The Law Governing the Issuing, Transfer and Collection of Municipal Bonds

Unlike some other reproductions of classic texts (1) We have not used OCR(Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

The Law Governing the Issuing, Transfer and Collection of Municipal Bonds

Excerpt from The Law Governing the Issuing, Transfer, and Collection of Municipal Bonds The law of municipal bonds, in the United States, is a development of the last half century. The great body of the litigation involving such securities has been, and will continue to be, prosecuted in the Federal courts, and the rules of decisions of those courts in such cases are now recognized by all courts as the law of municipal securities. In a continuous experience of about twenty years in the examination and collection of municipal bonds, it has been necessary for the author of this work to become familiar with the decisions of both the State and Federal courts on the subject; and, judging from his own experience, it has seemed to him that a full digest of all the decisions of the Federal courts of final jurisdiction involving the validity of municipal bonds would be of appreciable service to the bond lawyer, the bond buyer, and possibly to municipal officials who are required to issue bonds or, provide for and direct their issuance. It has been the intention and aim of the author to digest and cite in this volume all the reported cases which have been decided by the Supreme Court and the several Circuit Courts of Appeals of the United States in which the validity of municipal bonds and the laws relied upon as authority for their issuance have been involved. If any have been omitted, such omission has been unintentional. Departing from the usual course in digesting, I have quoted liberally from the opinions, and I am induced to believe that the practical value of the work is thereby materially enhanced. Such quoted matter is indicated by the usual quotation marks; and the subject-matter, in each instance, of the language quoted as well as of my own digests, or the point decided, in each instance, is indicated by an appropriate headnote. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our

edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

The Law Governing the Issuing, Transfer, and Collection of Municipal Bonds (Classic Reprint)

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

The Law Governing the Issuing, Transfer and Collection of Municipal Bonds

This is a reproduction of a book published before 1923. This book may have occasional imperfections such as missing or blurred pages, poor pictures, errant marks, etc. that were either part of the original artifact, or were introduced by the scanning process. We believe this work is culturally important, and despite the imperfections, have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide. We appreciate your understanding of the imperfections in the preservation process, and hope you enjoy this valuable book.

The Law Governing the Issuing, Transfer and Collection of Municipal Bonds - Primary Source Edition

Contains the reports of state departments and officials for the preceding fiscal biennium.

The Law Governing the Issuing, Transfer and Collection of Municipal Bonds

Leisure and Power in Urban China

Leisure and Power in Urban China is the first comprehensive study of leisure activities in a medium size Chinese city. Hitherto, studies of Chinese leisure have focused on holidays, festivals and tourism. This, however, is a study of the kinds of leisure that take place on regular workdays in a local environment of Quanzhou city. In doing so, Leisure and Power introduces leisure studies to China studies, and data from China to the field of Leisure studies. Based on interviews with people from all walks of life and case studies from bookshops, internet bars, Karaoke parlours, streets and public squares, Rolandsen brings to attention the importance of fun and socializing in the lives of Chinese urbanites. Central to the study is the contrast between popular practices and official discourse. Rolandsen provides in-depth analyses of the moralist "PRC leisure ethic" so characteristic of official Chinese publications and news media. Using examples from everyday life as a contrast, this study demonstrates that official propaganda has but little influence on how Chinese individuals lead their lives. Taking leisure as a point of departure, this book describes the new kinds of interaction between the local party-state and the population it seeks to govern. This book will be of interest to students and scholars of Chinese Studies, Leisure Studies, Urban Studies and Asian Studies in general.

Leisure and Power in Urban China

After millions of migrants moved from China's countryside into its sprawling cities a unique kind of 'informal' urban enclave was born – 'villages in the city'. Like the shanties and favelas before them elsewhere, there has been huge pressure to redevelop these blemishes to the urban face of China's economic vision. Unlike most developing countries, however, these are not squatter settlements

but owner-occupied settlements developed semi-formally by ex-farmers turned small-developers and landlords who rent shockingly high-density rooms to rural migrants, who can outnumber their landlord villagers. A strong state, matched with well-organised landlords collectively represented through joint-stock companies, has meant that it has been relatively easy to grow the city through demolition of these soft migrant enclaves. The lives of the displaced migrants then enter a transient phase from an informal to a formal urbanity. This book looks at migrants and their enclave 'villages in the city' and reveals the characteristics and changes in migrants' livelihoods and living places. Using an interdisciplinary approach, the book analyses how living in the city transforms and changes rural migrant households, and explores the social lives and micro economies of migrant neighbourhoods. It goes on to discuss changing housing and social conditions and spatial changes in the urban villages of major Chinese cities, as well as looking into transient urbanism and examining the consequences of redevelopment and upgrading of the 'villages in the city'; in particular, the planning, regeneration, politics of development, and socio-economic implications of these immense social, economic and physical upheavals.

