The project of developing a contextual theology for the Caribbean was first articulated in the early 1970s in Trinidad and Jamaica. In the years since, many evangelical churches and theologians in the Caribbean have been ambivalent about the validity of this project, assuming that an emphasis on context was somehow antithetical to the pure gospel. But the crisis of the times, along with a more mature hermeneutic, has led to a re-evaluation of this assumption. Here a group of evangelical Caribbean theologians enter the discussion, with substantive proposals for how the gospel addresses the Caribbean context. They are joined by other theologians from mainline Protestant and Catholic traditions in the Caribbean. The result is an ecumenical dialogue on the diverse ways in which orthodox Christian faith may provide both challenge and hope for the Caribbean context. Half the essays in this volume were originally presented at the Forum on Caribbean Theology held in 2010 at the Jamaica Theological Seminary; the rest were invited especially for this volume.

The Construction and Representation of Race and Ethnicity in the Caribbean and the World

From Catalonia to the Caribbean is a polyphonic collection of essays in dialogue with Jane S. Gerber's seminal contributions to Sephardic Studies. The essays present new sources and new perspectives that challenge our perceptions of the Sephardic experience from Medieval to Modern Times.

A Kairos Moment for Caribbean Theology

What does global biblical studies look like in the early decades of the twenty-first century, and what new directions may be discerned? Profound shifts have taken place over the last few decades as voices from the majority of the globe have begun and continue to reshape and relativize biblical studies. With contributors from Africa, Asia, the Pacific, Europe, Latin America, the Caribbean, and North America, this volume is a truly global work, offering surveys and assessments of the current situation and suggestions for the future of biblical criticism in all corners of the world. The contributors are Yong-Sung Ahn, George Aichele, Pablo R. Andiñach, Roland Boer, Fiona Black, Philip Chia, Nancy Cardoso Pereira, Jione Havea, Israel Kamudzandu, Milena Kirova, Tat-siong Benny Liew, Monica Melancthon, Judith McKinlay, Sarojini Nadar, Jorge Pixley, Jeremy Punt, Elisabeth Schüssler Fiorenza, Fernando F. Segovia, Hanna Stenström, Vincent Wimbush, and Gosnell Yorke.

The Politics of Change

This collection is a critical reflection of the evolution of Caribbean countries since the demise of the West Indies Federation in 1962. At this historical juncture, some territories opted for independence while others remained dependent territories. The volume examines Caribbean societies in comparative and general ways, covering aspects of their ongoing development and challenges. It covers such areas as Caribbean integration, the state of human capital and social policy in the region, the education sector, Caribbean economic sustainability, and, significantly, the physical environment of the Caribbean. A central question has always been: should these territories have gone independent or stayed under some British tutelage? The book addresses this question, illustrating that these island states have made considerable progress, especially in the maintenance and deepening of democratic practices.

From Catalonia to the Caribbean: The Sephardic Orbit from Medieval to Modern Times

This book covers significant new ground, examining the impact and imprint of new leading technology on a range of popular expressions. This technology includes the internet, the computer, the cell phone, television, and radio, among others. Best argues that Caribbean culture has gone wireless, virtual, and simulated in the age of the machines.

The Future of the Biblical Past

An outstanding compilation of over seventy primary and secondary texts of writing from the Caribbean. The editors demonstrate that these singular voices have emerged out of a wealth of literary tradition and not a cultural void.

The Caribbean in a Changing World

The Bible is of central importance within Caribbean life but is rarely used as an agent for social change. Caribbean biblical hermeneutics focus more on the meaning of biblical texts for today and less on the context in which the texts themselves were written. 'Biblical Resistance Hermeneutics within a Caribbean Context' offers a biblical hermeneutic that acknowledges the importance of the

socio-ideological interests, theological agendas, and social practices that produced the biblical texts, as well as the socio-cultural context of the contemporary reader. The book examines the social context of post-independence Caribbean and outlines the difficulties of biblical interpretation within Christian communities that descend from a history of slavery. Current hermeneutical practices in the Caribbean are critiqued and a biblical resistant reading offered that enables the Bible to be used as a cultural weapon of resistance.

The Politics of Caribbean Cyberculture

Religious Education for Caribbean Schools is a well established series of three books providing an interdenominational course in Religious Education for students at junior and lower secondary school level.

