Intro

Preservation of Mobile Devices all mobile device software and hardware • A lot of manual examination • No single tool will cover all mobile devices and situations

Forensic Preservation • Manual operation via user interface

Forensic Preservation • Logical acquisition via communication port

Forensic Preservation • Physical acquisition via communication port or proprietary interface • Extracts the memory contents in their entirety through the communications port Interpreting the extracted binary is dependent on understanding how the phone store data in memory structures

Forensic Preservation • Physical acquisition via JTAG Use the JTAG interface to extract the memory contents of the device

Forensic Preservation Physical acquisition via direct memory chip access

Forensic Preservation • It is advisable but maybe not practical to acquire data from a mobile device using two or more methods - compare results • Manual examination is sometimes OK i investigators only need a particular piece of information

Forensic Preservation • How to connect? • Wireless access Bluetooth • How to extract data?

Forensic Preservation • Physical memory acquisition