Rural Migrants in Urban China

This book is an empirically rich case-study of what is currently the most popular alternative-fuel vehicle in the history of motorization – the electric two-wheeler (e-bike). The book provides sociological insights into e-bike mobility in China and discusses politics, social practices and larger issues of mobility transition in urban China. Taking an accessible approach to the subject, the book identifies the main sociospatial conflicts regarding the use of e-bikes and discusses why electric two-wheeler mobility is important for the future of urban China and urban transportation globally. This book will be an invaluable read for urban geographers and transportation researchers, but also for academics and general readers interested in Chinese Studies, specifically in the area of urban mobility in China.

Urban Mobility in Modern China

In *Men and Masculinities in Contemporary China*, Geng Song and Derek Hird offer an account of Chinese masculinities in media discourse and everyday life, covering masculinities on television, in lifestyle magazines, in cyberspace, at work, at leisure, and at home.

Men and Masculinities in Contemporary China

The post-Mao urban reforms of the past decade have physically and psychologically transformed China's cities. *Urban Spaces in Contemporary China* explores how the character of city life changed after political-economic restructuring intensified in 1984, and how this change affected the creation of new physical, economic and cultural space in urban China. Drawing on a wide range of backgrounds, including economics, art history, law, and sociology, the authors bring personal insights to dimensions of urban Chinese life that are often misunderstood: China's large "floating populations," avant-garde art, labor movements, and leisure.

Urban Spaces in Contemporary China

Ken Roberts' Social Theory, Sport and Leisure offers a clear, compact primer in social theory for students needing to engage with the application of sociological perspectives to the study of sport and leisure. Written in a straightforward style and assuming no prior knowledge, the book offers a fresh and easy to read overview of sociology's contribution to sport and leisure studies. Ordered chronologically, each chapter: Focuses on the work of a major social theorist and their most influential ideas Provides helpful historical and biographical detail to set the person and their thinking in contemporary context Identifies questions in sport and leisure on which the theory can shed useful light Considers how the ideas can be, or have been, applied in the study of sport and leisure Works as a self-contained unit, enabling students and lecturers to use the book flexibly according to their needs. Written by an outstanding sociologist of leisure and sport, this intelligent yet jargon-free textbook enables students to get to grips with a wide range of important concepts and understand their diverse applications. As such, it is essential reading for any course designed to explore the place and meaning of sport and leisure in society.

Social Theory, Sport, Leisure

China's distinctive social media platforms have gained notable popularity among the nation's vast number of internet users, but has China's countryside been 'left behind' in this communication revolution? Tom McDonald spent 15 months living in a small rural Chinese community researching how the residents use social media in their daily lives. His ethnographic findings suggest that, far from being left behind, many rural Chinese people have already integrated social media into their everyday experience. Throughout his ground-breaking study, McDonald argues that social media allows rural people to extend and transform their social relationships by deepening already existing connections with friends known through their school, work or village, while also experimenting with completely new forms of relationships through online interactions with strangers, particularly when looking for love and romance. By juxtaposing these seemingly opposed relations, rural social media users are able to use these technologies to understand, capitalise on and challenge the notions of morality that underlie rural life.

Social Media in Rural China

This book explores the history of leisure in Chinese culture by tracing the development of Chinese philosophy and leisure values in Chinese tradition and civilization. It addresses the tremendous changes in Chinese society brought about by the country's rapid economic development and the impact on Chinese culture and leisure. It considers the social, political and economic challenges facing China, from corruption to sharpening inequalities, from ecological crisis to the need for a revival of Chinese culture and for political democratization. It suggests that leisure can exert an invisible and formative influence on people's lifestyle and value system and considers ongoing trends in the development of leisure activities as they relate to modern Chinese society and social reform.

Traditional Chinese Leisure Culture and Economic Development

In recent decades, Chinese cities have experienced profound social, economic and spatial transformations. In particular, Chinese cities have witnessed the largest housing boom in history and unprecedented housing privatization. China now is a country of homeowners, with more than 70 per cent of urban residents owning homes, higher than many developed countries. This book shows how China's spectacular housing success is not shared by all social groups, with rapidly rising housing inequality, and residential segregation increasingly prevalent in previously homogeneous Chinese cities. It focuses on the two extremes of the residential landscape, and reveals the stark contrast between low-income households who live in shacks in so-called 'urban villages' and the nouveaux riches who live in exclusive gated villa communities. Over four parts, the contributors look at the degree to which inequality affects Chinese cities, and the extent of residential differentiation; housing for the urban poor, and in particular, housing for migrants from rural China; housing for the rapidly expanding Chinese middle class and the new rich; and finally, governance in residential neighbourhoods. *Housing Inequality in Chinese Cities* presents theoretically informed and empirically grounded research into the polarized residential landscape in Chinese cities, and as such will be of great interest to students and scholars of Chinese studies, urban geography, urban sociology, and urban studies.