The Routledge Reader in Caribbean Literature

Peters use an island setting as a motif and the awareness of a feminine soul as stepping stones for exploring the path to self-discovery and personal enlightenment.

Biblical Resistance Hermeneutics within a Caribbean Context

Derek Walcott's eighth collection of poems, *The Arkansas Testament*, is divided into two parts--"Here," verse evoking the poet's native Caribbean, and "Elsewhere." It opens with six poems in quatrains whose memorable, compact lines further Walcott's continuous effort to crystallize images of the Caribbean landscape and people. For several years, Derek Walcott has lived mainly in the United States. "The Arkansas Testament," one of the book's long poems, is a powerful confrontation of changing allegiances. The poem's crisis is the taking on of an extra history, one that challenges unquestioning devotion. -- Amazon.com.

As a quest to answer the fundamental questions of our existence, the author discusses the origin of terrorism. Through notes and research accumulated during his life, he speculates how secret and secret organizations are "fertilizer" for terrorism. Based on readings from history, religion, cults, and other topics, he interprets that all organizations are governed by secrets. His insatiable search for knowledge through diligent analyses of scripture looks like a grail quest. Moreover, he investigates allied sciences so as to parse the world's secrets. After describing terrorism as it exist today, the author explains that terrorism is often a secret force. It is feared because it is hardly seen but is always felt. The aim of terrorism is to secure an opposition to a political or religious system. The world is in turmoil as it balances good and bad, terrorism/violence, doubts and belief, secrets and prophesies. There is no other choice- According to Anthony Gajadhar the Caribbean Novice- but to urge the world to "continue where the ancients left off" in order to overcome terrorism. As a modern day Diogenes, Gajadhar is searching humanity holding the guardian light of the masters.

The Arkansas Testament

Pentecostalism has become the fastest growing Christian movement, particularly outside Europe, and Allan Heaton Anderson is one of the foremost scholars of this phenomenon. His innovative interpretation of Pentecostalism focuses on the serious contribution made by both western and Majority World participants in its development. In this second edition of his leading introductory course book, Anderson presents an updated global history of the movement, which addresses significant events and changes in recent years, and surveys important theoretical issues such as gender and society, as well as politics and economics. The book also offers a comprehensive explanation of the significance of Charismatic Christianity throughout the world, plus its effect upon the globalisation of religion and its

transformation in the present century. This new edition will be an important resource for those studying Pentecostalism, Charismatic Christianity, theology and sociology of religion.

New Steps in Religious Education for the Caribbean

Crucial Issues in Caribbean Religions concentrates on the effects of intersections in the Caribbean of major world religions such as Christianity (both Catholicism and Protestantism), Judaism, Islam, and Hinduism, with indigenous religions such as Caribs and Arawaks, and African-derived religions such as Lucumi (Yoruba/Santeria/Regla de Ocha), Regla de Palo, Vodun, Obeah, Rastafari, Orisa, or Shango in Trinidad. Closely examined are the social and economic problems and issues of exile, slavery, oppression, racism, sexism, ethnocentrism, cultural dominance, religious diversity, syncretism, popular religiosity, religious and spiritual imperialism, continuity and change, survival techniques in the face of attempts at eradication by religious powers, interreligious dialogue, and the quest for universal spirituality.

Notes From A Caribbean Novice On Philosophy And Allied Sciences

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. The first comprehensive discussion of the major Caribbean thinkers who came to Britain. Written in an accessible, lively style, with a range of wonderful and distinguished authors. Key book for thinking about the future of multicultural Britain; study thus far has concentrated on Caribbean literature and how authors 'write back' to Britain – this book is the first to consider how they 'think back' to Britain. A book of the moment - nothing comparable on the Caribbean influence on Britain.. Discusses the influence, amongst others, of C. L. R. James, Una Marson, George Lamming, Jean Rhys, Claude McKay and V. S. Naipaul.

