International Marketing

International Retail Marketing combines a broad thematic overview of the key issues concerning international retail marketing with a series of incisive cases and examples of industry practice from markedly different sectors as fashion, food and healthcare. The authors provide an accessible and wide-ranging outline of the fundamentals of the subject, such as trends in retail marketing, strategy and logistics, and buying and merchandise management within an international perspective. Contributions from Europe, North America and Asia show the dynamics affecting international retailing through a variety of case. Key discussion points are highlighted throughout the text, giving a hands-on focus.

EBOOK: International Marketing, 5e

Offering a theoretical base supported by examples, this practical guide takes students through all phases of developing and conducting international marketing research.

International Marketing

Global Marketing, 3rd edition, provides students with a truly international treatment of the key principles that every marketing manager should grasp. International markets present different challenges that require a marketer to think strategically and apply tools and techniques creatively in order to respond decisively within a fiercely competitive environment. Alon et al. provide students with everything they need to rise to the challenge: Coverage of small and medium enterprises, as well as multinational corporations, where much of the growth in international trade and global marketing has occurred; A shift toward greater consideration of services marketing as more companies move away from manufacturing; A shift from developed markets to emerging markets with more dynamic environments; A focus on emerging markets to equip students with the skills necessary to take advantage of the opportunities that these rapidly growing regions present; Chapters on social media, innovation, and technology teaching students how to incorporate these new tools into their marketing strategy; New material on sustainability, ethics, and corporate social responsibility—key values for any modern business; Short and long cases and examples throughout the text show students how these principles and techniques are applied in the real world. Covering key topics not found in competing books, Global Marketing will equip today's students with the knowledge and confidence they need to become leading marketing managers. A companion website features an instructor's manual with test questions, as well as additional exercises and examples for in-class use.

International Marketing

The Fourth Industrial Revolution has disrupted businesses worldwide through the introduction of highly automated processes. This disruption has affected the way in which companies conduct business, impacting everything from managerial styles to resource allocations to necessary new skillsets. As the business world continues to change and evolve, it is imperative that business education strategies are continuously revised and updated in order to adequately prepare students who will be entering the workforce as future entrepreneurs, executives, and marketers, among other careers. The Research Anthology on Business and Technical Education in the Information Era is a vital reference source that examines the latest scholarly material on pedagogical approaches in finance, management, marketing, international business, and other fields. It also explores the implementation of curriculum development and instructional design strategies for technical education. Highlighting a range of topics such as business process management, skill development, and educational models, this multi-volume book is ideally designed for business managers, business and technical educators, entrepreneurs, academicians, upper-level students, and researchers.

International Marketing

Each year American executives make nearly eight million trips overseas for international business. In the process, they leave billions of dollars on the negotiation table. Global Negotiation provides critical tools to help businesspeople save money (and face) when negotiating across cultural divides. Drawing on their more than 50 combined years of experience, as well as extensive field research with over 2000 business people in 21 different cultures, John L. Graham and William Hernández Requejo have

discovered how to create long-lasting commercial relationships around the world. The authors provide a rare combination of practical insight and illuminating anecdotes, and offer examples from well-known companies such as Toyota, Ford, Intel, AT&T, Rockwell, Boeing, and Wal-Mart.

National Image and Competitive Advantage

This textbook sets out the context, techniques and strategies involved in successful international marketing. It breaks down the area into three main parts: analysis - including trading environment, market considerations, research and opportunities; development - including planning, standardization, entry strategies; and implementation - including product strategy, international communication, distribution, pricing, challenges. It takes material from around the world, including Europe, Australia, Pacific Rim and USA, covering consumer and business to business, manufacturing and services. With short case illustrations, longer integrated cases, summaries and discussion points, undergraduate students should find this easy to use both as a course book and for revision reference. Following the new syllabus of the international marketing section of CIM qualifications, this should also serve as reading for any student undertaking these examinations.

A Preface to Marketing Management

Fully updated to include coverage on the recent COVID-19 pandemic as well as other recent macro drivers, this third edition provides a comprehensive and authoritative examination of emerging markets across the globe.