Housing Inequality in Chinese Cities

This book is about understanding, contextualizing and carrying out critical analyzes of the policies intended and/or implemented by the various public and private actors in urban public spaces, as well as the daily, or eventual, politics exercised by the organized civil society and by citizens. It presents a collection of contributions about the public space in different theoretical, conceptual and methodological approaches. Coming from different disciplines, the authors share an understanding about the need to analyze the uses and appropriations of the city by social subjects and groups as they represent difference and see the city as a place to share life experiences; as such, they argue, through their cases studies, that places of public use should be thought of and understood as concept and as social practice. As an analytic tool, the book offers a five-dimension model to explore how people relate to daily life activities and confront imposed inequalities in their meeting places, how they engage in individual and collective manifestations and/or how they symbolically appropriate public spaces in face of the late capitalism led by large corporations and globalization. Together the authors seek to contribute to a city of utopia, where all differences can be seen and dealt with in public spaces and where free individuals can present themselves and engage in a *vita activa*.

Urban Public Spaces

In this book the authors offer their unique perspectives on the important roles Chinese students and intellectuals played in the shaping of the twentieth-century China. Their answers to these pivotal questions explore new nationalistic spirit, modern world-views, and willingness of self-sacrifice, which had attributed to the spontaneous actions of the students as a "New Culture" emerged during the May Fourth Movement. These articles show how China nurtured these spontaneous student movements, even though the Nationalist Party in the Republic of China and the Communist Party in the People's Republic had exerted tight control over schools. Both governments established organizations as well as operations among students that effectively turned some of the student movements into a political instrument by the parties for their own agenda.

A Century of Student Movements in China

This interdisciplinary collection of essays provides a broad, multifaceted examination of urbanization in China. The contributors also analyze the ways in which the Chinese Communist Party and the government have adapted and survived politically throughout the urbanization process.

Urbanization and Party Survival in China

The Lahu, with a population of around 470,000, inhabit the mountainous country in Yunnan Province bordering on Burma, Laos and northern Thailand. Buddhists, with a long history of resistance to the Chinese Han majority, the Lahu are currently facing a serious collapse of their traditional social system, with the highest suicide rate in the world, large scale human trafficking of their women, alcoholism and poverty. This book, based on extensive original research including long-term anthropological research among the Lahu, provides an overview of the traditional way of life of the Lahu, their social system, culture and beliefs, and discusses the ways in which these are changing. It shows how the Lahu are especially vulnerable because of their lack of political representatives and a state educated elite which can engage with, and be part of, the government administrative system. The Lahu are one of many relatively small ethnic minorities in China – overall the book provides an example of how the Chinese government approaches these relatively small ethnic minorities.

The Lahu Minority in Southwest China

This book examines the learning curve of the People's Supreme Court of China as an expanding Chinese national institution that has played a key role in the struggle for the rule of law in China. Within the unity of state administration and the requirements of the constitution, the court has negotiated the changing tension between politics and law through improvising new formats of interpretation and supervision in response to the changing priorities of revolution and market reform.

China's Supreme Court

"Providing a up-to-date, comprehensive analysis of the most critical aspects of the growth of HIV/AIDS in China, this book moves beyond biomedical explanations to link the epidemic to broader issues of economic and social development."--Publisher's description

HIV/AIDS in China - The Economic and Social Determinants

China today has the largest communist political regime and one of the most dynamic, fastest-growing, and largest economies in the world. Using a case study of China's tobacco industry, this book analyses how the Chinese government was able to cultivate big state-owned firms that have successfully embraced the global market. The success of the Chinese economy and the many state-owned firms within it have given rise to a "Beijing Consensus," challenging almost every principle enshrined in the so-called "Washington Consensus" that espouses private ownership, free markets, and democracy. By examining two important political processes in contemporary China, 'local state competition' and 'global-market building', the book argues that the first process serves as a crucial basis for the second. It illustrates how the local governments involved themselves in building and shaping the tobacco market throughout the 1980s and 1990s, and how these domestic market dynamics created conditions for China's recent embrace of the international market. Offering an in-depth exploration of the political-economic processes in a key Chinese state industry, the book emphasizes that the key to understanding China's political transition is to look at how the state has been shaped by its market-building projects both domestically and globally. It presents an important contribution to studies on Chinese Business and International Political Economy.

State-Market Interactions in China's Reform Era

Since the early 1990s the media and cultural fields in China have become increasingly commercialized, resulting in a massive boom in the cultural and entertainment industries. This evolution has also brought about fundamental changes in media behaviour and communication, and the enormous growth of entertainment culture and the extensive penetration of new media into the everyday lives of Chinese people. Against the backdrop of the rapid development of China's media industry and the huge growth in social media, this book explores the emotional content and public discourse of popular media in contemporary China. It examines the production and consumption of blockbuster films, television dramas, entertainment television shows, and their corresponding online audience responses, and describes the affective articulations generated by cultural and media texts, audiences and social contexts. Crucially, this book focuses on the agency of audiences in consuming these media products, and the affective communications taking place in this process in order to address how and why popular culture and entertainment programs exert so much power over mass audiences in China. Indeed, Shuyu Kong shows how Chinese people have sought to make sense of the dramatic historical changes of the past three decades through their engagement with popular media, and how this process has created a cultural public sphere where social communication and public discourse can be launched and debated in aesthetic and emotional terms. Based on case studies that range from television drama to blockbuster films, and reality television programmes to social media sites, this book will be of great interest to students and scholars of Chinese culture and society, media and communication studies, film studies and television studies.