An Introduction to Pentecostalism

Notes from the Last Testament, by veteran reporter Michael Deibert, is a riveting narrative account of the events leading up to and including the overthrow of Haitian President Jean-Bertrand Aristide. A fearless correspondent and a meticulous researcher, Deibert traces the rupturing of the social-democratic coalition that originally brought Aristide to power and that had been the fruit of years of opposition to the dictatorships and military juntas. From chaotic scenes of frenzied mayhem on the streets of the bidonvilles of Port-au-Prince with their armed gangs and burning intersections to heated debates in the halls of power, these dramatic events throw into stark relief the obstacles facing the world's nascent democracies, the trend of first world military intervention in third world affairs, and the dual legacies of slavery and colonialism. In a remarkable and deeply humane synthesis of on-the-ground perspectives and exhaustive research, Deibert sets vivid personal testimonies alongside an analysis of the country's rich history that reaches back to Haiti's first days as a colony, to the time of the rebellion led by the former slave Toussaint Louverture, and extends to the present, ultimately exploring how Aristide, once a beacon of populism and democratic aspirations, came to embody brutality and misrule in the tradition of his predecessors. Along the way, Deibert introduces us to the real heroes of the Haitian people's struggle for a just and independent society free from violence and corruption.

Crucial Issues in Caribbean Religions

The Encyclopedia of Caribbean Religions is the definitive reference for Caribbean religious phenomena from a Caribbean perspective. Generously illustrated, this landmark project combines the breadth of a comparative approach to religion with the depth of understanding of Caribbean spirituality as an ever-changing and varied historical phenomenon. Organized alphabetically, entries examine how Caribbean religious experiences have been shaped by and have responded to the processes of colonialism and the challenges of the postcolonial world. Systematically organized by theme and area, the encyclopedia considers religious traditions such as Vodou, Rastafari, Sunni Islam, Sanatan Dharma, Judaism, and the Roman Catholic and Seventh-day Adventist churches. Detailed subentries present topics such as religious rituals, beliefs, practices, specific historical developments, geographical differences, and gender roles within major traditions. Also included are entries that address the religious dimensions of geographical territories that make up the Caribbean. Representing the culmination of more than a decade of work by the associates of the Caribbean Religions Project, The Encyclopedia of Caribbean Religions will foster a greater understanding of the role of religion in Caribbean life and society, in the Caribbean diaspora, and in wider national and transnational spaces.

West Indian intellectuals in Britain

Now thoroughly updated and revised, this new edition of the highly acclaimed dictionary provides an authoritative and accessible guide to modern ideas in the broad interdisciplinary fields of cultural and critical theory. Updated to feature over 40 new entries including pieces on Alain Badiou, Ecocriticism, Comparative Racialization, Ordinary Language Philosophy and Criticism, and Graphic Narrative. Includes reflective, broad-ranging articles from leading theorists including Julia Kristeva, Stanley Cavell, and Simon Critchley. Features a fully updated bibliography. Wide-ranging content makes this an invaluable dictionary for students of a diverse range of disciplines.

Notes From the Last Testament

This timely collection explores critical issues facing theological education in the West Indies, with special attention to the current status and content of Caribbean theology. Contributors represent a number of mainstream Protestant traditions (Anglican, Moravian, Baptist, Methodist, and Presbyterian) and approach their topics from a variety of specializations (Biblical Studies, Church History, Social Sciences, Pastoral Care, and Christian Education). Howard Gregory, who is the president of the United Theological College of the West Indies, has done an exemplary job of representing the diversity of theological opinion at the conference as well as highlighting some common concerns of participants. All participants, Gregory points out, acknowledged a pressing need to address practical aspects of pastoral care and to identify priorities specific to the Caribbean region. In addition, all participants underscored the need for renewed commitment to the task of developing and teaching an "authentic" Caribbean theology, although there is considerable disagreement as to exactly what an "authentic" Caribbean theology should be. --

The Encyclopedia of Caribbean Religions

Caribbean Lutherans tells the story of the Lutheran church in Puerto Rico from a Caribbean perspective. Rodríguez intersperses archival research with cogent commentary and personal accounts, highlighting the power and agency of Puerto Rican and West Indian Lutherans amid the multifaceted legacy of Euro-American missionary efforts on the island. Readers may not be surprised to learn that the first Lutheran missionary in Puerto Rico was a Swedish American Lutheran; they may not be aware, however, that his welcome and success on the island were dependent on the hospitality of an Afro-Caribbean tailor from Jamaica. A winding journey of interactions among American Lutheran synods and a growing Puerto Rican church generated partnerships, tensions, and possibilities that continue to the present. Puerto Rico and neighboring islands joined the United Lutheran Church in America as the Caribbean Synod in 1952. Today, they remain part of the current Evangelical Lutheran Church in America while many other Protestant denominations on the island have formed Puerto Rican "national" churches. Rodríguez explores the continuing tensions inherent in this legacy, bringing both academic expertise and personal experience to this first comprehensive account of the Lutheran church in Puerto Rico.

