressed in *The Reluctant Europeans*. This new study draws upon recently available source material providing a clear chronological account and covering events right up to Blair's first year in office and the launch of the Euro.

Politicizing Europe

Although the United Kingdom's entry to the European Community (EC) in 1973 was initially celebrated, by the end of the first year the mood in the UK had changed from 'hope to uncertainty'. When Edward Heath lost the 1974 General Election, Harold Wilson returned to No. 10 promising a fundamental renegotiation and referendum on EC membership. By the end of the first year of membership, 67% of voters had said 'yes' to Europe in the UK's first-ever national referendum. Examining the relationship between diplomacy and domestic debate, this book explores the continuities between the European policies pursued by Heath and Wilson in this period. Despite the majority vote in favour of maintaining membership, Lindsay Aquiri argues that this majority was underpinned by a degree of uncertainty and that ultimately, neither Heath nor Wilson managed to transform the UK's relationship with the EC in the ways they had hoped possible.

The first referendum

The Prospect of Global History offers a new approach to the study of history, looking at the subject across a greater chronological range and seeking perspectives from sources beyond conventional European narratives.

The Prospect of Global History

The first edition of 3D Laser Scanning for Heritage was published in 2007 and originated from the Heritage3D project that in 2006 considered the development of professional guidance for laser scanning in archaeology and architecture. Publication of the second edition in 2011 continued the aims of the original document in providing updated guidance on the use of three-dimensional (3D) laser scanning across the heritage sector. By reflecting on the technological advances made since 2011, such as the speed, resolution, mobility and portability of modern laser scanning systems and their integration with other sensor solutions, the guidance presented in this third edition should assist archaeologists, conservators and other cultural heritage professionals unfamiliar with the approach in making the best possible use of this now highly developed technique.

Historical Institutionalism in Comparative Politics

This book questions the correctness of these assumptions and aims for further study of them. This is done by disentangling and illuminating the different elements underlying the interrelationship between the Court and the national courts. The objective is to distinguish between the requirements set by the Court; the constitutional powers and competences of national courts to interpret and apply international law, in particular the Convention; the way in which these courts actually use these competences to deal with the Court's interpretative approaches; and the type of criticism that is levelled at the Court's case-law. These elements are studied from the perspective of the Court as well as from a national perspective, in particular for Belgium, France, Germany, the Netherlands, Sweden and the United Kingdom. Analysing these elements separately enables a fruitful assessment of their interrelationship and provides a sound basis for a constructive debate on the implementation of the Convention in national law, which is based on solid constitutional foundations rather than assumptions and intuitions. The current book is therefore of great interest to those who are interested in debates on the interrelationship between the Court and the states - scholars, as well as judges, policy makers and politicians - but also to those who take a more general interest in constitutional implementation mechanisms, judicial powers and judicial argumentation.