Popular Media, Social Emotion and Public Discourse in Contemporary China

Rural-urban migration within China has transformed and reshaped rural people's lives during the past few decades, and has been one of the most visible phenomena of the economic reforms enacted since the late 1970s. Whilst Feminist scholars have addressed rural women's experience of struggle and empowerment in urban China, in contrast, research on rural men's experience of migration is a neglected area of study. In response, this book seeks to address the absence of male migrant workers as a gendered category within the current literature on rural-urban migration. Examining Chinese male migrant workers' identity formation, this book explores their experience of rural-urban migration and their status as an emerging sector of a dislocated urban working class. It seeks to understand issues of gender and class through the rural migrant men's narratives within the context of China's modernization, and provides an in-depth analysis of how these men make sense of their new lives in the rapidly modernizing, post-Mao China with its emphasis on progress and development. Further, this book uses the men's own narratives to challenge the elite assumption that rural men's low status is a result of their failure to adopt a modern urban identity and lifestyle. Drawing on interviews with 28 male rural migrants, Xiaodong Lin unpacks the gender politics of Chinese men and masculinities, and in turn contributes to a greater understanding of global masculinities in an international context. This book will be of great interest to students and scholars working in the fields of Chinese culture and society, gender studies, migration studies, sociology and social anthropology. Shortlisted for this year's BSA Philip Abrams Memorial Prize.

Gender, Modernity and Male Migrant Workers in China

This book explores how Confucian thought, which was the ideological underpinning of traditional, imperial China, is being developed and refined into a New Confucianism relevant for the twenty-first century. It traces the development of Confucian thought, examines significant new texts, and shows how New Confucianism relates to various spheres of life, how it informs views on key philosophical issues, and how it affects personal conduct. Starting by exploring the philosophical and ideological principles of New Confucianism, the book goes on to explain how New Confucianism is a collective process of continuous creation and recreation, an incessant and evolving discourse. It argues that New Confucianism, unlike its earlier manifestation, is more accommodating of a plurality of ideologies in the world; and that understanding Confucianism and how it is developing is essential for understanding contemporary China.

New Confucianism in Twenty-First Century China

This book traces the development of Taiwan's relations with its diplomatic partners and its policy towards the political opponents of its political opponent - mainland China. Paying particular attention to the powers that could exercise great influence in the future of East Asia, China-Taiwan Relations in a Global Context examines the main diplomatic strategies of Taiwan and its counterparts and the major

problems for Taiwanese foreign relations. To date there is very little scholarship which examines the 'Taiwan Issue' outside of the triangular Beijing-Washington-Taipei framework, this book does exactly that. The contributors examine the development of Taiwan's relationship with less prominent countries and governments, and attempt to ascertain how such examinations could give rise to new variables that help explain the strategy and purpose of Taiwan's foreign policy, as well as the reaction and response of mainland China. This book provides readers with vital information about Taiwan's foreign policymaking and introduces rarely told stories about Taiwan's foreign relations. The research demonstrates the ceaseless and unyielding diplomatic efforts of the Taiwanese for survival in a shrunken international space and renders for readers a better understanding of the complexity of Taiwan's relations with the rest of the world. This book is essential reading for anyone interested in Taiwan studies, Chinese politics, Cross-Strait relations and Asian foreign policy.

China-Taiwan Relations in a Global Context

This edited volume presents fresh empirical research on the emerging outcomes of China's law reforms. The chapters examine China's 'going out' policy by addressing the ways in which the underpinning legal reforms enable China to pursue its core interests and broad international responsibilities as a rising power. The contributors consider China's civil and commercial law reforms against the economic backdrop of an outflow of Chinese capital into strategic assets outside her own borders. This movement of capital has become an intriguing phenomenon for both ongoing economic reform and its largely unheralded underpinning law reforms. The contributors ask probing questions about doing business with China and highlight the astonishing escalation of China's outbound foreign direct investment (OFDI). *Law and Policy for China's Market Socialism* includes contributions from leading China-law scholars and specialist practitioners from the People's Republic of China, Hong Kong, the United States, the United Kingdom and other countries who all extend the examination of powerful influences on China's law reforms into new areas. Given the forecast for the growth of China's domestic market, those wishing to gain a better understanding and seeking success in the world's most dynamic marketplace will benefit greatly from reading this book. This book is essential reading for anyone interested in Chinese economics and business, Chinese Law, Chinese politics and commercial law.