A Dictionary of Cultural and Critical Theory

As Caribbean communities become more international, clinicians and scholars must develop new paradigms for understanding treatment preferences and perceptions of illness. Despite evidence supporting the need for culturally appropriate care and the integration of traditional healing practices into conventional health and mental health care systems, it is unclear how such integration would function since little is known about the therapeutic interventions of Caribbean healing traditions. *Caribbean Healing Traditions: Implications for Health and Mental Health* fills this gap. Drawing on the knowledge of prominent clinicians, scholars, and researchers of the Caribbean and the diaspora, these healing traditions are explored in the context of health and mental health for the first time, making *Caribbean Healing Traditions* an invaluable resource for students, researchers, faculty, and practitioners in the fields of nursing, counseling, psychotherapy, psychiatry, social work, youth and community development, and medicine.

Caribbean Theology

Volume 5 provides an account and interpretation of the historical development of the region from around 1930 to the end of the twentieth century. Its wide ranging study of the economic, political, religious, social and cultural history of this period brings the series to the authorial present. Highlights include

the 'turbulent thirties;' decolonization; the 'turn to the left' made in the 1970s by anglophone Caribbean countries; the Castro Revolution; and changes in social and demographic structures, including ethnicity and race consciousness and the role and status of women.

Caribbean Lutherans

New Testament Theology (NTT) is a scholarly, theological and cultural book to help the Caribbean church which continues to struggle with the question of identity, culture and the relevance of the church. The book traces the roots of a Caribbean Theology to the formulation of theological objections against slavery by enslaved Africans. The authors make the case that theology must be connected to the culture of a people; otherwise, theology becomes meaningless. The book surveys what the authors believe to be the main theological constructs of all the NT corpora, and provides a unique NTT synthesis in the form of a commentary. It is designed primarily for tertiary level Bible students, and consciously resists the call of those who say that a New Testament Theology should confine itself to a descriptive agenda.

Caribbean Healing Traditions

The Southern Caribbean was the last frontier in the Atlantic world and the most contested region in the Caribbean during the Age of Revolution. As well as illuminating this little-understood region, the book seeks to complicate our understanding of the Caribbean, the role of 'free people of colour' and the nature of slavery.

General History of the Caribbean UNESCO Volume 5

A comprehensive introduction to the syncretic religions developed in the Caribbean region Creolization—the coming together of diverse beliefs and practices to form new beliefs and practices—is one of the most significant phenomena in Caribbean religious history. Brought together in the crucible of the sugar plantation, Caribbean peoples drew on the variants of Christianity brought by European colonizers, as well as on African religious and healing traditions and the remnants of Amerindian practices, to fashion new systems of belief. Creole Religions of the Caribbean offers a comprehensive introduction to the syncretic religions that have developed in the region. From Vodou, Santería, Regla de Palo, the Abakuá Secret Society, and Obeah to Quimbois and Espiritismo, the volume traces the historical-cultural origins of the major Creole religions, as well as the newer traditions such as Pocomania and Rastafarianism. This second edition updates the scholarship on the religions themselves and also expands the regional considerations of the Diaspora to the U. S. Latino community who are influenced by Creole spiritual practices. Fernández Olmos and Paravisini-Gebert also take into account the increased significance of material culture—art, music, literature—and healing practices influenced by Creole religions.

New Testament Theology

The Jewish diaspora of the Caribbean constantly redefined itself under changing circumstances. This volume looks at many aspects of this complex past and suggests different ways to understand it: as a Jewish diaspora dispersed under different European colonial empires; as a Jewish body joined together by a set of shared Jewish traditions and historical memories; and as one component in a web of relationships that characterized the Atlantic world.

The Last Caribbean Frontier, 1795-1815

Afro-Caribbean Women's Writing and Early American Literature is both pedagogical and critical. The text begins by re-evaluating the poetry of Wheatley for its political commentary, demonstrates how Hurston bridges several literary genres and geographies, and introduces Black women writers of the Caribbean to some American audiences. It sheds light on lesser-discussed Black women playwrights of the Harlem Renaissance and re-evaluates the turn-of-the century concept, Noble Womanhood in light of the Cult of Domesticity.