Law and Policy for China's Market Socialism

As a nineteenth-century commercial development, the alleyway house was a hybrid of the traditional Chinese courtyard house and the Western terraced one. Unique to Shanghai, the alleyway house was a space where the blurring of the boundaries of public and private life created a vibrant social community. In recent years however, the city's rapid redevelopment has meant that the alleyway house is being destroyed, and this book seeks to understand it in terms of the lifestyle it engendered for those who called it home, whilst also looking to the future of the alleyway house. Based on groundwork research, this book examines the Shanghai alleyway house in light of the complex history of the city, especially during the colonial era. It also explores the history of urban form (and governance) in China in order to question how the Eastern and Western traditions combined in Shanghai to produce a unique and dynamic housing typology. Construction techniques and different alleyway house sub-genres are also examined, as is the way of life they engendered, including some of the side-effects of alleyway house life, such as the literature it inspired, both foreign and local, as well as the portrayal of life in the laneways as seen in films set in the city. The book ends by posing the question: what next for the alleyway house? Does it even have a future, and if so, what lies ahead for this rapidly vanishing typology? This interdisciplinary book will be welcomed by students and scholars of Chinese studies, architecture and urban development, as well as history and literature.

The Shanghai Alleyway House

Unlike many studies of social attitudes, which are based on large scale quantitative surveys, or which focus on the attitude of elites, this book considers the views of ordinary people, and is based on in-depth, qualitative interviews. This approach results in rich, nuanced data, and is especially helpful for highlighting ambivalent attitudes, where respondents may hold positive and negative views on a particular topic, views which are liable to change. The book examines attitudes on a range of subjects of current importance, including views on nationalism and internationalism, housing preferences, and educational ambitions. Throughout, the book explores how far attitudes are influenced by traditional Chinese values or by the neo-liberal outlook fostered by recent reforms, and concludes that materialism and individualism have increased.

Social Attitudes in Contemporary China

In China, the central government has the political will to control organized crime, which is seen as a national security threat. The crux of the problem is how to control local governments that have demonstrated lax enforcement without sufficient regulation from the provincial governments. The development of prostitution, underground gambling and narcotics production has become so serious that the central government has to rely on anti-crime campaigns to combat these "three evils". This book explores the specific role of government institutions and agencies, notably the police, in controlling organised and cross-border crime in Greater China. Drawing heavily on original empirical data, it compares the both the states of the People's Republic of China and Taiwan, as well as city-states Hong Kong and Macao. This region has become increasingly economically integrated, and human interactions have been enhanced through improved trade relations, tourism, and increased individual freedom. The book argues that the regime capacity of crime control across Greater China has been expanded through regional and international police cooperation as well as anti-crime campaigns. It suggests that a strong central state in China is necessary to rein in the local states and to prevent the risk of deteriorating into a political-criminal nexus. Focusing on regime capacity in crime control, regime autonomy from crime groups, and regime legitimacy in the fight against organized crime, this thought-provoking book will be of great interest to students and scholars of Chinese politics and criminology more broadly.

The Politics of Controlling Organized Crime in Greater China

In the West, innovations in new public management (NPM) have been regarded as part of the neoliberal project, whilst in China, these reforms have emerged from a very different economic and social landscape. Despite these differences however, similar measures to those introduced in the West have been adopted by the Chinese state, which has largely abandoned the planned economy and adopted market mechanisms in the pursuit of improved economic efficiency and growth. Evaluating the results of these reforms in both China and the West between 1978 and 2011, this book shows that despite substantial improvements in economic efficiency in both cases under consideration, there have been considerable negative impacts on the distribution of wealth, access to public services, levels of poverty, public health, and the incidence of crime. Further, this book explores the different results of NPM in China and the West and the conclusions Paolo Urio draws have timely significance, as he suggests that China has been able to change its policies more rapidly and thus more effectively respond to the challenges posed by the current economic crisis. Drawing on both Western and Chinese sources, this innovative book compares the consequences of their public management reforms, taking into account the impact on both the economy and society. As such, this book will be of great interest to students and scholars working in the fields of Chinese studies, Asian studies, business, economics, strategic public management and comparative studies in capitalism and socialism.

China, the West and the Myth of New Public Management

Despite operating in one of the most tightly controlled media environments in the world, Chinese journalists sometimes take extraordinary risks, braving the perils of job loss or imprisonment to report sensitive stories. As a result, a group of journalists stands at the forefront of some of China's most dramatic social and political changes. This book is the first to systematically explore why some Chinese journalists decide to challenge Communist Party power holders and the censorship system. Based on 18 months of fieldwork, interviews with over 70 Chinese journalists and academics and analysis of nearly 20,000 Chinese newspaper articles, it investigates the motivation behind news workers who often brave the perils of challenging an authoritarian system. Rather than being driven by commercial pressures or financial inducements, the book suggests that many aggressive journalists push the limits of acceptable coverage because of their sense of public spirit and their professional role orientation. It argues that ultimately, these advocate journalists matter because they challenge specific policies and are changing China, one article at a time. By investigating these path-breaking journalists, the book engages with literature across the social sciences on contentious politics and social movements, political communication, media theory and the sociology of professions. Therefore, it will be of great interest to students and scholars of Chinese Studies, Politics and Media Studies.

China's Unruly Journalists

Over the past three decades, China's economic structure, direction and international presence have undergone a dramatic transformation. This rapid rise and China's enormous success in economic terms has created new challenges, and this book examines how the Chinese economy can continue

to flourish, whilst at the same time protecting the environment and giving people more equal access to the benefits of the country's economic development. Examining the key issues surrounding China's continued sustainable development, in economic, political, social and more traditional environmental terms, this book assesses the costs of China's rapid development to date and in turn asks whether this can be maintained. The contributors show that the idea of sustainable development must take into account more than just the physical environment, and that there are additional problems relating to the sustainability of China's economic growth that are much more complicated. Divided into two broad sections, the book looks first at the broader issues of sustainability in China, before turning to the more classic idea of sustainability, that of the environment. In doing so, the contributors show that sustainability is a far more complex phenomenon than is often assumed, and that economic and social sustainability are inherently linked to environmental sustainability. Dealing with what are arguably the greatest challenges facing China today, this book will be of great interests to students and scholars of Chinese studies, Chinese economics and Chinese politics, as well as those interested in development studies and sustainable development more broadly.

Sustainable Development in China

According to the Food and Agriculture Organization (FAO) of the United Nations, more than 80% of world's fish stocks are fully exploited, over-exploited, depleted, or recovering from depletion. Although several international agreements have promoted more responsible fisheries, coastal states have usually maintained national policies that enable higher harvest levels rather than greater conservation of fish stocks, and international agreements for more responsible fisheries have generally experienced a weak domestic implementation. Among the major coastal fishing states, China constitutes the largest fish producer and main exporter in the world, and therefore presents a fascinating case-study for the domestic implementation of international fisheries agreements. This book investigates the degree to which China has complied with the international agreements it has signed, and asks why it is failing to meet expectations. Crucially, it calls for greater emphasis on the political, rather than technical, issues involved in the implementation of international regimes. In turn, it examines how understanding the case of China can help us to develop solutions for improved international compliance in the future. Providing an improved understanding of the implementation of international regimes, alongside an in-depth study of China's political system, policy-making and compliance, this book will be of great interest to students and scholars of Chinese studies, international relations, public policy, and international law and environmental studies. It will also be useful for policy makers working in the fields of environmental regulation and fisheries management.

International Regimes in China

As China began its economic reforms in the late 1970s and made a transition from planned to a market economy, corporate governance of the banking sector became an increasingly pressing issue. Further, in the aftermath of the Asian Financial Crises in the late 1990s, Chinese authorities became acutely aware of the importance of corporate governance to ensure that their banking system would not suffer similar fates to those of other Asian countries. This book examines corporate governance in city commercial banks, which are the main source of loans to the dynamic small and medium enterprises that are crucial to the development of China's economy. By the end of 2008, there were 136 city commercial banks in China, 13 of which had foreign partners, and this book clearly demonstrates the positive effect of these foreign partnerships on corporate governance practices, in addition to financial performance. With evidence from extensive interviews with 10 city commercial banks in China, Michael Tan explores the different models of corporate governance, and in turn, asks which model is most suitable to China, how are Chinese authorities overcoming problems with corporate governance, and how do these problems compare with those in other transition economies? Whilst the primary focus of this study is on China's city commercial banks, there are lessons that apply much more broadly to the industry and it therefore will be invaluable to foreign banking institutions wishing to invest in China. This book will also be of great appeal to students and scholars of Chinese business and economics, corporate governance and banking.

Corporate Governance and Banking in China

Since the late 1970s, China's move towards neoliberalism has made it not only one of the world's fastest growing economies, but also one of the most polarised states. This economic, social and political transformation has led to the emergence of a new Chinese middle class, and understanding the

development and the role of this new social group is crucial to understanding contemporary Chinese society. Investigating the new politics of the middle class in China, this book addresses three major questions. First, how does the Chinese state deal with problems of national sovereignty and political representation to create the middle class both as a legitimate category of the people and as an ideal norm of citizenship? Second, how does the recognition of the middle class norm take place in the practice of everyday life? Finally, what kind of risks does the politics of the middle class generate not only for middle class subjects but also for the disenfranchised? In answering these questions, this book examines a set of practices, bodies of knowledge, measures, and institutions that aim to manage, govern, control, and orient the behaviours, gestures, and thoughts of Chinese citizens. This investigation contributes not only to the understanding of the Chinese middle class society but also to the scholarly debate over the relationship between governmental apparatuses, subjectification, and life-building. Drawing on ethnographic information, historical archives, and the media, this book will be of great interest to students and scholars working in the fields of Chinese studies, Chinese politics, ethnic studies and urban studies, as well as those interested in culture, society, class and welfare.