New Steps in Religious Education for the Caribbean is a new edition of the popular and highly regarded course, now revised to meet the needs of schools in the Caribbean. Presented in clear double-page spreads, the three books in the series cover the major world and Caribbean faiths and actively encourage pupils to learn about religions and consider the role these play in society today. This edition can be used by all teachers of Religious Education in lower secondary schools and can be used with complete confidence by those looking for coverage of the new ROSE syllabus.

Comfa Religion and Creole Language in a Caribbean Community

These essays by Brian Meeks, a noted public intellectual in the Caribbean, reflect on Caribbean politics, particularly radical politics and ideologies in the postcolonial era. But his essays also explain the peculiarities of the contemporary neo-liberal period while searching for pathways beyond the current plight. In the first chapters, titled "Theoretical Forays," Meeks makes a conscious attempt to engage with contemporary Caribbean political thought at a moment of flux and search for a relevant theoretical language and style to both explicate the Caribbean's recent past and confront the difficult conditions of the early twenty-first century. The next part, "Caribbean Questions," both retrospective and biographical, retraces the author's own engagement with the University of the West Indies (UWI), the short-lived but influential Caribbean Black Power movement, the work of seminal Trinidadian thinker and activist Lloyd Best, Cuba's relationship with Jamaica, and the crisis and collapse of the Grenadian Revolution. As evident in its title, "Jamaican Journeys," the concluding section excerpts and extracts from a longer, more sustained engagement with Jamaican politics and society. Much of Meeks' argument builds around the notion that Jamaica faces a crucial moment, as the author seeks to chart and explain its convoluted political path and dismal economic performance over the past three decades. Meeks remains surprisingly optimistic as he suggests that despite the emptying of sovereignty in the increasingly globalized world, windows to enhanced human development might open through policies of greater democracy and popular inclusion.

New Steps in Religious Education for the Caribbean Book 3

The two volumes of Englishes around the World present high-quality original research papers written in honour of Manfred Görlach, founder and editor of the journal English World-Wide and the book series Varieties of English Around the World. The papers thematically focus on the field that Manfred Görlach has helped to build and shape. Volume 2 of Englishes Around the World presents studies of so-called "New Englishes", post-colonial varieties as spoken predominantly in countries of the former British Empire. There are five contributions on the Caribbean (covering Jamaica, Guyana, and Trinidad), five articles on Africa (South Africa, East Africa, and Nigeria), six studies of English in Asian countries (Japan, the Philippines, India, Singapore, Malaysia, and Papua New Guinea), and six papers on Australia and New Zealand. Topics covered range from sociohistorical causes and processes, the nativization of English in different countries, or the expression of individual identities by means of the English language through structural descriptions to sociolinguistic, psycholinguistic, lexicographic, pragmatic, stylistic, and other matters. The articles in the respective sections are written

by D.R. Craig, L.M. Haynes, P.L. Patrick, K. Shields-Brodber, and L. Winer; A Banjo, V. de Klerk, R. Mesthrie, J. Schmied, and P. Silva; R.W. Bailey, R. Begum and T. Kandiah, A. Gonzalez, R.R. Mehrotra, P. Mühlhäusler, and M. Newbrook; L. Bauer, S. Butler, M. Clyne, P. Peters and A. Delbridge, G. Tulloch, and G.W. Turner.

Critical Interventions in Caribbean Politics and Theory

Rodney claimed developing countries were heirs to uneven development and ethnic disequilibrium and was disturbed by the inability of intellectuals to share a common cause with the masses. He sought to lift the Caribbean people from the victimization of history and the poverty of material circumstance.

General History of the Caribbean

This book explores the textured process of rewriting and revising theatrical works in the Spanish-speaking Caribbean as both a material and metaphorical practice. Deftly tracing these themes through community theater groups, ancient Greek theater, religious traditions, and national historical events, Katherine Ford weaves script, performance and final product together with an eye to the social significance of revision. Ultimately, to rewrite and revise is to re-envision and re-imagine stage practices in the twentieth-century Hispanic Caribbean.