The Middle Class in Neoliberal China

China's economic reforms have brought the country both major international clout and widespread domestic prosperity. At the same time, the reforms have led to significant social upheaval, particularly manifest in labour relations. Each year, several thousand disputes break out over working conditions, many of them violent, and the Chinese state has responded with both legal and political strategies. This book investigates how Chinese governments have used law, and other forms of regulation, to govern working conditions and combat labour disputes. Starting from the early years of the Republican period, the book traces the evolution of the law of work in modern China right up to the reforms of the present day. It considers the structure of Chinese work law, drawing on both Chinese and Western scholarship to provide new insights into its unique features and assess where the law is innovative and where it is stagnant and unresponsive. The authors explore the various legal and extra-legal techniques successive Chinese governments have adopted to enforce work law and the responses of firms, workers and organizations to these practices.

Law and Fair Work in China

This book offers the first exploration into the development of social enterprises in the Greater China region, consisting of Hong Kong, Macau, Taiwan and Mainland China. By drawing on the research and experience of over a dozen scholars and practitioners from across the area, it offers a picture of how a strong State can play an important role as a catalyst in developing the social entrepreneurship sector, particularly by legitimizing it. It delves into the role and impact of institutions and policy on the development of social enterprises, and explains how micro and macro factors might interact in influencing social entrepreneurship. Structured in two parts – policy and cases – it reveals the historical development of the Social enterprises sector in the Chinese context and then illustrates this using cases studies. Providing an alternative view of social entrepreneurship by highlighting the importance of context in this new sector, the book questions whether or not social entrepreneurship is preferable to more conventional models of development. Sparking new interest and offering fresh insight into social entrepreneurship in the Greater China region, this book will be useful to students and scholars of Chinese Studies, Business Studies and Sociology.

Social Entrepreneurship in the Greater China Region

The decisions that shape the policy of weapons procurement are an important area of national security policy. This is all the more true for China, which during recent decades has vacillated between different sources and directions of military build-up. This book explores the politics of military procurement in China under the successive leaderships of Deng Xiaoping, Jiang Zemin and Hu Jintao. It shows how China's political and military leaders have sought to adjust military procurement policy to meet China's strategic objectives, to relate it to non-military needs, to strike a balance between the import of weapons and indigenous production, and to determine the connections between hardware and other components of military power. Exploring in detail five major shifts in the nation's military procurement, it traces the considerations and negotiations among China's civilian and military leaderships. By doing so, it offers both a conceptual framework and empirical grounds for evaluating the factors that shape China's military procurement directions, as well as their limitations, prospects, and operational implications. As the first book to study comprehensively and systematically the attributes shaping

China's military procurement, it will be of great interest to students and scholars of Chinese politics, Chinese history and military and strategic studies.

China's Military Procurement in the Reform Era

This book analyses public sector reform comprehensively in all parts of China's public sector – government bureaucracy, public service units and state-owned enterprises. It argues that reform of the public sector has become an issue of great concern to the Chinese leaders, who realize that efficient public administration is key to securing the regime's governing capacity and its future survival. The book shows how thinking about public sector reform has shifted in recent decades from a quantitative emphasis on 'small government', which involved the reduction in size of what was perceived as a bloated bureaucracy, to an emphasis on the quality of governance, which may result in an increase in public sector personnel. The book shows how, although Western ideas about public sector reform have had an impact, Chinese government continues to be best characterized as 'state capitalism', with the large state-owned enterprises continuing to play an important – and increasing – role in the economy and in business. However, state-owned enterprises no longer provide care for large numbers of people from the cradle to the grave – finding an alternative, efficient way of delivering basic welfare and health care is the big challenge facing China's public sector.

Globalization and Public Sector Reform in China

Hong Kong is a global city-state under the sovereignty of the People's Republic of China, and is home to around 250,000 Muslims practicing Islam. However existing studies of the Muslim-majority communities in Asia and the Northwest China largely ignore the Muslim community in Hong Kong. Islam and China's Hong Kong skillfully fills this gap, and investigates how ethnic and Chinese-speaking Muslims negotiate their identities and the increasing public attention to Islam in Hong Kong. Examining a range of issues and challenges facing Muslims in Hong Kong, this book focuses on the three different diasporic Muslim communities and reveals the city-state's triple Islamic heritage and distinctive Islamic culture. It begins with the transition from the colonial to the post-colonial era, and explores how this has impacted on the experiences of the Muslim diaspora, and the ways this shift has compelled the community to adapt to Chinese nationalism whilst forging greater links with the Gulf. Then with reference to the rise of new media and technology, the book examines the heightened presence of Islam in the Chinese public sphere, alongside the emergence of Chinese Islamic websites which have sought to balance transnational Muslim solidarity and sensitivity towards Chinese government's concern of external extremism. Finally, it concludes by investigating Hong Kong's growing awareness of the Muslim minorities' demands for Islamic religious education, and how this links with the city-state's aspiration to become the new gateway for Islamic finance. Indeed, Wai Yip Ho posits that Hong Kong is now shifting from its role as the broker that bridged East and West during the Cold War, to that of a new mediator between China and the Middle East. Drawing on extensive ethnographic research, this book thoughtfully charts a new area of inquiry, and as such will be welcomed by students and scholars of Chinese studies, Islamic studies, Asian studies and ethnicity studies.

Islam and China's Hong Kong

An upsurge in violence between Uyghur and Han in China's far western region of Xinjiang has gained increased media and academic attention in recent years as was evidenced in the July 2009 riots. Numbering over eight million, the Uyghur are China's fifth-largest minority nationality, and their mounting aspiration for obtaining more autonomy has contributed to the recent ethnic conflicts in the region. This book looks at those who are seeking to preserve the Uyghur identity, and support the secession of Xinjiang from China in order to create their own independent state by exploring the global operations and sister groups of the Uyghur diaspora umbrella organization, the World Uyghur Congress (WUC). It examines the networks of the WUC, the coalitions it has formed, the strategies the organization pursues to raise public awareness about Uyghur issues around the globe, and looks at the actors that have emerged as key players in the contemporary WUC network. Further, this book shows that the Uyghur lobby is not a unified movement, but that the local groups that it consists of are highly constrained by the broader domestic politics of their host countries, a fact which has a significant impact on the lobby's ability to realize its strategic and political ambitions. In turn, Yu-Wen Chen gauges the impact of the WUC on public opinion and policymakers in the world's democracies, and shows how since Uyghur organizations have been given legitimacy by liberal democracies and international governmental organizations, they can no longer be considered merely splintered members of a far-flung

diaspora locked in a one-sided struggle with Beijing. Indeed, Uyghur activists can and do use their hard-won legitimacy as legal migrants and asylum seekers to influence politics in their host countries. This unique and timely study reveals how an issue concerning a Chinese minority has been catapulted onto the wider global political stage, and as such, it will be of great interest to students and scholars working on Chinese politics, the Uyghur issue, and minority and ethnic politics, social movements, human rights, and international politics more broadly.

The Uyghur Lobby

This book provides first-hand, insiders' perspectives on urban issues in China, aiming to provide a theoretically informed and empirically rich discussion of the new social landscape of contemporary urban China. Focusing on, but not limiting its scope to southern China, this volume's rich ethnographic research and advanced survey-based quantitative analysis will appeal to students of urban issues in contemporary China, as well as the broader scholarly communities of area studies, urban studies, and urban sociology.

The Emergence of a New Urban China

This book explores how the labour and leisure lives of people in contemporary rural China have been structured and transformed, discussing the changing dynamics of power relations both between and within genders, and in local (village and family/household) and remote (the state and market) contexts. It combines perspectives from sociology, gender studies, social history and demography to investigate the changes and continuities in the lives of women and men in Lianhe, a rural village in central China, examining the period from 1926 to 2013 through the lens of labour and leisure. Employing methods from the field of ethnography, the research focuses on the life stories of three generations, including 57 women in Lianhe. The book develops a 'double comparison' analytical framework to compare the organisation of labour and leisure in the three respective generations, proceeding, on the one hand, diachronically along the historical time, that is, the pre-collective era, collective era and reform era, and synchronically along the women's life stages on the other. In so doing, the book links women's shifting role in changing family/household forms with broader socio-economic, political, demographic and cultural changes. Moreover, it employs a holistic perspective to reflect changing patterns in women's labour and leisure by disrupting the remunerated/unremunerated, home/labour, within/outside household and labour/leisure dichotomies, and exploring the interrelations between them. Based on this, the book then identifies the determinants of rural women's labour and leisure and reveals the women's experiences of their changing identities, particularly concerning their relationships with their parents (-in-law), sisters (-in-law), husbands and children. Particularly highlighting the interdependence and inequality among women, it also reveals their own perception of their identities and relationships, and their understanding of husband-wife fairness and gender equality. Lastly, it demonstrates that the prevalent androcentrism in the remote world does not match the increasing husband-wife fairness in the local world and argues that this mismatch has caused the complex and paradoxical experiences and subjectivities of these women. Given its scope, the book is of interest to scholars, students and researchers in the fields of sociology, anthropology, gender and development, as well as a general audience looking to explore contemporary rural China.

Transforming the Gendered Organisation of Labour and Leisure

This book presents exciting new research from a diverse group of China-based social scientists. Each chapter offers exciting new data and fresh insights on a broad variety of essential topics in contemporary urban politics and society.
